FOREWORD

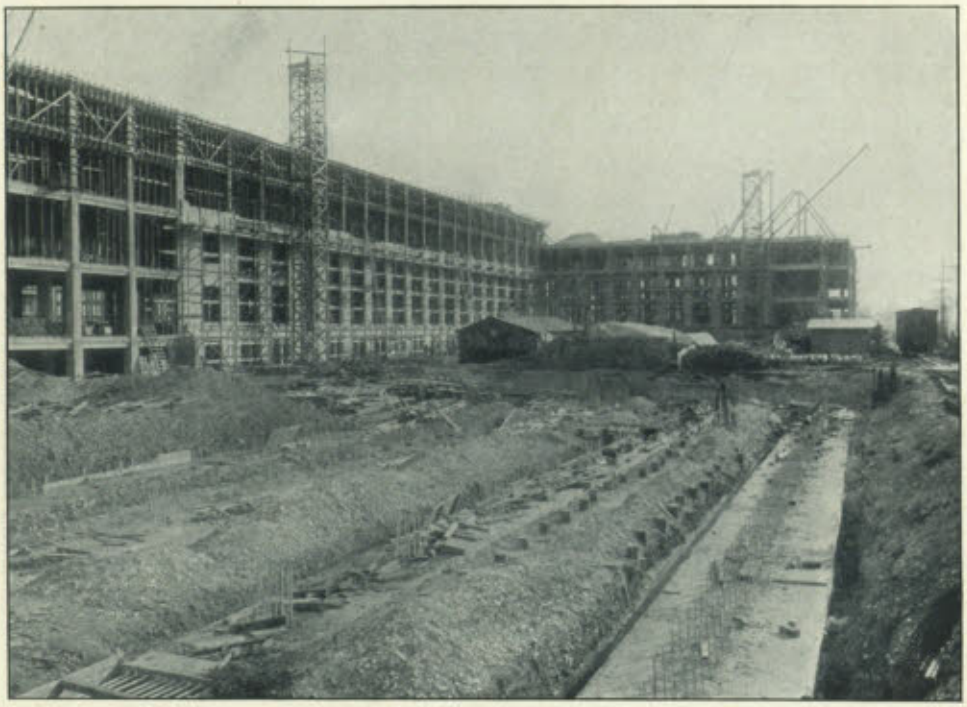

One of the greatest Privileges of Life is the Opportunity to Undertake and to Complete a Task in conjunction with a small; united Band of Classmates. Then are Cemented Friendships Permanent and Unvarying. It is with deep Gratitude for the Enjoyment of such a Privilege that we offer this Volume; in the Hope that its Pages; when Softening Time has glossed their Errors; may bind even more firmly the Fellowships unconsciously founded in mutual Interests & Labor.

Great Institutions have their fundamental conception in ... those basic Principles of Progress and Development upon which are built Civilizations and Nations, and neither ... time, nor clime, nor seas can separate those Institutions, whether Civil, Political, or Educational, that are ... based upon the same Principles and striving for the same Ends.

It is Our Hope that the Peace of ... this Hundred Years may continue ... and that We, as kindred Institutions may not only Youths of Kindred ... Spirit develop, but that they work ... together toward the Building of a ... New Civilization that knows naught but Peace and the Ways of Peace. ...

KEACH
SUMMER
CAMP

Monday, July 26. "The ship was cheered, the harbor cleared,
Merrily did we drop"

down to the North Station, the first stage of our journey to Summer Camp, 1915. Sleep was unthought of, and every one engaged in various forms of action, from cards to reflection. The expostulation-provoking gyrations of Lanky Tom Hannah, and the pure whiteness of Checa's flannel suit gave food for much speculation.

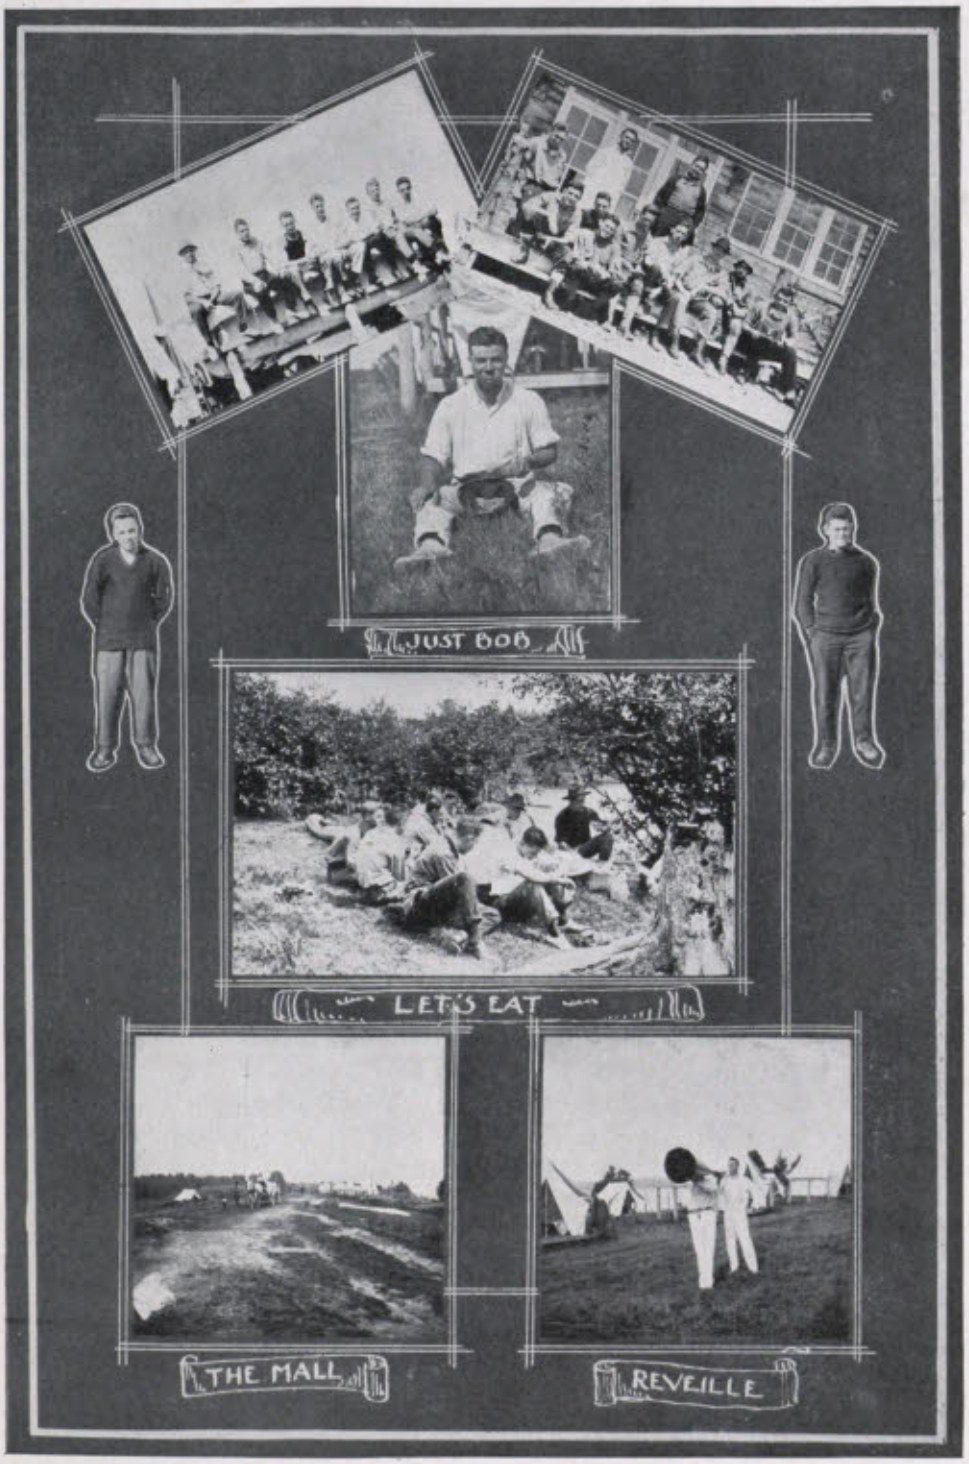

Tuesday, July 27. It took three sections to carry us and our paraphernalia from Bangor to Machias, a journey which was marked chiefly by rain and inactivity. At 9.55, we piled into a decrepit stage coach, and accomplished a two-mile crawl to the lake, cheered by the quips of Professor Russell, who was perched on the extreme apex of our luggage-covered equipage. Dinner came in mighty handy when we reached the camp at 1.00 P.M.

We spent the afternoon in making our tents habitable or in watching how our tentmates did it. In the evening we listened to the Professors' words of advice and sought our beds early.

Wednesday, July 28. Started in with Professor Robbins' party to make a transit survey around by the shore, being successfully and pleasantly diverted from time to time to lie in the shade and eat blueberries. The afternoon was given over to a compass survey of a neighboring farm, and was marked most pointedly in my memory by the thorns which attacked the most vulnerable part of me when I inadvertently sat down on a bunch of wild flowers. Camp life certainly does teach circumspection.

Seat assignments were made at supper, and I was fortunate in landing at the same table with that energetic philosopher, Pen Brooks.

Thursday, July 29. More rain. The tents are not the most agreeable places to live in, I find, especially when they get as wet inside as out. We had the camp elections in the evening, and Atkinson was elected chairman; Angas, librarian; Medding, secretary; Bell, manager of the baseball team; and others to less important, though equally arduous, offices.

Friday, July 30. Jimmy Doon was very much struck this morning by an egg, erroneously believed to be hard boiled, which Dud Bell attempted to open on his head. We had a long walk, technically called a Railroad Reconnaissance, in the morning, and yet we had work to do in the afternoon. Not my idea of something to do.

Saturday, July 31. A large crowd of us went to the village in the afternoon, and in the evening attended a dance given in Machias. It was especially irritating to some that Althouse disappeared with the best looking girl. The Dean was on hand when we returned.

Sunday. Truly a day of rest. Some of the week-end camping outfits blew in tonight and they were a sorry and hungry looking lot. Bill Eddy has been nicknamed "Joe Knowles."

Monday. Stream gaging plus rain equals computations plus mental misery. The wirelesses which Gardner and Morse have set up are working in fine shape.

Tuesday. Steve Markham tried to cut off his foot today but was prevented from doing so by the heavy boots he wore. Bill Eddy is rolling cigarettes, but finds some difficulty in finding any one to smoke them.

Wednesday. A baseball game, the first of the camp season, was played today.

Thursday. A self-appointed vigilance committee began work last night, folding Appleton up in his bed by pulling out the legs and removing the bedclothes. "Appy" has been less forceful in his language since.

Friday. "Hatless" entertained callers.

