L

In Memory of Charles Robert Cross

Professor of Physics from 1870 to 1917

His profound scholarly learning—his fair-mindedness on all occasions, and his keen sense of humor made him one of the most ideal and one of the best beloved men that has ever been connected with

The Massachusetts Institute of Technology

# Mrs. Ellen A. King

Mrs. King came to Technology in September, 1890, to manage the lunch room which was established in the basement of the Rogers Building. Small as the Institute then was, it was always crowded, for Mrs. King aimed not only to serve good and abundant food, but to make the lunch room at least a momentary home. How well she performed her duties, and carried out her aims, is shown by the fact that for eighteen years her establishment was the recognized meeting-place of the school. All of the students and instructors were regular or occasional visitors. Those who came to it were her friends and not a few of them have found that friendship one of the bright spots to look back upon in after years.

By 1908, the demands on the lunch room had increased to such an extent that it was deemed best to get a man to manage the dining service. Mrs. King took a position at the Twentieth Century Club, though her connections with Technology were by no means severed. Each year she took charge of the spreads at Christmas and Commencement. It was at these gatherings that she first met President and Mrs. MacLaurin and theirs were among the first greetings she received when she came back to the Institute during the War to be in charge of the Naval Recreation Building. This work ended, Mrs. King took charge of the libraries and reading rooms of Walker Memorial, which had just been made ready for student use, and in this capacity she is again able to look after the comfort and pleasure of the men. Though it is impossible for her to provide her famous scrambled eggs, brown betty or strawberry shortcake to the present multitude, she can still give a motherly touch to Walker Memorial and become a real friend to those in need.

# WHO'S WHO OF THE CLASS OF 1923

#### Prologue

Friends, Juniors, fellow-sufferers! Lend an ear! During your brief sojourn here, many of you have become marked men. How badly you are marked has been determined and recorded below.

#### Who of the Class of 1923 is

#### MOST POPULAR WITH THE FELLOWS?

Bob Shaw tops them all, with Brantingham and Kirkham tied for second favorite. Helen Miller wasn't last on the list either.

#### NEAREST THE HALL OF FAME?

Ted Edison was loyally supported by all the Jersey mosquitoes, but the rest of us don't seem to be very near.

#### THE MOST PIOUS?

Dick Frazier was nominated to wear his collar reversed, and carry a Polecon, but he claimed his shirt didn't have any buttonhole in the back. Course VI sparked on Phelps.

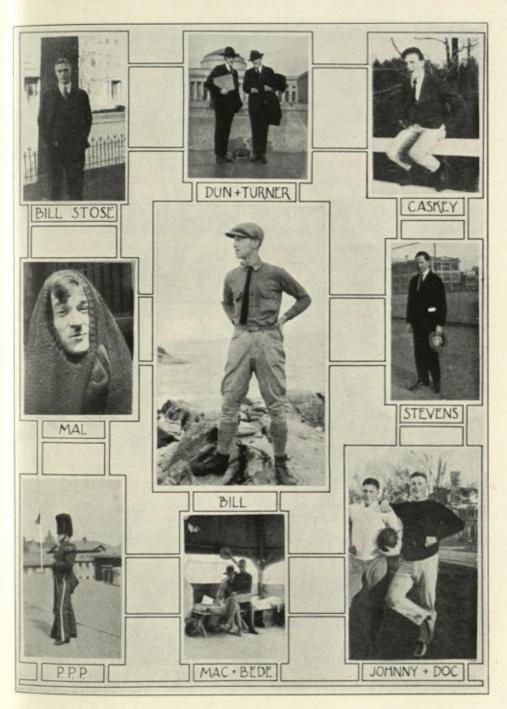

#### THE BEST TALKER-ABOUT HIMSELF?

W. L. Smith wins, with Brantingham a couple of words behind. Kinch also makes himself heard over the din.

#### THE MOST POPULAR—WITH THE LADIES?

Doc Murdoch wins the fur-plated lip stick. It's his wonderful line that catches them, they say. Herb Flather is rumored to shine in a system all his own, and says that business is picking up. The coeds couldn't agree on this one at all.

#### MOST POPULAR-WITH HIMSELF?

Since Ed Schmitz wore a nightgown and a tin pie plate, the public gaze is centered on him. However, Burchard is following closely, and expects to annex Ed's laurels at most any time.

#### A GOOD EXAMPLE OF VANITY FAIR?

Hal Niles' be-utiful shades and shadows in green get all the applause, but it surely was too bad that Denton Massey took the chicken pox. Has anyone seen Dexter or Kinch since they joined the Campus Golf Club?

#### THE BEST BLUFFER?

Well, we're all Juniors, aren't we? But seriously, fellows, most of you have seen Charley Reeves as a boxer, while Tommy Thomas rates a close second, due to his position on the official hand organ of Technology.

#### THE LAZIEST?

Doc Murdoch, Course XV again, by three winks and a drawl. Lameroux picks the next most comfortable chair, while H. C. L. Miller corralled one vote because he was too lazy to get up and walk out of a Polecon Lecture.

#### THE NOISIEST?

The dorms voted solid for the Gold-Dust Twins, Dexter and Kinch, while T. E. Rounds was several foot-pounds behind.

#### THE MOST BLASÉ?

Toss up between Niles and Schmitz with the coeds voting the Niles ticket. Putnam's stories rated him third position.

#### THE FATTEST?

Press Woodling, being an economical course XV man, expects to have a corporation of his own when he graduates; while Dietz is starting a rival concern.

#### THE THINNEST?

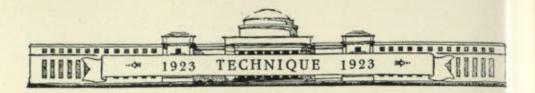

Either course IX student. They also say that Art Edwards goes and comes through the keyhole when he feels particularly lazy.

#### THE MOST HANDSOME?

"Myself" took on all comers successfully (nice modest fellows around here, aren't they). Jack Sheffield came next, with the coeds strong for him.

#### Who Is Our

#### MAN OF THE WORLD?

Red Sayre apparently cultivated all the necessary requisites while in France last summer, but Niles and Brantingham are close on his heels.

#### STAGE DOOR JOHNNY?

Hal Beadle has forgotten more than an ordinary Johnny ever knew; Tech Show needs lots of practise you know.

#### DEMI-JOHN BARLEYCORN?

Putnam is the highest consumer but Johnny Brill is an authority on home-brew.

#### MOST CONSISTENT CRABBER?

Every course had its candidate, but they agreed on R. H. Park, H. S. Ferguson and H. H. Spencer.

#### BOSS POLITICIAN?

Taylor showed his politics by collecting practically all the votes. The only other man who had a chance, was Al Brantingham, who tried to pass the class constitution in spite of the class.

#### CLASS GOAT?

The whole Technique Board. All Juniors seemed to think that the Statistics Ballot was a subtle way of hinting for compliments.

#### HIDDEN GENIUS?

Sorry to disappoint you, boys, but he is evidently so well hidden that all efforts to unearth the curiosity were unsuccessful. If you can find him, you're a better car than I am hunk of tin.

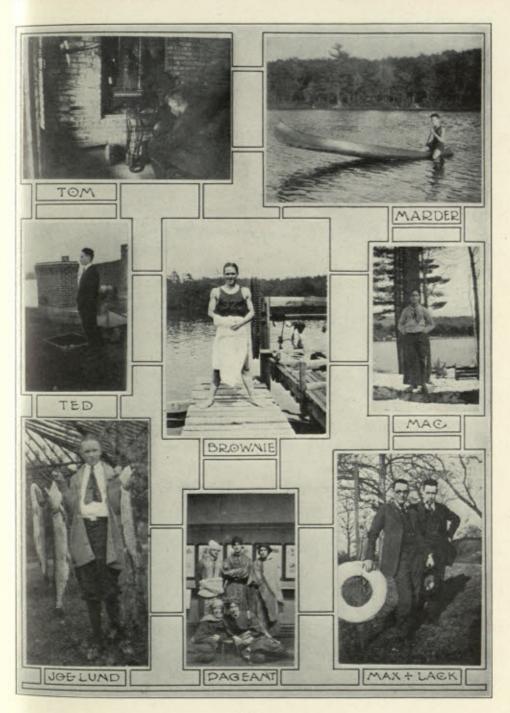

#### BEST MUSTACHE GARDENER?

Kirkham's mustache surely leads along the primrose path to fame. There was some controversy between Putnam and Clapp, but a recount favored Put. Dick Bowditch has proven the possibility of raising two crops a season.

#### CLASS INFANT?

We always wondered why Chick Miller was so popular with the ladies, now we know, all the coeds voted for him because he was so cute. J. A. Frank fought for first place, but was just a trifle small.

#### BEST ATHLETE?

Hendie breaks the tape, with Metcalf trailing, and Art Smith third.

#### WORST ATHLETE?

We hereby nominate the T. E. N. Football Team closely followed by that of the Tech, (Oh, it makes no difference, they play the game backwards anyway). George Southard, Managing Editor of the Tech, seems to be about average of the team.

#### PARLOR SNAKE?

E. I. Richardson even has a snaky motion in classes, but when Ed Schmitz gets in action, they simply can't resist.

#### CLASS SOCIALIST?

Any man with an Arabian name like Ginsberg will do, pick your own.

#### BIGGEST SOREHEAD?

Everybody the morning after Tech night, but Hoffman and W. L. Stewart the rest of the year.

#### What Is Your Favorite

#### PASTIME?

It's peculiar how many Juniors thought eating a pastime, sleeping in lecture a duty, and studying a necessity.

#### SHOW?

The corner of Boylston and Tremont Streets is still popular, especially on a windy day, but some highbrows liked the Follies better.

#### ACTRESS?

Pola Negri wins by an eyelash with Helen Miller's talent also recognized.

#### LITERATURE?

Police Gazette (one must obey the law) rivaled by that French Atlantic Monthly, La Vie, while others pronounced Poe and Voo Doo passable.

#### OUTDOOR SPORT?

Sitting in a nice comfortable hammock with some sweet lady (who has no little brother), with a full moon over your\_left shoulder and—hoping it doesn't rain.

#### INDOOR SPORT?

Same thing, scenery changed, fireplace and settee, moon turned off and-hoping the milk man doesn't come so soon as to wake father.

#### TIME FOR RETIRING?

After losing at poker is a good time or during most any lecture if the seats are comfortable.

#### DRINK?

Some X man said hooch but not HOOCH (Reference: Professor Moore's Outlines of Organic Chemistry—Coop-Price \$2.50). Water was equally popular, anything cheap would be, after Walker coffee.

# COLLEGE (excluding the blessed institution) Girls?

Wellesley still holds its supremacy, despite the rise in railroad rates, while Smith is a strong second.

#### Men?

The blue of Yale flies at the top of the flagpole of popularity, with Dartmouth's green and Cornell's red below.

#### WHAT DOES VOO DOO?

After a comprehensive study of the subject in hand, the investigating committee has reached the decision that Voo Doo is rivaled only by the Institute in parting a fool and his money.

#### WHAT IS ENTROPY?

Velvet Joe's pipe dream which doesn't materialize, but who the H—cares?

#### ARE YOU IN LOVE OR ARE YOU ENGAGED?

Gladys Farmer says "No," but she's open to conviction. Helen Miller says "It's none of your d— business," while most of the fellows say, "It's too expensive."

#### WHAT IS YOUR WILDEST AMBITION?

Gladys Farmer would like to have sixteen tall blondes all madly in love with her at once, but what could be wilder than smoking in the Dean's office.

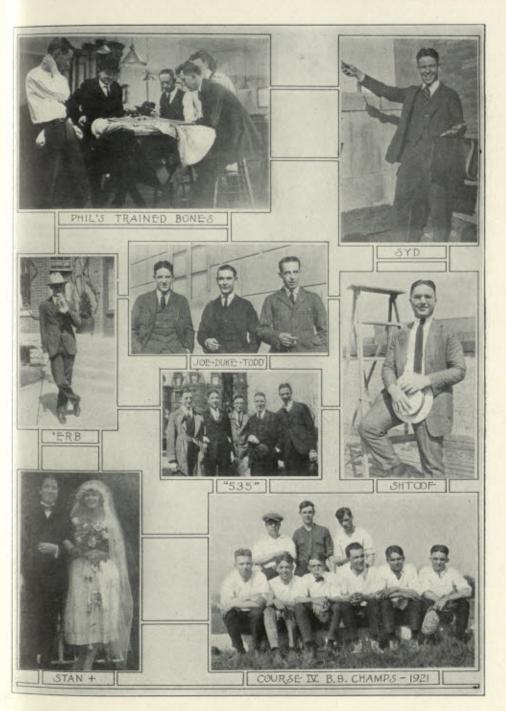

#### WHAT IS YOUR IDEA OF A SALARY TO MARRY ON?

Most everyone agreed that the girl should be earning at least \$20,000 a year.

#### WHAT IS THE WORST THING YOU EVER DID?

Some misinformed salesman tried to sell Professor Passano a pair of leather shoes, while another wild and reckless individual kissed a Sargent girl. (That sure is reckless with Boston women getting \$10,000 per.)

#### The Season of 1921 in Athletics

AMPERED as athletics were during the War, the return to normal conditions in this branch of Institute activities was remarkably rapid and the season of 1921 saw the teams of Technology holding more important places in the collegiate athletic world than ever before.

The thirty-five teams representing Technology enjoyed one of the most successful seasons that sports have ever had at the Institute, due to the increasing interest in athletics, and the larger number of men turning out for

sports as a result of this interest.

Two new sports, or rather old ones re-established, were successfully organized, and completed seasons. Basketball attracted about fifty men, from whom were chosen the men making up the Varsity and Freshman squads. Both teams were successful, and the creditable work easily warranted their continuation as recognized sports. Baseball gained sufficient interest among the undergraduates to find form in the organization of a Freshman team. In track, the Beavers retained their right to hold the Briggs Trophy for another year, by winning the New England Intercollegiate championship for the third consecutive time. George Dandrow '22 retained his laurels in the weight event at the Penn Relays, and also was selected to accompany the United States Olympic team to Antwerp. The swimming and rifle teams each added to Technology's list of titles by winning their respective New England championships. Three individual titles were brought to Technology by the wrestling team. Crew showed itself to be the second of the big spring sports of the coming Technology.

Thus, despite the obstacles encountered in the path of athletics, the teams all gave evidence of great progress, and it is with great hope that those interested in sports at Technology look toward the future. The movement on foot at the present time, in an attempt to secure adequate finances for the various sports, will, if it is successful, mark the beginning of a new era in the annals of greater

Technology teams.

# TRACK 1 9 2 1

W. K. MacMahon, Captain

When Mich Bawden crossed the line in the I. C. A. A. A. A. half-mile event, he closed one of the most successful track seasons that a Technology team has ever had. Coach Kanaly had at his disposal, men who were capable of scoring in every event. The men who made the season such a success in the way of performance were Captain MacMahon, Bawden, Bardes, Dandrow and Spitz. These men, together with those who brought in the smaller points, were responsible for the winning of the New England Intercollegiates for the fifth consecutive time.

Interclass Meet

The 1921 track season started in earnest on Saturday, April 23rd with the annual Spring Interclass Meet. The Juniors, with six firsts to their credit, were able to turn the tables on the Seniors who had snatched the victory in 1920 by a margin of seven points. The Seniors took second honors with a total of 43½ points and the Sophomores third, having gathered 27½ points. The Freshmen were outclassed but managed to bring in a total of 10 points. Pinkham '22, with a tie for first in the high jump and one second and two thirds, netted 11 of the Juniors total points. W. L. Smith '23 and Dandrow '21 tied for second honors with 10 points each. Dandrow's throw in the hammer

was the only performance to better previous marks. His toss of 156 feet 2 inches bettered his own 1920 record by more than 2 feet. Cups were awarded the first-place winners in each event.

