To the Memory of

RICHARD COCKBURN MACLAURIN

ADMINISTRATOR
SCHOLAR
LOYAL CITIZEN OF THE UNITED STATES

"HIS LOYALTY TO THE INSTITUTE AND TO ITS SPIRIT WAS COMPLETE. HIS EFFORTS ON ITS BEHALF, COVERING TEN TRYING YEARS, HIS ABSORPTION IN ITS WELFARE, HIS ABSOLUTE SACRIFICE OF HIMSELF TO ITS SERVICE, CULMINATING IN HIS DEATH IN THE VERY HOUR OF HIS TRIUMPH,—ALL THESE TAKEN TOGETHER CONSTITUTE THE HIGHEST TRIBUTE WHICH COULD POSSIBLY BE PAID BY ANY OFFICER TO ANY INSTITUTION."

ALUMNI

THE WORLD BOOSTER

THE ALUMNI ASSOCIATION

THE ALUMNI ASSOCIATION of the Massachusetts Institute of Technology was founded in 1876. Professor Robert H. Richards was the first President and Professor George S. Swain was the first Secretary. The Association continued in the original form of organization, having but one general meeting of the Association yearly for 33 years.

In 1909, the Association of Class Secretaries, which had been formed by calling together the secretaries of the various classes, conferred with the Executive Committee of the Alumni Association in regard to forming a more formally organized governing board of the Alumni Association. As a result of this conference, the Constitution of the Alumni Association was changed and it was provided that an Alumni Council be formed which is made up of representatives of each of the classes, of ten representatives at large—five of them being elected each year for two years, with the five latest living ex-presidents and an executive committee of the officers of the Association with four additional members—two being elected each year.

Since the foundation of the Council, monthly meetings during the school year have been held. Important problems have been considered by the Alumni Association through the Council. It has proposed the establishment of certain courses at the Institute. It has arranged for a summer camp and has, through a committee, furnished the Institute the Summer Camp of Civil Engineering.

Another function of the Alumni Association is to nominate each year three term members to the Corporation, who are elected by the Corporation and serve for five years as representatives. The Association presents to the alumni twice as many names as there are vacancies to be filled and by letter ballot the Association nominates as many as there are vacancies and presents them as nominations of the Alumni Association to the Corporation for election.

A subsidiary organization of the Alumni Association is the Technology Clubs Associated, which is an organization of Local Societies and it is planned that annually reunions be held at different points, but every five years an All-Technology Reunion be held at the Institute.

THE TECHNOLOGY REVIEW

THE TECHNOLOGY REVIEW was founded in 1899 as the official organ of the Alumni Association and the cumulative record of the more important events in the history of the Institute. The emphasis has, however, been usually more in the direction of keeping the members of the Association in touch with each other. For this reason a great deal of space is usually given to the class notes and the news sent in from the local associations throughout the United States and, indeed, the world.

The first editor of the Review was Arthur Thomas Hopkins '97. Others who have edited the paper are James P. Monroe '82, now secretary to the Corporation; Walter Humphreys '97, and until the summer of 1917, "Ike" Litchfield '85, who was for several years, as Field Secretary and general promoter of Tech spirit, one of the best known and most popular of the Alumni. After his splendid work in organizing the Jubilee Dedication Reunion of 1916, on the outbreak of war he went to Washington as an important member of the War Labor Board. Fortunately he is back among us for the 1920 All-Technology Reunion.

On his resignation the present incumbent, though not a Technology graduate, took charge and has carried it on since with the constant and valuable assistance of many of the alumni. The Review, during the war years, found it impossible to carry on its former scheme of monthly numbers, so it was cut down to a quarterly, which attempts to sum up and digest all that is of immediate or permanent importance either at the Institute or in the alumni world. The current news was left to The Tech, under alumni supervision, to deal with.

For economy, a year ago, the Review adopted a new type page, smaller type, wider margins, less decorative white paper. But the activities of the alumni have grown to such an extent, during the war and since, and there is so much to record every quarter, that the issue is at present nearly double in number of pages of preceding editions. The college year of 1919–20 gave the Review a peculiarly important task of furnishing some of the publicity and recording the progress both for the Educational Endowment Fund campaign, and for the All-Technology Reunion in June of this year, in connection with which The Alumni Association issued the Technology War Record Book and a new list of occupations and addresses of former students. The numbers at Technology are growing so, the recent classes of the alumni display so much activity, the whole question of covering the field is assuming such importance, that in the fulness of time it well may be advisable to consider an Alumni Weekly, like the other great Eastern universities. But until then the Review follows with increasing difficulty the good old, proved traditions of "Jimmie" Monroe and "Ike" Litchfield.

ROBERT E. ROGERS, *Editor.*

MR. GEORGE EASTMAN

TECHNOLOGY'S marvelous development of the past decade has been due, fundamentally, to the plans and efforts of but two men,—our late president, Dr. Maclaurin, and Mr. George Eastman. Dr. Maclaurin had visions of what the future Technology might be and should be, and by laying them before Mr. Eastman he found the way by which these ambitions were to be realized. Mr. Eastman is a man of broad vision, interested, from his position in the photographic world, in the advancement of science and industry. He has long been aware of how much might well be accomplished through greater educational facilities. Because he believed in the national character and the world-wide reputation of the Massachusetts Institute of Technology, he chose to help President Maclaurin in the realization of his dream. At one time he stated that he "had formed the opinion that there was no other place where a large sum of money could be invested with more effectiveness."

George Eastman

Therefore in 1912 he lent his first aid by contributing two and one-half millions of dollars toward a building fund, which made possible our present magnificent plant. He clearly demonstrated his disinterestedness by laying down the binding condition that his gift be anonymous, assigning himself the alias of "Mr. Smith." By this title only has he been known to the public in connection with his benefactions to the Institute until this present year.

While construction of the new buildings was under way, he added a million to his first gift to ensure that a good job be done. At their com-

pletion he contributed a total of $600,000 for new equipment. One-half of this amount was given under his own name upon personal solicitation by a member of the corporation.

Since facilities were so much greater than those previously afforded on Boylston Street, Mr. Eastman realized that expenses of operation would necessarily increase in proportion. Accordingly, he offered the gift of two and one-half millions for endowment purposes, if the alumni should raise three-fifths as much. This they did. When the war came, with hard times for most educational institutions, Mr. Eastman was wide-awake to the prevailing conditions. He knew how vital it was to the nation that establishments such as Technology be kept operating at the highest efficiency, so he added $400,000 to the endowment fund.

Because the war had taught the entire world the tremendous importance of technical methods, and because the war had produced inflated costs of operation, Mr. Eastman saw that the post-war period was a time for further definite action. It was in June of last year that he notified Dr. Maclaurin of his willingness to give a sum of four million dollars for endowment if a like amount were secured in a reasonable length of time, and at least three millions of which should be pledged before January 1 of the present year. With this offer came the promise of casting off his assumed title of "Mr. Smith" if the conditions were all properly met. Thus he precipitated the greatest campaign for funds ever before conducted at the Institute.

Dr. Maclaurin, at the termination of this recent campaign, stated what he thought to be the most prominent reasons for Mr. Eastman's preëminent support of the Institute. They were as follows:

His appreciation of the needs of technical education of the highest type.

His belief in the value of scientific training for executives.

His recognition of the duty of a man whose business is national to support national institutions, and not only local ones.

His recognition of the national character of Technology.

Gifts totaling eleven millions of dollars certainly are most practical demonstrations of the absolute faith of a man of broad visions and great genius in the growing needs and values of technical training, and as such should be a decided stimulus to every undergraduate within the walls of Technology.

THE ENDOWMENT FUND CAMPAIGN

THE conditions prescribed by "Mr. Smith" with his offer of four millions for endowment purposes immediately aroused to action those in intimate touch with the affairs of Technology. The summer was spent in laying plans which would ensure that his conditions were properly met. This involved the pledging of at least three millions of dollars before the close of the year, with a fourth to be added in the half-year following.

MERTON L. EMERSON

The first step taken was the appointment of a Corporation Committee, headed by General duPont '84, and including Charles L. Hayden '90, as vice-president, Charles A. Stone '88, as treasurer, and Theodore N. Vail, Everett Morse '85, President Maclaurin, Otto H. Kahn, Edmund Hayes '73, and Merton L. Emerson '04.

The virtual beginning of the campaign itself dated from the middle of October. At that time the Alumni Committee was appointed. Merton L. Emerson '04 was selected as chairman, the other members being Arthur R. Stubbs '14, Edwin S. Webster '88, I. W. Litchfield '85, Professor W. H. Walker, William H. King '94, Frederick K. Copeland '76, and Bradley Dewey '09. General offices of the Fund were opened in the Institute, and a working organization was immediately set up under the direction of H. E. Lobdell '17.

The one principal idea of the campaign, immediately placed before all workers and the alumni in general, was that of "Give and Get." The entire responsibility for the success of the campaign rested with the alumni. It was vital that what could not be given to complete the total had to be gotten from interested outside individuals and organizations. Thus the work was divided, I. W. Litchfield conducting the "Give" side from the office, and the "Get" side being under the direction of W. H. Walker. The work in the Middle-Western districts was greatly stimulated by the visits of President Maclaurin and Coleman duPont during a two weeks' trip at the opening of the drive.

On the evening of January 10th the alumni celebrated the successful termination of the campaign at a banquet held in Walker Memorial. This jubilee occasion proved to be the mightiest gathering of graduates that has ever occurred, fifteen hundred being present. Addresses were made by many prominent alumni and friends of the Institute, including several

who had been actively identified with the Fund. General duPont, president of the Alumni Association, presided.

The evening possessed one feature of greatest disappointment. This was the inability of President Maclaurin to be present at this event which marked the crowning glory of his career. At the very time, he was confined to his bed, fighting a fatal illness, though its serious nature was not then realized by any one.

Dr. Maclaurin's address was read to the gathering by Professor Sedgwick. At the very close of the program, General duPont made the announcement which all had been so eagerly awaiting,—"that Mr. George Eastman was 'Mr. Smith.'"

The campaign thus completed, all within a period of only seventy days, is a most certain credit and honor to the legion of loyal alumni and friends who gave of time, energy, and means. They had a huge job to perform—and they did it!

The Division of Industrial Coöperation and Research

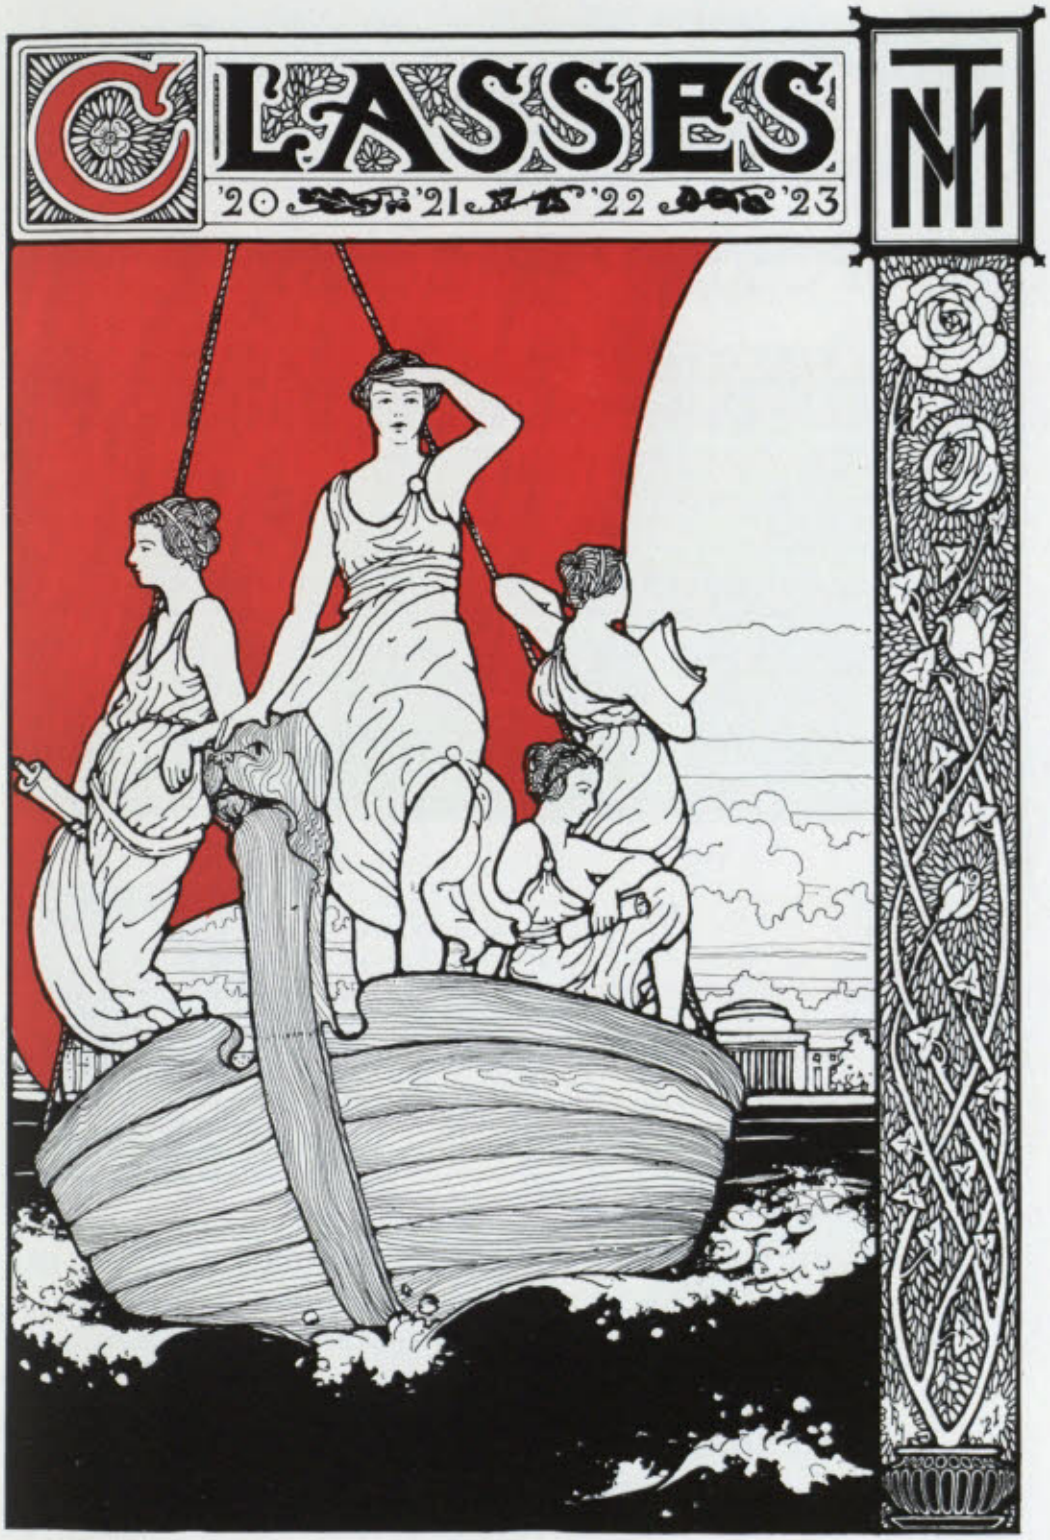

Concurrent with the building up of the new Endowment Fund was the inception of the Division of Industrial Coöperation and Research, frequently characterized as "The Technology Plan." This new department is designed to act as a clearing-house for industrial knowledge. Through it, all the resources of the Institute are made available to American industry. Definite contracts between interested manufacturing concerns and Technology are entered into. In return for the payment of agreed-upon retaining fees, the concerns are enabled to consult members of the Institute staffs relative to their engineering and scientific problems, make use of the libraries, have investigations and tests performed in the various laboratories, and possess definite touch with the trained engineers which the Institute produces.

William H. Walker

Dr. William H. Walker, former head of the Research Laboratory of Applied Chemistry, has been placed at the head of this important new work. His earlier accomplishments make it evident that he is the right person for the position.

The adoption of the Plan is well considered the most vital step the Institute has ever taken since its founding. Through real coöperation and closer contacts between the two greatest factors of industrial life,—the training school and the manufacturing plant,—there should be no limit to the development and real achievements which result.

THE history of the Post War Class of 1918 dates no farther back than the official opening of Technology in October, 1919. The association of its members with Institute life, however, began in 1914, but was interrupted at the beginning of the war in 1917.