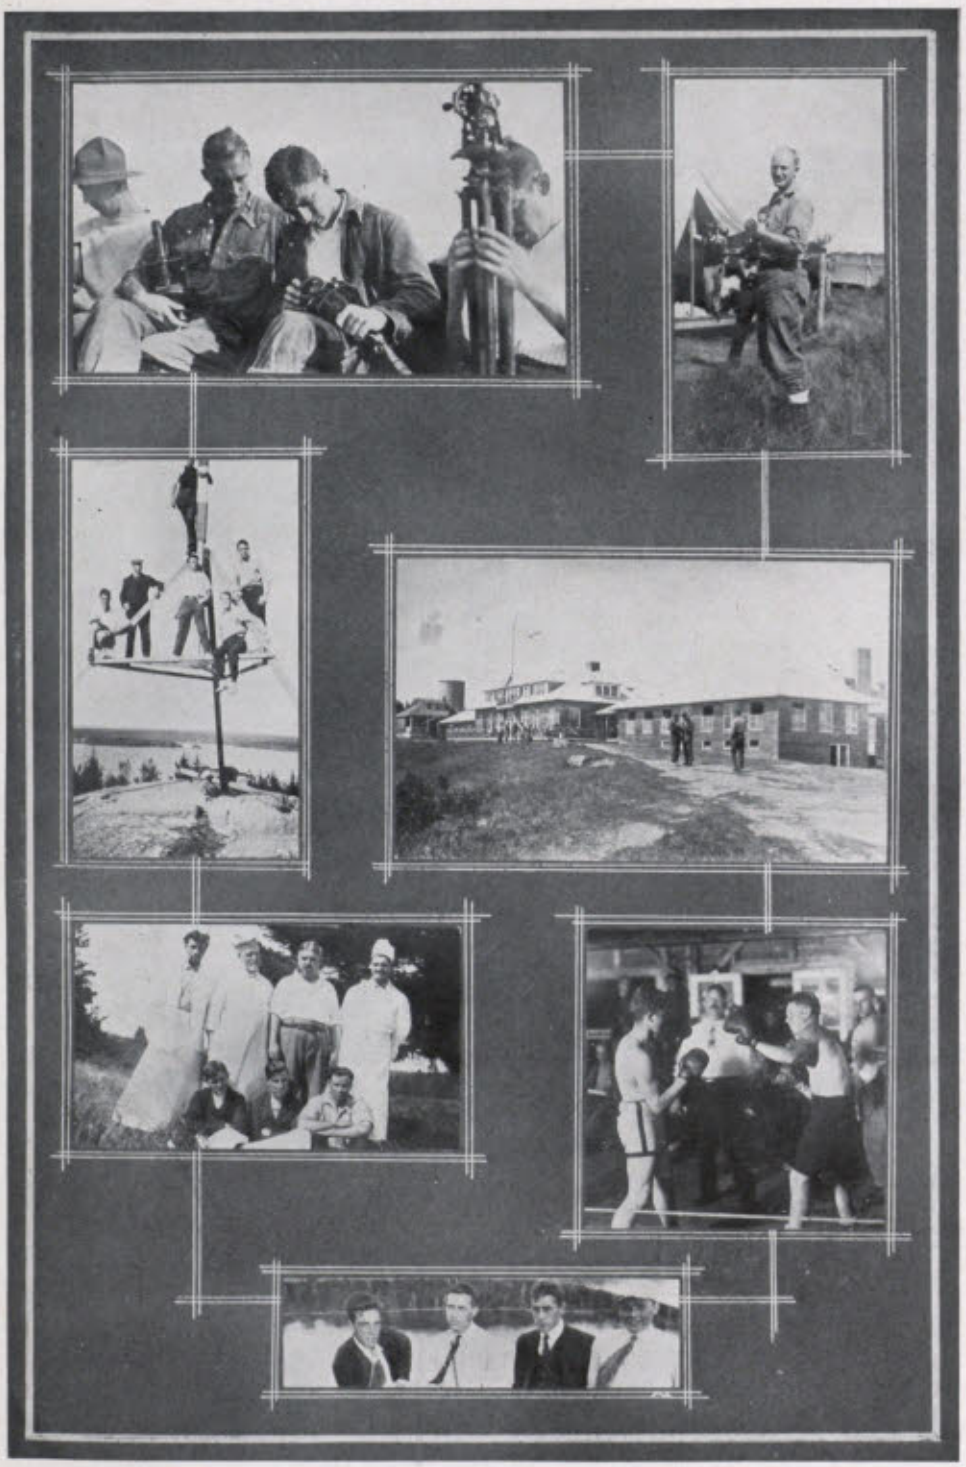

Saturday. More camping parties start in quest of the fish of distant waters. Another big dance was held in Machias in the evening and some of the fellows left, swearing.

Sunday. About seven of the fellows left early this morning to go on a trip to Machiasport and then take a boat and go fishing. They brought back about a hundred pounds of cod, and gave it to "Pop." We will probably have to eat it.

Thursday. We threw Hatless and Hartman in the lake the other day to celebrate a birthday. I've forgotten whose it was, but they nearly drowned Hartman, and some of the fellows had to go in after him.

Saturday. Yea, Bo! We imported a baseball team and five auto loads of damsels from Machias this afternoon, and cleaned up the former 9 to 1. Althouse again carried off the honors with the latter, ably seconded by Dud and Checa. For the first time since he's been here, Ed. Atkinson got mad: because he struck out with the harem looking on.

Sunday. Jimmy Doon went to camp meeting across the lake, and swam after his boat, which had left the dock via his beloved campmates.

Wednesday. Camp went up in the air this afternoon over the badger fight, which had been talked about camp for some days. It appeared that some of the men who were working on the road near camp had captured this wild animal alive and that the Dean had consented to having it brought to the camp. Accordingly, this afternoon, a bunch of us discovered Dick Whitney standing on a big box and shouting that the badger had come. A long rope was attached to the neck of the animal and led out from underneath the box. The idea was to have some one pull the rope, thus freeing the badger from the box and allowing the fellows to get a good look. The chief difficulty appeared when no one offered to pull the rope. After some discussion, Frank Peacock offered to do the deed, Whitney urging that the fellows arm themselves with rocks and stones, in case the badger broke loose. When the time came to have Frank pull the rope there wasn't a man within a hundred feet of the box, and Russell had appeared with his revolver. When Frank pulled forth the badger the expressions on the fellows' faces were wonderful to see, for the badger had come forth, *in the form of one of Steward Colton's favorite kitchen utensils.*

Saturday. Took the sandpaper off my face and otherwise prepared for the dance, which, with the show, is one of the big social affairs of camp. We had a corking crowd, and the dancing was surely remarkable. Checa and Doris did some duet work for which the Dean, after an elaborate speech, presented them with a box containing Ed. Atkinson's drinking cup.

Full skip of one week to the next Saturday. This afternoon we canvassed Machias on a publicity expedition, armed with tin cans and whistles. This was the red-letter day of the show, which went through without a hitch shortly after supper. About twenty of the fellows took part, and had a lot of fun out of it. Bob Gay and Tom Hannah were particularly funny as end men, and their songs seemed to please the crowd. The gate receipts must have been considerable, for there was a big crowd there, some of the people coming all the way from Calais. After the show some of the fellows went home and the rest danced until midnight.

Wednesday, September 15. Rose early and plugged on Stream Gaging, which came at nine o'clock, then went to it and passed, I believe.

Thursday. The Beginning of the End. This afternoon the tents began to be struck, and every one started packing. It is hard to leave: our settlement has become almost home to us now, in spite of the fact that the prospect of getting back to civilization seems good. This evening we all sat out on the great front piazza of Bemis Hall, listened to the Dean and Professor Russell, and sang our farewell songs. The next proceeding was the smoking of the pipe of peace around the fire of birch logs in the fireplace, with the Dean as "great Sachem." It was a time we will never forget — one that gets you down deep, and almost makes you pity the fellows who don't enjoy Summer Camp.

WHO IN 1917 IS?

MOST POPULAR?

"Pen" Brooks was so far ahead of any one else that there is no use in mentioning the few others that had a chance.

MOST LIKELY TO SUCCEED?

H(uman) P(rodigy) Eddy has started his professional engagements already, but Louie P(recocious) Sanborn is also considered a logical candidate.

LEAST LIKELY TO SUCCEED?

H(orribly) M(altreated) { Baxter / Brayton } tie for first place. There were no other competitors.

THE HANDSOMEST?

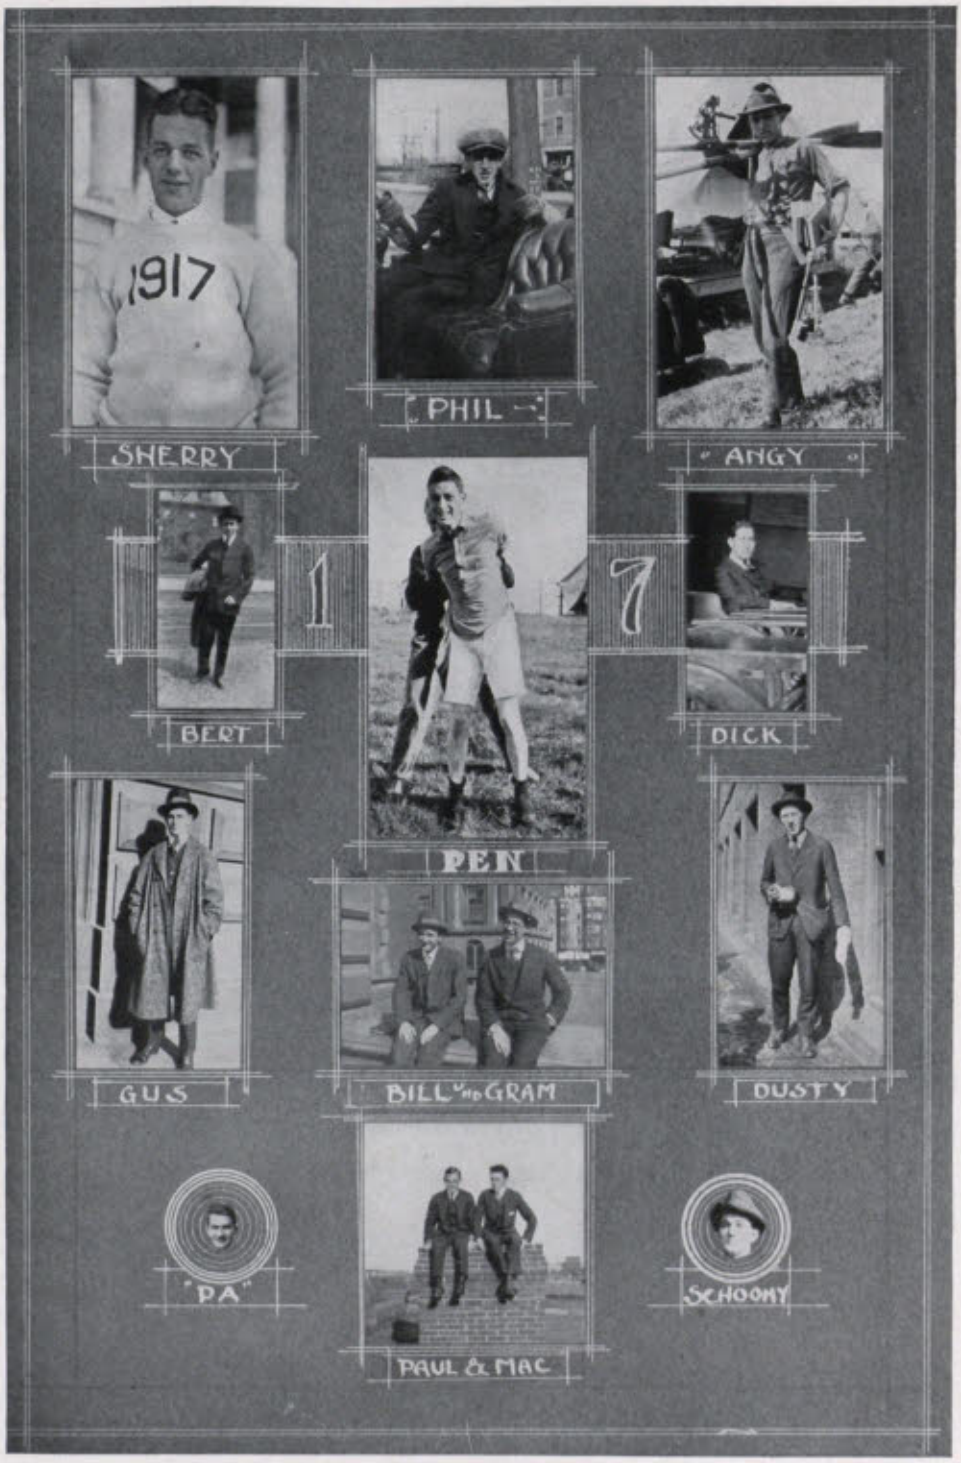

"Dutch" du Pont surely has a great following. Special information, however, points to the fact that the girls fall in bunches for "Walt" Harrington's pink cheeks.

THE GREATEST SMOKER?

"Longboat" Wyman and "Cig" McLaughlin, according to the worst possible sources, have been teaming with "Eddie" Pung to get a motorcycle on "fat" and Velvet coupons.

THE BIGGEST GRIND?

R(eal) B(right) Brown wins this honor, though A(wfully) E(nergetic) Keating did his thesis one Saturday evening while he was waiting for dessert. Works qualifies nominally.

WHO IN 1917 IS?

BEST NATURED?

Schoony doesn't know any better, "Walt" Harrington can't help himself, and "Stan" Krug just naturally is.

THE GROUCHIEST?

C(rusty) H(aggling) M(orose) Roberts is unanimously elected (by *The Tech*) largely because of the convenience of his initials.

BEST DRESSED?

Although A(ll) D(olled-up) Baker polled the most votes, V(ermin Castle) Checa is also in the competition. It is said that if his trousers weren't pressed he wouldn't wear any.

THE GREATEST TALKER?

Dudley E. Bell having the slightest possible aversion to unintermittent oscillation of his maxilla, is unanimously elevated to the pedestal of confirmed garrulity.

THE BEST ATHLETE?

F(ull of) P(ep) O'Hara and J(uvenile) W(onder) Doon ran a dead heat. Giles and Cochrane were in close competition for second honors.

THE CLASS GOAT?

H(arassed) M(eandering) Baxter apparently has all the goatly propensities, and is therefore admitted to this ancient and honorable organization.

THE WORST ATHLETE?

A(wful) K(ut-up) Althouse seems to be the choice of the class for this job, although "Ken" Bell admits that the hardest exercise he takes is wrestling with Thermo problems.

WHO IN 1917 IS?

THE NERVIEST?

L(engthy) E(longated) Wyman had a job with a real estate firm last summer. If they had a house that they claimed was five minutes' walk from the carline, Louis proved it to the customers. Think of the chances he took. That's real nerve.

THE LAZIEST?

H(onestly) A(mbitious) Knapp is elected. It is said that the hardest work he ever did was to close the door for his freshman English section.

THE MOST VERSATILE?

"Bob" Gay and Goldsmith defy description in this department. Even the myriad-minded bard isn't in their class.

THE MOST LADYLIKE?

J(edneski) P(avlowa) Gardner is elected by the class, which thus pays tribute to her ability as a dancing chorus maiden; but who ever heard of a ladylike chorus girl?

THE GREATEST BULLER?