Seniors 43½ Juniors 62 Sophomores 27½ Freshmen 10

Harvard By placing in each of the thirteen events on the program, Harvard's track team was able to score a victory over the Technology aggregation in the Harvard Stadium on May 7th. Although the score seems to indicate a one-sided meet, it was most closely contested throughout. Gourdin was easily

Spitz and Bossert at the Finish of the "440" Harvard Meet

Bossert in the "100" Harvard Meet

the star of the meet, scoring firsts in the "100," "220," broad jump and second in the shot. His mark of 23 feet 11 7-8 inches in the broad jump established a new Harvard record. Howlett of Tech pressed Gourdin in both the "100" and "220" but had to give way to the ability of the Harvard star at the finish. In the "440," Ted Spitz passed Wharton of Harvard on the turn and managed to place first ahead of his team-mate, Bardes, who nipped Wharton for second honors. In the half-mile, Mich Bawden displayed his usual burst of speed when in sight of the finish and slipped by Fox of Harvard in the excellent time of 1:59:2. Billy MacMahon, by taking a ten-yard lead in the first lap of the two-mile event and increasing this advantage each succeeding lap, was an easy winner over Mahon of Harvard and Hendrie of Tech who finished in the order named after a shouldering drive to the tape. Dandrow was the Beaver strength in the field events, with a first in the hammer throw and third in the shot put.

Harvard 69 Technology 48

Dartmouth Winning first and second places in the 220-yard dash, the final event on the program, Technology scored a one-point victory over

Dartmouth in the dual track and field meet May 14th. Ted Spitz and Ted Bossert swept down their lanes a couple of strides ahead of John Shelburne, Dartmouth's star sprint and weight entry, for the "220" places that brought Technology from six points behind to one point ahead of the Green. Captain Thomson of Dartmouth with firsts in both hurdle events and second in the high jump was high individual scorer of the meet, while Ted Spitz with firsts in the "100" and "220" was the individual star for Technology. Art Smith led the field in the quarter but yielded to Ollie Bardes and Mich Bawden on the back stretch. It looked like a dead heat, but the judges gave the decision to Bardes. The half-mile gave the second clean sweep of places to Technology when Mich Bawden, after trailing for one and one-half laps, finished an easy first ahead of Gurney and Snow. Sanborn took the lead in the mile and was never headed, finishing in 4:33:1, excellent time considering the slow track. Stone finished a good second ahead of Merriam of Dartmouth. Billy MacMahon, who was trying for a Field record in the two mile, was doomed to disappointment because of the wet track, but his initial

mile of 4:41 shows the fast pace set. Hendrie followed Captain MacMahon over the tape, placing second. In the field events, Dandrow was the stellar performer for the Institute. With a throw of 146 feet, he easily defeated Weld of Dartmouth in the hammer. Dartmouth's sweep of the pole vault and firsts in the broad and high jumps, as well as shot put, placed them in the lead until the result of the "220" was determined. Brown, of Dartmouth, in jumping almost six feet in the high jump, with such unsure footing, furnished one of the thrills of the meet.

N. E. I. C. A. A. Technology easily retained its title in the thirty-fifth annual New England Intercollegiates held on Tech Field, Friday and Saturday, May 20th and 21st. Boston College, with a total of 23 points, just one-half of the Beaver tally, captured second honors, while Williams took third place. Nine Beaver points were scored when Sheldon cleared the bar in the pole vault

Driscoll of Boston College easily carried off the individual honors when he broke the "440" record, held by Lester of Williams, by doing it in 49:1. This was the only Association record broken in the meet. The Boston College star also placed first in the "220." Bardes of Technology trailed Driscoll in the "440", an easy second over Stowers of Williams. Mich Bawden furnished the thrill of the afternoon for the Technology followers when he broke the tape in 1:57 in the "880", thus breaking the existing Field record. Running the same type of race as he had run all season, Mich hung back behind King of Holy Cross, the 1920 title holder, until the last turn had been passed, and then cutting loose with a tremendous spurt he crossed the line nine yards in the lead. Sanborn of Technology placed fourth in the mile which was won by R. S. Buker of Bates. In the two-mile event, Captain MacMahon and R. B. Buker, also of Bates and the winner of this event in the Penn Relays, led the field for seven laps, but the Bates entry here took the lead and with a

spurt in the last lap, in which he was timed at 59 seconds, and easily won the race. Captain MacMahon was an easy second, while Leath of New Hampshire State took third honors. Dandrow, of the Beavers, was the best man in the field events, with first place in the hammer throw, second honors in the shot put and fourth in the discus. Pinkham added five points to the Institute total when he won the discus throw with a toss of 127 feet ½ inch.

Penn Relays The Institute was represented at the Penn Relay Carnival, April 29th and 30th, by a team of six men. Records were broken in several events and Technology had the honor of bettering one of the marks. George Dandrow's throw of 32 feet 3¹/₅ inches, in the 56 pound weight event, increased his record of the 1920 Carnival by more than 2 feet. Captain MacMahon, running in the International Two-Mile Run, led the field for the first six laps, but was forced to give way in the last two laps and finished fifth. Captain MacMahon's time of 9:43 was 18 seconds slower than that of Buker of Bates who won the event. In the Two-Mile Relay, Hennessy, Bardes, Snow and Bawden represented the Institute and finished sixth. The showing of the Institute entry was very creditable as evidenced by the fact that the time of the winners was only four-fifths seconds slower than the record.

I. C. A. A. A. A. The unusually successful season ended when the Beavers tied for eighth place with Penn State in the annual I. C. A. A. A. A. meet in the Harvard Stadium on Saturday, May 27th, with a total of 10 points. Captain MacMahon, after a hard battle for position with the leading distance men of the country, took fourth place in the two-mile event, which was won by R. E. Brown of Cornell. George Dandrow added another title to his list when he easily beat his nearest competitor by more than eight feet, in the hammer throw, with a toss of 157 feet 4½ inches. Mich Bawden pulled the surprise of the day when he finished third in the half-mile event. Again, running back in the field, he uncorked a sprint when in sight of the worsted that carried him past runner after runner, finishing in 1:55:4, the fastest half of his career.

WITH another cross-country season looming up ahead, Coach Kanaly set out to build up a team which would uphold the reputation given to Technology by the team Billy MacMahon had captained the year before. With a nucleus consisting of Captain-elect Sanborn, Flanders and Hendrie, along with several of last season's Freshmen, work was started in earnest. The team seemed to be up to championship calibre, and the results of the annual Handicap meet and the meet with Harvard only strengthened this idea. The team did remarkably well in the Syracuse Invitation meet, and seemed to be on the road

Captain Sanborn and Flanders in the New England's

to another New England championship, when Anderson, who had been running in fourth position, was declared ineligible, due to an Institute ruling. Anderson's loss was just enough to nose the team out of the New England title and a better place in the I. C. A. A. A. meet at the close of the season.

The annual Handicap meet, which is the opening event of the season, was held over the Franklin Park course early in October. Leading a field of over one hundred starters, Captain Sanborn won this event in 27:28. Captain Sanborn's time and position won him the Benson and Nye Cups awarded to the winner and the man with the best handicap time, respectively. Art Flanders was the second man to cross the tape, and Billy MacMahon finished a good third.

Harvard On October 21st, the Beaver harriers took Harvard into camp to the tune Meet of 18 to 40, over the five-mile course at Belmont. Captain Sanborn took the lead at the start, and held it over the entire course, finishing first, in the fast time of 34:23. Nine seconds later, Art Flanders crossed the line, followed by Bob Hendrie, which gave the first three places to the Beavers, and with them the medals, awarded by the Harvard A. A., to the winners of the first three places. Harris, finishing fourth, was the first Harvard runner to cross the line. Robertson, of last year's Freshmen, and Poor, finishing fifth and seventh respectively, completed the scoring team.

Syracuse The Varsity next journeyed to Syracuse to take part in the Syracuse Meet Invitation event October 29, and returned with third honors. Cornell, with probably the strongest team in the country, took first place by placing their scoring team in the first five places. Syracuse, running over their own course, captured second honors, while the Institute beat out Yale by eight points for third. Captain Sanborn led the field over the first four miles of the course, but had to relinquish the lead to the Cornell men at that point in the race, and finished ninth. The scoring Technology team in order of their finish were Captain Sanborn, Flanders, Hendrie, Anderson and Poor.

Bob Hendrie leading Buker of Bates in the New England's

New England On Saturday, November 12th, the runners from the University Intercollegiates of Maine succeeded in capturing the New England Cross-Country title by leading the Institute entries home, and totaling 65 points as compared to the Beavers 72 counters. Hart of Bowdoin took the lead and held it throughout the race, coming home in 28:28. The Institute trio, Captain Sanborn, Flanders and Hendrie kept closely behind the leader until the last quarter mile when the sprint to the tape started. Buker of Bates, who won the event last year, passed five men on the home stretch, and finished second, closely followed by Doherty of Tufts. Flanders was the first Technology man to cross the finishing line, taking fourth. Captain Sanborn with fifth, was the second Institute runner to finish, closely followed by Bob Hendrie, who placed eighth.

Captain Sanborn

When the points were counted, it was found that the Ithacans had established a new intercollegiate team record of eighteen points. The first Technology runner to finish was Art Flanders, who was the fourteenth man to cross the line. Bob Hendrie finished in eighteenth place, just being nosed out by Burke of Harvard at the finish. The team placed sixth out of thirteen entries, and outclassed the University of Maine, who had defeated the Beavers the week before in the New Englands. Captain Sanborn hung behind with the slower members of the team until a little past the three-mile mark, when he quickened his pace and finished twenty-third. Poor and Holt were the fourth and fifth men to score for Technology. The fast pace set by the Cornell squad is evidenced by the time of 32:20:5/10, made by R. E. Brown, the two-mile intercollegiate champion.

In the first meet of the year, that with Harvard, the yearlings captured all of the first five places, and defeated the Crimson Frosh 15 to 42. Worcester was next disposed of to the tune of 24 to 34. Bemis, who captained the Freshman aggregation, took first in both these meets. In the Harvard race, Bemis, Sandberg and Parkinson walked off with the medals awarded to the first three place winners by the Harvard A. A. The 1925 squad tied with Princeton for sixth place in the Intercollegiates, running over a three-mile course. This meet marked the finish of one of the most successful Freshman cross-country seasons that the wearers of the Cardinal and Gray have enjoyed.

## SWIMMING 1 9 2 1

With the experience gained in 1920 behind them the natators started out on a schedule which included some of the best teams ever developed in the East as opponents. Of the nine dual meets, three resulted in decisive victories, three in narrow-margined losses, while the remaining three meets resulted in defeats at the hands of Brown, Navy and Yale, probably a trio of the strongest teams in the country. The close of the season saw the Institute tankists in possession of the New England Intercollegiate Swimming championship for the second consecutive season.

In the opening meet with Rutgers on January 22nd, at New Brunswick, the team came out on the short end of a 30–23 score. The deciding first and second places in the "100" were won by Giebel, the Olympic champion and Ross, the Junior National champion, respectively, while Captain Biddell finished a close third. It was a week later at Rensselaer Polytechnic Institute that the Technology mermen made up for the defeat of the week before by taking all of the first honors, and incidentally the long end of a 43–10 score. Three tank records were broken, by Trowbridge in the "100," Greene in the "220" and Boyce in the plunge.

Captain-elect Weber

On the second trip, the team divided honors with Amherst and Wesleyan, losing to the former by the close score of 27–26, and winning from the latter, 36–17. At Middletown, Greene lowered the "220" time, while the relay team, consisting of Colton, Trowbridge, Palmer, and Captain Biddell, broke the tank record over the 160-yard distance.

The first home meet was with Brown at the Boston Y. M. C. A. The Brown meet was one attracting great interest, due to the much-heralded "Davy" Jones, the stellar Brown swimmer. With the aid of Jones' two firsts, and the fast time in the relay race, Brown captured the meet with a total of 38 points against the total of 15 scored by the Beavers. On February 19th, the Navy defeated the Institute team, 36–17.

Manager-elec Miller

In the 50-yard back stroke event, Captain Biddell broke the pool record, and Kendall, with a plunge of 60 feet in 28 seconds, broke another Navy record.

In the second home meet of the season, the University of Pennsylvania won a three-point victory when Rambeau, after trailing Captain Biddell and Trowbridge for most of the 100-yard event, passed Trowbridge near the finish, and with second place gave Penn the large end of a 28–25 score. In the diving, Ferdinand and Purinton placed first and second, respectively. Harvard was next taken aboard by the Beavers, and retired to the sad tune of a 36–17 defeat. With three first places, besides a victory in the relay, the team easily outpointed the Harvard natators. The work of Purinton in the dives, and of Palmer in the relay and 50-yard event, were the features of the evening. Thomas, of Harvard, with a plunge of 67 feet took first honors in that event.

The team next journeyed down to New Haven and met defeat at the hands of the Yale team. Greene barely lost the 220-yard race to Marshall of Yale, Kendall and Boyce took second and third in the plunge, and Colton captured third honors in the 50-yard and 100-yard events. Yale beat us 43 to 10, but it was an honorable defeat at the hands of the best team in the country.

With a total of 19 points, the New England title was retained by the wearers of the Institute insignia, with Dartmouth second and Wesleyan third. Captain Biddell made a strong bid for second place in the "100" but was just a

## CREW 1921

The second year of crew as a recognized sport found one hundred and seventy-odd oarsmen waiting for the ice on the Charles to break and permit practice on the river. Despite the handicap of inadequate equipment, which necessitated the early picking of the squad, three crews were developed whose work during the season brings nothing but credit to Technology and to crew as a sport. The success of the 1921 season was in a large part due to the hard and conscientious work of the squad and especially to the tireless efforts of Coach "Pat" Manning, Captain Jakobson '21 and Manager Larry Davis '22. Through the kindness of H. L. Dallas '24, the crews had the use of a launch which greatly aided Coach Manning in his work.

On May 7th, three Technology crews rowed their way to as many victories over the crews of the Norton Boat Club of Worcester. In the first pull over the mile and five-sixteenths course on Lake Quinsigamond, the Freshman crew got away to a good start and were never headed, finishing three boat lengths ahead. The 1924 crew displayed the same strong race which won for them against

Captain-elect McCurdy

Huntington School, Stone School, and Exeter Academy later in the season. The yearling eight suffered two defeats, one at the hands of the Crimson Freshmen and the other by Groton School.

In the second race of the day, the Junior Varsity led the Norton second boat by four boat lengths at the finish. Using a slower stroke than the clubmen, the Technology crew trailed for the first quarter mile but slowly forged ahead and were never headed. The Varsity race was the most closely contested of all three races. Getting away to an early lead, the wearers of the Cardinal and Gray were never in the van, but had to give their best to maintain the lead of three-quarters boat lengths, which they showed at the finish.

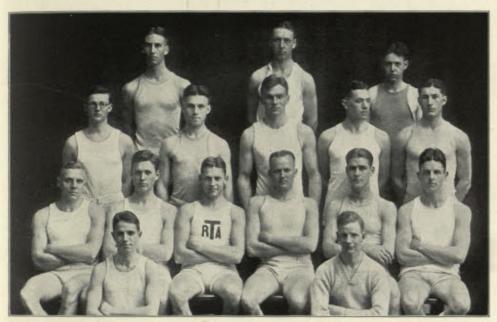

Manager-elect Smith

Yale's 150-pound sprint crew, the fastest

Eli 1½-mile crew, led the Junior Varsity over the finish of the Housatonic course on May 14th, with a boat length advantage. Unable to maintain the lead

which showed open water between the two shells at the three-quarters mark, the Yale crew saw the Institute oarsmen slowly pull up until the finish showed them but a single length behind.