Returning from England, France, Russia, Germany, and various localities in the United States and its colonies after completion of their government service, fifty men, comprising approximately fifteen per cent of the

POST WAR CLASS OF 1918

former class of 1918, returned to the Institute to obtain their degrees. To perpetuate the ties formed several years back in the original class, the "Post War Class of 1918" was organized, and the first meeting was held on October 23, 1919, at which officers were elected. Several successful dinners were held in the Walker Memorial on subsequent dates, which were also attended by alumni members of the class.

Twenty-two members of the class held commissions in the Army and Navy at the time of discharge. Twenty members served overseas.

The Post War Class of 1918 holds in fond memory those former classmates who sacrificed their lives in the Great War.

WHO'S WHO AND WHY

Each year the Junior class adds its list of notables to Technology's Roll of Fame. We, of 1921, hereby bring forth our list of "Blue-Book" eligibles, together with notation of certain popular opinions. These facts and fancies were all properly determined by official ballots cast by all of the liver members of our class.

Who of the Class of 1921 is

THE MOST POPULAR—WITH THE FELLOWS?

There was no doubt about this—it's Mish Bawden.

THE MOST POPULAR—WITH THE LADIES?

Lots of competition for this great honor! Some admitted personal distinction for themselves. Harry Junod "thot that he was till 'she' got engaged." However, they say that Wallie Adams and Scripps Booth have both smashed many a little heart in their time and are still in the game.

THE MOST POPULAR—WITH HIMSELF?

J. T. Peirce, Dick McKay, and A. L. Silver put all other possible candidates out of the race.

THE MOST LIKELY TO SUCCEED?

W. R. Barker wins the count against scattered votes.

THE MOST UNLIKELY TO SUCCEED?

Possibilities seem infinite. Any and all "C" chasers were popular candidates, especially those birds who bewail their lowly fate in rating only six out of a possible eight.

THE MOST PIOUS?

Larry Conant got a lot of support here, with all the Des Moines delegates trailing him.

THE MOST WORLDLY WISE?

What Johnny Starkweather doesn't know about hasn't happened yet, that's all!

THE MOST CHEERFUL LIAR?

No uncertainty here! Win Dean caused a landslide vote. Win even admits that he is clever at it.

THE BIGGEST DUB?

Nine-tenths of the fellows claimed this quality all for themselves. Strange how the 'Stute can create that feeling in one!

THE MOST SERIOUS-MINDED?

No one voted for him, but the fellow who said that dominoes was his favorite indoor sport should rate the vote on general principles. J. G. Lee got a big vote, with J. Vanhorn Whipple's matured mustache shoving him in.

Who of the Class of 1921 is

THE MOST LIGHT-HEADED?

A lot of rare wit was spilled about the blondes, among them Blomquist and Whitehead!!

THE BEST SPORT?

Irving Daniel Jakobson—"always happy Jake"—scores highest. They also say that Ken Sutherland takes lots of kidding!

THE BIGGEST SOREHEAD?

Hanson, C. E. Thomas, Vaupel. Take your pick.

Who Is Our

BOSS POLITICIAN?

From the way Rollin Officer corralled the decisions we have a hunch that he could swing even a South Boston vote. And they say that Bill Young can engineer things pretty well, too.

CHAMP ACTIVITIES MAN?

Paul Anderson never seemed to have any regard for the Point System. Dick Spitz kept everything going except his course at the 'Stute.

HOT-AIR EXPERT?

Egbert W. Olcott receives a hundred per cent. Course VI. vote. John Gray runs strong with the mechanical gang. Win Dean isn't the last man on the list, either.

ARROW COLLAR AD REPRESENTATIVE?

It seems to be general opinion that J. H. Bayle, Dwight Stagg, and Dick Lee should all be strongly recommended to the collar company out in Troy.

JOY-KILLER?

Who can blast more young, tender hopes than Sir Walter?

BEST WELLESLEY HOUND?

Paul Anderson has a B. & A. train schedule tacked up near his telephone. Bruce Rogers is about one twelve-trip ticket behind him.

BEST COPLEY HOUND?

Henry Landis seems to have more "nights" to his credit than anyone else. Art Rogers, Harry Junod, and J. Trevor Peirce are also observed down there every now and then.

MOST FAITHFUL STAGE-DOOR SENTINEL?

Those who saw I. D. Jakobson and Wallie Adams at the Interfraternity dance say there's no doubt about this. Jake insists that the Gaieties was a "nice" show, too! 'Tis said that Miles Zoller, Scripps Booth, and Pip Coffin are also faithful.

BEST ATHLETE?

Flip a jit between Mish Bawden and Ted Spitz.

Who Is Our

WORST ATHLETE?

We are told that Dick Spitz left building 2 as the afternoon car left Harvard Square—and he missed it!

CLASS BEAU BRUMMELL?

J. Henri Bayle wins this without disturbing a hair.

CLASS JOHN BARLEYCORN? (in ye olden days)

The vote revealed a long, long line of eligibles. Too many to print! Some say inquire from the Beaver Club gang.

CLASS BOLSHEVIST?

Canzanelli, Creel, and Lurie won most of the laurels!

* * * * * * * *

WHAT'S YOUR WILDEST AMBITION?

What could be wilder than a dream of graduating—some day? Some few expressed rather tame desires like inheriting a million or getting married!

GOT A GIRL?

36 per cent. said, "Yea Bo."
24 per cent. said, "Not one—several."
24 per cent. said, "Never can tell."
16 per cent. said, "H - - - No!"

WHAT DO YOU KNOW ABOUT WELLESLEY?

"Ask the man who knows one." "You'd be surprised."

Murray Jones insists that you are not always out of luck if you miss the 10.03 train.

WHO WAS ENTROPY?

Few there are who really know him. Strange! Some have vague premonitions that he's somehow related to either Eutectic, Double Ef, Berry, or Nero.

EVER TAKE A NAP IN HEAT LECTURES?

Not peaceful ones—nightmares!

THINK YOU'LL EVER BECOME AN ENGINEER?

Many thought there might be a fair chance of acquiring the title if given a job on the New Haven. The others didn't even think of that possibility.

ARE YOU SUPERSTITIOUS? DO YOU BELIEVE THAT THE NUMBER 10 BELONGS IN THE SAME CLASS WITH 13 AND 23?

There were but very few who displayed no knowledge of that ominous creation of the faculty,—Vote Ten. Just a few little unlucky breaks, they say, plus The Vote seem to be sufficient to cause sonny's hasty departure for home and family.

HOW MANY HOURS PER DAY DO YOU STUDY? HOW MANY FOR LOAFING?

Beyond a doubt these Juniors are industrious fellows. They can generally find something to study every evening. Bill Young says that his study sessions begin at either 8.00 or 8.15 P.M., depending on where he goes, you know. The average time for grinding figured at about five hours. The class appears even more able at loafing, accomplishing a lot of it in "the barn," 3–270, 4–270, 3–440, or 10–250.

What's Your Favorite

BEVERAGE?

Some of the fellows claim that their favorite "ain't no more." But we got a lot of suggestions, too. Wood alcohol is good to finish a little party with. Then there's Zepp's Hair Tonic (only 56%). Bevo is good to fall back on.

HOBBY?

Seben-come-eleben, or the old reliable Vice and Bench work.

INDOOR SPORT?

How human they are after all! By those "family firesides" (minus *most* of the family), and— Oh! Man!

COLLEGE, BESIDES TECH?

Smith wins by a big lead, followed by Sargent, Wellesley, Vassar and Yale, in the order named.

STUDY?

Women, Astronomy, or Polly-con. And incidently we would like to know what Bill Young knows about that Modeling class down at Rogers.

LITERATURE?

"The Voo Doo" first, then "La Vie Parisienne" and "The Tech."

PROF?

The old stand-bys,—Eddie Miller and Doc Talbot.

HAUNT?

The Lenox Grill used to be. Some know that the corner of Tremont and Boylston is good with favorable zephyrs blowing. Others say Wellesley suits them.

SHOW?

"Tech Show" ahead of anything else on the boards. After it comes "The Follies," "Sinbad," and "The Unknown Purple."

ACTRESS?

Our Freddie Britton takes the first honors against a whole stage full of notables. And when Norma kisses - - - - !!! Julia Sanderson and Ina Claire are not without their admirers, either!

DUOET VIGINTI

ON the tenth of October nineteen eighteen there was found in the main lobby an infant. Since no one called to claim it and we took a liking to it, it was adopted into our midst and christened Duoet Viginti. Doubtless you are all familiar with him (he proved to be a boy), for he is the largest child that has as yet been adopted by the Institute, and so far promises to become one of her most favored sons.

Although nurtured in infancy on the food of war (S. A. T. C.) and subject to all the exposures and hardships attendant upon such circumstances, his growth has not been stunted in the least. In fact historical data qualifies the statement that in January nineteen nineteen, as a result of the Junior Freshman episode he gained some three hundred "grams" (scientifically speaking), and last fall we were told that he had gained some two hundred more.

The stimulation of the Junior Freshman episode drove him to queer antics which resulted in the disapproval of his kind benefactor, but it created in his brethren a great esteem, for his acrobatic qualities had placed his emblem in those lofty positions envied by all.

Merry always and full of cheer, no wonder his first birthday banquet was a glorious feast. In mentioning this, it were impossible to omit the customary ceremony whereby he was initiated into the mystery of Institute life and led forth to be tempted into that city whose name has permeated a world, and the mention whereof has quickened the heart of many a student of culture. For a son of Technology to be tempted and not fall into the wiles of that city—! Suffice it to say that he was a credit to the name he bore and did justice to those who had trodden the wayward path before him.

"Duo" gives great promise of becoming a famed scientist, for at an early age he conclusively demonstrated Darwin's theory that humans, when young, like their brothers who walk on their hands, have a grip of tremendous tenacity when tugging at a rope. In this connection he revealed not only his ability for leadership but also a cunning appreciation of opportunity by utilizing the efforts of his older brother to prove the experiment, and taking advantage of the large gathering on field day to demonstrate it. At that evening's entertainment he was accorded the seat of honor, the "highest" in the place, and he delighted himself at intervals by showering the noisy family below with miscellaneous missives.

Browned and baked by the sun on the Charles and the proud master

of a differential, we find Duoet after a pleasant summer the host to "Skidoo," an awkward biped mailed to the Institute for experimental purposes. The first month was spent in impressing upon "Skidoo" by means of a rope and a shell, and those conveyances of physical manifestation that serve to thoroughly impress a youngster, how vital he was to the Institute, and how necessary—for the development of "Duo."

At his second birthday banquet with joyful singing to the tune of "Thirteen to Nothing" he celebrated the complete field day subdual of "Skidoo," and solemnly dedicated his abilities to the interest of the Institute. Needless to say the affair was a great success and we are completely justified in quoting those immortal words, "A good time was had by all."

We find that his promises were not vain. Seasoned by experience and nourished by victory his zeal was paramount. He continued to pursue his course of indomitable leadership which was so thoroughly established the year before when he took the part of leading lady in a prominent musical comedy and demonstrated to the appreciation of contemporaries his aquatic ability. The wrestling and gym teams seized the opportunity to acquire a peerless leader and they chose him as their captain. To him also were intrusted the offices of general manager and treasurer of the Technology Musical Clubs, and the clear tone and quality of his playing was everywhere remarked. As an "Ad Chaser" he has no equal, for nearly all the advertising matter which appears in the latter part of this volume has been secured through his efforts. Satisfied by his keenness and business ability the swimming and wrestling teams elected him to determine their plan of campaign, and whatever would have become of The Tech without his services is painful to contemplate.

None daunted by participation in strange fields he continued to exhibit an ever increasing skill in swimming, his merits echoing even to foreign shores. We note with satisfaction that his was an ambitious and venturesome nature, ever active and yet intelligently reflective.

In closing this brief biographical sketch we are tempted to paint a vivid future for our hero but we refrain, modesty compels us, being so intimately related to him. We have decided that it were better far for him to convey himself by his actions, than for us to boost him to the skies. So with a sincere belief that we have said no more than fact has merited, we close, endeavoring to encourage him with our interest and religiously determined to do all in our power to assist in elevating him to the lofty pedestal of which we believe him worthy.

EXTRACTS FROM A FRESHMAN DIARY

Dear 1924:

The present Freshman Class has decided to furnish a little fatherly advice for the future entering classes, to give them an idea, even though perhaps a vague one, as to what may befall them. For this reason the following has been preserved:

October 1919:

On the 6th, from the four corners of the globe the cohorts of 1923 gathered within the bounds of the grand and glorious Institute nearly seven hundred strong. It was the largest Freshman Class in the history of the Institute and has every indication of being the best. We soon settled down in our new surroundings to prove for ourselves whether or not the rumors we had heard (as to studies, etc.) were true.

However, we were not allowed to pursue this pastime too closely for at the "All Technology Smoker," on the 17th, we were treated royally and brought to realize the size of Technology and the opportunities of the various activities.

Unfortunately, because of the smoker and the police strike, our banquet was postponed. This took away a chance of becoming better acquainted with one another and tended somewhat to keep our class spirit under cover.

November:

Things went exceedingly well until the seventh (Field Day). The day was a glorious one (for the weather-man). Mathematically we were completely swamped, but that was not accomplished without a hard fight (several of them in fact, not scheduled) and a kind heart. The tug-o'-war, relay, and football teams, although very good, were satisfied to remain a few steps behind, but it was the crew race which furnished the thrills. We had been especially well coached for this race, so that a spectacular spurt, beforehand arranged, made the finish so close that many of the onlookers did not know who had won, and stood beseeching the judges to announce the winner, but they had also been fooled and announced erratically that '22 was the winner.

Nevertheless we swallowed our pill without crying and made the best

of it. Some sought to soothe their injured feelings by getting orchestra seats that night at the "Gaieties," with the Juniors and Seniors. (Lookout, '24, that's bad business.) The chorus girls, however, seemed to sympathize with us, for during the closing song of one of the acts they appeared with our class caps on. This caused considerable commotion among the Sophomore ranks. (Perhaps they were wishing that they had lost.)

It was hard to settle down again after such a stirring up, but soon a little card marked "Duplicate" rudely awakened us. Soon the call for candidates for our swimming team was made, and many enthusiastic competitors turned out, showing that '23 was ready to do its share in upholding Technology's honor, even though, by a new ruling, Freshmen are excluded from all varsity squads.

December:

We held our elections this month and chose our Shah (R. P. Shaw).

Many of us also received our first taste of real Technology exams, and for every one it was not a particularly sweet taste. They had some of us scared, and much modern midnight oil was consumed in preparation. However, the exams were disposed of in one way or another and the first lap of our four-year(?) journey was completed.

The rest of the winter, and indoor, sport teams were called out and a good start made.

January, 1920:

We returned from vacation with a few of the originals missing. (It was only a few because of a new faculty ruling.) However, this depletion was more than covered by about one hundred Junior Freshmen who had chosen 1923 as their standard.

February:

More "Duplicate" and disappointment—they seem to go together.

It has been decided to hold our postponed banquet early in March.

A call for a basket-ball team was made recently, but has not as yet been given a test. The rest of the athletic teams have fared well, and it seems as though '23 has firmly established itself as an active part of the Institute other than merely the student body.

We hope that this short missive will be of aid to some in preparing for similar ordeals. We commiserate with the present and future students who are unable to be members of the glorious class of 1923.

Very sincerely,

1923.

SUMMER CAMP

SUMMER CAMP

YOU know, fellows, this is supposed to be a brief history of the main events up at Summer Camp, where, when the end of the stay has come and each fellow thinks over the happenings during that time, he cannot but be glad that he is pursuing a course here at the Institute that requires his being present there.

It is a certainty that you won't find a single one of the hundred-odd fellows that boarded the train, August 4th, 1919, at 10 P.M., who will regret a minute of the time that he put in up there. Some, for *various reasons*, very nearly missed the train, while in the case of others, the *reasons* accompanied them to South Station to bid them a fond farewell.

Immediately on arrival, there was a grand rush toward Camp in jitneys. The Miners, by hiring a couple of canoes in which four of their number proceeded to cross the lake, gained the honor of being the first official arrivals in Camp. Soon after, the crowd arrived in the good old craft "The Tech," chauffeured by Al Stevens himself, and dinner was served. We might here mention that from the very start the main thing in the dining-room was TO EAT, and, sad but true, this had a very bad effect on table manners. Competition started at the first meal to determine those of greatest capacity. Before many moons had risen, however, the Miners had gained this honor undisputed, proving easily their preëminence in this art. For individual honors the race was much closer, since among the Civils were several who showed marked ability along these lines. Four weeks were necessary before this Epicurean honor could be awarded, but finally by decision of Dick Shaw, our high and mighty chef, Carol Stone brought home the bacon to the Camp of the Miners.