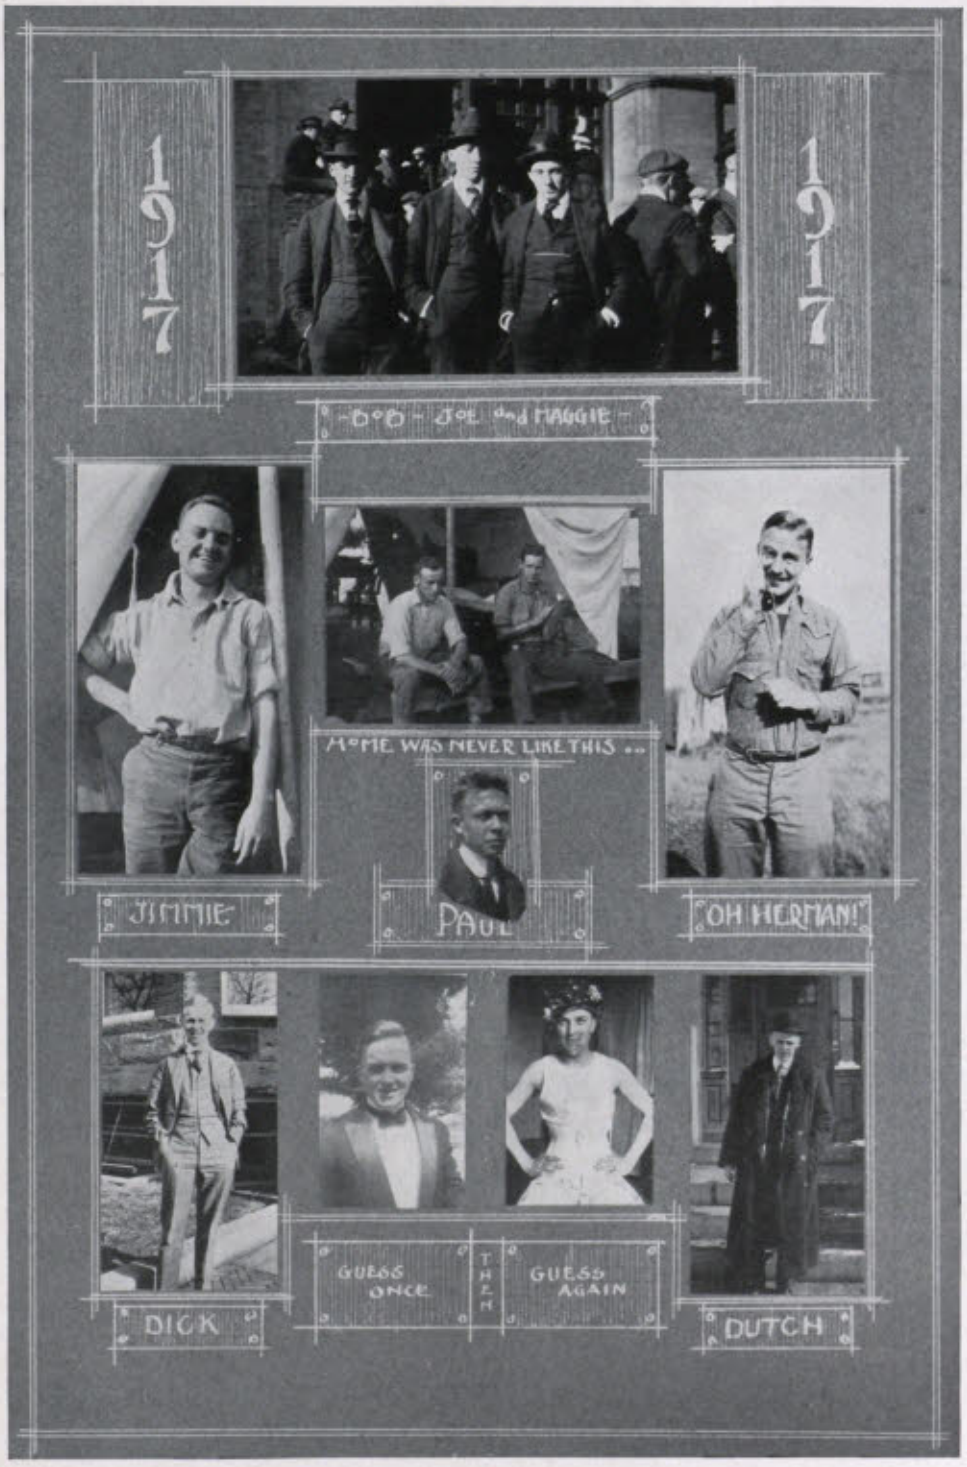

H(orrible) E(xample) Lobdell, the source of all information, really won out by a chin; but we promised him to hand this plum to his mute associate, B(ull) F(linger) Dodge.

WHAT IS YOUR AVERAGE TIME OF RISING?

This depends on the curve of supply and demand. Humphreys' demands for attendance at nine o'clock seem insatiable.

WHAT IS YOUR FAVORITE AMUSEMENT?

Amusements are naturally matters of personal preference. Carl Heath finds satisfaction in picking his teeth by the front door of the Copley-Plaza, while Louis Sanborn is highly enthusiastic over a game of cat's cradle in Pol. Econ. lecture.

WHAT DO YOU THINK OF THE BOSTON TROLLEY SYSTEM?

Some facetious individuals answer, "System? ?" However, let it be sufficient to say that most of it is beneath our notice.

DO YOU FAVOR WOMAN SUFFRAGE?

Apparently but one man fell for the flower girls in the parade. Most of the boys prefer old rose to yellow. What queer tastes men have!

DO YOU FAVOR NATIONAL PROHIBITION?

The T. C. A. seems to have missed a great opportunity in not doing missionary work among the members of this class. But one man favored prohibition, and that applied only to the morning after.

WHO IS THE HARDEST PROFESSOR TO BLUFF?

Major Cole wins. There's nothing to bluff him about.

WHO IS THE EASIEST?

Professor Currier is elected, but not because there's much to bluff him about. He is just naturally kind-hearted.

WHO IS THE MOST POPULAR PROFESSOR?

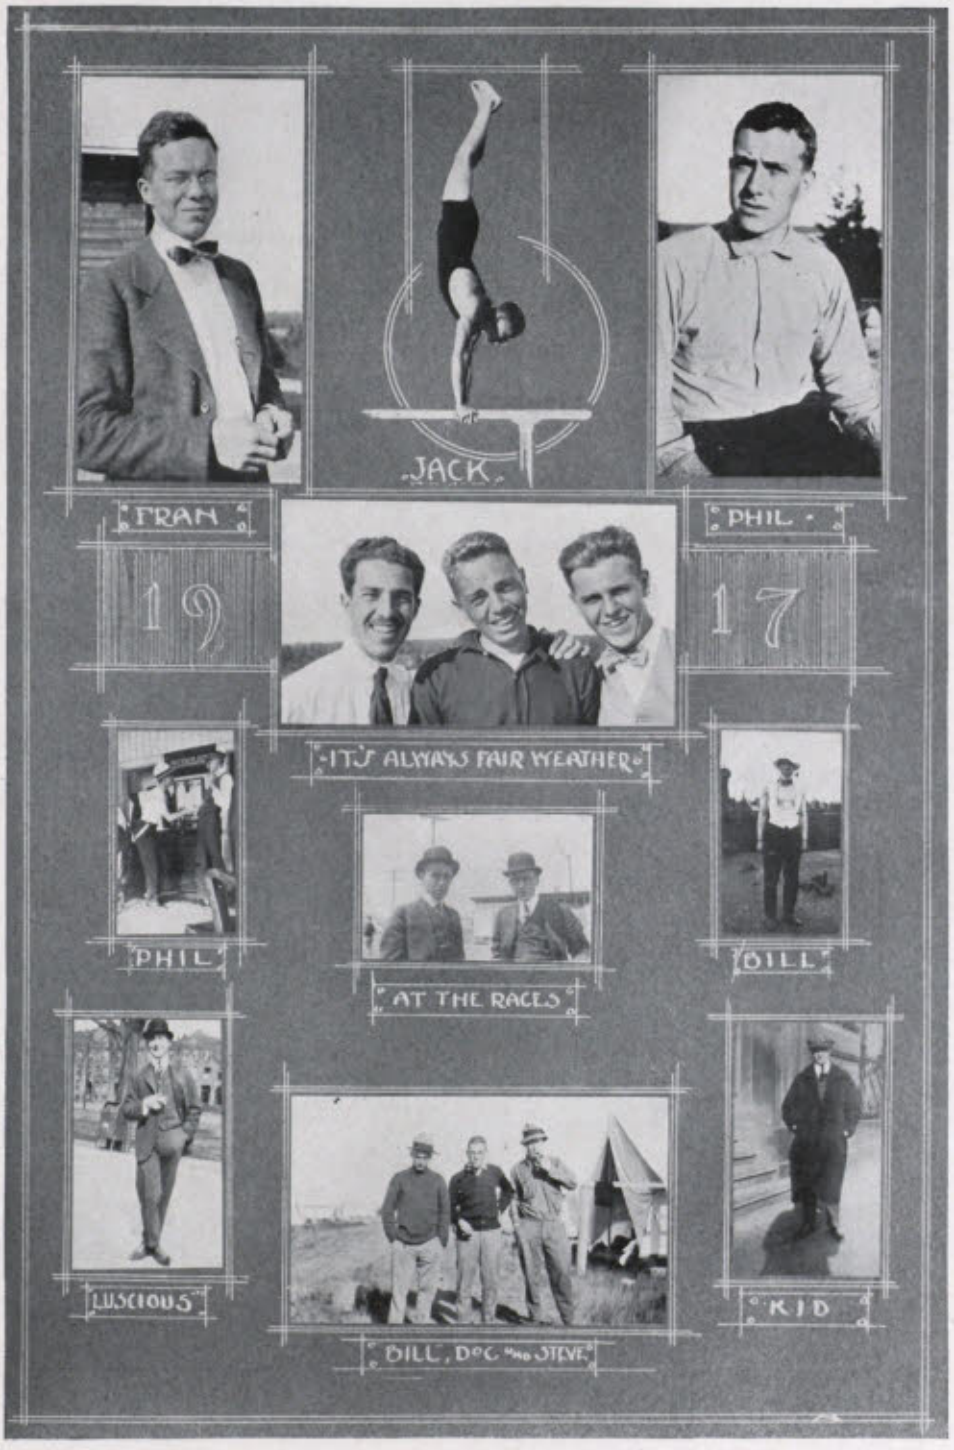

Dr. Dewey and Dr. Talbot are tied for first place. Dr. Dewey, however, never holds classes after vacation; that must appeal to a number of men.

HOW OFTEN DO YOU VISIT WELLESLEY; OR DO YOU FAVOR RADCLIFFE?

Some people were born lucky and others have luck thrust upon them. Would you believe that ten per cent of the class never heard of Radcliffe? As for Wellesley, well — the class prefers the Arena.

DO YOU SWEAR?

This question was intended to offer an opportunity to claim that this is a clean Technique, but Courses X and IV are still with us and the habit of ages crept into the ballots which came from them. So what's the use?

IF SO, WHAT IS YOUR FAVORITE EXPRESSION?

Suffice it to say that the Beacon Street cars, the turnstile in the Copley Station of the subway, and thermo-dynamics are the chief causes of unrestrained expression. Take your choice. The inspiration is there.

WHO IS THE BEST LECTURER ON THE FACULTY?

Charlie Cross is the successful competitor. "You can read, sleep, do problems, or anything — even listen to him — and his talk doesn't bother you in the least."

WHAT WAS YOUR OBJECT IN COMING TO TECH?

Most of us have forgotten the object; our objective is going instead of coming. Others came to escape Harvard.

WHAT IS YOUR GREATEST AMBITION?

"Let it be resolved that we, the members of the class of 1917, hereby affirm that our one and only ambition is to hold a monopoly on some of Andy Mac's necessities."

WHO IS THE MOST BEAUTIFUL CO-ED?

You will find the choice of the class when you look through the Portfolio. In passing, however, we must note that Fannie Freeman and Howard Mann also qualified.

TRACK SEASON, 1915

Manager Webster

THE 1915 spring track season was essentially one of surprises, disappointments, and innovations, being noted more for several brilliant individual performances of athletes than for the efficiency of the team as a whole. It marked the completion of the first season on the new track in Cambridge, and will undoubtedly stand as the first step in the great athletic progress which is bound to result when Technology is firmly established in her new home.

Captain Cook

The first event of the season, the Interclass Meet, held on the morning of April nineteenth, fully came up to expectations from the standpoint of athletic performances and outdid itself as a newly established function of Junior Week. Fair companions in the grandstand were the rule rather than the exception, and their presence lent to the occasion a color and vivacity unknown to the previous spring meets; while the donation by the activities of a separate cup for each of the events greatly increased interest in the contests. The meet was captured, appropriately, by the Juniors, who incidentally won the twelve-man, one and one-half mile relay with a picked team of regulars and regenerated Field Day warriors. Strangely, no track or field records were broken, but the performances were good and the races were by no means devoid of excitement.

Informal spring track relations with Harvard were re-opened on the twenty-first, when the team visited the Stadium for a practice dual meet. Attendance was not so complete as might have been desired, and it was perhaps fortunate that the managements agreed to score no points in the meet. The chief advantage gained was the obvious benefit to the new men which comes from competition with experienced athletes.

Doon

The next meet, held at Worcester on May first with Holy Cross, was extremely disappointing from a standpoint of interest in competition, and resulted in a hollow 79½ to 46½ victory. Technology's rivals showed but little interest in their work; and, although several individual performances were good, the meet as a whole was generally conceded to be a failure. Tom Huff did excellent work in the hurdles, winning both races and equalling the Tech record of 16 2-5 seconds in the highs, and Ray Brown performed brilliantly in the mile.