Misfortune took a hand in the destiny of the Varsity crew in their race with Union Boat Club on May 24, for, after a second start, due to McCurdy's broken oar, Valentine's sweep snapped at the rigger soon after the second start and left the crew with only seven men rowing. This misfortune only spurred on the oarsmen and Union was able to open up the space between the shells only as the finish neared.

On May 21, the Junior Varsity sprang a surprise, which made the work of the crew for the entire season seem worth while, when they pulled up, a seemingly beaten eight and by sheer grit crossed the finishing line opposite the Union Boat Club in a dead heat with the Harvard Junior oarsmen. With the slow, steady, stroke which so characterizes the Technology crews, they seemed hardly able to stay with the Crimson and as the bridge was approached, the Harvard shell was leading by three-quarters of a length. But, as the crews emerged from under the arches of the bridge, the wearers of the Cardinal and the Gray were pulling up, by putting every last bit of strength they had left behind their sweeps. As the bow of the Technology shell came across the stern of the Harvard shell, then slowly crept up until they led the Crimson by a scant quarter length, it seemed as though the impossible had happened. A spurt by Harvard closed the gap and tied the race in one of the most exciting finishes seen on the Charles River course. Harvard's Varsity led the Varsity crew across the line with three lengths to spare. Handicapped, as the first crew was with a borrowed shell and borrowed oars, they put up a game but losing fight and were defeated by a superior crew.

As Technique goes to press, negotiations for the purchase of the B. A. A. Boathouse are being completed and Crew should soon be in possession of its own boathouse. The purchase of the boathouse is only the first step toward the goal, which will be the establishment of crew as a sport on the same level as that which track now holds at Technology.

## TENNIS 1921

One set out of thirteen was all that the Brown tennis squad could gather in the first match of the season with the Beaver's on April 27th. Under the leadership of Bill Cauldwell, the Beavers took all four singles matches as well as the doubles. The racquet weilders from Williams were the next opponents on the schedule prepared by Manager McGhie, and after some delay the teams went into action on the indoor courts at Longwood, on the evening of April 30th Captain Cauldwell had an easy time of it in his singles match but, when paired with Bill Scott, in the doubles, had to put up the best possible tennis to take the match and thus give Technology the large end of a 4-3 score. Herm Broockmann met his match in A. H. Chapin, Jr., the Intercollegiate champion, losing, 6-1, 6-2.

The Beavers next made it three straight victories by defeating Worcester Polytech, 6-2 at Longwood. A cold wind made the use of the indoor courts necessary in some of the matches, but Herm Broockmann, playing on the outside courts, finally disposed of P. P. Sah in the hardest fought match of the afternoon, 8-6, 6-3, 7-5. Dartmouth's strong team succeeded in administering the first defeat of the season at Hanover on May 7th, the score being 6-1. In two of the hardest fought matches, Captain Cauldwell was defeated by Carleton, 6-4, 4-6, 6-4 and Broockmann by Captain Sanders, of Dartmouth, 6-2, 3-6, 6-4.

Amherst gave way before the Institute team, 5-1, on May 9th, at Longwood.

Captain-elect Scott

The Beavers clearly outclassed the Amherst team in this match and the brand of tennis of which the team was capable was not in evidence, except for the playing of Dick Carver who reached the zenith of his 1921 season in the match. Princeton met the Beavers on the indoor courts at Longwood, May 13th, and showed their superiority by winning 6-1. The team showed its best tennis in this match, but was outclassed by the Tiger. Harvard next took the measure of the Technology team, 4-2. Carver took his match from deTourenne after some of the hardest playing of the season, while Broockmann completed the Technology score with a win over Fenno.

## WRESTLING 1921

After getting off to a rather unfortunate start, the Beaver wrestlers staged a remarkable return and won from Yale and Harvard in the last two dual meets of the season. Captain George Buttler, Humphrey and Tuttle were entered in the New England A. A. U.'s and emerged from the fray with three championships. Captain Buttler was sent to compete in the National A. A. U.'s, held at Los Angeles, but was eliminated in the semi-final round. The combined support of the New England A. A. U. and some interested alumni made the entry of Captain Buttler in the Nationals possible, but the effects of the long journey told upon his condition and prevented him from showing his best.

In the first meet of the year, the wrestlers from the Cambridge Y. M. C. A. were defeated 26-3. Brown and Princeton proved themselves the peers of the Institute grapplers only after two hard-fought matches. It was in the meet with Brown that Captain Buttler dropped the only bout that he lost during the season in his own weight. Brooklyn Polytechnic can bear witness to the prowess of the Beavers, for they retained the short end of a 28-3 match with the matmen. Springfield College, Intercollegiate champions, took a closely contested

Captain Buttler

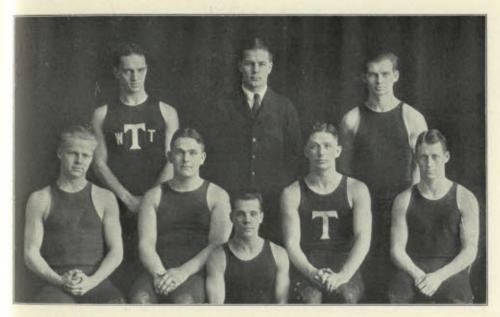

match from the team which had been greatly weakened through injuries received by Russell and Thomas. The final outcome of this meet was a 14-11 victory for the Collegians. Yale and Harvard left Walker sadder but wiser wrestling teams after instructive but forcible lessons in the finer points of the game at the hands of the Beavers. The Yale meet was part of a three-cornered athletic event; Yale engaged in wrestling and boxing and Dartmouth in combat with the gym team. Watts Humphrey proved to be the stellar performer, for, after taking three places in the gym meet, he obtained a fall in his own class as well as a decision in the heavyweight class in which he was substituting for Russell. Yale was defeated 19-6, while Harvard suffered a 14-9 loss.

## GYM 1921

February 9th saw the gymnasts in action for the first time of the season in a triangular meet with Harvard and Princeton. Only after the judges had compared notes on the tumbling event and the scorers had totalled up the points was the outcome known, so close was the competition. Technology tied with Princeton for first honors, while Harvard was content with third place. Cleaning up in the horizontal bar and horse events, Princeton got away to a good lead, but this was soon cut down when Humphrey showed his superiority on the rings and his team-mate Thompson divided second honors with Tuttle of Princeton. Pew and Keenan added eight points to the Institute total with first and second places in the Indian clubs. It was then that Ralph Wood and Bob Davidson flip-flopped their way to first and second honors in the tumbling event, tying the score with 24 points each for Princeton and Technology.

In the next home meet, Dartmouth left Walker a 31-23 winner over Technology, but only after another struggle that went up to the last event for decision. Only by showing her best on the parallel bars was she able to carry away the victory. Watts Humphrey was the star of the meet, for besides winning over two Yale men in the wrestling match with Yale, he filled in his time between matches by dividing honors on the rings with Thompson. In the first meet away from home, the gymnasts were bested by Penn and Haverford in a triangular match. Captain Whipple, Humphrey, Pew and Wood figured in the

Beaver scoring column.

Captain-elect Thompson

The gyrating gymnasts were again matched with Harvard, this time with Yale as the third team. Technology again showed its ability and took first honors, thus defeating Harvard for the second time. Humphrey, with first place on the rings, third on the parallels, second place having been captured by Captain Whipple, was the stellar performer of the meet. Thompson tied for third honors on the rings and Keenan completed the scoring with a tie for first in the Indian Clubs. Three men were sent to the Intercollegiates at Princeton, Captain Whipple, Humphrey and Wood, but Watts Humphrey was the only one to place. He gained second honors on the rings, this event having been won by Captain Hales of Annapolis.

# HOCKEY 1921

Under the leadership of Captain DuVernet and Coach Gaw, hockey got away to what had promises of being a very satisfactory season. However, the men were never able to reach the standard of play of which they were capable, due entirely to the limited amount of time available for practice at the Arena. In the first game of the season, King's College defeated the Institute sextet when the puck glanced off Hugh Nickle's skate into the net for the winning point of a 4-3 score. In the first of a series of three games, the puck chasers of Boston College took the long end of a second 4-3 score. The brilliant net work of Nickle was the outstanding feature of the game. In the second match with B. C., the Beavers avenged themselves and won 4-3, only after the game went for an overtime period.

Amherst was the next game of the season and the Beavers won their second victory of the season in a slow game at the Brae Burn Country Club. The Amherst aggregation held the Beavers to a tie, until the third period, when Bill Cauldwell scored the winning goal. In the fifth game of the season, the Mass. Aggies took a 3-2 victory from the Beavers by scoring in the last three minutes of play. The passing game of Dan and Neil MacNeil was the outstanding feature of the contest. This game brought forth the best hockey that the Beavers showed all winter. For two periods, the Harvard and Technology teams

Captain-elect Nickle

staged one of the best college games of the year; but in the third period, the Harvard team struck a stride which gave them an 8-2 victory. Dan MacNeil scored both Beaver goals, while Taylor and Neil MacNeil showed remarkable ability in handling the puck. In the only game away from Boston, the Beavers won from Dartmouth, 1-0, playing a rather uninteresting seven-man game. This type of game seemed to be rather disastrous for Technology, as in the last and deciding game with B. C. the men seemed lost on the ice with only six men and were defeated 5-1, giving B. C. the best of the three game series.

## BOXING 1921

The call for candidates brought out about one hundred aspirants for berths on the Varsity and Freshman teams. Under the careful tutelage of Coach "Nap" Boutelier, the men were soon rounded into shape and the elimination bouts in December showed the results of the training. The team had its first chance to show its mettle on January 14th when the Springfield College aggregation put in its appearance. Heralded by the newsmen as the probable victors, the Collegians were tied by the Institute boxers 3-3. In the 125, 115 and 158 pound classes, Captain Al Addicks, Tom Barnard and Tom Proctor, respectively, won their bouts. The other three members of the team, although defeated, made the Springfield entries fight hard every minute.

The Varsity next travelled down to Annapolis and were defeated by the Naval Academy on January 18th, 7-0. Some of the matches were closely con-

Captain-elect Moll

tested, but the team was outclassed and lost to one of the best teams in the collegiate world. The loss of Tom Barnard, who left the Institute, and of Captain Addicks, who was forced to stop boxing because of an infected ear, was sorely felt in this meet. Fred Koch was elected captain in the absence of Addicks.

The final meet of the year with Yale at Walker was a clean and fast exhibition of sportsmanlike boxing. Captain Fred Koch and Fred Paul chalking up our winning tallies. In the 175 pound class, Captain Egan of Yale, former A. E. F. champion, easily defeated Dan Sayre. The outcome of the bout was never uncertain, but Dan put up a plucky fight while he lasted.

Under the leadership of Captain Eddie Moll, the Freshman team won two of its

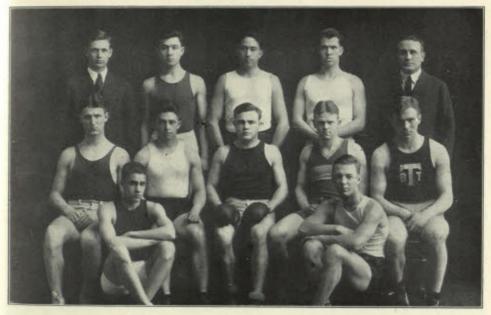

Manager-elect Nowell

matches and tied the third. The first meet was with the Cambridge Y. M. C. A., who were defeated 5-1. Andover were also defeated 5-1, while the St. John's Military Academy team held the Freshmen to a 3-3 tie.

THE desire for the formation of a baseball team at Technology took definite form in the spring of 1921, when a Freshman team was authorized by the M. I. T. A. A., and subsequently organized. Although the team did not prove to be a success from the standpoint of games won, the team showed that the national sport could be successfully inaugurated at the Institute. To judge the success of a sport at Technology by the results obtained from a first-year team, organized from the talent of a single class, is not a fair trial, but the interest shown by the squad, and the exhibition of clean sportsmanship, are indications of what could be expected from a Varsity Baseball team. The earnest efforts of the squad, and especially those of W. D. Sherman '22, who coached the team, Captain Bates and Manager Phelps are to be commended.

## FIELD DAY

1925's Mascot

Friday, November 7th, found both Sophomores and Freshmen awaiting the time for the first event on the twenty-first annual Field Day program. Cards, predicting the defeat of the upholders of 1925 athletic ability, were distributed early on the morning of the seventh, while the Freshmen saved their surprises for the afternoon, and appeared on the Esplanade, before the crew race, with a donkey, gavly dressed in a 1924 banner. After the race, the Freshmen filed into the stands behind the familiar steam roller, decorated to suit the occasion with a 1925 banner. By winning both crew and relay races, the Sophomores got away to a seven-point The 1925 football victory gave the Freshmen their first score, but the gray-jerseyed athletes won the third and deciding pull of the tug-of-war contest, and concluded the events of the day, thus making a 9-4 victory for the Sophomores.

All of the teams, with the possible exception of the crews, were very evenly matched, and showed the results of the earnest efforts of the men and coaches. The Sophomore crew had the overwhelming advantage of the training of the previous spring, which made them a markedly superior crew. Both crews were

under the direction of Coach Pat Manning, while Frank Kanaly had charge of the relay teams. The 1924 football team had the services of Wilbur J. Woodruff '22, and Walter A. Metcalf' 23 worked with the 1925 team. Albert P. Powell '21 coached the 1924 tug-of-war team, and Arthur W. Davenport '23 acted in the same capacity for the Freshmen. The four events of Field Day were allotted points as follows:

Crew Race	9104	0.00	F-30	PD5	00	400	61	46.4	150	3 points
Tug-of-War		1000	200	2 - 2			25.03		510.5	2 points
Football .										
Relay Race					-			200		4 points
Total				200						13 points

When the two crews took up their starting positions, just below Race Cottage Farm Bridge, the Esplanade in front of Technology and Harvard Bridge were lined with one of the largest Field Day crowds that ever witnessed the annual event. The experience gained by the Sophomore eight during the 1921 spring season made them the stronger crew, but the Freshmen had grimly determined to make a real fight for the coveted three points. The two boats, getting away to an even start in the comparatively calm waters of the upper basin, soon drew slightly apart as the faster Freshmen stroke pulled the 1925 boat a quarter length ahead. This slight advantage was soon equalized as the slower, yet more powerful Sophomore stroke began to tell in the progress of the shells. The two crews maintained their even position until the bridge was neared, and then the 1924 boat drew slowly ahead as they increased their stroke. This sprint of the Sophomores carried them over the finish line threequarters of a boat length ahead of their Freshmen rivals. The time of 5 minutes and 40 seconds, although 2 seconds slower than the record established by the

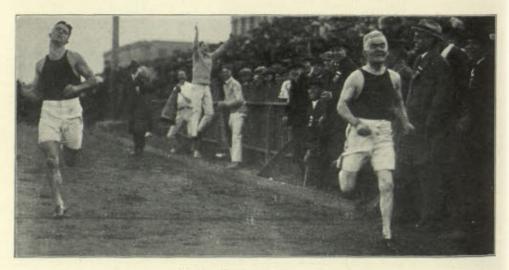

Freshmen losing ground.

1923 crew the previous year, was very good, considering the choppy water encountered in the last half-mile of the race. In a preliminary race between the second Freshmen and Sophomore crews, the Sophomore eight crossed the finish of the course two and one-half boat lengths ahead of the Freshmen. In accordance with the custom of victorious crews, and in spite of the icy coldness of the water, both of the Sophomore coxswains were tossed into the river when the boats were back at the boathouse.