There has to be some directing force in every community, so soon after the Camp opened, the crowd was addressed by the powers in charge, and, by the election that followed soon after, the following outfit was picked to hold the high and mighty power:

And baseball! Oh, how they craved it! Every P.M., on completion of the afternoon's work, a crowd would gather on the athletic field, and only the call to dinner could break up the game. There were good players and bad ones, but somehow the interest remained high from the beginning to the end of our stay. A League was formed to determine the champions of Camp. Chairman Delany of the athletic committee picked the teams from those who signed up. Five teams were formed, and, as things resulted, Ed Delany's team romped off with the Championship. Therein lies the mystery still unsolved.

Ed MacDonald was picked as captain of the team which represented Camp in the games with East Machias, etc. Among his men were Eddie Howard, pitcher-extraordinary; Ace Gardner, a wonderful hurler, provided he had a day's rest—which somehow he never seemed to get; Brimblecom, tall, and hard to miss at first; hard-hitting Bill Farrisee at second; Curtin, who didn't miss *very many,* at short; and George Bray, a regular all-around ball-player, at third. In the outfield were Spitz, who has ambitions of becoming a pitcher; Johnson, slow but sure; and Knight, who was much better as Chairman of the House Committee. All in all, they constituted a well-balanced team.

Don't ever let any one tell you that there is nothing to do up there Saturday nights. Just ask Gibson, De Staebler, Rogers, Junod, Smithwick, Loesch, Skilling, Moss, or any one of the others, who seemed always to have important engagements in Machias about twelve o'clock Saturday night, causing them to miss the last boat back for Camp. But, to be fair to these boys, it must be said that the attraction over there was quite some strong; furthermore, it isn't often that one finds a seven-piece saxophone orchestra of the Wiswall type. Oh, no! Never will the names of Kay Gilsen, El Farrell, Edna Crane, Mary Halloway, Florence Nash, and many others, be forgotten.

But not all the dances were held in Machias. To be sure, the drafting-hall wasn't built for a dance-hall, but some very good times were had there, just the same. The girls came over in the boat, some thirty to forty strong, for each event, and the fun began. Professor Luther was always there in full regalia and surely did himself justice with the young ladies. There may have been better dances staged in the history of the Stute, but none more thoroughly enjoyed.

The time just seemed to fly past, and along came Labor Day. On this date, he of aforementioned athletic prowess gains the honor of leaving his name engraved on a silver loving-cup, along with those of great skill

who had gained their laurels before his time. For a time it appeared that Ted Spitz was going to have things his own way, but Harry Junod came into his own after the half-mile race, and, by placing second to Smithwick in the 50-yard swim, brought the points even all between himself and Spitz. One event, that of the underwater swim, remained. Spitz, not being a swimmer, remained out, and Junod did his best to carry off the honors undisputed; but luck was not with him, for, though he swam far and well, his course was not directed in a straight line, and consequently the cup is burdened with two names. But there were others in the competition. Stone showed his ability in the mile and half-mile, Brimblecom had little competition in the high jump, Vepsula showed his aptitude with the shot, while our modest friend Smithwick surprised every one in the swimming events. There were many more entered who did well, and all helped to make the affair a success.

And the Show! Oh, yes, the Show! Tech Show 1920 can find some excellent material in the members of that cast. Let a word to the wise be sufficient. Who doesn't remember De Staebler, Hobey Baker, Rus Johnson, and Ace Gardner, our famous end men, with their wild antics? Just to glance over the noted personages in the cast is surely enough to prove without a doubt the great success of the performance. Read and believe!

One doesn't often have the pleasure of seeing a student cut up a professor's hat in public, as did Herb De Staebler when he failed in his trick to knife Professor Babcock's hat and restore it to its original condition with his magic words. The hall was packed to the limit, and among the

audience were such illustrious persons as Johnny Nash, who made the long trip from his home so as not to miss the occasion. Those who saw the performance were well pleased, and as for those who performed, they too enjoyed it up to the time when they had to remove the blacking from their darkened countenances. Following the show came the Junior Prom of Summer Camp, attended by all, both the students and inhabitants of Machias and East Machias. The memories of that night will live long in the minds of many.

But this history would be a failure were we to leave out that part played by the men who were not students. From Professor Luther down to the kitchen boy, there could not have been a better organization. No one could have done his work as head of Camp better than did Professor Luther. His discipline was strict yet wholly fair, and, as far as popularity is concerned, there was not a better-liked man in the Camp. May those who follow us have the good fortune we possessed. Professors are not professors at camp, as we all know in our contact with Professor Robbins, Professor Howard, Professor Babcock, Professor Hosmer, and Professor Collomore. The assistants were all good fellows, which helped considerably. One must go far to find such fellows as Keith, Hole, Lucus, McCreery, Dawson, etc.; and all deserve a lot of praise for the manner in which Camp was conducted.

The Miners left Camp on September 10th, for their underground work in Vermont, leaving the Civils behind with the feeling that a large portion of Camp had departed.

Thenceforth the drive was on to see what would be the final count for the two months' work, and studying was for the first time really in evidence. Soon the days of exams were over, and after pulling down the tents and discarding the Camp outfit of clothing, across the lake were again borne the returning members of the party, each in the best of spirits, happy that he had been present, sorry to leave, and yet with the desire to get back to the Stute and all that it means in the life of an undergraduate.

MINING CAMP

YOU'VE got to hand it to those Miners. They were a real bunch if ever there was one here at the Stute. Professor Howard would never admit it,—in fact, he ofttimes proclaimed drastically in the opposite belief; but then, he wouldn't have told the fellows they were good even if they had been experts in their line. The bunch all liked him, and it's a good guess that it wasn't all one-sided, either.

The party, fifteen in number, including Professor Johnny and his assistant Griffith, departed from Maine on the tenth of September, much to the sorrow of the Civils, since most of the pep of the Camp departed with the Miners.

Professor Howard was kind enough to grant a day in Boston before leaving for the mine in Vermont. It was a day of days for the boys, and they surely did make their presence known. The whole crowd remained in Boston overnight, except Reg Smithwick, who had some very important business that called him up to New Hampshire,—at least, he said it was business. The one great disappointment came to Harry Junod, who had read about the big "crap games" in the Hub and was just itching to add a little more to his large earnings, but the State Guard had arrived and alas, alack, Harry was doomed to disappointment.

Moonlight on Lake Gardner.

After a six-hour train ride and a long ride in a bus, we arrived at our destination. The following morning we made our first hike to the mine from the hotel, some two miles distant. From then on it was survey, survey, survey, except for the little time at night for sleep and playing cards.

The mine was wet, the hike was long, and none of the party wanted to lug the lunch-baskets. Eddie Noyes, however, was aspiring toward a "C," so he was rather easily influenced at times to help out. Speaking of Eddie, we must mention that his fair friend, Helen Lord, was there in all her glory, which leads to the statement Professor Howard made that "the Miners spoke two languages, poor English and Profanity." Judge the rest for yourself.

Then came the map-making without the drawing-tables. The floor had to serve for this purpose, and the maps proved the fact that when good drawings are desired, situations other than the floor should be found. Then followed the exam. On asking any one of the crowd, you will be told that it didn't take long to pack up after that, and soon the Miners were again on their way back to Boston and the one and only—School.

ATHLETICS

Athletics at Technology

ATHLETIC sports at Technology have always been hampered, but at last they are coming to their own. The Institute at large realizes that we must keep up our prestige with other colleges, this is in the main done by athletics. Nothing can help a college more than good, clean, straight athletics; and this is what Technology stands for in the Athletic World. As with all other colleges, we had to fight our way through the ranks, meeting smaller opponents at first and then expanding until now, when we are recognized as being in the first rank of athletics. We compete against such colleges as Cornell, Dartmouth, Harvard, and Pennsylvania; and though we taste of defeat, may it always be said that Technology goes down fighting.

During the 1919–20 season Technology was very successful in athletics. Her Track Team won the New England Intercollegiate Championship for the third consecutive time. This victory also entitled her to the first leg of the Briggs Cup, which is awarded to the team winning the most championships in the next eight years. Major Briggs is a prominent backer of athletics in general, and especially those of the Institute. The Tennis Team likewise carried off a New England Inter-Collegiate Championship. The Swimming Team has only been defeated twice in five years, and both of these times by Yale University, the Intercollegiate Champion. Our other sports have also more than held their own, and the prowess of Technology along athletic lines is beginning to stand out.

Technology is also striving to establish more varied kinds of athletics, and therefore new athletics are springing up at the Institute. During the last year many athletics that had either been extinct or never in the Institute before were organized and started in good shape. Hockey has been reorganized again, and a fast team has been put on the ice. Basket-ball, Boxing, Fencing, Gym, and Soccer have been started up. These sports are all new at Technology, but they are becoming more and more known, and popular to the Student Body. Unfortunately, due to the large amount of work done by the Undergraduates of the Institute, Varsity Football and Baseball Teams are not put into the field. Nevertheless, Technology may stand very high in an athletic sense by excelling in these other sports.

Technology has always been more or less handicapped by lack of equipment, time, and money. Of these three, lack of time is unavoidable, the work at the Institute must be done; but this is not the case with the other two. Our equipment in general is poor, and athletics are not allowed a great deal of money; but I believe that this difficulty can be overcome by the increasing wealth of the Institute.

It has always been the policy of the Massachusetts Institute of Technology to expand, and this policy should be carried out as regards athletics; and when the time comes that the Institute realizes this, We will stand at the top of athletics in this country.

TRACK

Track Season, 1919

THE track outlook for 1919 was bright despite the fact that several star men were lost, either by enlistment or graduation. Manager Anderson had arranged an attractive schedule, the regular Spring Interclass Meet being the first on the program, followed by a meet with Harvard at home. The team next took the trip to Dartmouth, and then wound up with the New England Inter-Collegiates and the I. C. A. A. A. A.

Spring Interclass Meet The Spring Meet, which is the opening meet of the year, was won by 1921 with a total score of 65 points. The Freshmen and Juniors fought it out for second and third places, the Freshmen winning 41 to 34, the Senior class trailing with 13 points. Rollins '19 was the highest point winner of the meet, winning the 100-yard dash and the shot put, and placing second in the 220. Bawden '21 was another star of the meet, winning the half-mile and the quarter.

Harvard Meet On May 3, Harvard came to Tech Field with a very strong, evenly balanced team. They avenged themselves of last year's defeat by defeating the Technology team 73–44. The star performance of the day was made by Flower of Harvard, who won the broad jump with a leap of 23 feet, 3 inches. In the quarter, Bawden was hard pressed by his team mates, Downey and Ormon, who finished in the order named. Dandrow broke his own record in the hammer throw and won first place from Acting Captain Stevens of Harvard.

Manager Anderson

Dartmouth Meet The team made the trip to Hanover on May 10, to meet the strong Dartmouth team. The Dartmouth team was too strong for Technology, defeating us 85–41. The team was unfortunate in losing four of its star men. Bawden was unable to

run in the quarter and half because of a bad ankle. Dandrow, Nagel, and Poole also remained in Cambridge, due to unavoidable circumstances. Captain Murray of Dartmouth and Downey of Technology had a sensational race in the quarter-mile, the result being a tie. Murray of the Technology team sprang a surprise by defeating Bolles of Dartmouth. Rollins was again the highest point winner of the meet, winning the 100 and placing second in the 220 and shot put. Weld of Dartmouth closely followed him with first in the hammer throw and discus. The meet was run off on a wet track with very adverse weather conditions, and the times were very good considering this.

Brown of Williams in the 2-Mile

Driscoll of B. C. winning the 440-yard dash

New England Inter-Collegiates Technology won the thirty-third annual New England Inter-Collegiates for the third successive time, and won the first leg on the Briggs trophy donated by Major Briggs to the team winning the New England Inter-Collegiates the greatest number of times in eight years. Technology had 37 points, nearly twice as many as the nearest competitor, Wesleyan, with 19½ points. Brown was a close third with 19 points, followed by New Hampshire State with 17½ points. The remaining teams totalled 61 points.

In the track events Rollins won the 100-yard dash, but was beaten by

Rollins in 100-yard dash

Savage of Bowdoin winning the Low Hurdles

Mullane of Brown in the 220-yard dash, Spitz '21 placing third in this event. The quarter-mile was run in heats, and the task proved too much for Downey, for after winning his heat he was unable to place in the finals. Ormon placed fourth for Technology, Driscoll of Boston College winning the race. Bawden's absence was felt in the half as it was in the quarter, for in all probability he would have won the half and placed in the quarter. Bardes placed fourth in the half-mile. Technology's weakness in the mile and two-mile was felt, as we secured no points in either event. Scranton placed third in the high hurdles. The race was one of the most hotly fought of any. All four that placed were within a couple of yards of one another.

In the field events we did very well in contrast to last year's results. Unfortunately Dandrow fouled in all his attempts in the hammer throw. Previous to this he had been throwing some 15 feet farther than the winner's throw. Raymond placed second in this event. We placed no men in the shot put or discus throw whereas we won both first and second place in the discus last year. The high jump was very much Technology's way, for we got nine of the eleven points. Allen won the event, and Frey and Ash tied for second place. In the pole vault, Nagel and Walton tied for first place, while Fletcher and Carter figured in a tie for second place with four other men.

Taking it as a whole the meet was a great success. It was less of a walk-away than last year, and all the events were closely contested. In all Technology scored two first places, tied twice for first, two second places, tied four times for second, three thirds, and two fourths.

Mills winning heat in Low Hurdles, N. E. I. C. A. A. Meet

I. C. A. A. A. A. Meet Technology entered several men in the I. C. A. A. A. A. Meet, which was held at the Harvard Stadium: three men qualified for the finals, Dandrow in the hammer throw, Rollins in the 100-yard dash, and Allen in the high-jump. On Saturday, the day of the finals, we placed two men (Dandrow was second in the hammer throw, and Rollins fifth in the 100-yard dash), giving us a total of five points.

Manager Anderson took charge of the team after Manager Drew went into the service, and the position was well looked after. Manager Anderson is on the Executive Committee of the I. C. A. A. A. A. and besides this, is also president of the N. E. I. C. A. A. The prospects for next year's team seem to be very good, for, now that the war is over, many of Technology's old stars will be returning; besides this the enrolment has increased very appreciably, and a good deal of material should be found from incoming classes. A very attractive schedule is being arranged for next season by Manager Anderson.

CROSS-COUNTRY

1919 Cross-Country Team

Anderson, Mgr. Carpenter Flanders Purcell Stone
MacMahon Dorr, Capt. Murray

THE 1919 cross-country season really started before the school year, as Coach Kanaly had his charges working out previous to the opening of the Institute. The team lost no men by graduation and was fortunate enough to have MacMahon '21, a star of two years ago, return.

The usual preliminary runs and the Wakefield handicap meet were held early in the season. Stone '21 won the Wakefield handicap race with the fastest actual time, and he was closely followed by Murray '20; but unfortunately MacMahon '21 and Flanders '22 with several others lost their course and were disqualified. The times were fairly fast in this meet and gave promise of good results as the season went on.

The first intercollegiate meet was held at Syracuse on October 25, where the Technology team acquitted itself very well, placing third; a duel meet with New Hampshire State followed on November 1, when the Technology team lost in a close meet 23–32. The New England Inter-Collegiates followed this, in which Technology placed fourth. The next week, in the I. C. A. A. A. A., Technology only placed eighth, but MacMahon placed second to Simmons of Syracuse after putting up a good fight all the way. The freshmen had three meets, being defeated by Harvard in a dual meet and placing second in a meet with Yale and Dartmouth, and in their last meet they defeated Dartmouth 23–32. We should have an excellent team

next year, for the Varsity loses only one man by graduation and some of the Freshmen showed great promise of developing into Varsity material.

Syracuse Meet On October 25 the Syracuse invitation cross-country run was held. In all, eleven colleges were represented. Technology did exceedingly well in this contest, placing third to the Princeton and Syracuse teams, and defeating such teams as Harvard, Yale, Cornell, and Pennsylvania. The Syracuse course was a hard four-mile run, the steep hill bothering the runners most of all, but in spite of this the team did very

New England Inter-Collegiates The New England Inter-Collegiates were held at Franklin Park on November 22, Technology placing fourth in this meet. This was rather a disappointment, for the team was thought to have a good chance of winning the meet. MacMahon starred for Technology, placing third and nosing out Brown of Williams in the last yard.