Reed

The surprise of the season came with the Bowdoin Meet in Cambridge on the eighth of May, when the team, now rather overconfident, was soundly trounced by essentially the same team it had defeated at Brunswick the year before. Bowdoin's superiority was evident in the weight and field events. The most noteworthy work of the day was the winning of the two mile by Captain Fred Cook, who broke his own previous Technology record and set up a new one of 9 minutes 35 3-5 seconds.

GUETHING

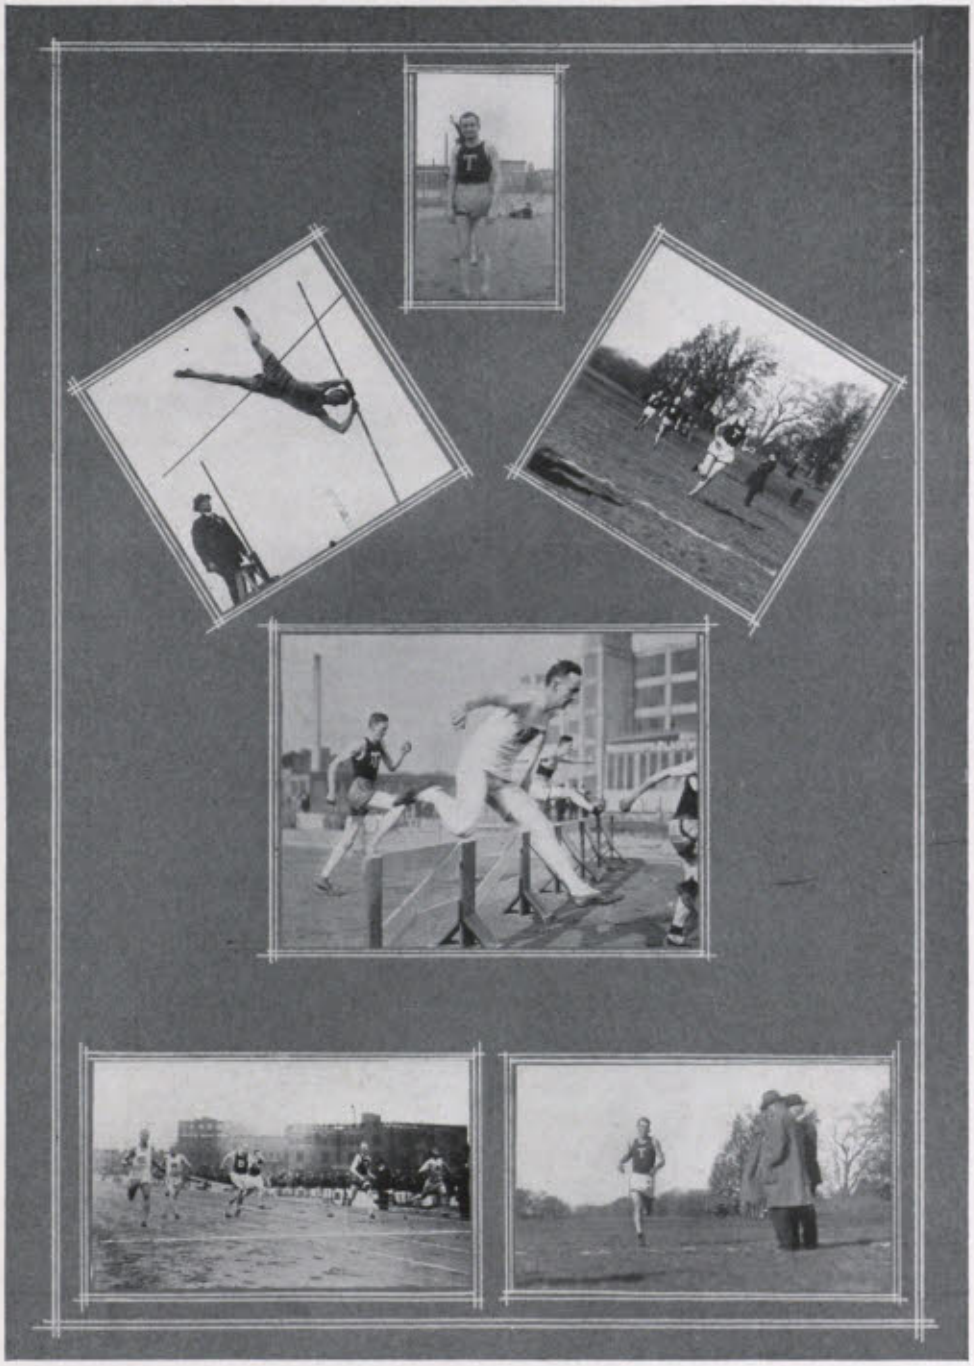

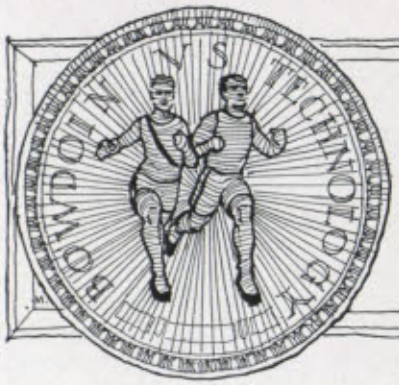

O'HARA

The climax for the team as a whole was the New England Intercollegiate Track and Field Championships, which were held on the twenty-second and twenty-third of May at the New Field. Here Bowdoin nosed Technology out for third place and the team had to be content with fourth, scoring seventeen points. Fred Cook and Ray Brown again distinguished themselves, winning the two mile and mile in 9 minutes 35 4-5 seconds and 4 minutes 24 4-5 seconds, respectively, the latter time setting a new Technology record. Chuck Loomis did good work, winning third place in both dashes; and other points were made in the high jump and pole vault.

At the I. C. A. A. A. A. Meet in Philadelphia, which was held during the final exam week, the season was brought to a very satisfactory close by Fred Cook, who won fifth place in the two mile, the third score made by Technology in these meets.

RELAY TEAMS

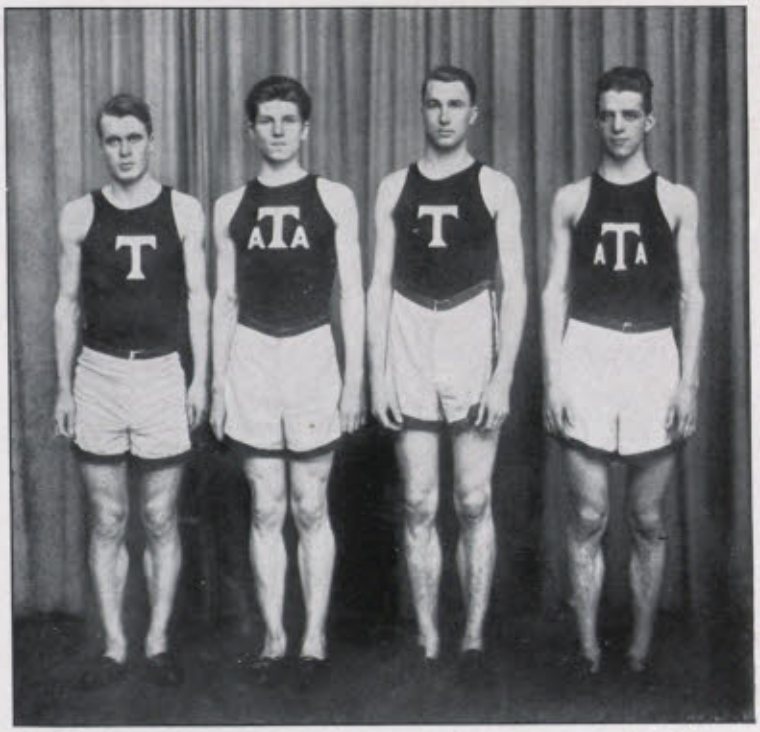

EARLY in the fall it was seen that Technology was to be represented in the indoor season by an exceptionally fast and consistent team. The classes showed a wealth of material for all the relay teams, as well as for the sprints, high jump, and hurdles. Two of the last year's record-breaking relay team, Guething and Reed, were back, while O'Hara, a third member of last year's team, was reserved exclusively for sprinting. Doon, Bent, and Brock, all seasoned veterans, were also available for the relay and sprints.

At the Coast Artillery Club games on January 29, the mile relay was defeated by Harvard's fast quartet by a narrow margin. The Freshman team suffered the same fate at the hands of the Harvard Freshman team. Sullivan starred for Technology by winning the high jump, with an actual jump of five feet eleven and one-quarter inches.

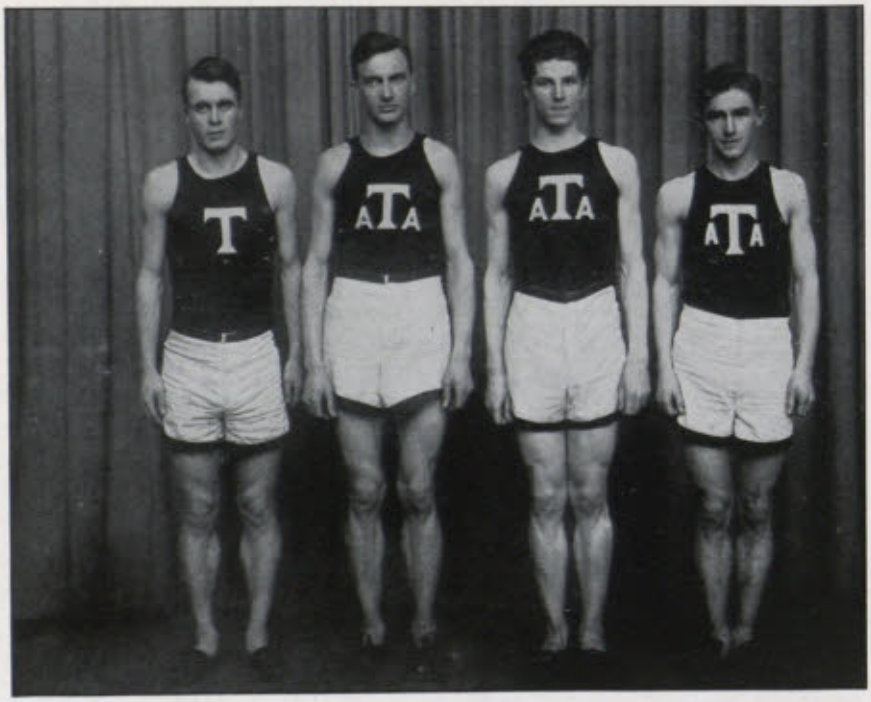

On the following Saturday, at the Boston Athletic Association games, the Varsity, weakened by the absence of Captain Guething, was defeated by Dartmouth. In a triangular race, the Technology Freshmen finished second to Dartmouth and defeated Holy Cross. The star performance of the meet was the defeat of Loomis, the widely advertised sprinter from the west, by Frank O'Hara.

On Monday, February 21, the mile and two mile relay teams and O'Hara competed in the Naval Militia Meet at Hartford. The mile relay defeated the team representing the Catholic University of Washington rather easily, but the two mile team lost a very exciting race to Dartmouth. Frank O'Hara again distinguished himself by placing third in the Intercollegiate seventy yard dash, and

lost by the narrowest margin a special exhibition race in which Drew, the champion sprinter of the world, was a competitor.

At the Madison Square Garden Indoor Meet, Technology was represented by a twelve-lap relay, sprint and high jump team. These were pitted against the best college athletic teams in the country and undoubtedly achieved as great success as any previous track teams at the Institute. The sprint team tied with Pennsylvania for third place, being defeated by Michigan and Yale, and defeating Cornell, Princeton, and Columbia, while the high jump team took fourth place. The twelve-lap relay team furnished the surprise of the evening by nearly lapping the Cornell team of favorites and by lapping Columbia three times. This event proved a fitting close to a season characterized by the co-operation of a loyal, hard-working squad, an excellent coach and an efficient management.

CROSS-COUNTRY SEASON

Captain Brown

Manager Tourtellotte

THE Cross-Country Team, at the close of the Hare and Hound season, showed promise of being one of the strongest in years; with several runners from last year's team, supplemented by a wealth of material from the entering class, Coach Kanaly made extensive plans for a brilliant season.

Amherst Aggie, the first team to match speed with the Technology runners, proved to be a strong opponent, especially since the long, uneven course, which was very tiring to the men because of the exceptionally long, hard hills, was familiar ground to the Aggies. Technology stood the test, however, and won by a narrow margin. Each position was closely contested, but the brilliant running of Captain Brown and Guething, backed by a well balanced team, won an honorable victory for the team.

A practice meet with Harvard, however, proved to be an unfortunate one: several of the veteran members left the team just before the race, leaving Tech without reliable men to take their places. The first three men of the Tech team each finished ahead of his opponent, but the others could not take the places of the absent men, and the team was obliged to bow to defeat.

The honors in the New England Intercollegiate Meet fell to Maine. With their team of steady, consistent runners they far outclassed the rest of the league. Technology still felt the loss of the veteran men, but nevertheless ran a hard-fought, plucky race, Captain Brown contributing his share by leading the field home with several seconds to spare.