The Sophomore tug-of-war team came upon the field after the crew Tug-of-War race, determined to add to the three-point lead gained by the oarsmen. With the crack of the referee's pistol, the 1924 team slowly began to pull the Freshmen toward the line, inch by inch, until the bob crossed the line in 1 minute and 45½ seconds. The teams showed themselves to be quite evenly matched, but the Sophomore pull was just a bit stronger than the Freshmen's combined efforts. Coming back for the second tussle, the Freshmen showed

a look of determination, which foretold trouble for the 1925 team. From the start, the 1925 aggregation were on the offensive, and in  $28\frac{1}{4}$  seconds they had pulled the unwilling Sophomores over the line. With only the third pull to decide the winner of the event, the teams came upon the field ready to put every bit of skill and strength into the task. For a minute the teams were pulling so evenly that the rope hardly moved, but at this point the Sophomores' endurance began to tell, and the Freshmen were slowly drawn over the line. The time for this pull was 2 minutes  $2\frac{1}{4}$  seconds.

Relay The relay race was the most closely contested of the four events of Field Day. Captain Read '24 winning the toss, elected to take the pole, and with this advantage Blodgett, the first '24 runner, had obtained a slight lead over Russell '25, when the baton was passed to Ambach, the second Sophomore man. From this point on, the race was a real match, the Sophomore lead never exceeding five yards, and at times only a yard separated the runners.

Sophomores leading

The ninth Sophomore to run, E. S. Coburn, took the baton from Marsh, and opened up with a pace that gave the 1924 team a twenty-yard lead. When the last two men, Captain Read '24 and Captain Bateman '25, started, the 1924 leader had a thirty-yard advantage. Captain Bateman put up a fine fight, and cut down the Sophomore lead to about twenty yards. The winning time was 5 minutes  $\frac{1}{6}$  second.

Football Captain Bob Grant '25 won the toss and elected to receive. On the kick-off, Phil Carrier '25 received the ball, running it back to his eighteen-yard line before being downed. After three attempts at gaining ground through the Sophomore line, Ray Leonard '25 punted. The ball then

shifted back and forth in the center of the field for the remainder of the period, the chance to score only coming once during the first quarter. During the second quarter Johnson, the Freshman quarter-back, tried a drop kick from the 38-yard line, but narrowly missed the goal. The opening minutes of play were greatly slowed up by frequent fumbles. The opposing lines were quite evenly balanced, contrary to expectations, which favored the Sophomores, and as a result neither team was able to gain consistently. Between the halves of the football game, Mike Hoar, the ground keeper, defeated W. C. Hull, Jr. '23 in a hundred-yard handicap race. Mike's time was 10\frac{1}{2} seconds.

The Sophomore upset came early in the third period. Ferguson '24 fumbled Ray Leonard's kick, and before the Sophomore's could recover the ball, the Freshmen ends were upon it, and the opportunity for a Freshman score was at hand. Phil Carrier was sent through the line on the next three plays. The first two plays netted a yard each, and the third play through left tackle put the ball over the line by two inches. Captain Bob Grant kicked goal, thus giving the Freshmen a seven-point lead. Further attempts to score were unsuccessful, and when the final whistle blew, the Freshmen were 7–0 victors. The playing of Bob Grant '25 was exceptional. At one stage of the game, after passing the ball back from his position at center, he broke through the Sophomore line in time to down the receiver of the punt. The punting of Leonard '25 and Ferguson '24 was one of the features of the game. A short line pass, Johnson to Leonard, was the best attack of the Freshmen. Benny Lehan and Michelena played an exceptional game for the losers.

# INSTITUTE: ACTIVITIES

## All-Technology Smoker

THE third annual Smoker, to which all of Technology was invited, was held in Walker Memorial on October fourteenth. Once again, the first important event of the year proved to be a remarkable success. The purpose of the Smoker was not only to give the students a good time, but also to welcome the Class of 1925 to the Institute and to give them a little idea of the more enjoyable side of the Institute life.

D. R. Linsley '22 headed the Committee which made the arrangements for the Smoker. Too little credit can not be given to him, for there was not a detail overlooked. Boxing and wrestling bouts were held in the gymnasium, while on the second floor gambling for cigarettes with cigarettes was carried on. There was an abundance of music, furnished by two exceptionally good school orchestras.

After dinner, there were two-minute talks by each of the activities. A new institution was a gong which sounded two minutes after the speaker began. This assured every one that the affair would not drag on into the precious time for studying. Dean Talbot was the last speaker, this being his first time to address the school since his appointment as Dean. He urged the Freshmen to go out for activities, but at the same time not to permit their studies to go unprepared. He then presented the key of Walker Memorial to D. F. Carpenter, President of the Senior class.

### TECH NIGHT COMMITTEE

Charles Edmund Brokaw, Chairman

Henry John Horn, Jr. Joseph Cornell Nowell, Jr. George Floyd Nesbitt, Jr.

TECH Night, an occasion when Technology men go out with their fellow-students to have a really good time, was indeed a big one this year. The event occurred after the Field Day games, in which the two lower classes participated, and because of the outcome of the sports, each Class had something to talk about, and it was apparent that they did. The committee, appointed by the Institute Committee, had entire charge of choosing the show, making arrangements with the management of the theatre, and selling the seats to the students.

The "Passing Show of 1921" was the choice of the committee, and the performance was given at the Shubert, before 1500 happy men. Willie and Eugene Howard scored a mighty hit with their "Days of the Past," and the "Lenox" camel. Everyone, both in the company and in the audience, entered fully into the spirit of the event.

## Intercollegiate Conference

The idea of the Intercollegiate Conference on Undergraduate Problems and Government originated at the Massachusetts Institute of Technology and was put into operation by an executive committee composed of representatives from Massachusetts Institute of Technology, Cornell, University of Pennsylvania, Princeton and Dartmouth, which met in New York on December 23, 1920. At this time, the various discussion groups were outlined and W. R. Barker of Technology elected chairman of the executive committee.

The groups were decided upon and their respective chairmen were as follows: Student Government and General Problems, in charge of J. C. Telmosse, University of Pennsylvania. Athletics, in charge of D. B. Strickler, Cornell. Musical Clubs and Dramatics, in charge of S. B. Gorham, Dartmouth. Publications, in charge of T. C. McEachin, Princeton.

These men compiled data relative to their particular discussions and presided at the discussion groups of the conference on Friday, April 15, and Saturday, April 16, 1921. It is due to their efforts that the conference was such a success.

The following colleges and universities were represented at the conference:

Amherst Bowdoin

Boston University

Brown

Carnegie Institute of Technology

Chicago Columbia

Connecticut Agricultural College

Cornell Dartmouth Harvard

University of Illinois

Iowa State Lafayette Lehigh

Haverford

Lehigh

Massachusetts Institute of Technology Massachusetts Agricultural College

Michigan Missouri North Carolina Ohio State

Pennsylvania State College University of Pennsylvania

Pittsburg Purdue Rochester

Stevens Institute of Technology

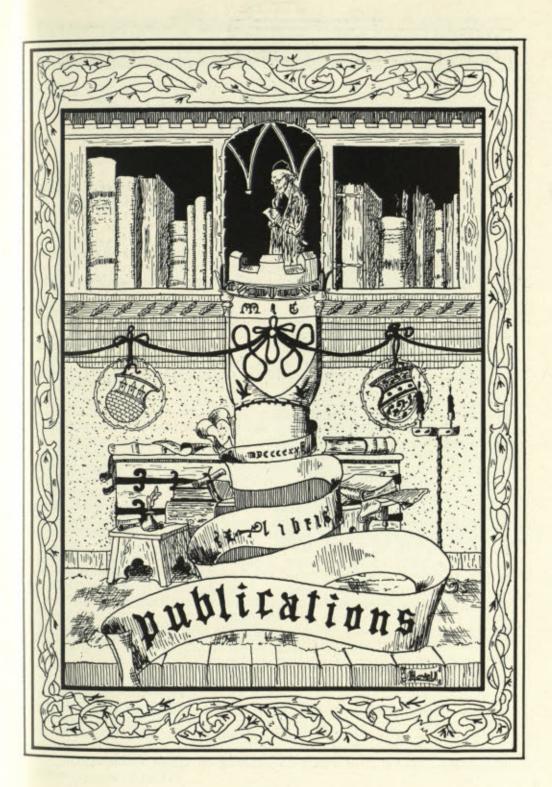

Stevens Instit Trinity Vermont Tennessee Tufts Virginia Wesleyan West Virginia

Williams Wisconsin

Yale Princeton

Washington and Lee

A report on problems and solutions discussed was sent to each of the colleges at the conference. Men from other colleges also got a new idea of Institute life. The result was that every one went away feeling that the conference was extremely satisfactory.

# THE TECHNOLOGY REVIEW

THE TECHNOLOGY REVIEW was founded in 1899 as the official organ of the Alumni Association and the cumulative record of the more important events in the history of the Institute. The emphasis has, however, been usually more in the direction of keeping the members of the association in touch with each other. For this reason, a great deal of space is usually given to the class notes and the news sent in from the local associations throughout

the United States and, indeed, the world.

The first editor of the Review was Arthur Thomas Hopkins '97. Others who have edited the paper are James P. Monroe '82, now secretary to the corporation; Walter Humphreys '97, and until the summer of 1917, "Ike" Litchfield '85, who was for several years, as Field Secretary and general promoter of Tech spirit, one of the most popular of the Alumni. After his splendid work in organizing the Jubilee Dedication Reunion of 1916, on the outbreak of the war he went to Washington as an important member of the War Labor Board.

On his resignation, the present incumbent, though not a Technology graduate, took charge and has carried it on since with the constant and valuable assistance of many of the Alumni. The Review, during the war years, found it impossible to carry on its former scheme of monthly numbers, so it was cut down to a quarterly, which attempts to sum up and digest all that is of immediate or permanent importance, either at the Institute or in the alumni world. The current news was left to the Tech, under alumni supervision, to deal with.

For economy, two years ago, the Review adopted a new type page, smaller type, wider margins, less decorative white paper. But the activities of the alumni have grown to such an extent, during the war and since, and there is so much to record every quarter, that the issue is at present nearly double in number of pages of preceding editions. The College year 1919–1920 gave the Review a peculiarly important task of furnishing some of the publicity and recording the progress both for the Educational Endowment Fund campaign, and for the All-Technology Reunion in June of last year, in connection with which the Alumni Association issued the Technology War Record Book and a new list of occupation and addresses of former students. The numbers at Technology are growing so, the recent classes of the alumni display so much activity, the whole question of covering the field is assuming such importance, that in the fullness of time it well may be advisable to consider an Alumni Weekly, like the other great Eastern Universities. But until then, the Review follows with increasing difficulty the good old proved traditions of "Jimmie" Monroe and "Ike" Litchfield.

Although there is still, after two years, no General Manager or Field Secretary for the Alumni Association, who will also have charge of The Review, it is to be hoped that when the next Technique is published, we shall have this officer, who will devote all his time to the alumni activities, and especially will be so able to awake and interest and organize the scattered Technology men that the Review will take on a new lease on life and become again the indispensable source of information concerning all things Technological.

Robert E. Rogers, Editor.

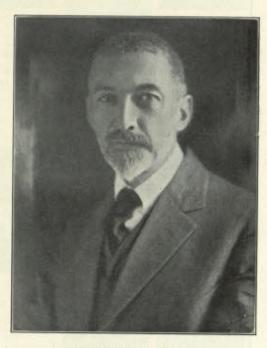

## The Advisory Council on Undergraduate Publications

Professor A. T. Robinson, Chairman

Paul C. Leonard '17 Alden H. Waitt '14 H. E. Lobdell '17 Harry D. Peck '13

In 1910, the Institute Committee, realizing the need of closer co-operation between students and alumni in the management of undergraduate publications, and feeling that some directing influence was necessary to save the publications from financial disaster, asked the Alumni Council to form an advisory body to serve as the connecting link between the Alumni and these undergraduate activities. In response to this request, the Advisory Council on Undergraduate Publications was formed. At first, it devoted most of its attention to The Tech, but with a few minor changes in organization, this Council has continued with the same general purpose and now acts in an advisory capacity for all undergraduate publications.

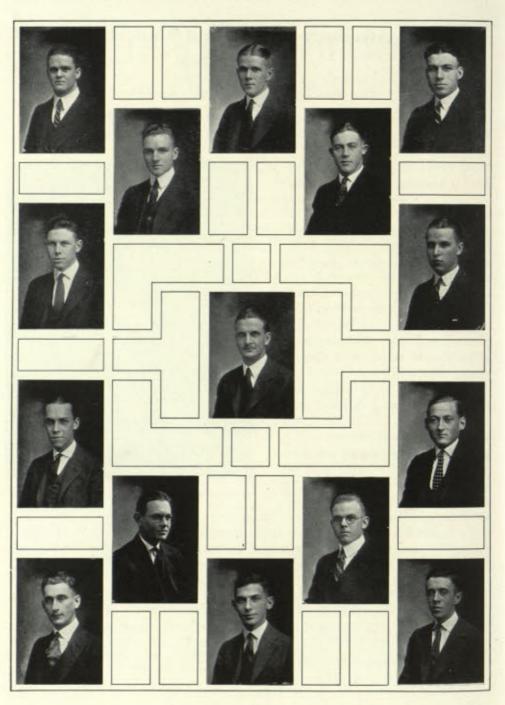

A. T. Robinson, Chairman

To make clear its policy and its relations to the Alumni Council, the Institute Committee and the activities concerned, a constitution was adopted on January 22, 1920, which became effective upon the approval of the Executive Committee of the Alumni Association and by the Institute Committee.

Certain trust funds have been set up out of the surpluses of The Tech, Technique and The Tech Engineering News, for which the Advisory Council acts as trustee. At the present time, the total value of these funds is slightly less than \$8000 and it is hoped that it will some day become sufficient to carry out the idea of erecting a separate publications building.

## TECHNIQUE 1885

The first volume of Technique was published by a group of men of the Class of '87, while they were in their Junior year, and made its initial appearance late in the Fall of 1885. The book was paper-bound and contained two hundred pages, of which forty-five were devoted to technical or semi-technical advertisements. Most of the sections of the book were, in their elements, similar to those of more recent editions. Among these, the Athletics write-ups occupied a prominent place and therein are contained records of baseball, track, and football teams and even a training table for the latter. Activities of a more social nature were represented by glee and poker clubs.

The aims of the Editors of this first annual are best expressed by their own statement which says in part: "When the pioneer students in high

scientific training were at the Institute, there was no need for anything in the line of an annual; but now there is a demand for such an article. Local societies and eating clubs have sprung up, the interest in athletics sports is on the increase, . . . and things are booming generally. Therefore, we present for your favorable reception the first annual ever attempted at the Institute — Technique. We trust that we are not too dry, too stupid, or too foolish. We are not to rival the Tech or the Catalogue. We are a class affair, yet truly of college interest for all classes are represented and no pains have been spared to make this first Technique replete with everything that is interesting or amusing to our average student."

Since this pioneer volume, the line of Techniques has been unbroken. In this thirty-seventh volume we have tried to realize as much as possible the aims of the first Editors. The development has been substantially along the lines suggested by them and we hope, as they did, that it has not been of such character as to imperil the Catalogue or to shake the foundations of the Official News Organ. Let those who read decide!

The Tech might well be called the sire of all student publications at Technology. Its first appearance was made on November 16, 1881, bettering by four years the age of its nearest rival, Technique. The paper in the eighties can hardly be compared with the present Tech in either form or contents. The issues were made up in magazine form, and had more the appearance of a literary organ than that of a newspaper. Stories, poems, scientific reports, and jokes were all found beneath its fancy cover, in the paper's attempt to combine the fields now covered by the Tech, Voo Doo, and T. E. N., into one bimonthly publication. This magazine form, though change in minor ways, remained the same for twenty-two years, until 1903. For the following six years it came out regularly as a triweekly newspaper, and then in 1909 became a daily paper. The daily issues continued for another six years, but finally were abandoned for a triweekly again. During the War, the paper was cut to two issues a week.