RELAY

1920 Relay Season

COACH KANALY had hoped this year to have an indoor track to run on; and the hangars left by the Naval Aviators had been seriously considered. However, unfortunately this plan did not seem feasible, as the Bursar had some other use for the hangars, and so the old board track was put up behind the Track House. This track is a 150 yard track and one of the fastest of its kind in this part of New England.

The men started training for the indoor season shortly after Field Day and the outlook was very promising, for there were a great number of old men back and so the competition for the teams was very keen. Coach Kanaly selected Spitz '21, Junod '21, Bardes '21, and Bawden '21 for the 390 Relay Team; while Gill '22, Gurney '22, Stone '21, and Hennessey '21 were chosen for the 780 Team.

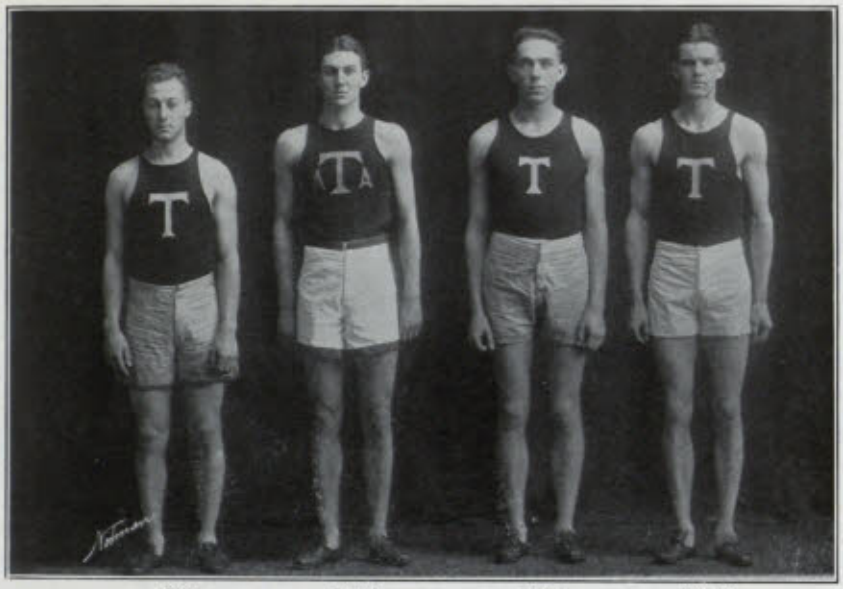

The Boston Athletic Association games saw the wearers of the Cardinal and the Gray in action for the first time. The Dartmouth quartet administered defeat to the Technology long distance team; but the 390 team defeated Harvard, and in so doing the result of the B. A. A. meet was very satisfactory to Technology.

Spitz, Technology's lead-off man, ran a pretty race against Chute of Harvard. The two men raced around almost together for two laps, and then Spitz showed his superior strength and forged ahead and passed the baton to Junod, Technology's second man, with two yards to spare. From then on, the race was never in doubt, as each succeeding Technology runner gained on his Harvard opponent; and Bardes, running last for Technology, had about 15 yards advantage over Wharton, running for Harvard. The time was 3 minutes 14⅕ seconds. This was the third fastest time of the evening. The Freshman did not fare as well against the Harvard Freshman, for they were beaten. The race was a very pretty one to watch, as it was not evident at any time which team would win.

Technology had a team entered in the Millrose games at New York, but unfortunately the night before the race it was found that Spitz was unable to take the trip, and Junod was ill. Poole, one of the substitutes, was also ill, and so it was decided to call off the trip. This was a big disappointment, for after the fine showing Technology made against Harvard it was expected that they would finish well up in the ranks at New York.

The Pennsylvania Relay Carnival, which is to be held in Philadelphia the latter part of April or the first part of May, will have some keen competition for the one mile Intercollegiate Championship of America. Technology hopes to send her four fastest men down there and bring back a championship.

SWIMMING

1920 Swimming Season

TECHNOLOGY had hopes of a new swimming-pool adjoining Walker Memorial, but the Endowment Campaign drive more or less put a stop to the raising of funds for a pool. However, a new pool is a thing that Technology needs, because we have a swimming team that is on a firm foundation of high intercollegiate standing. A pool would attract greater numbers to the swimming squad, and would make swimming conditions better in every way. The Technology team, which had only been defeated once in four years, and then by Yale University, the Intercollegiate Champions, had one of the biggest schedules in the history of the Institute. The first two meets on the schedule, those with Brown and Pennsylvania, had to be respectively postponed and cancelled due to the suspension of Institute activities because of the death of President Maclaurin. The meet scheduled with Amherst for February 6 was also cancelled because the team was unable to go to Northampton, due to the heavy snowfall which blocked railway traffic. The arrangement of this schedule was all due to Manager McKay '21; and McKay has run the entire swimming team in a most efficient manner. He has been asked to take charge of the N. E. I. C. A. A. swimming meet to be held in Boston on March 13. McKay was unfortunately compelled to resign as Manager of Swimming because of his outside duties, but his place is being ably filled by Geckler '22.

Yale Meet The Yale meet was unfortunate from the standpoint of the Technology swimmers, for the strong Yale team defeated them by the score of 39–11. In the opening event of the meet, the relay race, the Yale team led the Technology swimmers to the finish, but the first Yale swimmer fouled by not touching the end of the tank. Because of this, the race was called off; ordinarily the team fouling is disqualified, but under the circumstances (Yale winning by quite a margin), the judges decided that the only fair way was to race over again. Yale then won the race by default. The feature of the meet was the plunging of Meagher of Yale, who broke the tank record by plunging 73½ feet in 60 seconds. Biddell '22 placed second in the 220 yard swim and third in the 100 yard race, while Captain Greene '21 closely followed him in the 220 yard swim. Technology gathered her remaining points in third places. The Freshman Relay Team was victorious in an exhibition race with the Boston Chapter of the American Red Cross.

Springfield Y. M. C. A. Meet The opening meet of the year was held at Springfield against the Y. M. C. A. team on January 31. The result was an easy victory for the Technology swimmers, the score being 36–17, Technology capturing 5 first, 2 second, and 2 third places. Captain Greene '21 won the 220 yard swim with ease and placed second to his team-mate Weber '22 in the 100 yard race. The Relay Team, consisting of McGrath '22, Young '21, Colton '22, and Greene '21, defeated the Y. M. C. A. quartet with ease. Colton '22 won the 40 yard, while Stalbird '22 plunged the 60-foot tank in 49 seconds, winning the event. Ferdinand '21 placed third in the fancy dive.

Wesleyan Meet The team took the trip to Middletown and met the Wesleyan on Saturday, February 7, defeating them 30–20. Technology showed good all-around form and placed in all events. Williams of Wesleyan showed the way to the Technology swimmers in the 40 yard and 100 yard swims. Purinton '22 won the fancy dive, and Captain Greene '21 won the 220 yard swim. Stalbird '22 plunged the length of the tank (60 feet) in the fast time of 39 seconds, easily winning the event; the Relay Team also won their race. The team was scheduled to meet Amherst at Northampton just before the Wesleyan meet, but weather conditions prevented this.

Brown Meet The team met defeat at the hands of Brown in Providence on February 18. The Brown swimmers won the meet 28 to 25, the score being 25 to 20 in favor of Technology until the last event, the relay, which the Brown swimmers took from the Technology swimmers. This and the fancy dive were the only first places that Brown won, for Technology took first in the other four events. Biddell '22 was the individual star, winning both the 100 and 220 yard swims. Captain Greene '21 also won the furlong in the fast time of 2 minutes, 42⅘ seconds, while Stalbird '22 won the plunge with a distance of 65 feet. The strong Freshman Relay Team were again victorious over their opponents, the Moses Brown School of Providence.

TENNIS

Tennis Season

THE Tennis season started early in the year with the defeat by Harvard, Captain Broockmann winning the only match for Technology. Amherst then defeated the team in a close contest, four matches to two. In May, however, the New England Inter-Collegiates were held and Technology was very well represented there. In the singles, Captain Broockmann and Barron reached the finals, Captain Broockmann defeating his team-mate Barron in straight sets. In the doubles, Broockmann and Barron reached the finals giving Technology two points out of the possible three points, thereby winning the Inter-Collegiates for her. The team then met Tufts, defeating them easily 6–0. The trip to Dartmouth was not so successful, Technology losing 4–2. In the final match of the season, Worcester Polytechnic Institute was defeated 6–0, closing what may well be called a highly successful tennis year.

The Freshman tennis team had a very successful year indeed, winning all of their six matches, but one. Elliot of the Freshman team won the annual tournament, which was held in the spring of the year. The team after losing to the Harvard second team won five successive matches by defeating Andover, Milton, Harvard freshman, Tufts freshman, and Exeter.

WRESTLING

1920 Wrestling Season

WRESTLING is a sport that has been very progressive at Technology. Although working under the disadvantages of inadequate conditions and lack of funds, the team has proved itself to be of high calibre.

One of the best schedules in years has been arranged by Manager Coffin and Assistant Manager Bainbridge, and they deserve a great deal of credit. The team is led this year by Captain Russell, an old Andover man. Since practically the whole team was back from last year, with a few additions they present a very formidable array. Technology has been very successful in all her early season games, one of the greatest features being the defeat of Yale in their own gymnasium. The Yale Wrestling Team has been undefeated for seven years, and it is a great honor to the Technology Wrestling Team to break this record. From the early season meets, the team shows great promise of winning the N. E. I. C. A. A. Wrestling Meet at Springfield.

The team met Brown in the Walker Memorial on Friday, January 9, and won by the close score of 17–8. Captain Russell '22 was thrown by Shurtleff of Brown in the 175-pound class, but he retaliated and threw his man in the heavyweight class. The team then defeated the Cambridge Y. M. C. A. in a practice meet 15–3.

The trip to New Haven and Brooklyn was the feature of the year, the team defeating Yale 10–8 and easily beating Brooklyn Polytechnic Institute 16–1. At Yale the Technology team obtained two falls and two decisions, Captain Russell '22, 175-pound class, and Humphreys '22, heavyweight, threw their respective men; while Smoley '20, 115-pound class, and Butler '21, 145-pound class, gained decisions over their opponents, thus giving the meet to Technology. The team was very fortunate in securing the services of Bridson Greene, the 145-pound champion of New England, and the outlook seems very bright for the remaining meets of the season.

CREW

1919 Crew Season

CREW is a coming sport at Technology and all efforts are being made to have it properly recognized. The Crew race in May was the first one to count in the points of Field Day; and although the Freshmen lost this race, they were highly successful throughout the rest of the season. They were only defeated by the strong Harvard '22 Crew, and were successful in winning their other four races.

The officials in charge of rowing are E. T. Steffian '21, General Manager, G. P. Anderson '22, Assistant General Manager, E. W. Villett '22, 1922 Manager. Steffian arranged an attractive program for the Crews and obtained the services of Mr. Manning as Coach. Mr. Manning is considered one of the best coaches in New England. It is hoped by the Technology Rowing Association that a Varsity Crew may be put on the river; however, nothing definite has been decided concerning this. There is great enthusiasm shown for the Crew, and a large number of men turn out yearly for the Crews; in numbers Crew is second only to Track.

The Crew season opened with a defeat by the Harvard '22 Crew on May 10, the Crew then met Stone School on May 19 and defeated them quite easily with 3 lengths to spare. Middlesex and Tufts Varsity then fell victims to the prowess of the Crew; and in the last race of the year the Crew entered the Harvard Regatta for junior eights and defeated the Noble & Greenough School and Tufts. Each member of the Crew was awarded a medal.

Manager Steffian

It has been decided by the Advisory Council on Athletics that, due to the increasing prominence of the Crew, a "T" with crossed oars shall be awarded each year to the General Manager. This in itself shows the expansion of the Crew; and Crew needs the backing of all the Institute in order to expand. A new boat-house and equipment are badly needed, and the Crew has also need of shells and a bigger place for winter practice. The outlook for a good Crew next year is very bright, for there are many men in the Institute at present who are interested in rowing, and from these men some very good material may be obtained.

GYM

1920 Gym Season

GYM is a sport that went out of existence at the Institute some time ago; it was reorganized again this year mainly through the efforts of Humphrey '22, an old Princeton star. The Institute saw the need of equipment and Walker Memorial was fitted out with a complete set of apparatus. The first call for the team brought forth a large number of candidates, some of whom had had a great deal of previous experience. Humphrey '22 was elected Captain and Ramsey '22 was appointed Manager by the M. I. T. A. A. Ramsey '22 was compelled to resign because of his departure from the Institute, his place being filled by Wade '22. The Gym Team was recognized by the M. I. T. A. A. and was given a place on the Athletic Association. Manager Ramsey made the trip to Princeton, where the Intercollegiate Meeting was held; at this meeting Technology was invited to become a member of the Association. Dr. David Montgomery was engaged to act as Coach for the coming year.

The team is composed of many stars from other colleges and has all the makings of a championship outfit. Captain Humphrey was a star on the Rings while at Princeton, being a varsity man there. Pew '23 is an exceptionally good man; while at Annapolis he won the Intercollegiate Indian Club Championship, and also carried away first honors on the Horse. McKinstry '21 was captain of the Haverford Gym Team, and is a consistent performer on the Parallel Bars. Simpson '23 was a member of the Yale Freshman Gym Team, while Bowers '22 was a member of the Dartmouth Freshman Team. Wood '22 and Davidson '22, who perform in the Tumbling, are from Exeter and Hill School respectively. The team has a good schedule and seems to have all the prospects of a highly successful season.

HOCKEY

1920 Hockey Season

HOCKEY was reorganized this year for the first time since 1917. Its organization was entirely due to R. F. Officer '21, who worked upon the matter and got hockey recognized by the Advisory Council. An attractive schedule was arranged, and the services of Mr. Charles Foote were obtained as Coach. Due to the building of the new Pavilion, Technology has had better opportunities for practice, although conditions are not yet as good as they might be. The team had several men back, including Ex-Captain Cochrane of the 1917 Technology team. D. M. McNeil '21 was elected captain of the team. McNeil is a very fast, able hockey player and was a well-known player at the Boston Arena before it burned down.

The hockey season opened on January 9 with a game against Tufts at the Pavilion. In this game, Technology showed superior playing and won 4–2. The game scheduled with the Massachusetts Aggies for Friday, January 16, was cancelled because of the suspension of activities at the Institute in memory of President Maclaurin. The team defeated Boston College at Roslindale by the score of 6–4, and three days later, on January 30, Springfield Y. M. C. A. was overwhelmed by the decisive score of 10–2. However, in the next two games, the Technology skaters struck a snag in the form of Harvard and Boston College. Harvard defeated Technology 8–0, the work of Holmes, the Harvard goal, being the feature of the game.

Manager Officer

Boston College administered defeat to Technology in a very rough but close game at the Pavilion, by the score of 5–4. The game with the Yankee Division Club resulted in a 7–7 tie, although four extra periods were played; however, the team made the trip to Williamstown on February 14, and defeated the Williams team 3–1.

FIELD DAY

FIELD DAY

THE nineteenth annual Field Day held Friday, November 7, found Technology larger than she had ever been before, and therefore with greater numbers to pick from. The two classes were all prepared for the fray. It was 1922's last chance to have their names inscribed on the Field Day Cup, and they availed themselves of this opportunity by easily defeating the Freshmen.

The teams were coached in general by Juniors and Seniors. 1922 football was coached by Russell '22 and Casey '20. 1923 was coached by H. Gardiner '21. A tug-o'-war found Ryer '20 showing the Sophomores how to pull, while Boley '21 and Crosby '21 did the same for the Freshmen. Mr. Frank Kanaly and Mr. Pat Manning administered the honors of both relay teams and crews respectively.

The order of events and the number of points allotted to each is as follows:

Crew Race	3 points
Relay Race	4 points
Tug-o'-War	2 points
Football Game	4 points
Total	13 points

The Crew Race

For the second time in the history of Field Day, crew counted in points of the day. The race was rowed over the mile course, starting at Cottage Farm Bridge and finishing in front of the Walker Memorial. The '22 shell took the lead from the start and

A hard job for the Judges

passed under Harvard Bridge a full length ahead; from then on the '23 crew put up a game struggle, and they began slowly but surely to pull up and lessen the space between the two boats. However, the stamina of the '22 crew showed itself, and they finished one-third of a length ahead.