The chances of making a small score in the I. C. A. A. A. A. Meet were rather slight, but the team entered the race determined to make a good showing. Their pluck was rewarded by the capture of seventh place and the defeat of several of the larger colleges of the East, usually classed as Technology's superiors in athletics. This meet ended a season which, though perhaps not so striking as had been expected, was still a decided success and an excellent experience for the new men who form the nucleus of the succeeding team.

HOCKEY TEAM

EXCELLENT incentives for hockey candidates were provided at the opening of the season by the arrangement of a large schedule of fifteen games with colleges throughout New England and an attractive midyear trip. Work began in earnest early in December, when fifty recruits reported for practice at the Arena. Of these, only four were veteran men, a fact which made the task of selecting a good team somewhat more difficult for Captain Cochrane.

The first game, a scoreless tie with the Winchester Hockey Club, served as little more than an index to the new material, since both teams were on the ice for the first time. The effects of lack of ice were particularly demonstrated in the following game with Dartmouth, which, with two weeks' practice under proper weather conditions, snowed the team under to the tune of 6 to 0.

On New Year's eve, Technology won a well deserved victory over the Amherst Aggies at the Arena. Captain Cochrane, Swain, and Johnson were an impregnable defence, and successfully broke up every attempt of the Aggies to score. The team showed a remarkable reversal of form from the Dartmouth game, and carried the day, 1 to 0.

The return game with Dartmouth on January 8 was lost by the much more even score of 2 to 0. The team at this time was in its best condition, a fact which was very apparent in the showing made against Cornell on January 12 at the Arena. The game was very close and well fought, Cornell having a slight advantage during the first half, and Technology during the second. Only the clever work of the Cornell goal prevented Tech from bringing the score to a tie.

On January 15, the team went to New Haven to play Yale, and was defeated 5 to 2. The fact that the Yale goal was credited with many more stops than Johnson, however, signified that the game was by no means one-sided.

The warm weather at midyears came very inopportunely; not only did it spoil the ice and thus prevent the planned trip, but it also completely upset practice for the rest of the season. The two games after this time, with Williams and Exeter, showed that the men were in poor physical shape.

With proper ice conditions, the season would have undoubtedly come to a greater final climax; and in spite of the adverse weather, it is rightly considered as among the most successful of recent years. Next year, with its own rink, the team should prove a dangerous rival to the best of its opponents.

WRESTLING SEASON

Manager Stebbins

WRESTLING at the Institute was given added impetus during the recent season by the adoption of a large schedule, including meets with the strongest college teams in the East. Captain Loo and Manager Stebbins started the campaign for a larger and more organized squad of varsity and freshman wrestlers early in September, and were rewarded by a squad of ninety promising freshmen from which they selected several men to fill gaps in the ranks of the varsity. The heavyweight and light heavy classes were the hardest to supply, but with the aid of Coach Lamb, formerly of Pennsylvania State, two men were found for these positions.

Captain Loo

The season opened with a twelve-hundred-mile trip to Pennsylvania State and Lehigh Universities. At the former, the team was rather badly defeated in score, but as all of the matches were very close and often carried into extra periods, the team was not at all despondent with the result. The Lehigh match was much the same as the Penn State, although the men, with a little of the greenness worn off, gave a better account of themselves. The results of the trip showed that the team was not up to the high standards set by the teams of the last two years; but that a well-balanced unit could be formed by a little more practice and training.

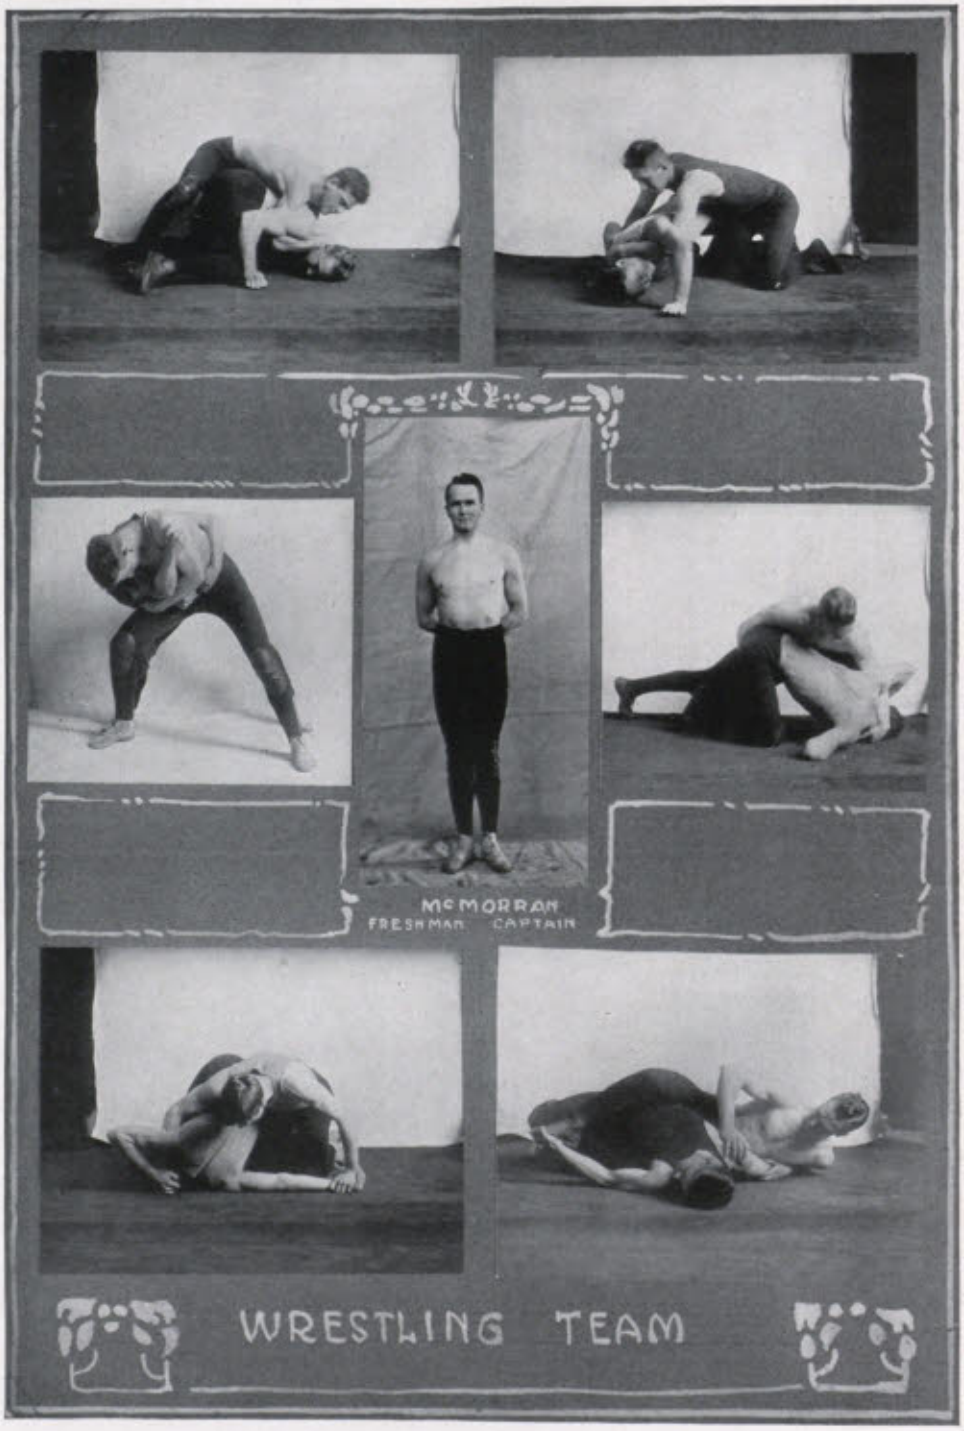

The Saturday following the midyear vacation the team met and defeated the Springfield Y. M. C. A. College. This victory encouraged them greatly and removed the sting of the defeats on the midyear trip.

Harvard was next on the schedule, and the event, as in previous years, was considered as one of the most important of the year. The first three matches went to Tech in short order, but after that Harvard had slightly the better success. The last bout decided the match: Bone of Technology put up a game fight, but, tired from a match at Andover that afternoon, was unable to stand the strain and lost by a very close decision.

The last dual meet of the season was at Brown University. Technology, as usual, had a far superior team and easily defeated the Brown aggregation. After this success, the team came confidently to the climax of the season, the Intercollegiate meet at Harvard, on March fourth. Here Technology was represented in the finals by three men: Captain Loo, Morse and Hoffman. Captain Loo was the only man of the three to win his bout, but this victory, combined with the points gained in the semi-finals, tied the team with Springfield Y. M. C. A. College and beat the scores of Harvard, Bates and Brown. Yale easily won the meet with her team of strong, experienced men. This meet came as a fitting climax to a season, not as brilliant, to be sure, as those of the last two years, but one which was a credit to Technology.

FIELD DAY

FIELD DAY

NOVEMBER 5, 1915

THE ceremonies of Field Day, 1915, began when a carefully planned parade of five hundred undergraduates, headed by the famous, although hastily organized, Technique Band, and those talented leaders "Fat" Rennie and "Rusty" White, marched from Rogers steps around Copley Square, down Newbury Street, and across the Harvard Bridge, to the new buildings. It would have been hard to find a more persevering set of students than these,

plashing blithely through the mud and rain, and cheering their respective classes to the echo. When the new site was reached, the parade halted, and with bared heads sang the Stein Song, in honor of Technology's new home and its builders. It then re-formed ranks and proceeded to the Field.

The tug-o'-war men were the first to appear before the stands, and were greeted with rousing cheers, as they took their places on the rope. At the report of the gun both teams settled into a slow, steady pull. The freshmen gained what seemed to be a slight advantage, but it was short-lived, for almost immediately the sophomores recovered and literally dragged their opponents through the ground for a record-breaking victory in the short time of 16 2-5 seconds.

The football teams then lined up, the freshmen choosing the northwest goal, which gave them the decided advantage of having the wind, rain, and tide at their backs. Gleason of the sophomores kicked off, and the freshmen punted to the middle of the field after but a single rush. The sophomores caught the ball on the fifty-yard line, and started to advance it by line plunges. Gleason gained nine yards, but Watt could not make first down, and Clarkson was thrown for a loss. An attempt at a field goal failed, but the sophomores recovered the ball when Young fumbled on the twenty-yard line. A forward pass netted ten yards and first down. On the next play Watt carried the ball across the line for a touchdown.

The freshmen kicked to the sophomores, who rushed the ball back to the twenty-five-yard line. After failing to penetrate the freshman line in two tries at the center, the sophomores kicked. The freshmen immediately returned the punt, gaining slightly on the exchange. The sophomores gained their distance once on a long end run by Johnson, but did not have time to make another first down before the period was over.

The second period started with the ball in the sophomores' territory on their own twenty-five-yard line. Clarkson punted out of bounds. The freshmen returned the punt, which was fumbled on the sophomores' seven-yard line, but immediately recovered. Clarkson kicked to the forty-yard line. Then the freshmen, by steady advance, rushed the ball to the twenty-yard line, where they attempted a field goal. The kick fell short and the sophomores punted to midfield just as the half ended.

The freshman tug-o'-war team next took their places on the rope, determined to win the pull at all cost. Soon the sophomore team appeared and the lines formed. Although the freshman team showed much more fight and determination than

in the first pull, the superior form of the sophomores won for them another victory in less than a minute.

The relay race now drew the attention of the spectators. Kwan, the veteran first man for the sophomores, was pitted against Wright, the freshman captain. With the flash of the gun, Kwan jumped into the lead and maintained this slight advantage throughout the whole distance. The sophomores gradually increased this lead and won easily with a lead of forty yards, in the time 4 minutes 59 2-5 seconds. The time was slow, probably due to the fact that the track was heavy and the sophomores were not pushed.

The second half of the football game opened by the sophomores receiving the ball from the freshmen on their twenty-yard line and running it back five yards. Two attempts at the line failed to gain the required distance. An attempted punt was blocked by the freshmen and the ball was theirs on first down, at their opponents' twenty-yard line. Two rushes through the line netted a first down; two more rushes through tackle and end carried the ball to the seven-yard line. Here, however, the attack crumbled and the ball was lost on downs to the sophomores, who immediately kicked to safety. Recovering the ball in midfield the freshmen again advanced it by rushes and passes to the five-yard line, failing again to make the touchdown by a narrow margin. The second year men kicked out and the period came to a close.

The Winners

The last period was very uninteresting since the sophomores had only to keep the freshmen from scoring to win the game. The freshmen started another march toward the sophomores' goal but the attack was nipped in the bud by Malley, who intercepted a forward pass and carried the ball over for a touchdown, running the final score to 14-0 for the football game, and making Field Day a clean sweep for the sophomores with a total score of 9 to 0.

Mens et Manus

From the miracle of being,
From the secret of the clod,
Atom, protophyte, electron,
Tingling with the breath of God,
From this mystery of matter
Let him seek and find, who can,
Whatsoever most availeth
For the benefit of man.

Who may woo the heart of Nature?
By what sign shall Truth be known?
Ask the young men pressing forward,
Who would claim it for their own.
Where the flame of science blesseth,
Kindled by this band of youth —
Fire of boiler, forge or furnace —
Is an altar unto Truth.