Stath Row: Piepho, Rickard, Davis, Johnson, Ashworth, Kirkham, Ryan, Burt, Castle, Lee
Fifth Row: Bates, Reynolds, Webster, Marble, Leighton, Neebitt, Lewis, Rosenwald, Eitle, Ramsey, Fogg
Fourth Row: Taylor, Ferguson, Schoenfeld, Richards, Cuthbertson, Bates, Kaufman, Bond, Gray, Conway, Magee, Dorr

Second Row: Bishko, Carlton, Worthington, Mossman, Gemmer, Cohen, Cowle, Goldsmith, Alland, Rheindardt, Lewis, Malthy
Second Row: Brokaw, Milss Clement, Thomas, Southard, Purinton, Brugmann, Gerofski, Petrce,
Kattwinkel, Miss Payne, Shirey, Carpenter
First Row: Rubens, Benedict, Nye, Hess, Smith, Riodes, Henderson, Brugmann, Gerofski, Petrce.

In spite of the general business depression, Volume XLI took as one of its first jobs the re-establishment of the triweekly which was one of many changes made in the paper during the volume. The circulation has doubled that of last year's, due to the use of unique methods by the paper towards this end. A monthly news letter is sent out to many of the alumni clubs by The Tech, and on the announcement of the resignation of President Nichols, 13,000 copies of a special edition of the paper were sent out to the alumni.

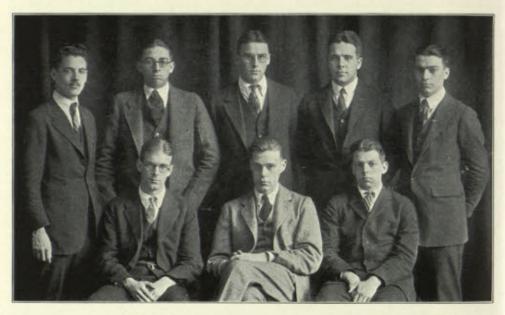

The influence of The Tech in the Institute, by means of its editorial columns, has been marked. Volume XLI has had no editorial policy except the promoting of those ideas which were for the best of Technology and her undergraduates. It has attempted to co-operate with the other activities in developing a better Technology spirit, and in having larger percentage of the student body interested in these activities. The volume has also conscientiously tried to participate in administrative thought in order to bring the students' viewpoint before the faculty when any radical changes were being discussed.

The "esprit de corps" of the paper's staff

itself has not been forgotten, and numerous smokers and the annual Tech banquet, to which every alumnus of The Tech's staff was invited, have all been held with the development of this spirit in mind. The personnel of the volume includes over a hundred men, a larger staff than on any previous volume.

In presenting this, the second volume of THE BENCHMARK, it is hoped that the ambition of those who established THE BENCHMARK 1920, that it might become a permanent memoir of the Summer Surveying Camp, be realized. The editors have tried to make improvements in every department, and if they have been successful, it is due to the ready response of the Faculty and students when called upon for material.

Mr. Ralph Morris

THE purpose of the Cosmopolitan Club is "to unite for their mutual benefit—social and intellectual— Technology men of all nationalities." The Club was founded March 10, 1910.

The first president was Christiansen, a Norwegian. The next president was an Englishman from New Zealand. Under his leadership, the system of national chairmen was started. These chairmen arranged entertainments of a national character, which were presented for the benefit of all the students.

In 1914, the Club affiliated with the Corda Fratres Association of Cosmopolitan Clubs. In 1916, the first American President was elected. Under his successor, the Club took part in the annual convention of the Corda Fratres Association, which was held at Harvard. In 1918, meetings were held to discuss international questions.

Under the leadership of Rodriguez in 1920-21, the membership became the largest in the history of the Club. Dinners, dances and smokers were given and the practice of taking trips to places of interest was begun.

The Cosmopolitan Club is the official organization of the foreign students at the Institute, and it has a representative on the Institute Committee. Besides the more than 250 students from foreign countries, half as many more members may be American citizens. The intercourse of these future leaders of our people with the picked youth of foreign lands should do much to cement the friendship of America and the other nations of the world.

FACULTY ADVISOR Prof. F. S. Dellenbaugh, Jr.

The Radio Society operates one of the foremost stations in the United States in experimental and practical radio, with a consistent record of service and progress in radio relay work. It was one of the first stations to cross the Atlantic on

amateur wave and power.

The Society owes much to the Electrical Engineering Department of the Institute for its encouragement and support.

## JUNIOR WEEK

THURSDAY, MARCH 17

11:30 - Technique Rush, Eastman Court.

3:00 - Reception, Walker.

FRIDAY, MARCH 18

8:30 — Tech Show, Boston Opera House.

11:30 — Junior Prom, Copley-Plaza.

SATURDAY, MARCH 19

2:30 - Tech Show Matinee, Boston Opera House.

8:15 — Tech Show for Alumni, Boston Opera House.

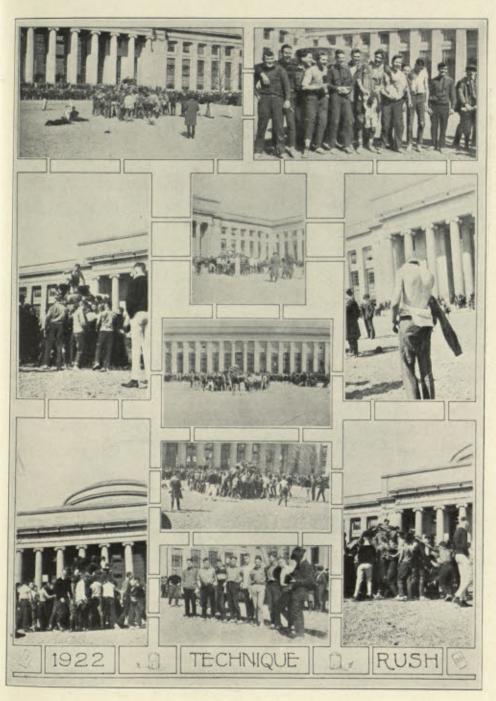

8:30 - Fraternity Dances.

The Technique Rush which, as usual, began the activities of Junior Week, certainly did it with a bang, for at 11:30 o'clock a loud report was heard in the Great Court of the Institute and the first paddle appeared from no one knows where. W. W. Quarles was the lucky man, receiving the first Technique. Then for the next twenty-five minutes there was a mad scramble for the paddles which were put out through the crack in the top of the traditional little round house. Those brave warriors who succeeded in pulling and pushing their schoolmates away from the small opening and thus gaining the much-desired autographed books were: J. E. Sallaway '22, R. D. Jackson '24, E. B. Davidson '24, A. S. Renfrew '24, D. W. Sayre '23, J. Nesmith '22, E. J. Hanley '23, W. W. Bainbridge '22, S. D. Leland '22, D. W. Skinner '23, D. D. Stowe '22, C. J. McGrady '22, D. H. Maury '22, R. L. Kittredge '24, and H. C. Barrett '23. The "statistics" competition was won by W. C. Roberson '22 and the "grinds" competition by H. J. Bickford '23.

The Faculty Tea Dance was a new and very pleasant addition to Junior Week. It was held in Walker Memorial on March 17th. All of those who attended, and the number was very large, filling the building to its capacity, declared, as the old saying goes, that "a mighty good time was had by all."

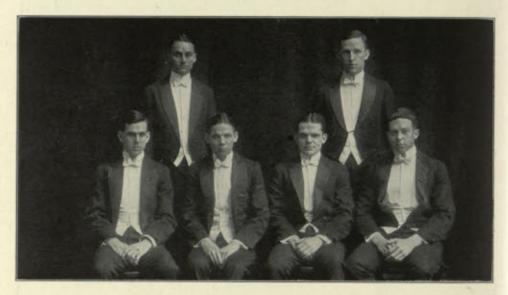

The Prom came at a rather exceptional time. Because of the automobile show, which was being held at the Copley-Plaza, the Committee was forced to run the Prom from midnight until six o'clock. The Tech Show, however, was the entertainment for the first part of the evening. The result was that although somewhat tired, everyone had an exceptionally good time.

The Junior Prom is the most important social event of the year at Technology, and is held in April on the second night of Junior Week. All of the arrangements are made by the Junior Prom Committee, which is composed of the President of the Junior Class as Chairman, and five other Juniors who are elected by vote of the class.

## TECH SHOW

E. F. Hodgins, Author

Tech Show 1922, "The Wrong Steer," is a musical comedy in two acts and three scenes. It was written by Eric Francis Hodgins '22.

The first act is laid in the Paris apartments of Lord Hubert Bathbrick. Lord Bathbrick is an agent of his country's Secret Service, and is charged with the responsibility for guarding the only existing model of the Tate Combination Bayonet and Can Opener until its English patents are completed. The Combination Bayonet and Can Opener is an epoch-making contribution to the cause of World Peace, and must be guarded with an exquisite caution, until manufacture can begin, that it may not fall into the hands of the enemies, and defeat every hope of salvaging this civilization of ours.

And so it shocks us to observe, as the curtain rises, that there are persons entering Lord Bathbrick's living room via a second-story French window. It looks serious, but in a moment it turns out that there's nothing to be feared.

There are Jerome Farr, a Senior at Tech, and Marian Rewett, his fiancée, who have happened in with the bridesmaids and ushers for their impending nuptials. Lord Bathbrick, when he encounters them, is inclined to be annoyed at their method of entrance, but he withdraws his objections with heartfelt apology when he learns Jerry's exalted position, and asks how he may serve them.

Whereupon, Jerry explains. He is now, he says, the European representative of the Surtax Hack-Saw and Razor Works, the firm that is to manufacture the Bayonet-Can-Opener. Marian is the adopted daughter of old man Surtax, the head of the firm. Together, they have come to Paris with the Surtaxes and a professional chaperone for them, that Sam Surtax may put the Bayonet-Can-Opener on a quantity production basis. This particular afternoon they gave their cursed chaperone the slip, and because Marian was passionately anxious to see the new invention, they came to Lord Bathbrick, knowing him to be its custodian. Will Lord Bathbrick show it to them? Lord Bathbrick wonders. It's risky business, of course, but great heavens, the man's a Senior at Tech, and consequently the soul of honor . . . What harm, indeed? Lord Bathbrick shows them the Bayonet.

But there comes an unhappy interruption. The Surtaxes and the chaperone have trailed the runaways. Moreover, Sam was indiscreet in his method of entering Lord Bathbrick's house, and Gaston Hautemille, Agent de Police, who saw him, places him under arrest. Lord Bathbrick's efforts to extricate Sam rouse Hautemille's suspicions, and he places the entire house under a blanket arrest, and forbids anyone to leave. Well, it's just dinner time. This puts it up to Lord Bathbrick good and hard, but he's game; he invites the whole crew — some twenty-five — to dinner. They promptly accept, and go to prepare for the feast.

As they go, Mustapha Kamel, Lord Bathbrick's oriental manservant, announces that Mr. Robert Omelette is calling. The burden of his call (he's the famous detective, you know) is a solemn warning to Lord Bathbrick that the kingdom of Ptomania, that sink-hole of political iniquity, is after the Bayonet-Can-Opener, and intends to get it by any means, however foul.

This looks serious. But a moment later, all our fears are dispelled. Omelette warns Lord Bathbrick that Jerry Farr is a treacherous scoundrel, in the pay of Ptomania. How perfectly ridiculous! How in the world Omelette got the idea that he was the villain of the piece is more than we can see. When Lord Bath-

brick straightens him out he gets huffy, and leaves, unconvinced.

No sooner has one caller left than another arrives. This time it is none other than — young Richard Tate himself, come over to Europe suddenly, on receiving a mysterious warning that his Bayonet was being menaced by Ptomania. The sanguine Lord Bathbrick quiets his fears. Nothing, however, can quiet his

emotions a moment later, when he comes face to face with Marian, and discovers that she is the girl who has lived in his dreams since the day he was brought. a wounded soldier, to her ministering presence in a Red Cross station. Whew! It's terrific!

But it leaves Jerry out of consideration altogether. Marian confesses to Dick that she has never really loved Jerry - that her engagement is all her mother's doing. It simply makes one socially to have a Senior at Tech in the family, and Mrs. Sam has Ambitions. Unfortunately, Jerry enters during this touching recital, and points out to Dick, that, being a nobody, no Senior at Tech at all, he cannot possibly run off with the heroine. Dick sees that his suit is hopeless, and is just about to go away forever when a peculiar coincidence makes him decide to stay to guard his bayonet, for all that his

heart is broken. But a healthy appetite being impossible when one's h. is b., Dick retires to his room, and does not join the other guests at dinner, which is presently announced. Hautemille is detailed to guard the Bayonet.

Then, during dinner, the Bayonet-Can-Opener is stolen.

The whole trouble was that Hautemille fell asleep. He slept so soundly that the Bayonet was stolen not once but three times, each time by a different villain who left behind him a carefully prepared counterfeit for the next unwitting

Naturally, after dinner, the theft is discovered. And worse yet, Hautemille (who denied falling asleep, of course), accuses Dick of having stolen his own invention to cheat old man Surtax out of his rightful gains. The crowd, save Marian, turn against the unfortunate Dick, and he is lead away, disgraced.

Lord Bathbrick telephones in desperation for Omelette, now, but he has left Paris, no one knows for where. Everyone is distracted, and the only move

they can think of is a trip to Ptomania. Of course, we go with them.

The second act is laid in a patio of the palace of the Emperor of Ptomania, a week later. Ptomania is a semi-barbarous country, still superstition-ridden. One of the most important features of the native religion is a cow — a Sacred Cow. As the curtain rises on the second act, the Emperor, Votus X, and his court, are seen to be much troubled, for the Cow does not seem, physically, to be herself.

Physicians are summoned, but can do nothing

save prescribe rest and quiet.

Now appear Marian and Jerry. They've quarreled, and it's plain to see that of their engagement, it's all over but the shouting. Jerry is greatly annoyed when the Cow, entering, attempts to demonstrate her affection for him. When she persists, he, with much precision but no tact, kicks her resoundingly in the Middle Portion. Marian, white with fury at such brutality, flings Jerry's ring in his face, and leaves with the still grieving Cow. The Institute seems to be getting it in the neck.

Marian, Ida and Jerry

This impression is heightened a moment later, when it is discovered that, beyond the shadow of a doubt, Omelette was right about Jerry. He, our hero, our Senior at Tech, is a Ptomanian spy!

More, so is Mustapha.

But it's getting late in the evening: we must hurry more. Lots of other things happen, but you'll have to ask somebody about 'em. Just as it looks as if Truth-crushed-to-earth could never rise again, the Sacred Cow enters and confronts the villains. And behold! The Sacred Cow turns out to be Robert Omelette, detective extraordinary, who assumed a bovine disguise to track the plotters down. He's settled everything.

Perfume Girls

Proved that the Institute's prestige has not suffered through Mr. Farr, who was thrown out for mental insufficiency two weeks after admission as a provisional Junior Freshman. Recovered, by an ingenious device, the missing Bayonet-Can Opener. More, satisfied tradition — for without a valid Senior at Tech in the cast, there can be no Tech Show. Omelette uncontrovertibly proves that the missing ingredient is supplied by Richard Tate, who, all throughout, had been too modest to stand forth and claim the glory that was rightfully his.

So everything's all right; the villains are pardoned, as all good musical comedy villains should be, and to the magnanimous Dick now comes his just reward. The beautiful Marian, her eyes like stars, her soft cheeks flushed with

the glow of youth, her girlish bosom

It was fortunate that the curtain came down just then. Isn't it a lovely evening?

# COMBINED MUSICAL CLUBS

R. C. Rundlett

The Institute Musical Clubs started out in the Fall under very favorable conditions. With the management intact and new leaders for the Banjo and Mandolin Clubs, the prospects for the year looked very bright. Too little credit cannot be given to every member of the organization for putting it upon a firm basis.

The Glee Club was fortunate to have the services of Mr. William E. Weston of Brookline as coach. Mr. Weston is a man of marked ability, and has met with much success in musical circles. He is at present the director of the Shepard Chorus of Boston.