The Relay Race From the beginning the relay race seemed to be a foregone conclusion. The Sophomores led and increased this lead until they were ahead by about 40 yards at the finish. Laird started off passing the baton to Christensen with 3 yards to spare. Holden of the Freshmen practically evened this up, but Chittick, who was running fifth for '22, opened up the first big gap of about 10 yards and after this the Sophomores increased their lead up to 40 yards. The time was 8 1-5 seconds slower than the record held by 1921.

The Tug-o'-War The first pull of the tug-o'-war came immediately after the relay race. The Sophomores, who were favorites, due to their last year's victory, showed their superiority by pulling the Freshmen over the line in quick order. The Sophomores pulled together steadily and accomplished this victory in the fast time of 24 3-5 seconds.

The Football Game—First Half The men had a pretty muddy field to contend against, but notwithstanding this they put up a good exhibition, the Sophomores winning 12–7. At the start both teams were prone to fumble, but they soon rid themselves of this. Johansen '22 was the star of the day, as he repeatedly made long runs ranging up to one 60-yard run, and he also scored one of the Sophomores' touchdowns. Brokaw '22 was exceptionally good when it came to broken-field running. Boli also starred, catching a forward pass over the goal line for a touchdown.

First Quarter

1923 kicked off to the Sophomore 15-yard line, Boli receiving the ball and running it back 15 yards, 1922 then losing the ball on a fumble. The Freshmen fumbled once and recovered, but followed this fumble by another which was captured by a Sophomore, and at this time the crowd was thrilled in the form of a 60-yard run around left end by Johansen '22. Kelley '23 then intercepted a forward pass on his own 7-yard line, the Freshmen then punted out from behind their goal line, and Johansen '22 ran the punt back to the 12-yard line. Brokaw '22 went through guard for 5 yards, following this with another 2-yard gain. Immediately after this, Brokaw '22 shot a pass to Boli '22 right over the line, and a touchdown was scored. Boli missed the goal. 1922 kicked off to 1923, Kelley '23 running the ball back 35 yards. The Freshmen were then penalized for holding. A short forward pass was given, Brantingham to Bouis; Richards made 8 yards through tackle, followed by Cronin with 5 yards more. But '23 was off side, and they refused the penalty, so '22 took the ball. Brokaw '22 and Johansen between them carried the ball about 45 yards with seven plays. The whistle then blew and the quarter was up.

Second Quarter

Johansen '22 ran the ball to the 1923 1-yard line. The Freshmen then held for two downs, but after that, Johansen pushed the ball over the line. The kick out was missed. The Freshmen kicked off. Johan-

sen running the ball back 20 yards, he then punted the ball 40 yards and the ends dropped the '22 man in his tracks. The Sophomores accepted the forward pass and Brokaw made 5 yards on a fake kick. Boli was then called back and he punted. Kelley who ran the ball back 10 yards was laid out and was replaced by Schultz. The Sophomores were off side and Johansen punted the ball about 25 yards. The ball wasn't run back. At this time the whistle blew for the close of the first half.

Tug-o'-War—Second Pull The second tug-o'-war took place between the halves of the football game. The Freshmen were determined not to be pulled over as easily as they were the first time, and they put up a mighty struggle. The Sophomores got the jump and fought their way, pulling the Freshmen slowly toward the line and the Freshmen did not capitulate until 1 minute, 25 seconds.

Third Quarter

Football Game—Second Half There were several substitutions at the start of this half—Meyer '22 for Boli '22, Shepherd '22 for Chadbourne '22, and Pike '23 for Randolph '23. The Sophomores kicked off to Schultz, who ran the ball back 25 yards. The Freshmen then decided to punt, and Brokaw '22 ran the punt back eight yards. Ramsey '22 was hurt, and Bainbridge '22 replaced him. The Sophomores were unable to gain, and Johansen kicked, the punt almost being blocked. The Freshman receiving this was downed without much gain, but on the next play Richards '23 carried the ball 25 yards around left end for a touchdown. The ball was kicked out, and Cronin '23 made the goal. 1923 kicked off

to 1922, Brokaw running back for kick. A lateral pass was attempted, but no gain was made, Kelley downing the man for a 6-yard loss. Miller '23 went in for Schultz '23, and Smith '23 for Richards '23. The quarter then ended.

1922 . . . 12 1923 . . . 7

Fourth Quarter

1922 failed on a forward pass and then resorted to a punt which went over the back fields' heads for about 55 yards. The punt was exchanged and 1922 again received the ball. Johansen was thrown for a 10-yard loss by Tirrell '23 forcing 1922 to punt. The man was tackled before he had started. The Sophomores were penalized 5 yards for off side. Sayre '23 went in for Hewitt, and Newman '22 for White '22; then 1923 held on the next down, but it was of no avail, because Johansen made it first down by a 15-yard run around end. Richards '23 went in for Miller '23, and Levitz '23 for Sayre '23; and shortly after this the game ended with the ball on 1923's 33-yard line.

1922 . . . 12 1923 . . . 7

Boxing Boxing was in a rather unfortunate position, being the last scheduled event, and at this time of year it was too dark to see; but two bouts were fought off practically by searchlight. Corbett '21, the New England amateur light-weight champion, received the decision

1922 Sidelines during the game

over Rhodes '22, and Rosenfield '21 got the decision over Horgen '22 in the heavy-weight class. The third match, Addicks '21 against Doebler '22, was not held, as Doebler was ill and unable to participate.

The dinner in honor of Field Day participants was held the next night in Walker Memorial, thus ending one of the best Field Days ever held at the Institute.

TECH NIGHT

Akers Gee Jakobson Coyle

TECH NIGHT is so well known to all undergraduates that it scarcely needs an introduction. Even though the Institute has a well-earned reputation for long and concentrated hours of mental effort, the majority of the students are so constituted that upon occasion they seem quite able to appreciate the pleasures of an evening spent at some more or less frivolous show, the more frivolous the better, in fact. As the year rolls by and a new fall appears, every undergraduate looks forward to Tech Night as a fitting climax to the annual Field Day.

All the details for Tech Night are placed in the hands of a committee of three men, two Seniors and one Junior. This committee selects the show and makes all the necessary arrangements with the theatre management for taking over and selling every seat in the house. Furthermore, it is their duty to determine the allotment of seats for the different classes: the best seats to Field Day officials and Seniors, then Juniors, then Field Day teams and Sophomores, and finally Freshmen.

This year the "Gaieties of 1919" appealed to the committee as suitable for the occasion, this selection proving highly acceptable to the student body as well. "How far is up?" "Who wants to know?" became the recognized form of greeting during the ensuing week.

In closing, it is well to add a word or two in regard to the undergraduates present. The conduct of every Tech man in the audience made each and every one proud of the fact that he was a Tech man. No further comment is necessary. May the years to come see many such enjoyable evenings as that of Tech Night 1919.

STUDENT ACTIVITIES

ALL TECHNOLOGY SMOKER

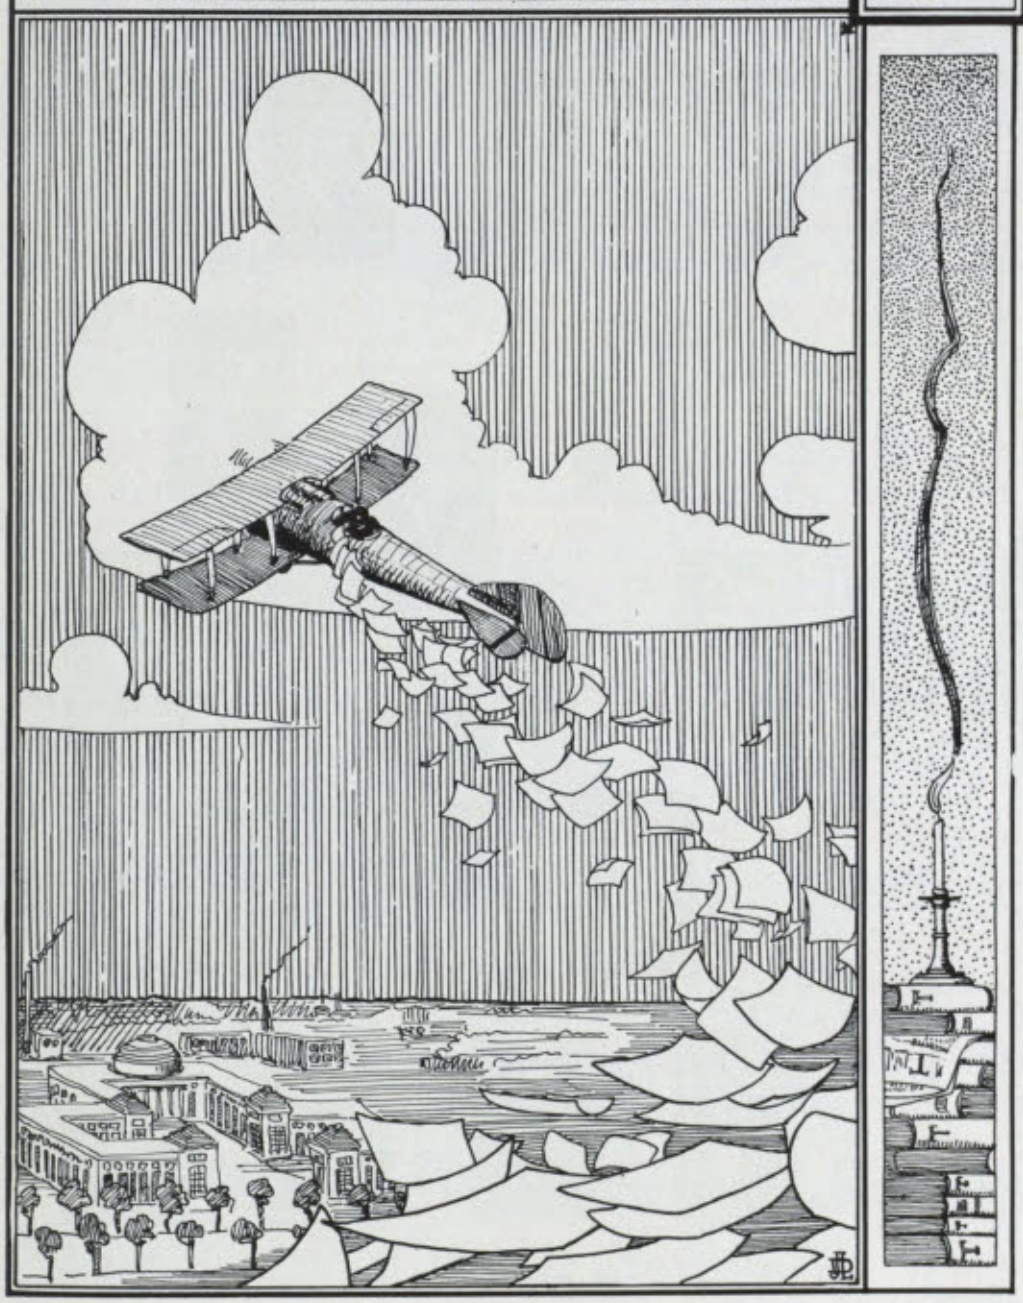

THE first event of the school year 1919–20 in the line of undergraduate activities was the All Technology Smoker held in Walker Memorial on October 17 under the auspices of the Institute Committee. This, although a comparatively recent addition to the Institute's calendar of annual student get-togethers, has now reached the point where it is really satisfying a much-felt want among the undergraduate body, namely, an opportunity for the entire school including the faculty to get together, to hear what the school activities are doing, and to appreciate better the fact that the Institute is one unified whole rather than a university composed of a large number of different courses each with its own particular organization. This year the Smoker was given for the ostensible purpose of welcoming the Class of 1923 and introducing to them the various Institute activities, but in accomplishing this end the bigger, broader significance of the gathering was made clear.

Following the dinner and the various vaudeville features, speakers representing the school activities gave five-minute talks outlining the history and future plans of the organizations which they represented. Dean Alfred E. Burton, known at Technology as the "friend of activities," extended the welcome to the new class from the undergraduate body and the faculty, and the Rev. George C. Gibbs '00 spoke on loyalty to self, school, and country.

Inasmuch as Walker Memorial was a gift to the students from the Alumni, each year the keys to the building are presented by an alumnus to a representative of the undergraduate body, thus symbolizing the gift to the school. The first presentation was made at the All Technology Smoker held in Walker Memorial the early part of last year. This year the presentation was made by Mr. Henry A. Morse, Ex-President of the Alumni Association, and the keys were accepted by Norris G. Abbott as President of the Institute Committee. No more fitting conclusion to an All Technology Smoker could be found. May the Smokers of ensuing years continue to maintain the high standard set by that of 1919.

CONCERNING M. I. T.

A WELCOME addition to the publications of the undergraduate body of the Institute appeared this year in the form of the third edition of "Concerning M. I. T." The first edition of this little book appeared in 1909, the second in 1914, and the third in 1919. The purpose of the book is to present a complete description of the Institute and its life to the incoming freshmen particularly, and to the undergraduates, alumni, and the world in general. The first two editions had so well accomplished their purpose of making better known the true Tech as to make the publication of "Concerning M. I. T." an established necessity in the scheme of things at the Institute. But in order that it might keep pace with the changing conditions of undergraduate life, it has now been reëdited and the third edition printed.

This third edition contains a full-page picture of President Maclaurin, an historical sketch of the Institute, and descriptions of the aims and requirements of the various courses in the first part. The following sections deal with the many sides of undergraduate life, social and class organizations, teams, the Show, Musical Clubs, publications, and professional societies. All these various features of undergraduate activities are taken up from the point of view of the student.

The information contained in the little volume is broad and accurate, making the book valuable to every one interested in the Institute. Probably the greatest service rendered is that of counsellor and guide to the freshman, bewildered and trying to adjust himself to new conditions. For with each succeeding year just such a volume becomes more and more necessary to assist the freshmen in solving the various problems of undergraduate life.

The Technology Christian Association aims to be of practical service to every student in the Institute and to help Technology realize its highest ideals.

This year the Association ran a book-exchange which disposed of eight hundred dollars' worth of books for and to undergraduates; it conducted an employment bureau which gave work to men amounting to $4,100; it distributed, free of charge, 2,500 handbooks or "Bibles," obtained rooms for 1,000 fellows, and placed 18 undergraduates in boys' work in Greater Boston.

The eighth convention of the Student Volunteer Movement was held at Des Moines, Ia., December 31, 1919, to January 4, 1920. Practically every educational institution in the United States and Canada was represented, there being 7,500 students, professors, and other representatives from about 800 institutions. Tech was represented by the largest number which she ever sent to any similar gathering—33, which was her full quota. Great information and inspiration was obtained by the Tech delegation showing them what a Christian engineer might do in foreign lands.

SOCIETY OF ARTS

THIS is a department of the Institute which is especially devoted to the general dissemination of scientific knowledge. It aims to awaken and maintain an interest in the advances and practical applications of the sciences. During the past four years popular experimental lectures on science have been given for the pupils of high and preparatory schools of Boston and vicinity. The purpose of these lectures is to provoke an interest in science from the pupils of the secondary schools. While it is expected that pupils who are studying science may benefit more than others from these lectures, a knowledge of science is not assumed by the lecturers.

CALIFORNIA CLUB

THE M. I. T. California Club was organized in 1919 to fill an ever growing need at the Institute. In view of the increasing number of men coming here every year from the various Western colleges, and the difficulty of obtaining practical information from college circulars, the Club was formed to assist men of the West, who desired to come to Tech, in procuring the best data possible on the various subjects and courses, and, in addition, the California Club will help the new men get settled and smooth the way wherever possible.

TECH SHOW '71

TECH SHOW

THE twenty-second annual Tech Show is a musical comedy in a prologue and two acts, entitled "Patsy," and was written by C. C. Carven '21.

The play concerns two students of Architecture at Tech, Philip Morris and Herbert Tareyton. While studying "History of European Civilization and Art" late one evening in the Rogers Building, the lights suddenly go out. Much to their surprise, as the lights gradually grow bright again they find themselves in Cleopatra's Palace at Alexandria. Here they meet many men and women famous in history, among them Julius Sneezer, Emperor of the Roman World, and Marc Antony Keezer. Marc is a forerunner of our friend Max and is in the same business, as the two students soon discover. Wishing to don the Egyptian clothes to Marc dispose of their suits of second-and buy suitable clothes from him, hand Egyptian gust of Julius much to the dis- and Marc are Sneezer. Julius hand of Cleo- rivals for the known to us as patra, better is natural "Patsy," and so it that Julius should look down upon Marc.