And its spirit, all-pervading,
Correlates the hand and mind,
Broadens out the field of effort
To the needs of all mankind.
Rivers toil, a plague is halted,
Mountains quiver, darkness glows,
For the grim unconquered essence
Of the man who really KNOWS.

'Tis the dawning of an era
Harmonizing humankind,
Based on truths evolved from matter
By a process of the mind.
Science beckons — we must follow,
Courage firm and spirit true,
For to KNOW is human progress —
It is destiny to DO!

TECHNOLOGY MONTHLY

19 17

IN the early spring of 1914, The Technology Monthly, the youngest of the Institute's undergraduate publications, made its first appearance. The founders felt that the hearty response accorded by the students was sufficient *raison d'être* for its continuance. The constant progress of the Monthly, which is now in its third volume, has shown its field among Institute men, filling in the gap between the scope of newspaper, The Tech, and the record, *Technique*.

When President Maclaurin brought about the alliance of the Graduate School of Applied Science of Harvard University and the Massachusetts Institute of Technology, it became evident that the students of both colleges, being in almost constant association, would have many interests in common. It was only natural, then, that Tech's magazine and the official organ of the Association of Harvard Engineers should be combined, and the present publication, The Technology Monthly and Harvard Engineering Journal, is the result.

To make Technology's present students greater engineers than they would otherwise become, and to add to Tech's great name, are among the highest aims of any undergraduate activity. The Technology Monthly has helped accomplish this in a very obvious way. Its articles on engineering and science help to make broader engineers than the present courses of instruction can permit; its articles and discussions afford a thorough comprehension of Institute affairs and thought; and van Zelm's cartoons give in humorous vein what is going on about you, often unseen to the majority.

Through its various articles, section of Faculty Honors, and editorials, it offers the only direct connection of the students with all that is associated with Tech's greatness — our Faculty and Alumni.

HISTORY OF THE TECH

ON THE sixteenth of November, 1881, the first issue of *The Tech*, the oldest permanent publication at the Institute, was published. Now, after thirty-five years of varied but successful history, *The Tech* presents in its files perhaps the most authentic and detailed account of Institute life that can anywhere be obtained.

The first editorial states that "it will be its aim to promote the interests of the students of the Institute, and maintain a friendly spirit among them, breaking down the ancient barriers of class and department." These sentiments, so relevantly expressed by the founders, are rigidly adhered to at the present day. In carrying out these aims, and due to natural development and improvement, *The Tech* has passed through the stages of a Bi-Monthly, Weekly, Tri-Weekly, and Daily, and is now a bigger and better paper than ever, serving the Institute and students in a way never foreseen by the founders.

THE TECHNOLOGY REVIEW, the official organ of the Alumni Association, is published monthly during the school year. Its object is to promote the welfare and advancement of the Massachusetts Institute of Technology by keeping its graduates, and others interested in its progress, in touch with it. In its articles are discussed the growth and expansion of the Institute, the general problems of education that pertain to it, and the important achievements, both in engineering and science, of its past students. It also reports in an informal way the action taken by the Corporation and Faculty, the meetings of the local alumni associations, the news relating to student organizations and to the social life of the Institute in general. It presents also the personal information obtained by the Class Secretaries in regard to the occupations and activities of former students.

THE curtain, on rising, reveals a classroom in which lectures in the subject M 34 are delivered. The janitors are discovered finishing their task of cleaning the boards as the students enter. The professor, a little late as usual, starts his lecture, but finds that Bob Baxter, the hero, is still later. Upon Mr. Baxter's entrance, a few moments afterward, the professor expounds a question

WHITE AND FREEMAN, Authors

HELENE

for him to answer, but Bob, who has never been noted for his brightness, falls back upon his usual stand-by, the one co-ed in the class, Miss Helene Angel. Helene whispers the answer to him, and Bob accordingly answers the question. The lecture proceeds, and the subject, "Gold, its occurrence and uses," soon proves decidedly uninteresting, despite the fact that it is accompanied by many lantern slide views taken in various parts of the world where gold is to be found. Bob finally succumbs to the wiles of Morpheus, and the audience, swept into his mental state, merge with him somewhere in the center of the earth.

It takes Bob some time to grasp the situation, and he finally correlates his position with the professor's last audible words in his description of the deep mines of the future. The car in which Bob concludes he arrived has become stalled, and Bob, in an endeavor to fix things up, is blown into space.

Baxter and the Judges

While the hero is soaring through the air the audience are carried ahead in the story and find themselves on the way to a wonderful contest, reminiscent of Field Day but set in the scenes of ancient Greece. The faculty and the activities are to contest for the control of the student. The contest over, the judges are unable to reach a decision and implore the help of the gods. Baxter, having completed his enforced aviation stunt, strikes earth at that time and is mistaken for one of the Olympic rulers. A decision demanded of him, he is seized with the usual brainstorm, when the ever-faithful Helene appears and tells him to which side to award the victory. Hailed as savior of the day and about to be made king of the city, Bob thinks of Helene's share of the honor, but she is not to be found.

Wood Sprites

He takes the advice of the populace and seeks for her in the garden of Love, but, enticed by the wonderful dancing of the mysterious goddess, he fails to ask the all-important question, and must search through all the world for Helene.

As he wanders on to the Arizona desert in the function of a surveyor, the whole thing begins to puzzle him and he begins to recognize the scenery as that he has seen in the lecture slides. He is forced to play part in a Wild West movie and

emerges, tired and thirsty, to be ushered into the frigid north, where he hobnobs with Eric the Red and the steward of the Cliquot Club of New York City, who, with his flunkie, are lost in the frozen regions.

An infinite longing for Tech and the old scenes leaves him standing in front of the student social center, Walker Memorial, at New Technology, and there, on the after-noon after the matinee of Tech Show 1920, he finds Helene. All is about to end happily, when Bob is suddenly aroused by Helene, who, gently tapping him on the shoulder, warns him of the fact that the hour is nearly over and that there is an examination to be done. Bob finally wakes up to the full meaning of the situation, and the class in M 34 comes to a close.

Though the work we do is hard
And the Dean's most private card
Shows the marks are slowly starting in to fall,
Though we flunk Thermodynamics
And just squeak on 'Plied Mechanics,
There is something funny in it after all.

Though we get "held up" at drill
Just because we don't stand still
And we have to do quick time around the hall,
Though we draw out adiabatics
Like a lot of drunk fanatics,
There is something funny in it after all.

Even though it's theoretical
With cases hypothetical
And formulas and figures to recall,
Though our rendering is hazy
And with concrete beams we're crazy
There is something funny in it after all.

DISGUSTING, isn't it? Really too bad — he is such a nice chap and she — why, she hasn't a vestige of brains. To be sure she has good looks and all that sort of thing, but her clothes are absolutely everything. There is really nothing to her. Yet she is so infatuated with him that she is getting terribly absent-minded. She has forgotten herself entirely, as you see.

WHAT have we here? I didn't know that Tech had an aviation department.

Yes, we have had a course in aviation for a long time. In the past, though, the efforts have been confined to pole-vaulting, high-jumping, and hurdling.

What a beautiful machine it is. I wonder if it will fly.

No, no, it was not meant to fly, it was made for a thesis.

Aren't theses meant to work?

Goodness, no. Only the student is supposed to work.

Did he ever try to fly it?

Oh, yes, he ran down a launch in the river basin once just as the machine was about to leave the water. Too bad, too. Then he put skates on it and waited for ice. Then just as it was dancing around and was about to soar, a fence jumped out in the way and broke the front skid. What did you say? Did it get him anything? Oh, my, yes. He is an instructor at Tech now and teaches the Chinese students aviation.

Why does he teach the Chinese aviation?

Oh, because they are the only ones who are foolish enough to believe he knows enough about it, and also they are the only ones nervy enough to take the course.

Yes, indeed, he will get it to rise some day. At least he has succeeded in making time fly with it, anyway. Those two men standing over there are the aeronautical department, Tom and Hunsacker.

WEST POCKET ESSAYS

By George I. Itch

Author of "That Good Old Kibosh"

THE SLIDE RULE

THE slide rule is a marvelous little instrument of great complexity. It is a source of wonder and amazement to the unsophisticated Frosh, who is immediately attracted by the marvelous possibilities for making the folks at home sit up and take notice.

By means of this simple little stick, an adept operator can slide the answer clear to infinity and back again, divide by the product of the least square of the mean and compute the logarithmic values on the back, all in one operation. From the value thus obtained he may derive the equation of the hyperbolic paraboloid by merely inverting the slide.

These are not all the tricks of the slip stick, for with it you may find the mean of the A, B, or C scale, the tangent, sine, cosine, or versed sine of anything from doughnuts to fur-topped boots, with only a log table to compute the results. The dope stick is one of the *few* sources of income to Andy Mack, particularly since the introduction of the new glass rider to be broken and replaced each week. Every Frosh must have one; preferably a twenty-inch affair with special scales for figuring such things as the effect of a magnetized scarf pin on the red ball banked near the further corner pocket; neglecting the weight of the number spot and assuming no English.

Thomas Edison will not employ a man who uses a dope stick. Why? Because he says that if a man can't even guess without the aid of a stick, he is a sad engineer.

It may be truly said that it takes the place of brains. This probably explains the fact that so many men at the Institute do not carry their brains in their heads.

PROF.: "Jones is asleep. Will you tap him on the head?"

V. F. R.: "Don't do it; you will flood the floor."

AND we hear from Prof. Norton in Heat Lecture: "Cattle hair insulators are very good, but they are — er — too good for residential purposes."

EMANATING FROM POL. ECON.

MR. SHUGRUE: "Is the moon an economic good?"

BRAYTON: "That depends on who the girl is."

FIRST FROSH: "The Tech says that a student was arrested for having a doughnut from the Union in his pocket."

SECOND FROSH: "Was he trying to steal it?"

FIRST FROSH: "No, they pinched him for carrying concealed weapons."

AS THE SENIORS SAW IT

DON'T Shoot! I've had my informal taken."

How Careless of Him!

PEABODY, in Applied: "Now, gentlemen, when ivory meets ivory, we have — [class starts to laugh] I don't mean football, I mean billiards."

ASTIE of course IV (eating in the Copley Lunch): "Can I hab some wadder, pleze?"

Waitress (to regions below): "Send up some water for the tank, will yuh?"

CHARACTERISTIC SAYINGS OF THE GREAT AND NEAR GREAT

TALBOT: "At the close of our last lecture, we were discussing——"

Breed: "Use your brains—"

Miller: "That reminds me of the time—"

Currier: "Inoticethatthereare — severaldiscrepanciesbetween — myrollsand thoseoftheregistrar —" (boom).

Passano: "Bless my soul—"

Derr: "Now, the-er platitudancy-er of the-er—"

Swain: "A child could think better than you—"

Allen: "Allen's tables are good tables—"

Sumner: "Next slide, Mr. Goodwin, ahem—"

F. J. Moore: "Won't you-er expatiate on that, Mr. —"

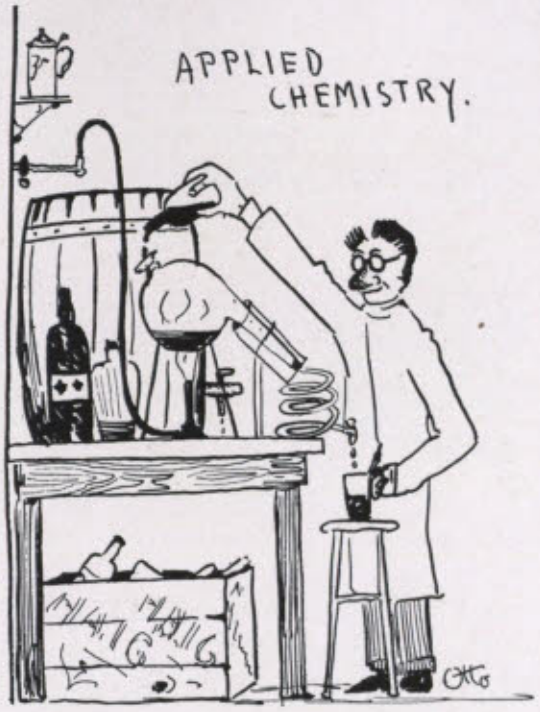

Sedgwick: "The doctrine of parsimony demands—"

Sherrill: "Let us make this simplifying assumption—"

Osann: "Lookit—"

PROF. BERRY (in Heat Eng.): "What formula shall I use in this problem, gentlemen?"

ROUNDS (dreaming of Wellesley): "S.O.S."

FIRST STUDE (in gas engine lab.): "Wait a minute, one cylinder is missing."
SECOND STEWED: "Well, let's go back and find it."

PROF. WILSON: "If two cats are fighting on a new tin roof, which cat will win?"

ALKALI IKE: "The one with the greatest μ.

FIRST ARCHITECT: "Whadaya gonna do tonite?"
SECOND DITTO: "I dunno; whadaya gonna do tonite?"

THE FORMER: "I dunno."

THE LATTER: "Who else will play?"

CHARLES LE CROSS: "Are you positive that you thoroughly understand this theory which you are going to take up in section tomorrow?"

DOC. WASHBURN: "No, but I fancy that I will express myself in terms sufficiently obscure to prevent any one from taking interest enough to question me about the matter."