Mr. George L. Lansing was secured to coach the Banjo and Mandolin Clubs. He is a professional teacher, and has coached the Clubs at different times in the past.

He has also been connected with numerous other college musical organizations in the East.

Thru the efforts of the General Manager, who made a trip thru the middle west during the summer, tentative arrangements for a winter trip were made. The plans finally decided upon called for concerts by the Clubs in Rochester, New York; Akron, Ohio; Cleveland, Ohio; Chicago, Illinois; Rockford, Illinois; and Schenectady, New York.

In the Trip Concert, held shortly before Christmas, a new scheme was tried. Dance orders were done away with and stags were encouraged to attend. The plan met with approval, and the concert was very successful.

The trip started at Rochester on December 27. The men met there, and after being received by the Eastman Kodak Company were taken thru Kodak Park. Following a concert at the Hotel Seneca, the Clubs left for Cleveland in their special Pullman, which was used thruout the trip. In Cleveland, they were taken thru the Nela Park Laboratories, and later gave a concert and dance at the University Club, which met with a great deal of approval. The next stop was at Akron, where a luncheon and tea dance had been arranged. After going thru the Firestone Plant and the Quaker Oats Mills, they were the guests of the Akron Alumni Association at the University Club for dinner. The third concert was given in the Masonic Temple that evening. After the dance, the men boarded their car and went to Chicago where they were met by alumni. The concert that evening at the Blackstone Hotel was the most successful of the entire trip. The Clubs performed exceedingly well, and the audience was most appreciative.

318

W. E. Weston

On Saturday, the Clubs went to Rockford, and were the guests of Mr. C. S. Brantingham at a tea dance. In the evening, a concert was given at Mendelson Hall under the auspices of the Vassar Club and Sprouters Club. Sunday was spent in Chicago, with friends, and late that evening the long jump back to Schenectady was started. The last concert of the trip was given there at the Mohawk Golf Club.

In showing the results of the trip, we quote from an editorial in The Tech:—

"The trip which was taken by the Musical Clubs during the recent vacation is one that is, without question, the most illustrious event in the history of the organization. Never before have the Clubs undertaken a

tour of such magnitude, and the success which attended it justified the expectations of all. The highly favorable newspaper comment, and the enthusiastic acclaim from the Alumni, which the Clubs received, is an indication of the excellence of their performance.

"Technology is well on the way towards becoming understood by the general public. We have been too long looked upon as a body of students interested in nothing that does not pertain to science or engineering. It is the function of our musical organizations, among others, to dispel this idea, and the Musical Clubs have contributed in a large measure towards this disillusionment."

Several letters from Alumni were received by the Dean at Technology, and were later printed in The Tech. In these letters the spirit and behavior of the men were highly commended.

The Jazz Band outdid itself on the trip. It played at nearly all of the parties, and in Chicago, where it supplanted the famous Benson in presiding over the Blackstone ballroom for the evening, it was encored again and again. It also filled many successful engagements at Mt. Holyoke, Newton, and other places near Boston.

After the return of the men to school, plans for the annual Winter Concert began to be made. This affair was held at the Copley-Plaza, on the evening of Friday, January 27. The attendance reached six hundred, and music for the dancing, which lasted till 3 A. M., was furnished by Bert Lowe's orchestra.

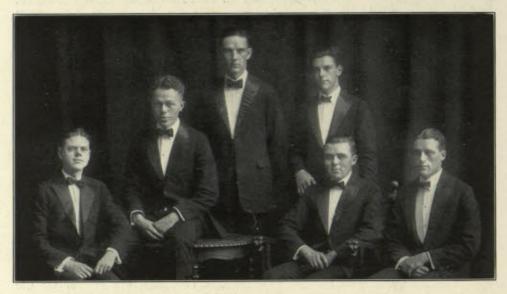

The concerts of the winter term after the Winter Concert were at Lowell, Sargent and Haverhill.

## THE DORMITORIES

THE past year has experienced no serious adversities or promethean episodes from the "Latin Quarter" of the Institute.

Shortly after the eruption of the last edition, occurred one of the dorm's best-staged bouts in the role of Sammie Vadner's "Peanut Smoker" at the Memoria of delicious foods and flagrant odors. During the regalia, there were distributed some of the unused trophies of past Dorm Dances, in the form of little gold pencils. Some of these had lead in them. This portentious event

was probably the sublime achievement of the Cave Dwellers.

#### Ad Possum Interim

During our brief respite at that domicile called home, some one acquired Manager McCafferty's interest in the open air stables of the Back Fire Club, and removed that institution to the rear of the premises where business has fallen off somewhat, due to poor location. So this thought-productive and advice-lending enterprise has given way to landscape gardening; more æsthetic to be sure, but the combination of this and the inanimate atmosphere of Prexy's prysmoidal palace and prodigious pagoda has had its sombre influence on the "Sleepy Hollow of the Styx."

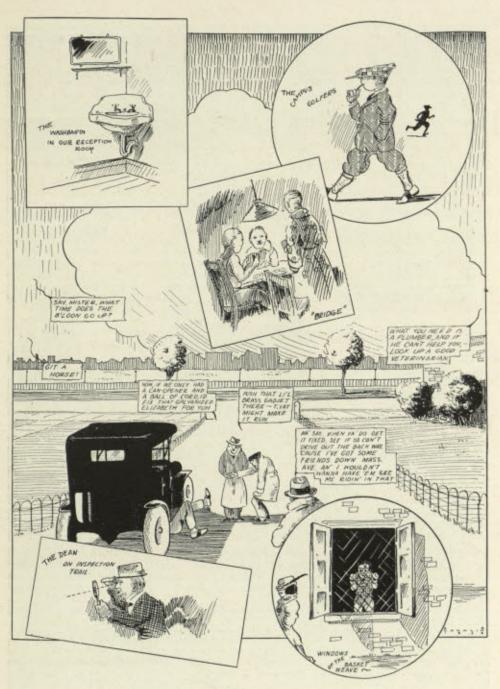

#### Fortuniti Returnum

Upon their return this fall, the martyrs of the pen in our group inhabiting the outside caves were delighted with the windows of the basket weave, and are now free from the obnoxious visits of the Cambridge kittens. The dorms also acquired the Reception Room equipped with miscellaneous paraphernalia, including relics of the Renaissance, steam heat and running water. The social barometer immediately took a leap, and the galloping dominoes galloped off with the poker chips, due to the impromptu visits of the Dean, and the dorms became inoculated with the more plutocratic game of bridge. On the whole, indoor sports have become decidedly less athletic, as is manifested by the larger numbers of aireated candelabra and less hard wood kindling than heretofore. But who can tell? Nichols may get another brass plate. Nightly excursions to Walton's are still made necessary by the aforementioned Memoria and the "Greasy Spoon." In fact, the killing of the fatted CALF, which resulted in our eating beef for an entire term, was a catastrophe claiming the deepest bereavement; particularly from the Campus Golfers.

#### Ab Rediculum Cum Sublimum

Next year, the dorms will house an almost new list of men; many of its present tenant's being graduated or leaving in June. Some of us who have made headquarters here ever since the war, look back upon it as a pretty good place to live, and look forward to the erection of more of them in the near future.

# SUMMER CAMP

The first week of camp, a meeting was held, a constitution was adopted and the following men elected to take charge of the student activities:

#### STUDENT COUNCIL

Chairman Charles B. Weiler

Secretary-Treasurer Malcolm B. Beattie Librarian Joseph C. Nowell, Jr.

#### Committee Chairmen

Arnold F. Taylor, Field and Sports Carl D. Dippel, Dining Room Prasob Sukhum, Entertainment Arthur R. Stuckey, Student Welfare

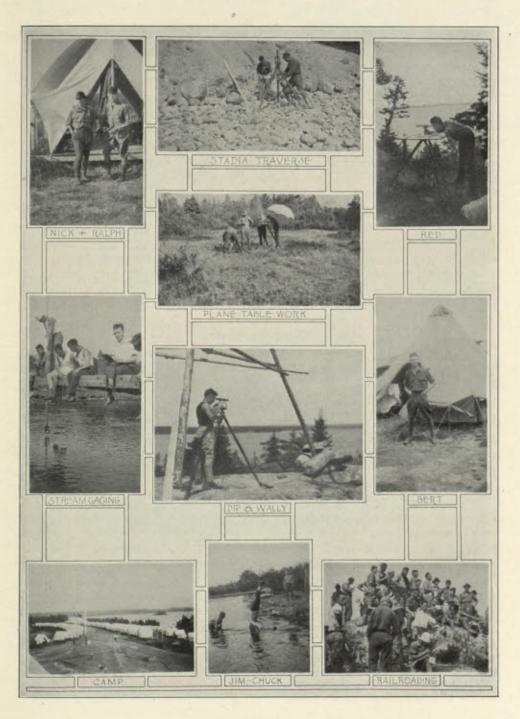

#### MEMBERS

Robert Burns George Buttler, Jr. Albert A. Kenney Benjamin Lane Herbert N. Leisk Malachy J. Naughton James M. Robbins Ralph E. Rubins

The committee chairmen immediately started things going, so that practically every man was busy doing something for the camp. We were especially lucky in the line of weather, so that the baseball team was able to get to work that week. Everyone was on his toes for that first game with East Machias, the world's champions of Maine. They were still world's champions after that game at least, as far as the Camp had anything to say; they won by the close score of 13 to 6. We were still wondering whether it was the cow that they had for a mascot, or their superior ability to chase a ball over the outlying mountains, when they came up to camp two weeks later and proved to us that it was their natural hit and run ability that made them such a famous team. The second game was a race to see how often each team could go around the bases. Here again, we were outclassed; their better condition enabled them to make the complete circuit at least thirty-six times, while the camp team lasted only until the end of the thirteenth trip.

The morning of Labor Day, we held our annual meet to determine the best all-around athlete in camp. Eddie Heap came through in great style, and won the right to have his name engraved on the silver cup. Dippel finished second and Downey third. The canoe tilting contest provided the thrills for the day, when Jones and Weiler did not even get wet.

The afternoon was the scene of the annual victory of the Civils over the rest of camp. Best of all, was the dance that was held as a part of the open house plan for Labor Day. This was the biggest dance in the history of the camp, and was a great success; in fact, we had such a good time that we ran another as farewell party the last Saturday of camp. We furnished our own music, thanks to the musicians in the camp, and, as a result, we enjoyed it even more than the previous one.

The show was given the Saturday night before Labor Day, and judging from appearances, everyone had a royally good time, and greatly enjoyed the show. Sukhum deserves a lot of credit for the way in which he managed to put on such a good show in such a short time.

To prove that the friendships formed at camp are more than the usual casual acquaintances formed at the 'Stute, the men of this year's camp have gotten together for a reunion banquet in Walker. In this way, we hope to keep the old crowd together and renew our experiences of "Summer Camp" of 1921. We worked hard, but we only enjoyed our play more as a result of it, and by far the best of all, we were able to get acquainted with our classmates.

#### Camp Orchestra

Gerald Putnam, *Piano*; Myron Kendall Lingle, *Trumpet*; Somerby Rogers Evans, Norman Harwood Gilchrist, *Banjoes*; Prasob Sukhum, *Banjo-Mandolin*; John Hamilton Zane, *Traps*.

The Camp Orchestra deserves a lot of credit for the music they furnished for our last dance. We had to borrow most of our instruments from the various bands in that part of the world, but in spite of this, they all got together and turned out some really good music. The members of the orchestra worked in reliefs, so that everyone was able to dance sometime during the afternoon.

#### Mining Camp

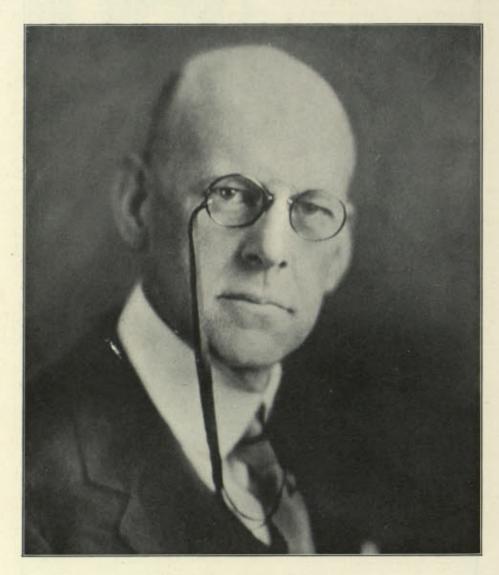

Instead of going to Pike Mine in Vermont, the Miners, under the watchful eye of Prof. Johnny Howard, went to the mines at Dover, New Jersey, for their underground work. Everyone worked hard and long, and enjoyed the work. The living conditions could not even compare with those at East Machias, and we hope they will be better next year.

The redeeming feature of Dover was the fact that it had a real movie house, with shows every night, where we might go and forget about anything that had made the day so "enjoyable."

SENIOR WEEK

Ernest Fox Dichols

## **INAUGURATION**

T was with high expectations for the future, that Ernest Fox Nichols was inaugurated as President of the Institute on Wednesday morning, June 8, 1921, in Walker Memorial. The absence of a President had been keenly felt for some time, and it was with great interest that the members of the Corporation, Faculty, Alumni, and undergraduates observed the ceremonies

of installation and waited for their new leader's

first words after taking office.

Dr. George Gordon of the Old South Church began the ceremonies with an invocation, which service he had performed at the dedication of the new buildings in 1916.

Dr. Elihu Thomson, acting President of the Institute, then spoke on the long search required to find a man who could take the place so successfully held by the late Dr. Maclaurin, and how the Corporation had selected Dr. Nichols. He closed his speech with a few remarks on the qualities essential for a President. Speeches followed by Governor Cox of Massachusetts and President Lowell of Harvard.

Professor Talbot welcomed the new President on behalf of the Faculty, and gave a brief

outline of the history of the Institute and its wonderful record in the War. He also discussed the Technology plan and touched on the more important problems which will have to be dealt with in the near future.

Dr. Nichols, in his inauguration speech, spoke on the problems of science in general, and emphasized the need of an all-around, trained personality. He discussed the new idea of industrial co-operation between school and faculty, and also the problem of the ultimate aim of technical education, the training of men for responsible managerial positions.

At the conclusion of the exercises in Walker Memorial, a procession was formed through Eastman Court to the main buildings, where a reception was held for the delegates to the inauguration. Col. Frank Locke headed the procession as chief marshal, followed by Dr. Nichols and Dr. Thomson, members of the Faculty, Speakers, Alumni, and undergraduates. One of the features of the inauguration was the amplifying apparatus which permitted all in the building to hear the speakers perfectly.

It is most unfortunate that mention must here be made of the unfortunately necessary resignation of Dr. Nichols through ill health, before he had had an opportunity to begin his new work.

## SENIOR WEEK

N Sunday, June fifth, at four o'clock, Senior Week opened with the Baccalaureate Sermon at Trinity Church. From the Rogers Building three hundred Seniors marched to the church, there to hear a sermon by the Reverend Doctor Mann on "The Value of Sober-mindedness in the Individual." The occasion was most impressive and was a fitting beginning for the final exercises of the class.

Most of the remainder of the week was spent in purely social functions. The annual senior picnic was given on Monday at Pemberton, the trip being made by boat. Four hundred members of the class attended and helped to keep high the spirit of the occasion. Baseball, swimming, and other amusements had their place in making the day a success.

In Walker Memorial, Tuesday evening, the Seniors held their dinner. The new president of the Institute, Doctor Ernest Fox Nichols, made an address to the students, and Dean Burton gave a farewell speech.

A tea dance at the Copley-Plaza, Wednesday afternoon, was followed by the Pops Concert at Symphony Hall. Class Day Exercises and the Senior Prom came in due order, and the week was closed with the graduation exercises, in all their solemnity and impressiveness.