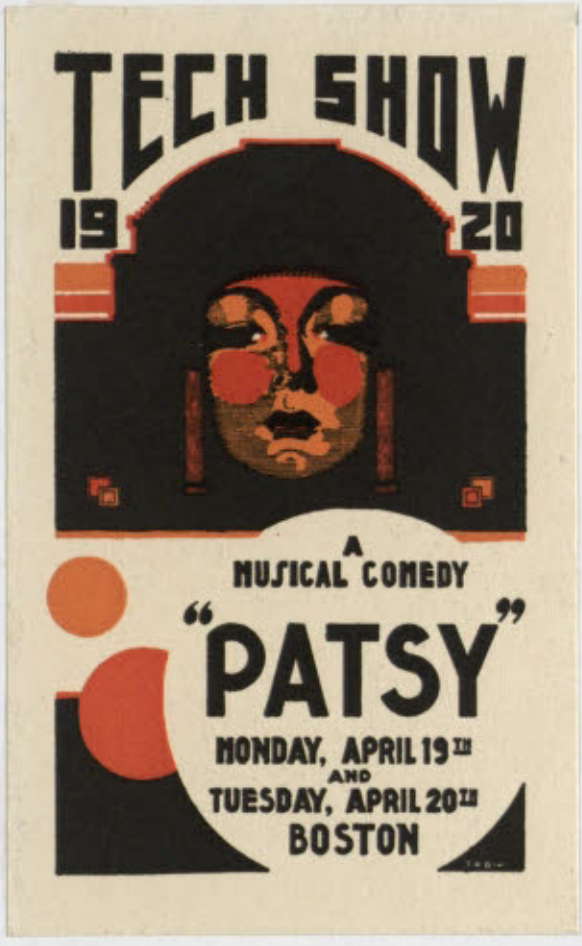

"Patsy"

With evident embarrassment at the scantiness of their Egyptian clothes the two students make their début before Patsy, and with difficulty explain the cause of their presence and describe their Technology on the Charles. Patsy is not slow in having plans prepared for a Technology on the Nile, as "Egypt must be foremost in education," and Murad, the Royal Architect, collaborates with the students on the plans.

Later, when left to themselves, Phil and Herb are filled with amazement at the whole business, but their little reverie is broken by Cleofan, Patsy's daughter. She succeeds in vamping Herbert, much to Philip's disgust, as he is "off that stuff." He is just a little premature, however, as he soon finds that Patsy herself is an aim worth considering.

In the mean time Antony has been thinking of how he might get rid of Sneezer, that he too might have a chance with Patsy. Rameses, an Egyptian cigarette manufacturer, offers him a solution of his problem.

Knowing that Sneezer must attend a Senate meeting on the Ides of March, they plot his assassination in Rome on that date. The details are discussed on the long-distance telephone with Brutus, head of the Roman Bolsheviki.

Now Sneezer, before his departure, wishes to win the Queen's hand, but is unfortunate in his endeavors. He is constantly interrupted just as he is about to "pop the question," which leaves him, much to Keezer's delight, in no better position than he was before. But Keezer, in turn, reckons without Rameses. He also has aspirations for the Queen's hand

and intends to get rid of Keezer at his first opportunity. Meanwhile Sneezer, unsuccessful in his love, leaves for Rome, not waiting even to see an exhibition of the Queen's Royal Ballet, which is given in his honor.

Cleofan

The second act, timed a month later, depicts further the adventures of Philip and Herbert. Keezer has managed since Sneezer's departure to 'tell the Queen of his love for her; but his joy is short-lived. News is received of Sneezer's murder and also that Keezer has been blamed for it. The Roman populace are enraged and demand his death, which naturally causes him no little worry. Phil and Herbert, however, try to save him by rehearsing him in Anthony's celebrated funeral oration, that he might deliver it to the Roman people and thus appease their anger. This done, Keezer goes to Rome.

Rameses sees now his chance to get rid of Keezer. He and his sister Zira again telephone to Rome and arrange the details for Keezer's murder. Rameses is exultant as he can see no possible chance of his plans being disrupted, but he soon discovers he is mistaken. Patsy has singled out for her next victim our friend Philip, and when he is not supervising the work on the new Technology, he is making love to the Queen.

This naturally enrages Rameses, and for a while he and Zira are at a loss as to what to do. They finally hit on a novel plan whereby they hope to dispose of both students. Knowing that the people are anxiously awaiting the completion of this new Tech, they plan for a strike of the Bricklayers which would hold up the work. The blame would be placed on Phil and Herb, and Rameses expected the people would rise up against them. The plan works to perfection, and the students are put in jail, much to the sorrow of Cleofan, who suspects a plot. Her hopes are raised again, however, by a conversation with Helmar, Chief of Police. The policemen intend to strike, and Cleofan, realizing that the jails will be left unguarded, sympathizes with them. Meanwhile Rameses is not as fortunate as he had hoped, for Patsy refuses him when he asks her hand.

Herbert and Philip

Events now move rapidly. The policemen strike,

C. C. Carven, Author

much to Patsy's discomfort; and to cap the climax, news is brought that Keezer's ship has been submarined. She is just about to kill herself with the snake, when the students rush in and save her. With every one else out of the way, Philip makes his final attempt to win the Queen's hand. His arms are about her waist. In honeyed words he tells her how he loves her. She is just about to kiss him—and then he wakes up.

Tech Show has been unusually fortunate this year in securing Mr. John Craig to coach the Show, assisted by Miss Mary Young and Mr. Harry Gribble. Mr. Craig and his associates have given freely of their time, and the excellent finish which characterizes this year's production is due almost entirely to them.

As heretofore, Miss Virginia Tanner has charge of the Ballet. All of the other branches of the Show—scenery, music, lyrics, and even costumes—have been the work of the undergraduates. The co-eds deserve special mention for their very generous work in the making and designing of the costumes.

OWING to the unusually large registration at the Institute this year, the call for tryouts for the Musical Clubs brought out a wealth of material. The services of Mr. G. Roberts Lunger were obtained as coach for the Glee Club, and the splendid work done by this organization throughout the year has evidenced the wisdom of the choice.

Rehearsals began in October and the first concert was given at South Braintree followed by the Annual Concert at the Franklin Square House. The next affair at Lynn on the 26th of January served as a dress rehearsal for the Winter Concert on the 30th. The latter was the most pretentious of its kind ever given by the Clubs. The management was able to secure the Princess Ball Room at the Hotel Somerset in addition to the main Ball Room and about four hundred couples were present at the dance, while the attendance at the concert was over nine hundred. At this time the Musical Clubs were beginning to show their real caliber, with the result that the concert was a great success.

Following the Winter Concert came concerts at the Arlington Men's Club and at the Winchester Town Hall. Owing to the uncertainty of the Alumni Associations, the plans for the Annual Spring Trip had to be changed somewhat, but the Clubs were cordially received wherever they went and the concerts were well up to the standard of the winter entertainment. The Spring Concert was also given at the Hotel Somerset, where a large and enthusiastic audience heard a well-balanced program.

The Clubs were unfortunate in losing the services of General Manager Landis '21, at the beginning of the second term. F. L. Raymond '21 was elected to his position and took up the work where Landis left off.

Under the capable leadership of H. O. Davidson '20, the Glee Club and the Glee Quartet did especially good work while the Banjo Club under Merrill Knox '20, and the Mandolin Club under J. R. Hotchkin '21, did splendidly. Special praise is due Frank Gage and his Specialty Act for the "pep" and variety which it added to the program. Great credit is also due the management for the very satisfactory financial showing made by the Clubs during the season.

IT IS the custom in this annual recital to draw comparison with the past. Precedent must not be ignored. The Dormitories have this year for the first time been unmarred by military garb of any kind. When first the Dorms opened and the student battalions were in operation,

each pleasant afternoon saw an array of embryo officers stepping out for their drill. Following this, the Naval Aviators requisitioned the plant and occupied it until last winter, when it was again released for peaceful pursuits. This year militarism is taught on a strictly vocal plan, and the Dormitories are at peace, at least sartorially.

The summer session disclosed no organized social activities, but that there were social activities was testified by the heterogeneous flock of automobiles herded in our front yard, and by the general exodus of expectant-looking youths each evening.

During this year the best traditions of the past have been followed and improved upon. The national indoor pastime of dancing has interfered with many otherwise peaceful evenings, "and a very pleasant time was reported by all." This year the Dance Committee adopted a program considerably more extensive than any previous. In February there was put on a special entertainment in the form of a Mardi Gras with all the customary features and several additional decorations. This is by far the most elaborate affair that has taken place in Walker Memorial, and was in itself evidence of the untiring activity of this year's Dance Committee. Informal dances were given to celebrate almost every holiday, legal and illegal, a particularly hilarious one accompanying Hallowe'en.

A very successful smoker was given in February. Some combustibles were furnished by the committee, and no smoking instrument was barred, not even the aromatic corncob. The Dormitory Jazz Orchestra, local talent capering, and the usual speeches diverted attention from ordinary troubles.

Athletics consisted, as in former years, of bowling and baseball. Not enough candidates volunteered to make up second teams, but the first team from each section bowled every week. A number of individual high scores were made, and what the teams lacked in marksmanship they made up in vigor. A baseball team is planned for spring. The weather last year did not permit a regular schedule, but any clear day when twelve or more men could be lured out to an open lot a match game was held. We are hoping for more regularity this spring. Dormitory baseball, informal as it is, unencumbered by convention as to personnel, equipment, or terrain, may be expected to cause many a healthy sleep and ill-prepared lesson. Basket-ball has been agitated. So far the demand exceeds the supply. Basket-ball must await the provision of an adequate court, which in turn must await a good many things.

This tale of Dormitory activities must not be concluded without mention of "Mac," officially Superintendent McCafferty, unofficially the Dormitory shock-absorber for complaints from both directions. Since the Dorms were put in commission "Mac" has been in charge. His careful management, his desire to bring conveniences within easy reach of the inmates, the prodigal lending of his hammer and nails and morning paper, and his chronic good-nature have in no small way contributed to our general happiness.

FRATERNITIES

THE purpose of the Inter-Fraternity Conference is to help fraternity men to become better acquainted with each other, to regulate and control their common interests, and to furnish a link between the faculty and the fraternities and between fraternity and non-fraternity men. This is a very large scope and perhaps a little larger here at Technology than elsewhere because of local conditions.

As to the specific things that the Conference does. It has always felt that one of its big duties should be to work for betterment of fraternity scholarship. To this end a prize is awarded each year to the chapter having the best scholarship record for the past year. The prize is a clock which stays in one house only as long as that chapter maintains its first place. The faculty has been very glad to coöperate with the Conference so that the award may be perfectly fair. Inter-fraternity sports are arranged for, schedules drawn up and rules made so that each year the champion in any sport may be determined. So far, inter-fraternity sports have been limited to baseball and bowling, but an attempt was made this year to establish football and basket-ball as recognized sports. These attempts, if not successful this year, will undoubtedly prove to be within the next year. Inter-fraternity sports not only get men in the different chapters better acquainted, but give men who do not feel that they have time to go out for a Technology team an opportunity to do something in the way of athletics. The Conference takes care of the arrangements each year for a series of exchange dinners between the various chapters. These usually come once in two weeks and by the time each chapter has visited each of the other chapters for dinner, the year is over and every one feels that he knows all the other fraternity men just a little better than he would have otherwise. It is to be hoped that the precedent established this year in having a formal inter-fraternity dance will be continued in subsequent years. The dance was a very great success.

GRINDS

And now you can scan the pages
Where Mirth and Humor prevail,
So join in the fun free-heartedly,
Lest all our efforts should fail.
"Laugh and the world laughs with you,
Weep and you weep alone";
And the one who can laugh at the knocks
Is the one that avoids the hone.

O ye Freshmen that appear so innocent,
And you Sophomores steeped in sin,
Juniors that have survived the Heat,
And Seniors nearly out of the din;
You professors with your stale old jokes,
And the assistants devoid of fun,—
If we get your pet goat in passing,
Remember that the truth harmeth none.

Let the spirit of give and take,
Even if your panning should be rough,
Render to your injured mind and soul
An appreciation of this stuff;
For we knock on a constructive basis,
As knocking at times does good,
So Woe to him who doth forget
"Real Humor is better than food."

GRINDS

MUCH INTEREST IS BEING SHOWN IN THE NEW COURSE IN DISTILLING, WHICH NOW FORMS A PART OF THE CURRICULUM.

Prof. George—Which is right, Hurley, the former or the latter method?

Hurley—The former.

Prof. George—Which is the former?

Hurley—I don't know.

We'll Say So

Barker—She has the rep. of being some Siren.

Junod—That's nothing. You ought to hear Conant after he gets to sleep.

A New Kind of Movie

W. T. R.—Is that going to be a military science lecture to-night?

W. H. J.—No. They are going to show illustrated movies.

Christian Scientist—Is your father a scientist?

Freshman—No. He is an insurance agent.

Heard at Tech Nite

"Who was that on the phone?"

"Some one calling Scotty Wells. He wanted to get the keys to Walker Memorial from Scotty, so that he could run a smoker for himself."

Helen—I heard you out there. What was it that Jack said before leaving that tickled you so?

Gertrude—It wasn't anything he said.

Naturally

Shugrue (in accounting)—Upon what does the strength of a company rest?

Student—Its assets.

Medically Speaking

'21 (in report writing)—What about the appendix?

Prof.—For Heaven's sake, wait until we finish the *body* of the report and then we will take up your *appendix* and also the *heads* as well as their general *feat*ures.

Force of Habit

Prof.—Mr. Windisch, will you please see me at five?

Dick (half-asleep from excessive study the night previous)—Sure, I will see you and raise you five.

GRINDS

Courses

Frosh—Say, Prof., how long could I live without brains?

Prof.—Well, that remains to be seen.

The Whole Class Was There

Prof. (elucidating method of staying)—Now if we had two guys at C.

Muses

I sometimes wonder how it would feel to be a laborer and only have to work eight hours a day or how the electric light companies could stay in business if it were not for Tech men.

At Wellesley

Prof. (the old maid)—When I was a young girl, I used to sit in the parlor to entertain my young gentlemen callers.

Prof. (ditto)—That's why you are still sitting there.

Expert Mechanic

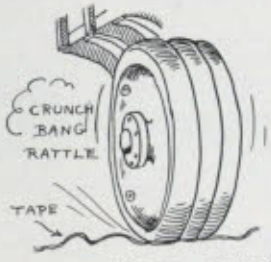

The other day one of the members of our faculty had difficulty in starting his car and after working for over an hour on the engine discovered that the gasoline tank was empty. This was no less a personage than our own Walter Humphreys, professor in mechanism. Impracticality is his middle name.

GRINDS

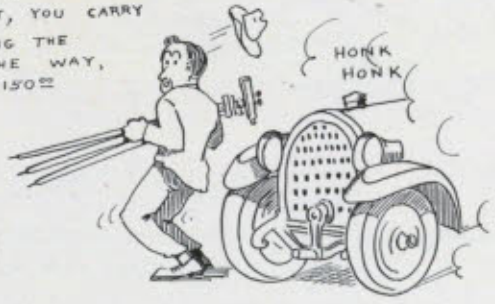

PROF.—HERE MR. WHOSIT, YOU CARRY THE INSTRUMENT DURING THE EXERCISE. ER— BY THE WAY, ITS WORTH ABOUT $150.00

G'BYE TAPE!

ZOWIE! THAT SURE WAS ONE CLOSE SHAVE. I WISH THIS INSTRUMENT WAS IN—

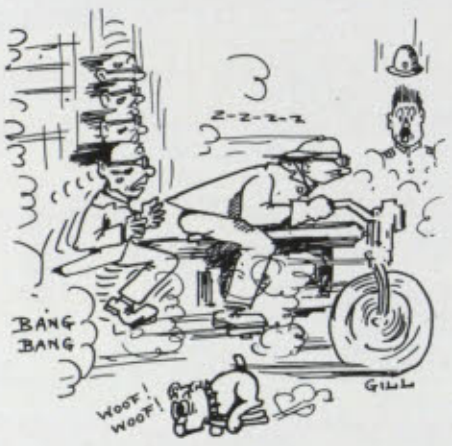

CLARENCE (AFTER HAVING FOCUSSED ON OTHER END OF HARVARD BRIDGE) — PAST! HEY, CHARLIE! LOOK AT THIS ONE. OH BOY! SOME BABY!!

LET ME SEE! 14000 CHAINS—

SURVEYING

GILL

Tony Anable (rounding corner at approximately 72 per) —Hear those cylinders knocking?

Companion — 'Tain't the cylinders. It's my knees.

Very Good, Eddie

'21—I want a good book for Heat. What would you recommend?