A TECHEMICALUMNUS

A GALLANT young chemical engineer,
(Hear ye, from Tech.)
Out of college but one short year,
(Hear ye, from Tech.)
Fell in love with a damsel fair
With eyes of blue and a baby stare
And heaps and heaps of peroxide hair,
Hear ye, from Tech!

He won his way with the beautiful lass,
This chemist from Tech.
And his heart was as light as laughing gas,
Happy man from Tech.
Her smile was as sweet as saccharine
When he fondly whispered to her, "Be mine,
More precious than platinic iodine."
This lover from Tech!

Her father's heart was wrought Fe,
Hear ye, from Tech.
The youth lacked Au and Ag,
One year out of Tech.
Stern parent spurned him from the room,
Consigned him in rage to a sulphurous doom,
Which plunged the youth into horrible gloom,
Poor lad from Tech!

So chemical engineers, beware,
Though clever and from Tech,
That ye are not caught in a similar snare,
Adventurous men from Tech.
Where there's naught left in life but a leap from a crag
Or a neat potassium cyanide jag,
Green grass and a calcium carbonate slab,
Have a CARE, ye men from Tech!

AND THE RAIN DESCENDED AND THE FLOODS CAME—

AHA! it looks like rain. In fact, I think it is going to be very, very wet. Don't you think so, Ed Rounds? No? Well, you may change your mind. Perhaps your mind won't be the only thing that you will change. You look very nearly soused. What is that? You don't drink anything but water? Well, you will have enough of that soon. Yes, plenty, with a superabundance of flour suspension.

MR. DOTEN (in Poly. Con.): "Labor Unions excluded saloon-keepers, bar-tenders and lawyers."

The professions have certainly done some backsliding lately.

CHARLIE (after revolving the familiar bowl about): "Now we see the familiar Eddy, that soon becomes dissipated."

To which we add these

LITTLE SLIPS OF THE LUNG

HAYWARD: "If two parallel lines of force are perpendicular," etc.

NORTON: "You will readily understand that if I have an enclosed volume of gas and can heat it very rapidly, that I will change the temperature very quickly."

LEWIS; "You don't want to heat it any higher than possible."

MOORE: "The rock on which this question is struggling to get over—"

NOYES: "But which we could find it in a table possibly—"

PRESCOTT: "We don't nobody know—"

And again: "Milk which is secreted from the cow."

DERR: "Put the slips in the basket with Mr. Taylor."

FLETT THE GREAT! Notice the classic pose, the winning smile, and the modestly delicate tie. Orators are not made, they are born!

"SEEING THE DEAN" under more favorable circumstances than usual. He is looking down, but does not see the pebble just below his upraised foot. His face is calm and thoughtful. The next picture would have shown the result of contact between foot and pebble but unfortunately the density of the atmosphere at that time spoiled the negative.

IN HEAT ENGINEERING: "Seems to me the value given for Entropy is a little large, is it not?"

PROCTOR (mildly): "What's goodenough for Goodenough is goodenough for me."

AND THIS SQUIB FROM THE WINTER CONCERT

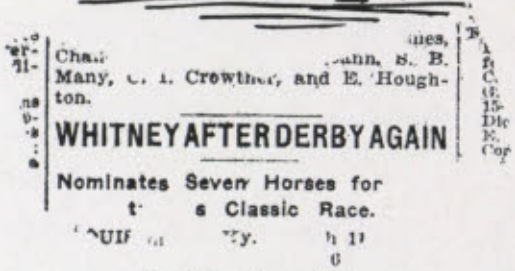

SOME GIRL (to Shorty Carr, after he has explained how to find partners): "But what do you do when you get lost?"

SHORTY (not at all sarcastically): "Hang yourself on a hook in the lost and found booth."

KNUTT: "Miss Flye is some girl, eh, what?"

WATT: "Yes, but she is quite a $\frac{ds}{dt}$."

Cha... ...ann, S. B. Many, C. A. Crowther, and E. Houghton.

WHITNEY AFTER DERBY AGAIN

Nominates Seven Horses for t... s Classic Race.

AHA! THE LID IS OFF!

SMASHER: "Jim is a miner, isn't he?"

CRASHER: "Yes, he is taking Sibyl Engineering."

STUDE: "This problem in Applied looks very difficult."

PROF.: "Why, no. It can be done in just a moment."

NO honest-to-Gosh-book would be complete without a Rusty White joke, so here goes:

RUSTY: "$3 for tickets, $5 for feed, $2 for flowers, $1.97 for taxi, lessee, that makes $12.98."

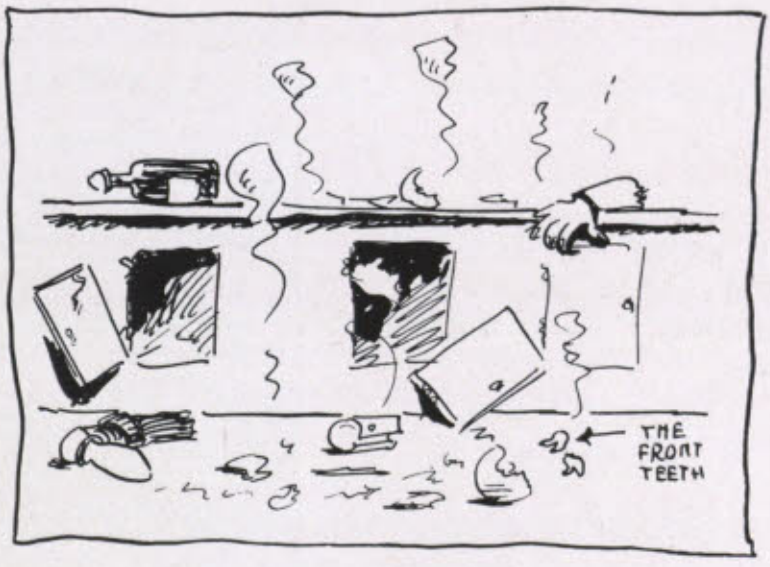

MCDANIEL: "Mental arithmetic, Rusty?"

RUSTY: "No, sentimental arithmetic."

BUT HERE IT IS ON AGAIN

A JOLLY young chemistry tuff,
While mixing a compound of stuff,

Dropped a match in the vial,
And after a while,
They found his front teeth and a cuff.

IN STRUCTURES

MR. SUTHERLAND: "Now, Mr. Neumann, plot the shear diagram."

NEUMANN: "Well, we resolve the $5000 into its vertical component."

Crown him, James, crown him.

SHE: "Yes, I will be yours, — on one condition."

BILL, THE FAMILIAR EDDY: "That's all right; I entered Tech with four."

THE original chin warmer. Get Duff's original. Which way is it growing? Down, of course. Very, very, very deep.

RECENT DETERMINATIONS ON THE DENSITY OF SCOTCH MIST IN THE "PHIZ" LAB.

PROFESSOR to 1919 (who has just come in late): "Mr. Smith, where do you come from?"

1919: "From Scotland, sir."

Ring for the undertaker, James, the poor boy is dying.

STUDENT (to lab. assistant): "How many ounces to a foot, kind sir?"

ASSISTANT: "Aw, I dunno! I only know the metric system."

THIS FROM THE PROM

CLASSY BLONDE: "Oh, Mr. Althouse, don't you think this floor is lovely?"

A. K.: "Yes, indeed, it is."

C. B.: "Then, why don't you stay on it?"

LAB. ASSISTANT (assigning problems): "Thickness!"
SOPH. (angrily): "To whom are you referring, sir?"

THE TECH REPORTER: "Hello, Schabacker? You have been elected to the Presidency of the T. C. A."
"The hell, you say!"

SCHOONY (in Math.): "How do you do this long integration?"
PROF. MOORE: "I wouldn't do it. How would you?"
SCHOONY: "Same way."

GOING!

DEAR DAD:

Let me take this opportunity of acknowledging your last check and of preparing you for the worst. My exams are almost here and I do not feel, somehow, even as confident as in former years. The strain these last few weeks has been something terrible. Sometimes along about one or two o'clock in the morning, when my head is almost breaking, I wonder that I do not become a mental wreck. Then, too, sometimes I wish that I might have a nervous breakdown, just to show you how hard I really am working. Dad, if I should flunk a whole bunch of subjects can I go to the war, or would you rather have me come back here?

Affectionately,

FRANK.

GOING!

DEAR DAD:

Just to let you know that I won't be home for the holidays, because Prof. James thinks that I had better stay here and draw.

Affectionately,

FRANK.

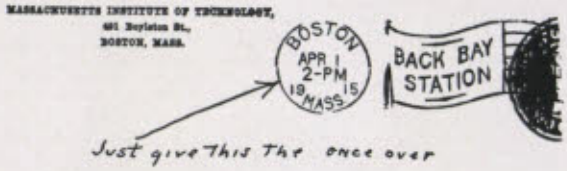

GONE!

DEAR MR. RIZZO:

Kindly send us a check in settlement of your son's marriage license, which for some reason he had charged to the Institute.

Yours,

STATISTICS

(Continued surreptitiously from Phil Hulburd's department)

THERE are 121 professors at Tech.
85 have written books.
82 of these books are used by Tech students.
16 have whiskers (Drisko counted twice).
61 have moustaches.
5½ have a sense of humor.
23 have good lecturing voices (Currier barred in fairness to others).
22 have German degrees.
66 obtained degrees from Tech.
23 were given degrees by Harvard.
112 give third degrees to students.
98 are married.
7 ought to be.
13 are known outside of Tech.
But, when all is said and done, all 121 are a darn fine bunch after all.

DEDICATED TO THE 1917 ELECTORAL COMMITTEE

Frank Tinney, Al Jolson, look out
When that fellow called Joe is about.
B. F. Keith's, so they say,
Offered thousands a day:
He's a scream, is that kid, there's no doubt.

Of all the unprincipled crooks
The worst is that loafer named Brooks.
For his innocent phiz
He is sometimes called Liz;
You never could tell by his looks.

He's a regular eugenic guy, is Bill,
He always gets the Lady's eye, does Bill;
When he has one on each arm,
Why you'd sell your down home farm!
This is not a false alarm, is it, Bill?

When Phil gets away with that southern dope
The girlies all ask for more,
They all say, "Whee, there is no hope:
Take me to that Suanee shore!"

Wine, women, song, and dice
Dud looks at more than twice:
If a care he must drown
He seeks solace downtown.
There's a reason — it's naughty but nice.

No dentist is that Cronin guy,
Yet a tooth he can draw with one eye,
And also a cork,
A stein or a fork,
But water he'll always pass by.

Our Editor, Johnnie DeBell,
Says in order to make Technique sell,
Advertisements must go
To the devil below
So the Tech men can see them in Hell.

That pink-cheeked young darling named Dunning
Is assured by the girls that he's cunning,
But when Gaby Deslys
Sat down on his knee,
He broke the mile record for running.

A speed king is that guy called Dutch
On motor bike, street car, or such:
But speed was the thing
That lost Gaby a king;
Take warning, or else use a crutch.

His first name is Bill, and his last name Eddy,
When young they fed him on milk;
But now for chicken he always is ready,
Spring chicken with dressing of silk.

Gus Farnsworth, once a football hero bold,
Now points the box and says, "Look pleasant, please!"
He claims Technique photographers
Should always have stenographers
To help them get results with greatest ease.

Walt Harrington, chorus girls' pet,
Once made this terrible threat,
In my shirt pink and white
I'll sleep every night.
Have the squirrels got him? Not yet.

Paul knows the girlies, from the kind that swipe your watch,
To the kind that you canoodle in the dark,
And the one he took to Field Day was a chicken rare to catch,
I should like to take her walking in the park.

To a beautiful dame once said Phil,
As his jitney flew fast up a hill,
"You are now far from home,
Shall I drive on alone?"
She answered, "I'll stay with you still."

Phil Hunt, as you already know,
Has a wart where his head ought to grow;
When he's sober or full,
He can sure throw the bull,
Could a phonograph beat him? Oh, no.

As a sleeper, critic, or writer,
Lobby, you may meet defeat,
But as Prof. Brown's chief goat swiper,
Harold, you cannot be beat.

Lowengard, all dressed in white flannels,
Sat down like an unthinking dub
On the steps of old Rogers. Our annals
Say he joined the Audubon Club.

Our bloated young bondholder Mac
Had fingers that ached for long green,
He could spy out a dime through your back,
And scrape out your pocketbook clean.

That Union bench warmer named Dick
One day told a prof he was sick,
The reason, he said,
Was a pain in his head,
Which he got when he scored a bridge trick.

That long-legged simp named O'Brien,
To fish in the ocean was tryin'
When a mermaid came by,
Gave Sherry the eye.
When the cops pulled him out, he was dyin'.

That husky young Hercules Swan,
The Portfolio guy, — are you on?
Tho' you may think he's base
When you look at his face,
On the high tenor gargles he's strong.

At picking the sporting page dope
Neal hasn't even a hope,
The games he likes best,
And he hates all the rest,
Are marbles and skipping the rope.

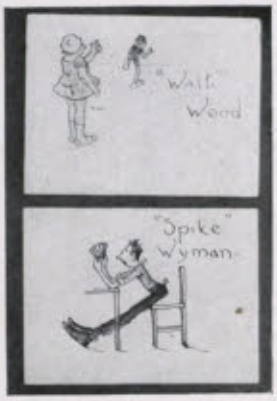

That young social bounder named Whitney,
Who always is present at teas,
Wouldn't now deign to ride in a jitney,
It gives him such cramps in his knees.