On Thursday afternoon, the Class of 1921 gathered in the Great Court and marched over to Walker Memorial to hear the program which members of the class had prepared. Carleton T. Proctor and Frank Gage started the activities with some popular music. It was exceedingly well rendered and met with great applause. H. C. DeStaebler then gave a very interesting and humorous oration on "Wine, Women and Song." Several courses gave a little information on their respective lines of studies, the most notable of these being the "shocking" act of course VI. To put a finishing touch on the program, the Senior Quartet composed of L. W. Conant, C. S. Knight, Karl Jetter, and L. A. Lloyd gave a few selections.

The Senior Dance was held that evening in Walker Memorial and most of the class attended, making this last social gathering of the class a great success.

## COMMENCEMENT

THE Seniors gathered in Walker again on Friday afternoon for their graduation exercises. As in the past, the ceremonies were simple but very impressive. The Class of 1921 had the honor of having the largest number of men that ever graduated from the Institute at one time. Seven men received degrees of Doctor of Philosophy, ninety-six Master of Science, and five hundred and thirty-four Bachelor of Science.

According to tradition, six extracts of theses were read at the exercises. They were:

"A Report upon the Construction and Maintenance of Military Roads and Bridges in Forward Areas," by Captain Henry Hutchings, Jr., U. S. Engineer Corps, Civil Engineering.

"Efficiency Test of a Hydraulic Turbine and an Investigation of Hydraucone Draft Tubes," by Marshall Hayden Winchester of Manchester, N. H., Mechanical Engineering.

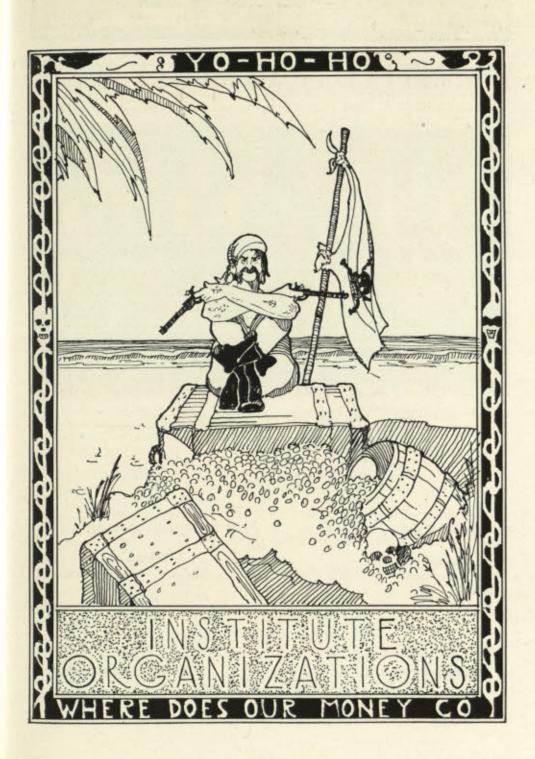

"Iron Mining of the Mesabi Range, Including Concentration of Eastern Mesabi Low-Grade Magnetite," by Edward W. Noyes of Newburyport, Mass., Mining Engineering.

"Drying of Vulcanized Fibre-Board," by Munroe C. Hawes of Newark, N. J., Chemical Engineering.

"The Design of an Aerodynamic Balance with Six Degrees of Freedom," by James B. Ford of New York City, Naval Architecture.

"The Electrolytic Deposition of Monel Metal," by Robert B. P. Crawford of Kansas City, Electrochemical Engineering.

Dr. Thomson gave an informal talk to the Seniors after the degrees had been given out. He told them about the existing business conditions, and the trouble that they would have in getting positions. He strongly advised every man to take any job he could get whether or not it was exactly in line with the studies he had followed at the Institute. "When I started out I found no opening in the electrical field," said Dr. Thomson, "but I started as a chemist and did analyzing and teaching until my opportunity came to go into electrical engineering. When it came, I took it and have found a great deal of interest in it ever since."

The Walker Memorial Committee is a sub-committee of the Institute Committee and has charge of the student administration of the Walker Memorial. The duties of the Committee are of an administrative nature and consist of granting permission for holding meetings in the building; assigning the activity offices to the best advantage; regulating the use of the gymnasium; and co-operating with the officers of the Institute in the general upkeep and operation.

The Committee aims to help the different organizations to plan their functions so as not to conflict with each other. A directory with the addresses of the officers of all the student activities is also main-

tained.

The Budget Committee is made up of undergraduates and has for members the Treasurer of the Institute Committee as chairman, the Treasurer of the M. I. T. A. A., the Chairman of the Finance Committee, and two members at large appointed by the Institute Committee.

The duty of the Committee is to apportion the Student Tax money among the undergraduate activities which are supported by it. This is done by reviewing and adjusting budgets which are submitted by the latter.

#### ADVISORY BOARD

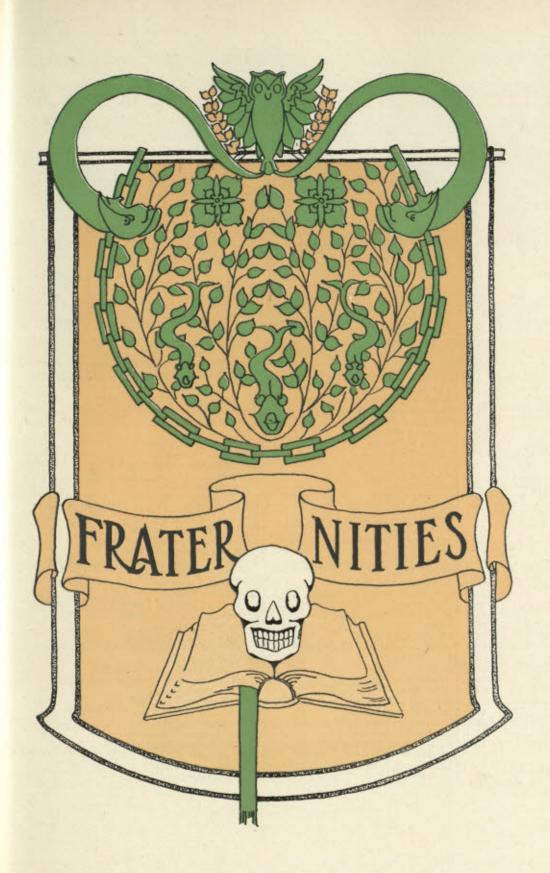

P. R. Ziegler '00, Chairman George B. Haven '94 Walter B. Snow '82 H. S. Ford, *Treasurer* Frederick R. Kneeland Henry P. Talbot '85

THE Technology Christian Association aims to be of practical service to every student and, by so doing, help the Institute to realize its highest ideals. No membership fee is charged and all students and members of the Institute who are in sympathy with the objects of the Association and who wish to co-operate in promoting them are eligible to membership.

There is an Advisory Board of alumni and faculty which maintains a General Secretary and sustains advisory relations with the undergraduate organization. Direction of all the affairs of the Association is in the hands of a Cabinet made up of the officers and the heads of the different departments. The Executive Committee, composed of the officers and one member of the Cabinet, transacts business which requires more immediate attention.

Since the Institute opened last fall, one thousand two hundred men have obtained their rooms through the T. C. A., and two thousand copies of the Handbook - five hundred more than last year - were distributed free of charge to the men. Freshmen and some transfers were mailed their Handbooks about the first of September. Four hundred and fifty Freshmen were furnished with advisors who wrote to the new men during the summer and assisted them at the opening of the Institute year. Churches were furnished with lists of men of their denominations and the students themselves were given pamphlets showing where the different churches were and when their services were held. The Employment Bureau succeeded in giving work to seventy-eight different men, thus making it possible for several men to continue at the Institute who otherwise might have been forced to leave school. Boys' Work has been promoted in six different places and at Morgan Memorial eight different men taught boys' clubs, supervised Boys' Scout activities and coached basketball teams. Music and men have been furnished for socials and dances by the Social Department. Men have been teaching English to foreigners and others have come together for the Bible Study classes and regular meetings.

# **Inter-Fraternity Conference**

THE purpose of the Inter-Fraternity Conference is to promote the interests of the Massachusetts Institute of Technology, to regulate and control the common interests of the fraternities at Technology, and to create a better feeling and a more general acquaintance among the fraternities and between fraternity and non-fraternity men.

This purpose is carried out in many different ways. It has been customary in the past to award a prize to the fraternity having the best scholarship record in the past year, the prize being a clock which remains in the possession of the chapter as long as it continues to hold the highest record in the years following. The faculty has been glad to co-operate with the Conference in this matter by issuing to it the official marks upon which the ratings of the chapters are based. Among other things, inter-fraternity sports are arranged by the Conference for each year. The most popular sports have undoubtedly been baseball and bowling, but basketball was very successful last year and the interest this year promises some lively games. Football has unfortunately been omitted from the list of fraternity athletics, but the majority think it best not to attempt this sport. Handsome cups are awarded to the champions of the various sports.

Inter-fraternity sports, on the whole, have been exceedingly well supported, probably on account of the little time the men have to devote to Institute athletics. Exchange dinners have been arranged in the past few years but it has been thought best to substitute open house evenings, thus affording another opportunity for the fraternities to become better acquainted. This plan is now being worked out and should be very successful. Last, but not least, are the inter-fraternity dances which are always very popular. The dances held in the past have been a great success, and the enthusiasm among the fraternities this year prophesies an even greater success.

TERINDS

Γ is now fitting that we should turn from the more serious side of this life at Technology to the more ludicrous. For that purpose, a section known as "Grinds" has each year been set aside in this publication, and it has been our duty to compile the digest of the humor and the more or less comical situations which arise from time

to time in our Institute life. It may seem strange to some of our readers that there is anything funny about this school of ours. Well, in truth, there isn't. But even as in the grim struggle of life, at times occasions arise whereupon we turn from the solemnness of the thing and revert to the affairs that please. And so we have found that, having sufficiently oiled our crazy bones so that they will react properly to the comedy being enacted before us, there are at least some funny things in this world of ours—which does not prove that the following will in any way be funny.

At different points in this section, we will endeavor to bring smiles by deliberately bringing out little personalities for which the owner should pride himself instead of trying to harangue us. We often wish that we had some iota of wit tacked about us somewhere, for then our task would be that much lighter. The chosen few who have given us material should be complimented.

Let us therefore embark on the voyage though we know not where it may lead. Follow on with us, and, if nothing funny occurs on one page, we advise you to hope that on the next page your expectations will be fulfilled. They likely won't; but hope, anyway.

# New Way of Getting Out of Heat Lecture.

Prof. Berry (reading notice from information office): Mr. De Acosta is wanted at room 10-100.

30 seconds elapse. No one moves.

Then a bird by the name of Severn gets his hat and coat and goes.

Attaboy Doug.

Bug No. 1: "Been on a vacation?"
Bug No. 2: "No, on a tramp."

"Oh, Archie, will you take Miss Smith home?"

"No end sorry, old thing, but I live in a fraternity house you know."

### Rundlett and Bainbridge on a Camping Trip.

R: "Look Bill, this coffee pot leaks."

B: "Why don't you fix it?"

R: "It's full, I can't fix it."

B: "Fix it when it's empty then."

R: "It don't leak then, you egg."

Groce: "I have a rotten cold."

Sweet thing alongside: "What are you taking for it."

Groce: "Well, make me an offer."

# What the WELL DRESSED Tech Man will wear for JUNIOR WEEK

WITH APOLOGIES TO VANITY FAIR.

### AFTER TECHNIQUE RUSH,

One set of false teeth, secondhand if possible. Your other shirt, the first one having been demolished in the rush, with a flowing black tie as worn by Prof. Franklin. Seymour trousers, that is, see more of the socks than you can of the trousers. Shoes light tan as furnished by the Mil. Science department.

### JUNIOR PROM,

Hard-boiled shirt, men are advised to boil at least eight minutes. Tuxedo furnished by Max Keezer, same model as used by waiters, go early and avoid the rush. One pair alarm clock stockings, one on each foot. Black bow tie, either with elastic attachment for fastening to the neck or wide to be tucked under the collar. Flowing silk handkerchief from breast pocket with cardinal and gray border to show you are from Tech — always necessary to have some evidence to show you are from Tech. If handkerchief is not available, carry slide rule in outside pocket. This will also give some means of entertaining the girl during the intermission.

### TECH SHOW,

After you get through fighting for and paying for your tickets, wear anything you have left, however we suggest:

Walking suit, green in color to match surrounding spring-like local color. Silk shirt, preferably orange in color with some quiet colored stripe, say cerise. Hat, derby, either brown or pearl gray in color. Concealed about your person somewhere carry about three cans of tomatoes. The canned type are more appreciated by the actors than the solid ones. They run farther. A light top coat would be in order, but a regulation Lab. coat can be substituted. In case show gets dull, be prepared by bringing along a copy of Peabody's Thermodynamics. No time is to be wasted during this vacation.

He: "If a boat is 135 feet long and 35 feet wide, how old is the captain?"

She: "Thirty-five years."

He: "How come?"

She: "I asked him."

Some problems we get at this institution have about as much sense to them as:

If it takes four yards of calico to make a shirtwaist for an elephant, how long would it take a grasshopper with a wooden leg to kick a hole through a lump of sugar?

#### Or -

If it takes a canary bird on roller skates four weeks and three days to cross the Rocky Mountains in a snow-storm, how long would it take an eel to sink through a barrel of soft soap?

#### Or -

If rye bread is eight cents a loaf, why is pumpernickel?

#### Or -

If your grandfather grew a set of whiskers at the age of four, why does your old maid aunt read the Boston American?

#### Or -

If Julius Caesar wrote Æsops Fables when a boy, why was Charlemagne Nero's valet?

### Or -

If people that live in glass houses gather no moss, why is an early bird worth two in the bush?

Holy Smoke

## The Fable Of The Freshman

AND lo, there came unto us here at Technology assembled a freshman of exceeding smoothness. From the top of his sleek nabisco-like head to his flaring tassels on his golf socks and below to the fringed tongue in his brogue shoes, he was exceeding smooth. It so happened that he had come from out the wilds of Utah from which he had acquired this great smoothness. And, in the course of his wanderings about our own Park Street, he had been misdirected to the institution of learning, which is situated a little further out Massachusetts Avenue and had been lucky enough to catch Thursday's car on the Dudley-

Harvard shuttle. Now, not realizing that there was such a place as Technology, he had alighted and it so came to pass that Horace, seeing his poor condition, had relieved him of some \$6,157,986,476,987.99 and told him it was perfectly K. O. for the exceeding smooth frosh to go to school here. But even before Horace had quite finished with the frosh of exceeding smoothness, there descended upon him an whole army of men of various types and description which in those days were yelept fraternity men. So there came to pass for the exceeding smooth frosh a two weeks' sojourn spent amid the walls of the Brunswick, Copley-Plaza, Lenox and stretching even sofar as the town of Wellesley. These appealed greatly

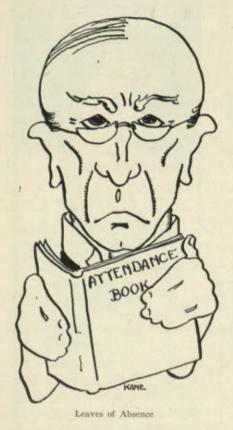

to our frosh of exceeding smoothness and were things much to be desired by him.

Now, at the end of these two weeks, his companions settled down to learn more or less of various subjects, but not so the frosh of exceeding smoothness. For the taste of the life he had received was entirely satisfactory to him and he continued to live it even unto the sixth and seventh week. His hair had thus

Moral: Grease your hair too often and you grease the wheels of progress that turn for a hasty exit from Technology.

# Famous Sayings by Famous Men

Prof. Phelan: Take a beaker or any other suitable apparatus.

Prof. Armstrong: I will do the talking in here, gentlemen.

