*Chemical Dynamics  
with Ion Imaging*

March 30, 2004; 12:00 – 1:00 p.m.

---

## Abstract

We will present highlights of our recent work applying velocity map ion imaging to a range of problems in reactive scattering and photodissociation. We will emphasize the chemical questions we can address with these methods and motivate the work by placing the field of Chemical Dynamics in a broader context.

Grier Room, MIT Bldg 34-401  
Refreshments will be served