A party (Yale, Harvard and Tech)
Was nifty and also select,
The stories Ham told
Knocked the others out cold.
They brought Mr. Wood home a wreck.

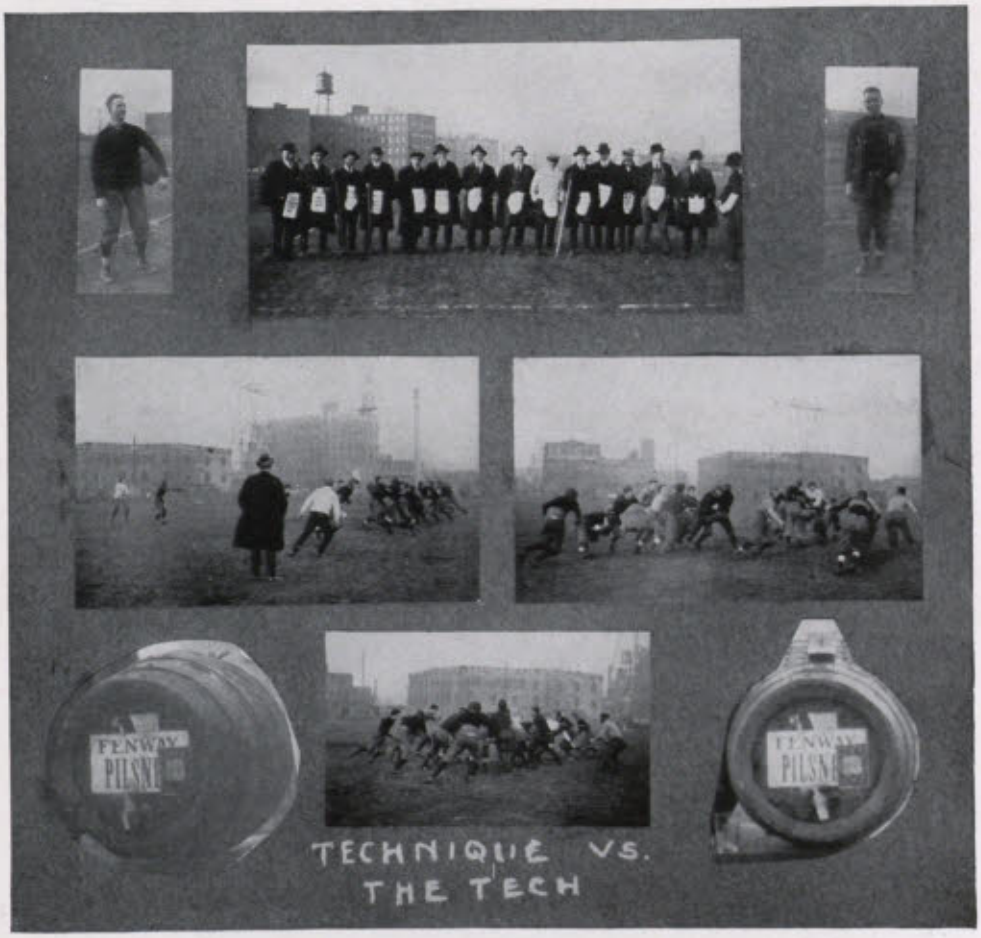

Jack Wood, Tech's husky athlete,
Could take Frank Gotch clean off his feet,
He's hardy and strong,
Could bust a shoe hawn,
It's all 'cause he eats Shredded Wheat.

Walt Wood is some boy, let me state,
With a guy he will sure keep a date,
But once let the women
Try to get him in swimmin',
He will beat it like Hell for the gate.

Spike Wyman, that long-legged joker
With a build like an ossified stoker,
Played a game that was mined
And drew six of a kind,
And he still says he never played poker.

EXCHA

The Technology Monthly is a magazine of the highest standard of those that POLYANA exchanges with. Every department is well represented and its stories are of the best that we have read in any school paper. It is a magazine that Harvard can boast of as an ideal paper.

INQUISITIVE FROSH: "What would happen if you tried to play a cornet with your mouth full of water?"

D. W. MAC., '18: "You'd get liquid tones."

GENERAL
INFORMATIO

THE Institute has a total registration of 1900, the largest in the history of the school. Each of the three upper classes has shown a marked gain in membership; the number of candidates for advanced degrees has increased from 43 to 67.

The American students come principally from the North Atlantic States, over 1400 living in that section. The foreign students number 125, or approximately 6½ per cent of the total registration. As was the case last year, the Chinese delegation is the largest of the foreign groups. Norway, Bulgaria, Italy and Portugal are well represented, although the total number of European students has diminished.

There are 308 members of the faculty, an increase of 17 over last year. The ratio of instructors to students is 1: 6.8.

Of the 293 men who were awarded degrees in June, 1915, 102 entered from other colleges, 54 of them having previously been awarded various degrees. The Class of 1915 graduates brought the total number of alumni up to 6000.

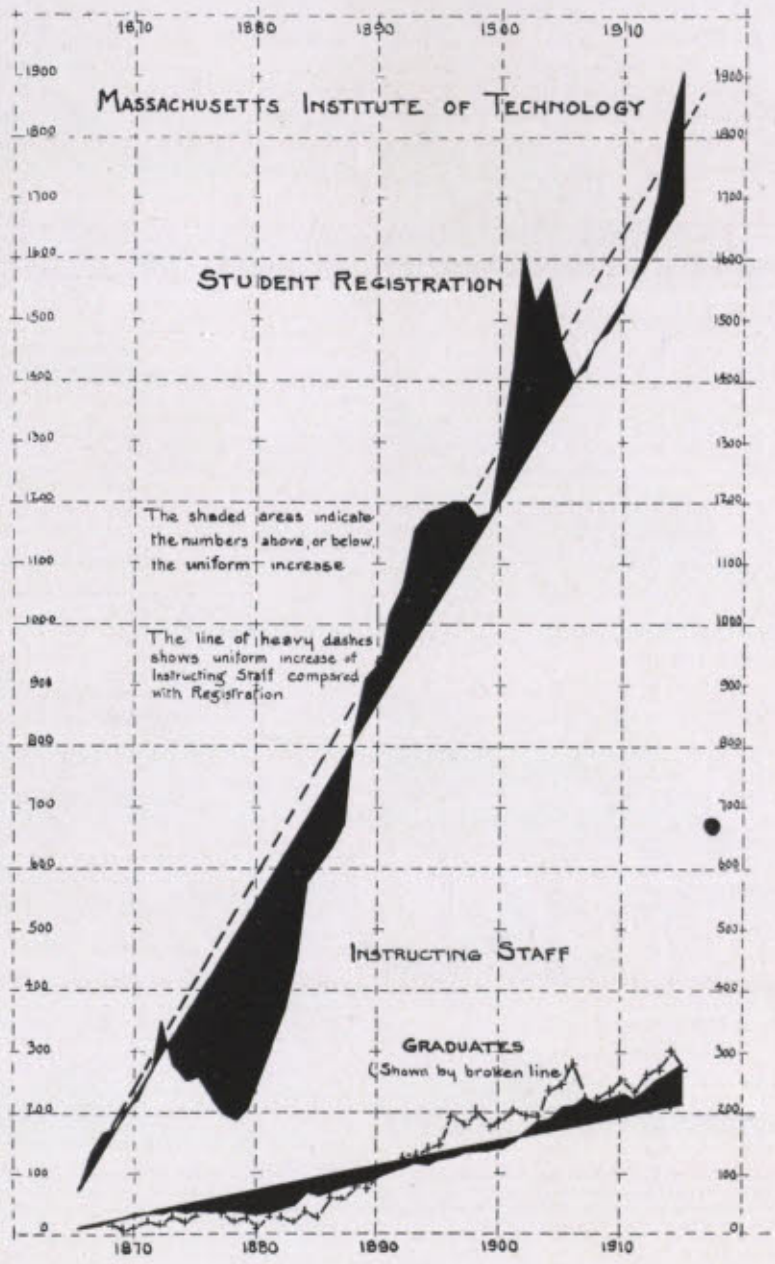

The registration of women students has increased from 14 to 18; these are distributed among the departments of Chemistry, Architecture, Mining Engineering, Chemical Engineering, and Biology and Public Health.

Mechanical Engineering, with an enrollment of 279, leads the other courses in respect to numbers. There are 235 embryo Electrical Engineers and 188 incipient Civil Engineers. The course in Engineering Administration increased its enrollment from 57 to 99, excluding first-year men.

Nineteen eighteen is the largest class, 481 men being on the Treasurer's list.

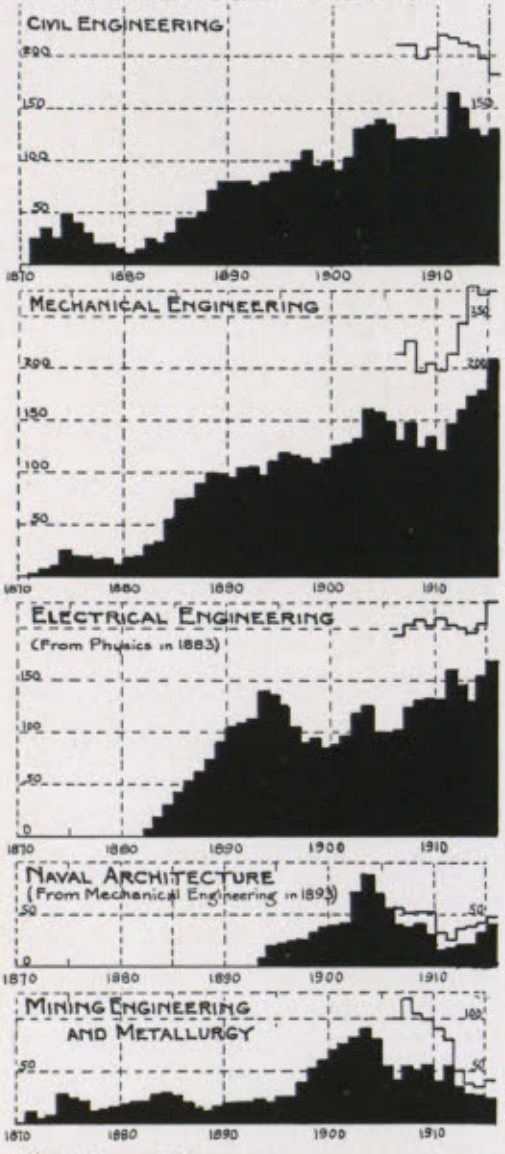

The number of students receiving scholarship aid from the Institute, the State, or both, is 324, making a percentage of 17.3, or one out of every six men. The Institute funds distributed for this purpose amounted to $24,437.50.

The total gifts to the Institute during the past year totalled $877,814.99.

STUDENTS OF THE UPPER THREE CLASSES

NOTE. PRIOR TO 1906 STATISTICS WERE PUBLISHED OF REGULAR, OR CLASSIFIED, STUDENTS; SINCE THEN THE NUMBER OF UNCLASSIFIED, FORMERLY CALLED SPECIALS, HAS ALSO BEEN REPORTED, HENCE THE UPPER AND LOWER RECORD AT THE RIGHT OF EACH PLOT. THE UPPER RECORD SHOWS THE COMPLETE REGISTRATION ABOVE THE FIRST YEAR. STUDENTS ARE NOT SEPARATED INTO COURSES UNTIL AFTER THE FIRST YEAR. THESE STATISTICS ARE AS OF THE FIRST OF NOVEMBER OF EACH YEAR.

WARNING!

IN promulgating your esoteric cogitations, or articulating your superficial sentimentalities and amicable philosophical or psychological observations, beware of platitudinous ponderosities. Let your conversational communications possess a clarified conciseness, a compact comprehensibleness, coalescent consistency, and a concatenated cogency. Eschew all conglomerations, flatulent garrulity, jejune babblement and asinine affectations. Let your extemporaneous descanting and unpremeditated expatiations have intelligibility and veracious vivacity, without rhodomontade or thrasonical bombast. Sedulously avoid all polysyllabic profundity, pompous prolixity, psittaceous vacuity, ventriloquial verbosity, and vaniloquent vapidity. Shun double-entendres, privuent jocosity, and pestiferous profanity, obscurant or apparent.

In other words, talk plainly, briefly, naturally, sensibly, truthfully, purely. Keep from slang; don't put on airs, say what you mean, mean what you say, and

THE SYMBOL OF EFFICIENCY
FOR THE USERS OF
EXPLOSIVES

EFFICIENCY of material and application of proper methods will achieve success in engineering fields.

The selection of explosives is a most important procedure and largely determines the progress of the work, the safety of employes and affects the cost of operations.

For the graduate engineer, there is one way to avoid improper selection of explosives,—state the conditions governing prospective blasting operations and ask us for recommendations. You are sure of obtaining practical data from those having a wide field practice and therefore knowing the particular explosive best adapted to your work.

OVER 100 YEARS' continuous progress in powder making is an assurance of the adaptability and efficiency of DU PONT EXPLOSIVES in any engineering work.

Our HIGH EXPLOSIVES' CATALOG is an illustrated, practical and instructive book giving valuable and necessary information to those having the selection and application of explosives in charge. The book is FREE, write for it.