Cooper—Well, we have a Goodwin and Goodenough, both of which are considered to be very good, and Goodenough, in my opinion, is good enough for any good student.

Eventually, Why Not Now?

A melodrama in two acts. Short and Snappy.

Act The One

Time—Bedtime Place—Right near there

Oldtimer—Well, what course are you going to take?

Frosh—I came here to do some hard work, so think I'll take II.

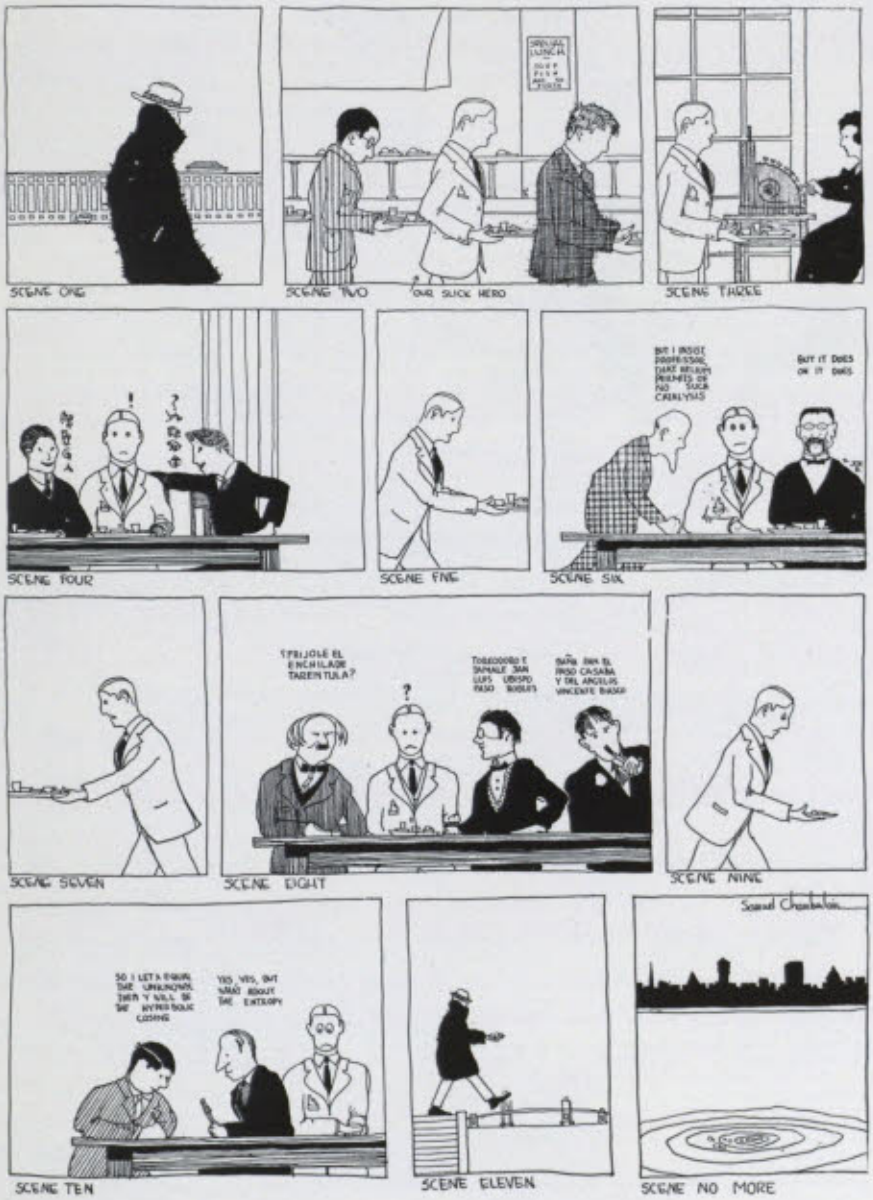

Act The Two

Time—Overtime Place—Replace

Oldtimer—How yuh making out?

Soph (formerly Frosh)—Fine. Found out that the cultural side of engineers is neglected, so changed to XV.

The Atavistic Maid

Listen, Sweetheart, to my plea.
Cut this highly cultured game.
All this fine gentility
Grows to be exceedingly tame.
What I want is low-brow love,—
Heavy, knockdown, caveman stuff.
I'm no cooing turtle-dove.
Treat me rough, kid,
Treat me rough.

Can the soft and weepy sighs.
Choke the meek and humble pose.
I'm no cut-glass raffle prize.
I'm no fragile little rose.
Grasp me with a pythian grip.
If I struggle, call my bluff.
Want my love? Then take my tip—
Treat me rough, kid,
Treat me rough.

I don't want my cheek caressed
With a soft and gentle peck.
Yank me wildly to your chest;
If I fight you, break my neck.
Please don't be a gentle dub.
Woo and win me with a club.
Treat me rough, kid,
Treat me rough.

Ode to 1920

Six hundred little Freshmen entering the Stute;
Midyears came along, and thirty got the boot.
Five-seventy little Freshies still left alive;
When the year ended there were five-forty-five.

Twenty passed away, due to Derr's light waves.
Four-seventy of the fittest still hope to get through;

Our Li'l Nell

The girl stood in the moonlight,
The world lay stretched below,
And all the sky was peaceful,
As the gentle zephyrs did blow.

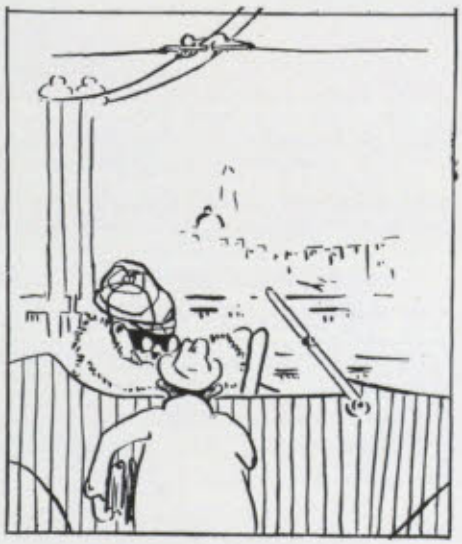

The world was quiet and silent.
Far on the plain so wide
The girl was on the cliff alone,
Nor did she try to hide.

The stars that twinkled in the sky
Shone like balls of fire,
And sent a message of love to her
That stilled her heart's desire.

The girl is quite imaginary,
So if you have read this through,
Remember others have read it too
And are quite as dumb as you.

One guess as to the identity of the brave toreador throwing the bull. You guessed it. No other personage than our own Eddie Miller, B.S., A.S.M.E., Royal Order of Life Savers, etc. His faithful second, "Kid" Berry, can be seen on the side lines grasping the adiabatic tail of the bull, whose name is "Old Entropy" in English, corresponding to "Galloping Dandruff" in Spanish. The score is 1–0 in favor of Eddie. Come on, Eddie.

TECHNIQUE 00—TECH 0

Mr. J. H. Coyle, Sporting Editor,
THE TECH, Walker Memorial,
Cambridge, Mass.

Dear Sir:—

Another year has passed by, and with the coming of fall the blood of the members of the Technique Board is surging through their veins, hot with anticipation, and instilled with the desire to inflict upon THE TECH, board and staffs, their annual trouncing. It is with great difficulty that this spirit has been restrained, as each issue of THE TECH serves only to further our rage, as the toreador urges on the bull, and makes us quiver with delight at the thought of performing the customary and traditional killing.

"Techites," you have reason to shiver with fear, but we are merciful. Our hunger for blood increases with the square of the time, hence we set November 12, 1919 as the fatal day. We would like to treat you as gentlemen, trusting to your code of honor not to entice ringers into your ranks, but past experience and information received from our secret service department prove conclusively that you have no honor, and that you are using underhand methods to impress ineligible men into your service. You outnumber us five to one yet these odds do not seem to be enough. Therefore, considering the above facts, we must insist that you play no men who have been elected to THE TECH this fall in any capacity whatsoever, and we will pledge our honor to observe the same rule. Watch out "Techites," our spy system is ever potent and every underhand move you make or contemplate making will be discovered. Remember two can play at every game.

We therefore take great pleasure in challenging you to a football battle, a fight to the finish, to take place at 4 o'clock on Tech Field, November 12, 1919.

Till the day of your death.

TECHNIQUE 1921.

(Signed) R. H. SMITHWICK,
Editor-in-Chief.

Mr. R. H. Smithwick, Editor-in-Chief,
TECHNIQUE 1921, Walker Memorial,
Cambridge, Mass.

Dear Sir:—

Be assured that nothing is dearer to the hearts of the Techites than an opportunity such as your rash challenge has presented. We are prepared, not only to punish you most properly on the football field, but to perform the last rites and ceremonies over your dead bodies.

It is most pleasing to note that each issue of our paper has acted as the red flag to the bull, and has furthered the rage of the "Sniquers." Ask some of your Spanish friends whether it is the one who waves the flag or the bull itself that gets the worst of the fray.

The provisions for the contest as stated in your challenge are most acceptable, inasmuch as they bind you to observe all the rules of gentlemanly conduct—distasteful as it probably is to you. November 12th, 1919, then, shall be the glorious day. (A different point of view causes us to change your wording "fatal day.")

Yours with love and devotion,

THE TECH, Vol. 39 . . .

(Signed) J. H. COYLE,
Sporting Editor.

Award of T with Crossed Rifles

To members of the outdoor rifle team who shall score 143, or better, out of a possible 150 at the outdoor competition of the N. R. A.

To members of the indoor team who participate in two-thirds or more of the competitions of one season and demonstrate an excellence comparable to the preceding.

Award of rTr

To the six members of the outdoor rifle team and the manager, provided the team position in competition places it among the first third of the competing teams.

To the members of the indoor rifle team who participate in two-thirds or more of the competitions of one season, providing the team be placed in Class A (the first third of the competing teams).

Other Awards

The Advisory Council reserves the power to constitute automatic awards of insignia in other branches of recognized sport where the level of performance shall be adjudged to be comparable to those given above.

At its discretion, the Council may also award aTa as follows:

To members of winning relay teams in indoor intercollegiate competition.

To winners of first place in open class meets.

To members of any team, exclusive of the track team, who participate in two-thirds or more of the meets of one season, and to the manager.

Award of Class Numerals

To winners of points in open class meets.

To members and manager of winning teams in any form of interclass competition recognized jointly by the Advisory Council and the M. I. T. A. A.

To participants on Technology Field Day as follows:

First, to members, not more than five substitutes, and manager of both football teams; second, to members, not more than two substitutes, and manager of the winning team in the relay race; third, to members, not more than two substitutes, the manager, and the counter of the winning tug-o'-war team; fourth, to members, not more than two substitutes, and manager of the winning crew.

To the first six to finish of the winning class in the annual Freshman-Sophomore cross-country run.

OUR ADVERTISERS

IN the following pages will be found the announcements of many reliable companies which have contributed materially to the success of this volume.

We bespeak your patronage in return.

Barrett Specification Roofs

The 20-Year Bond

20 Years of Service Guaranteed—

IN the old days buying a roof very often proved to be something of a gamble.

Maybe you got just what you specified, and maybe not.

The cost per square foot was too often taken as the only standard of value—frequently to the owner's subsequent sorrow.

Today all this is changed.

It was the Barrett Specification which first made it possible for building owners everywhere to obtain, through their local contractors, a *standardized roof*, worked out by roofing engineers and based on scientific principles of modern roof construction.

Today we offer to *guarantee* Barrett Specification Roofs *for a period of 20 years!* This guaranty is obtainable on any roof of 50 squares or more, in any town of 25,000 population or over, and in smaller places where our Inspection Service is available.

It is a Surety Bond, issued by the U. S. Fidelity & Guaranty Company, of Baltimore.

To obtain this Surety Bond you have only to insert in your building Specifications the following:

"The roof shall be laid according to The Barrett Specification, dated May 1, 1916, and the roofing contractor shall secure for me (or us) the 20-Year Guaranty Bond therein mentioned."

The guaranty costs you nothing. We merely require that the roofing contractor be approved by us and that we be given an opportunity to inspect the construction.

We shall be glad to send you a copy of *The Barrett Specification*, with diagrams ready for insertion in your building plans.

INSTITUTIONS

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY is the acme of educational excellence, and those who have been privileged to enter into its atmosphere of Engineering instruction, may well consider themselves members of an internationally recognized organization of scientific merit. The untiring aim of those who made "Tech" what it is today has always been to make it the leading engineering institute of technical education, and it now stands undisputed as such.

Ten miles from Cambridge there is another engineering Institution, which has been built through the same untiring efforts as "Tech" has been. Today it also stands, undisputed, as the leading Organization of research, design, and manufacture of air moving apparatus.

Much of the success of this Organization is due to the men who first gained their education at "Tech" and then associated themselves with the B. F. Sturtevant Company, for the purpose of applying their knowledge to the industrial uses of air.

A fine testimony of the excellence of our apparatus rests in the acceptance by "Tech" of nothing but Sturtevant Fans and Heaters for heating and ventilating the new buildings.

The Sturtevant Organization holds itself always in readiness to undertake the solution of the multitudinous problems to which air may be applied. Consultation is always welcome.

The
Massachusetts Institute of Technology
Cambridge

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY offers courses, each of four years' duration, leading to the degree of Bachelor of Science, in Civil, Mechanical, Mining, Electrical, Chemical, Sanitary, Geological and Electrochemical Engineering; in Architecture, Chemistry, Biology and Public Health, Physics, General Science and General Engineering, and Naval Architecture, and in Engineering Administration.

To be admitted to the first-year class, applicants must have attained the age of seventeen, and must pass satisfactory examinations in Algebra, Plane and Solid Geometry, Trigonometry, Physics, English, History, French or German, and must present teachers' certificates for two units of a series of elective subjects. A division of these entrance subjects between June and September or between three successive years is permitted.

Entrance examinations are held in June and September of each year. In June, applicants are examined by the College Entrance Examination Board in Boston, New York, Philadelphia, Chicago, and many other cities in America and Europe. A circular stating times and places is issued in advance, and will be mailed on application to the Secretary of the College Board, 431 West 117th Street, New York City.

Graduates of colleges and scientific schools of collegiate grade are admitted, without examination, to such advanced standing as is warranted by their previous training.

Graduate courses leading to the degrees of Master of Science, Doctor of Philosophy, and Doctor of Science are also offered. Special Research Laboratories of Physical Chemistry, Applied Chemistry, and Sanitary Science have been established.

Correspondence should be addressed to Prof. A. L. MERRILL, Secretary of the Faculty.

DODGE

WHEN YOU PUT YOUR THEORIES INTO PRACTICE

Two factors are necessary to your success—your own knowledge, and the mechanical appliances with which this knowledge is put into practice.

The writers of your text-books must of necessity assume that the machinery used in producing and transmitting power is efficient and strong.

Unduly tight belts, excess bearing friction, faulty lubrication, imperfect contact between belt and pulley face will nullify even the most carefully planned power transmission installations.

All these troubles are due to incorrectly designed or poorly made transmission equipment.

You will always get the results you have a right to expect if you use

Dodge Power Transmission Appliances

You'll find in the DODGE line everything for the mechanical transmission of power.

It is the only line that furnishes the correct appliance for every part of the transmission system, from main drive to the collar in the most remote part of the plant.

All DODGE appliances are DODGE designed, and built with a correct mechanical relation to each other and to the work they are to perform. As a result, a DODGE equipped line or countershaft goes together right and acts as a unit in economical power transmission.

Such effective service cannot be obtained where the products of several makers are used in the same installation, as the limits and designs of one manufacturer are entirely different from those of another.

More than five hundred stocks in the power using centers of the country make DODGE equipment readily available wherever you are located.

We will gladly take the responsibility for the continued economical operation of DODGE equipment.

The building of the pyramids was a miracle of manual labor. But that was 4000 years ago — and besides you are not in the pyramid-building business.

TODAY when there are loads to lift, loads to move and loads to lower, the industrial world depends upon the Yale Spur-Geared Chain Block. With this modern hoist one man alone can do what 300 men *might* do unaided. It takes the place of the old-fashioned methods, the block-and-tackle, the floor truck and the crowbar-and-rollers.

The steel vitals of the Yale Spur-Geared Chain Block, rigid inspection, and 50% overload test before it leaves the factory, assure safety to the operator and the load.

A GREAT SONG

"THERE IS NO DEATH"

Dramatic Art Song by
GEOFFREY O'HARA
Words by Gordon Johnstone

I tell you they have not died,
They live and breathe with you;
They walk here at your side,
They tell you things are true;
Why dream of poppied sod
When you can feel their breath,
When flow'r and soul and God
Knows there is no death.

I tell you they have not died,
Their hands clasp yours and mine,
They are but glorified,
They have become divine:
They live! they know! they see!
They shout with every breath:
"Life is Eternity!
THERE IS NO DEATH!"

Founded in Providence in a small clock shop, the business conducted by David Brown and his son J. R. Brown branched in 1850 into the manufacturing of machines and machinists' tools.

That year and the next saw an Automatic Linear Dividing Machine and the Vernier Caliper introduced to America, these being followed by the Micrometer Caliper. Later the Universal Milling and Grinding Machines were invented and offered to the public.

In 1920

A modern factory covering over 1,360,000 square feet and equipped with the best tools and appliances obtainable, producing several types and many sizes of machine tools and thousands of small tools known throughout the entire world for their high quality.

MESSAGES

Facts vs. Fancies

A MESSAGE, whether in oral or printed form, that is expected to bring results must have something more behind it than flowery language and dreamy theoretical ideals, presented in a studied effort to impress.

Facts—information—plainly stated in forceful but simple form, with logical "reasons why," always have and always will bring about the results for which a message was intended.

It is our business to undertake the production of ***commercial messages,*** in various forms of printed matter, each adapted to particular requirements, which will convey to the ultimate purchaser, in an effective and convincing manner, the essential facts and information he needs to know about your commodity-in-trade (merchandise or services), with sound ***reasons why*** yours is the one particular article which will meet his requirements.

The success of our clients has been our success. We would like to demonstrate our ability to you.

Radium Dial, Alarm. 30-hour intermittent alarm. Height 6¾ in., Diameter 5¼ in.

GILBERT Night and Day Radium Dial Clocks

THEY are the last word in radium-clock technique. They represent the utmost in clock comfort for den and bedroom—clock convenience for camp and tent.

Gilbert radium dial clocks "make night time plain as day." No need for switching on the electrics—no need for striking matches in the middle of the night.

The Gilbert dial has real night-time visibility. It is the result of radium concentration upon the Gilbert markings and hands. The clear radiance of the two tells the time unmistakably.

Gilbert radiums come in nickel and in attractive mahogany finished wood cases. You can have them with alarm features or without.

The next time you pass your dealer's, step in and ask him to show you his line of Gilberts. You are bound to take one home with you.

LEATHER BELTING

Tanned by us for belting use

A Forty-seven Year Belt

THIS twenty-four inch Graton & Knight belt has transmitted power on one drive for forty-three years. It withstood four years of neglect. Today its efficiency is unimpaired.

In the year 1872 this belt was placed on a water-wheel drive in a woolen mill in Pawtucket, R.I. For thirty-three years it did its work well.

In 1903 the plant shut down, and was not reopened until 1907, when the Central Falls Mazda Lamp Division bought the property. Upon inspection it was found the wheel-pit and part of the belt were covered with rubbish. After cleaning out the pit, they turned on the power. The belt picked up its load and has been carrying it ever since, driving a sixty-eight inch pulley from a ninety-six inch wheel.

This forty-seven year leather belt is positive proof of the quality of Graton & Knight Tannage of leather. In 1872, as now, Graton & Knight were making the right belts for the work to be done.

JENKINS VALVES are made in types and sizes to meet all requirements of power plant, plumbing, and heating service. The dominant idea behind the construction of every valve is strength and proportion for maximum service. The severest conditions to which each valve may be subjected, not the average, determines the design and construction, with the result that JENKINS VALVES are always strong and heavy enough, and ready to meet the strains and "hard usage" by a wide margin. Only valves bearing the JENKINS "Diamond Mark" cast in the body may be truthfully called and lawfully sold as JENKINS.

Jenkins '96, Jenarco, Oiltite and Magnolia Sheet Packing, Jenkins Renewable Composition Discs, Pump Valves, Cut Gaskets, Gasket Tubing, Washers and Compressed Asbestos Jointing are also included in the Jenkins line.

JENKINS PRODUCTS are obtainable through supply houses everywhere.

HELP!

LEFAX CAN HELP YOU

SENIORS

George: What're you doing with your gown Jack?
Jack: Making a crepe for the notes I took in college.
George: None of that for mine. The notes I took are still live ones—I use Lefax.

NOTES:—Keep the notes you take in college in a form you may use after you are "out on the job." Use a pocketable, handy, uniform size sheet and be sure that the blank forms you want to use are available in the size you choose. Nine years of supplying the engineers' and chemists' needs have taught Lefax what your requirements are. Therefore in deciding on your standard note-book give consideration to Lefax. In its 110 different blank forms and 2100 sheets of technical data the needs of even the most exacting persons are met.

JUNIORS

Bill: You forgot to bring the tables you will need for this class.
Ed: No, I didn't.
Bill: Here are mine; where are yours?
Ed: In my pocket—I use Lefax.

DATA:—In your note-book is the handiest place you could have the tables, charts, diagrams, and explanations which you have almost constant need of and which are now scattered through your many texts and technical books. Lefax has 4200 pages of data in Lefax size for you to choose from. The printed data and written notes will fit in the same memo book or file. Select what data you will have use for and carry only that, with what blank forms, graph paper, etc., you will need when you go to class—or out on the job. With Lefax you carry no unnecessary data.

SOPHOMORES

Senior: What are you looking for?
Soph: I can't locate my "chem" notes.
Senior: Here, take mine. I've kept them in my Lefax file.

MEMO BOOK AND FILE:—You can't carry all the notes which you ever use all of the time. Neither can you keep them all in note-book covers. The obvious solution of this difficulty is to file your notes —systematically. Use but one note-book and remove all notes for which you have no immediate need to the file and refill your memo cover with new sheets. This is extremely easy with Lefax—and it is the only way in which you may keep all your data at your finger tips without confusion. With Lefax the drudgery of filing is eliminated and your old notes may be found on a moment's notice.

FRESHMEN

Postman: That's right, "Mister" John—subscribe to Lefax while you are a freshman, and by the time you graduate you will have over a thousand pages of useful data besides your college notes.

DATA SERVICE AND MAGAZINE:—The need for more and later notes grows with every one. Likewise, the time available in which to compile and classify continually grows less. The Lefax blank forms lighten the task of taking and preserving these notes. The Lefax Data Service does more, it keeps you supplied with the newest data on any branch of engineering you desire. Every month the postman will bring you new data to add to your personal "Handbook." You will appreciate the Magazine which is an integral part of the Lefax Data Service.

Familiar Quotations:

By JOHN BARTLETT

A Collection of Passages, Phrases, and Proverbs, traced to their sources in Ancient and Modern Literature.

This new edition includes quotations from nearly 200 of the more important writers of the latest decades—among them Swinburne, Stevenson, Mark Twain and Kipling. This leading reference book now contains 1054 pages of quotations, arranged chronologically, with a 400 page index of the most important words of each quotation, and an index of authors.

Tenth edition, revised and enlarged by Nathan Haskell Dole. 1454 pages. 8 vo. $4.00; half leather, $5.50; half morocco, gilt top, $8.00; full crushed levant morocco, $16.00.

A Dictionary of English Synonymes and Synonymous or Parallel Expressions

Designed as a practical guide to aptness and variety of expression. By RICHARD SOULE, editor of Worcester's Quarto Dictionary. Revised and enlarged by George H. Howison, LL.D.

Four hundred and eighty-eight double column pages of synonyms alphabetically arranged.
Easily stands at the head of books of its class.—*The Nation*, New York.

488 pages. Crown 8vo. $2.50. Half leather, $4.00.

A Dictionary of Similes

By FRANK J. WILSTACH

Contains 17,000 similes from the important writers of all languages alphabetically arranged under subject headings. Not only will one find such familiar similes as "Spread like wildfire" and "Bitter as wormwood," but several thousand others as droll as "Hard as a barren stepmother's slap," or "About as much privacy as a goldfish."

488 pages. 8vo. $3.00. Half leather, $4.50. Half morocco, gilt top, $7.00.

SUCCESS

TWO men finish their education and start in business. Both, apparently, are equally endowed with the qualities that make for success. Yet one fails—the other succeeds. Why?

Perhaps the former lacked that vital requirement—the ability to get things done: his ideas were all right, but he could not produce results.

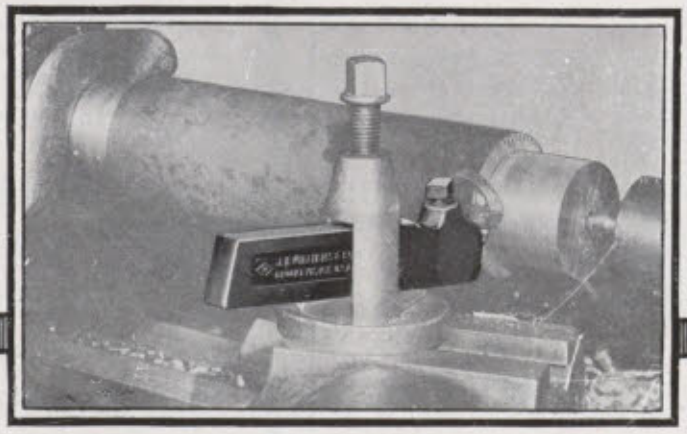

When *you* begin to specify or purchase equipment, be it Wrenches, Tool Holders, Lathe Dogs, or other Machinists' Tools, remember that for nearly half a century the name of J. H. Williams & Co. has been linked with Success—success in building tools that do the work for which they were designed efficiently—that increase production and improve quality.

RED EDGE
SHOVELS

SIX YEARS AGO we made up our minds to make the best shovel we could—even though the tide of Shovel quality was very low just then.

Our thought was that as the new classes were being graduated from the Boston Tech they would go out into their selected fields and see the urgent need of keeping hand shovels up to the capacity of modern machinery and to-day's demands,—that poor or ordinary hand shovels were making a weak link in the chain of operating practice, whether mining, construction, or railroads.

We congratulate ourselves on our diagnosis, because the tide is now running very full towards hand shovel quality.

RED EDGE is the lighthouse, and we have equipped in time to take care of the heavy demands being made upon us.

RED EDGE shovels have proved their fitness for their position by every unit of measure—ton, day, or dollar—and we will be glad indeed to send the evidence upon request.

Entering the World Electrical

THE graduate of today enters a world electrical.

Gathered from the distant waterfalls or generated by the steam turbine, electric power is transmitted to the busiest city or the smallest country place.

Through the co-ordination of inventive genius with engineering and manufacturing resources, the General Electric Company has fostered and developed to a high state of perfection these and numerous other applications.

And so electricity, scarcely older than the graduate of today, appears in a practical, well developed service on every hand.

Recognize its power, study its applications to your life's work, and utilize it to the utmost for the benefit of all mankind.

Sheldon Worm Drive Axle

FOR MOTOR TRUCKS

CONSTRUCTED ON THE LOCOMOTIVE-AXLE PRINCIPLE

The wheels are fixed to the axle shafts and the axle turns with the wheels like those of a locomotive. The bearings are at the Hubs and Differential, giving the utmost leverage against side strains.

The Worm Shaft is mounted on Ball Bearings which take all combinations of radial and thrust loads directly through the centre of the balls. Ball Bearings offer less friction than any other type. The front bearing is free to move, adjusting itself automatically to compensate for any expansion in the Worm Shaft.

For great weight, high speeds, and enormous side strains, the Sheldon Axle is as dependable as that of the Locomotive itself.

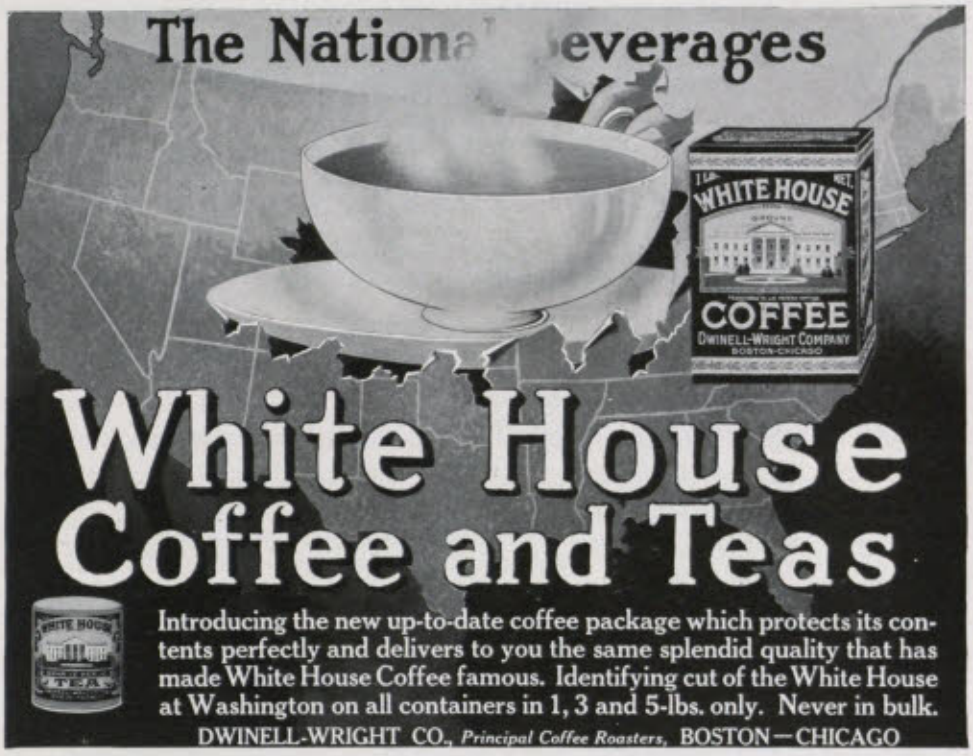

Serves best on rails and roads.

DU PONT

Dependable Explosives

WHEN you get into the practical work of construction or mining operations you will learn at first hand the traditions of your chosen profession and the methods practised. When you assume the responsibility of completing a contract, upon your judgment will rest the selection of materials best suited to your purpose.

The selection of proper explosives is most important and largely determines the safety of employees, the progress of the work, and the cost of operations.

Your predecessors specified and used Du Pont Dynamites because they knew they could depend upon them for satisfactory performance. Other dynamites might accomplish as much, but men of experience realized that Du Pont Explosives would give *maximum tonnage every time.*

Therefore, in your new responsibilities it is best to "let well-enough alone"—let Du Pont do the experimenting. If it were possible to produce better explosives, Du Pont would do it. Select the proper grade of Du Pont Explosive for your work and then *stick to it.*

To enable you to determine the kind of explosives best adapted to your requirements, ask for our catalogs descriptive of Du Pont Explosives and Blasting Accessories. They are valuable assistants to engineers engaged in construction work.

NORTON PRODUCTS:

Alundum Grinding Wheels, Crystolon Grinding Wheels, Alundum Grain for Polishing, Glass Cutting Wheels, Razor Hones, Scythe Stones, Alundum Refractories, Alundum Safety Tile, Rubbing Bricks and Stones, Grinding Wheel Dressers, Precision Grinding Machines, Bench and Floor Stands.

THE grinding wheel user should always remember that there is one suitable wheel, one combination of abrasive, grain and grade, for each particular operation, whether it be round grinding, surface grinding, tool grinding, internal grinding, for machinery, manganese or high speed steel, cast iron, chilled iron, bronze, brass, or aluminum. He should also remember that the wheel must be selected to meet all the conditions that affect the operation, such as the condition of the machine, feed, contact, and method of grinding.

Alundum Wheels and Crystolon Wheels are distinct in composition and have therefore different cutting qualities.

Alundum Grinding Wheels should be used for all steel grinding, except in those few cases where the conditions are out of the ordinary. Since 75% of the pig iron production of the world goes into steel, this means that Alundum Wheels should perform by far the larger proportion of grinding operations.

Crystolon Wheels, on the other hand, should be used on cast iron, which is lower than steel in tensile strength. Crystolon Wheels are hard and sharp, and the grain is of such a character as to break away at the right time, giving a wheel that cuts fast and free.

The Norton Company, Engineers and Demonstrators, come in contact daily with different grinding operations, and learn the successes and failures of wheels of certain grains and grades. Such experience is always beneficial to the buyer and the benefit of it is free to every inquirer.

And the finer Swiss Watches

The movements are specially made, adjusted and timed for us exclusively

A man's most intimate associate is his watch. Day after day for years it times his going and coming. Its accuracy should be unquestioned—its appearance one to inspire admiration. Our selection of fine watches fulfils to an admirable degree both requirements.