Prof. Johnston: May I run over the hour a few minutes?

Prof. Passano: God Bless my Soul!

Prof. Derr: Er-Er-More of which later.

Prof. Miller: It only killed 17 men. A small explosion.

Prof. Bartlett: That's wrong. What do you say next?

Prof. Smith: He said something good one day but it was too fast. We couldn't get it.

Prof. Dewey: How are you going to invest your first \$1000? We'll bite, Davie, how do you do it?

Prof. Ruttledge: Says nothing. He draws it all.

Prof. Lewis: To-day my great-grandmother spun wool by hand.

Prof. Haven: Gentlemen, expedite the conclusion of your delineation as much as may be.

(All of which means, finish your drawings.)

Prof. Hayward: Gentlemen, we must co-operate.

Boyer: "Where did you go over last week end, Heinie?"

Horn: "Oh, I just went down to see the folks."

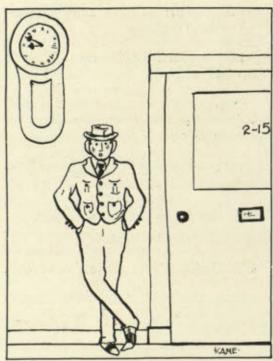

Boyer: "How did your find them?"
Horn: "Well, I knew where they lived."

#### One To Think About

A: "Why is a lazy dog like an aisle in a theatre?"

B: "Go ahead, spring it."

C: "Well, it's a slow pup."

Bright and Early — At least early.

Our Professors

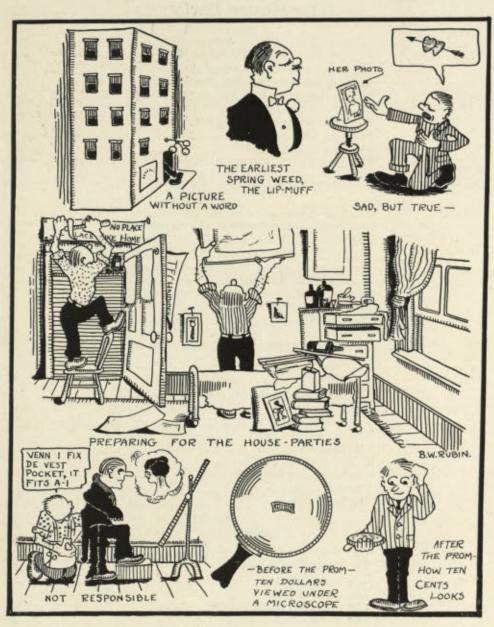

Brantingham returning from the wilds of Boston center one day had a great story to relate concerning two women who he had seen fighting in the Post Office.

# TECHA DELENDA EST!

Much water has flowed into the sump of the Hydraulics Lab., and having flowed in, flowed out again, since last we felt called upon to crush this viprous cocatrice, that, raising its slimy belly from the damp sweat of its reeking bed, dared proclaim its existence to virtuous beings.

Again our serene tranquillity has been ruffled by the foul mouthings of this raffish ophidian. Twelve times within the concourse of the last moon has it paraded its pediculous fetor before the student body, drooling fatuous verbiage into the ears of all who would deign to listen.

Far be it from us to snoop with inquiring proboscises close to the ground, seeking a sundry, stray, feculent, stench yet, when such a product of natal ooze permeates even to our abode on high Olympus, we are annoyed, vastly annoyed, and hesitate not for the smallest fraction of an æon to expunge this abhorrent prodigy. Therefore at the fourth hour on November ninth shall the Tech crawl forth to its doom.

It is only those of the Managing Board and such others as have resided in the same hotbed of iniquity for the space of one congealing of the turbulent Charles who may enjoy the privilege of partially expiating the crimes of their forefathers by being sacrificed to Belial upon the Gridiron—too noble an extinction for this phthiriasic amphisbæna.

Armageddon is nigh at hand.

(Signed)

HALL KIRKHAM, For TECHNIQUE.

# Business Brightens— For the Undertaker

To the most ignoble ruffian, editor of that despicable collection of typographical errors, Technique: Greetings:

"To fight is to pray" as one of your reprehensible heelers once misquoted. After a perusal of your dastardly challenge the benevolence of our magnanimous souls forces us to notify your degenerate gang of debilitated drones that we, virtuous and respectable TECHITES all, intend to unite in prayer on Wednesday next, in order that the more energetic of your slothful crew may have sufficient time to engage proper conveyance for themselves and comrades to their respective hospitals and morgues. It is altogether fitting and proper that we should do this—the impenetrable dullness and natural inability of the aforementioned challengers makes necessary such a warning in all humanity.

However, before crushing into the ooze of eternal oblivion our altogether ridiculous antagonists, we are obliged to present one immutable demand that you keep your indescribably degenerate personages out of the sight of our pure and undefiled warriors in order that our contempt for such degenerate stuff may not cause us to utterly annihilate you even before the night set for your destruction.

Furthermore, allow us to advise that you caution all to hold back the pestilential torrent of oaths so customary to your "men." Let them rather seek deep into their brown bags, and amuse themselves with slide rule and log table until such time as we see fit to show them up as the negligible increments that they are.

Condescendingly yours,
A. J. Browning,
General Manager of THE TECH.

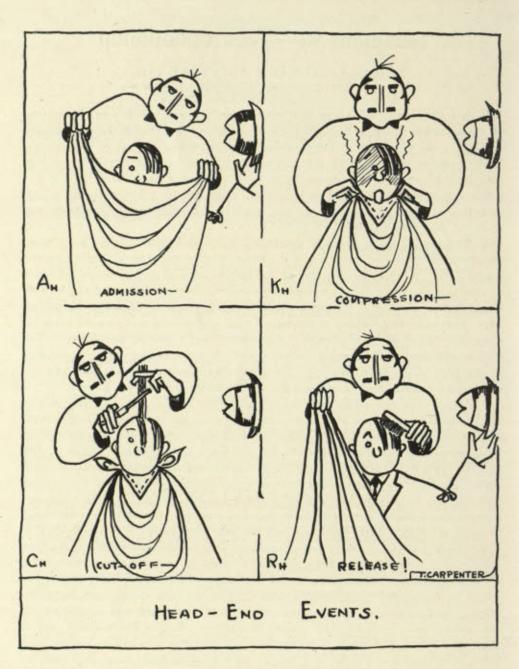

# Technique 9 — Tech 000000000

# SNIQUES WALK OUT AND TAKE THE PUBLICATIONS CHAMPIONSHIP

T is a time-worn old adage that no matter how much bull you throw you have to kill the beast to become a real toreador. But the brother penpushers and type punchers of the so-called "Official News Organ" of Technology likely have never heard of the saying or, if they have, it has been entirely disregarded by them. In consequence, they took many hours' time before the great contest was to be staged and devoted these precious hours to perfecting their flow of the English language and making it fit their needs in attempting to throw fear and trembling into the hearts of we who are directly connected with Technique. In a series of spurious articles published in the Tech, they attacked, assailed and belittled our courage and physical possibilities at great length. In the sporting element of today this form of indoor sport is known as mud-slinging, and it is a fact that so many cubic yards were slung by our rivals that on the day of the game the field was not in fit condition to be played on. However, after looking at the sea of mud and asking our own editor if he deemed it advisable to hold such a swimming meet as would be necessary for such conditions, the honorable Techites had the unbecoming nerve to publish in the next day's issue words to the effect that there were streaks of certain color, not known to men of indomitable spirits, running down our backs.

Having told you of the preliminary bouts we need but to look at the top of the sheet to note the great truth of the adage we have quoted. We won despite all our seeming failings. The first half was uneventful as far as scoring was concerned. The teams battled up and down to a scoreless half with the fighting mainly in Tech territory. All during this half, Technique clearly showed their superiority and the result was never in doubt. Soon after the second half opened, Technique brought out a more varied attack. Forcing their opponents down under their own goal posts, they were held for downs but managed to score after all. Tech had their ball on their own ten-yard line and Charlie Toll dropped back to punt out of danger. The Tech center lifted a perfect mashie shot over Charlie's head, the ball coming to rest some ten yards back of their goal line. Taking a survey of the situation at hand, Charlie decided it would be considered good form to pick up the ball and scurry back onto the playing field. But alas! There was a reception of Technique men awaiting him, such as had never been accorded a Tech man before. Result, Technique 2 points. After an exchange of punts, Brantingham picked up a lose ball and scampered forty yards across the field, and on the next play heaved a beautiful pass to Ray Holden who went on over for a touchdown and certain victory. And this, gentle reader, is the sad tale of the downfall of the great "TECH" football before the continued onslaught of "TECHNIQUE." 'Twas ever thus.

We
Were dancing
With youthful abandon
When the buttons on
The top deck
Of my tuck jeans
Carried away.

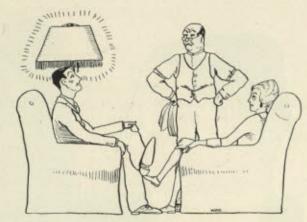

Clapping my hands into my Pockets, I laughed LOUDLY. And suggested We stroll outside.

I
Fear my partner
Had a sense of
Humor
And no
Feelings
For, outside in the
Moonlight she tripped me
Playfully,
And I all but lost those
Infernal pants.

I
Finally managed to tie
A running bowline
Thru the strap
With success
And thereupon
Felt greatly
RELIEVED.

i thank you.

Apologies to KCB

Father: "Young man, the lights go out at ten in this house."

Y. M.: "Suits me to a T. Don't delay on my account."

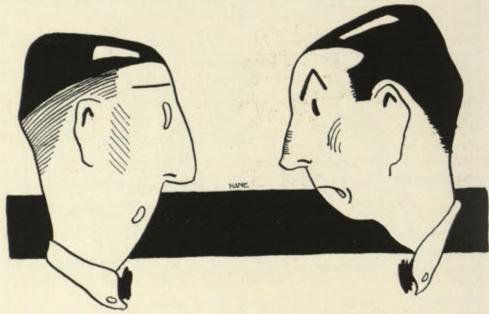

Beadle: "Say, Lee, if a man walks down the street and kicks an iron fence three times, why is his name Johnson?"

Cowie: "I don't know, Hal, why is his name Johnson?"

Beadle: "Well, you see his father's name was Johnson."

When the light of your eyes begins to trail her fingers thru your hair; PAUSE — and remember what happened to Sampson.

Joe: "Nice day, don't you think?" Bush: "No, not often."

Two members of the class of '87 were discussing old times.

Have you seen Shepard lately, he used to be a wonder at leading the class yell.

Yes, I've seen him and I've come to the conclusion that yell was weak. He's got a boy at the old school and you ought to hear him now when he audits the kid's bills.

In more remote parts there is still some connection between the Ein Stein and the Zwei Beer theories. Wot say!

Phyllip: "Wouldn't it be awful if all of these people came to life."

Phyllis: "I wish one of them would."

## Fate is Cruel

The weary student was returning home with a pint of precious prune juice on his calloused hip and being a convivial soul, stopped at the United Cigar Store to swap lies with the "boys."

While leaning against the radiator and thus engrossed, the "corpus delicti" exploded and blew out a section of his room-mate's overcoat.

Pity this man! His punishment was equivalent to burning at the stake.

Editor's note—If it had been a quart
—it would have killed him.

### Heard at House Party

He to Flapper: "You know there is a dog in our town that hasn't any nose."

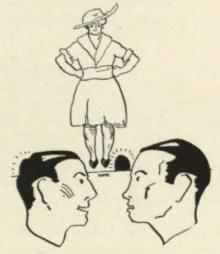

Flapper: "Isn't that perfectly terrible. How did he lose it?"

He: "I don't know."

Flapper: "Well how does the poor

little dog smell."

He: "Terrible."

The Tech Show Chorus Manager Faces a Knotty Problem

Coat: "Who was that terrible girl Smith took to Prom?"

Vest: "That was my sister."

Coat: (slightly torn): "That's nothing, you ought to see mine."

#### The Song of the House Party Stag

I love to be a stag, because when the jam begins, I'm right there, without making any preliminary excursions — and when it's over, I don't have to take some girl for an expensive ride in a taxi, or an endless ride via the Public Service — me — I can go to bed and give the devoted ones the horse laugh.

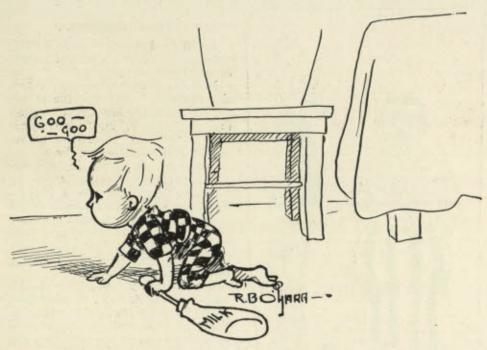

I have my pick of everybody's girl—if you don't believe it, ask them—sometimes, while making a reconnaisance, I catch a throw back to our Puritan forbears, but, as a rule, I experience no trouble, the variety is exhilirating and the party costs me nothing.

When I'm tired of dancing, I can entertain someone's else friend, or take a quiet smoke. Whenever refreshments are served, I revel in my enviable position — I can horn into any tête-à-tête and get by with it — I can even separate the timid and less experienced from their lady loves.

I am a tower of smoke by day and a pillar of fire by night!

God bless me!

Our editor, Hall Kirkham, was known to hold the record when at the age as depicted in the above, for continuous non-stop run. He averaged three miles on the gallon.

Hell hath no fury like the aftermath of smoking.

- Peruvian proverb

Possibly this accounts for the sulphurous odor of Christmas cigars.

Ken Kingsley: "Is this the weather bureau? How about a shower to night?" Voice of the Prophet: "Don't ask me, if you need one. Take it."

Bum 1: "I hear they are thinking of legislating against cigars."

Bum 2: "That won't make any difference to you with that rope."

Professor Moore, in Organic Chem. Lecture, was discussing the properties of Thymol.

Gentlemen, this substance gives the characteristic odor, with which you are probably familiar, of wild thyme.

Sorry, old man, we have to take your word for it. We personally know nothing about it.

We sincerely believe that our next president's name will be Dimes, or Quarters. We only hope it will not be Sheckles.

#### Thesis Subjects.

Joe Bush, a senior in Course XXIII, submitted a report the general context of which ran as follows:

Having delved into great and extensive research, I find that the reason for the extremely low cost of Sauerkraut in Bangkok, Siam, is due in great part to the novel method of manufacture employed in that clime.

Cabbages are placed in high exposed parts of Banyan trees by Simians and a species of gorilla. Elephants are then inhumanely driven under these and are made to trumpet into the upper branches of said trees by unbelievably cruel methods, thereby blowing upon and artificially drying this great delicacy.

We feel that if brought to the attention of the S. P. C. A. something might be done about the matter as these poor pachyderms are kept in agony from early morn until dewy eve in this nefarious business.

AND NOW OUR TASK IS OVER AND WE WILL REST IN PEACE FOR THE REMAINING YEARS AT THIS INSTITUTION. I SAY YEARS WITH RESERVATIONS. IT HAS BEEN OUR PLEASURE TO COMPILE THIS OUTFIT OF WHAT YOU WILL CALL A FUTILE ATTEMPT AT HUMOR, AND IN LEAVING YOU AT THIS TIME WE HOPE THAT YOU HAVE GOTTEN YOUR QUOTA OF THE COST PRICE OF THE BOOK FROM THE SECTION JUST READ.

ALL THE GOOD LUCK IN THE WORLD IS OUR MESSAGE TO OUR SUCCESSORS.

GOOD DAY!

#### Measuring Roofs by a 'year-stick"

AFTER all's said and done, there's only one way to measure roof value — that's by the "year-stick."

For when choosing a roof, the really important question is: "Which roof will last longest with the least trouble and expense for upkeep?"

In the light of long experience, the logical answer is: The Barrett Specification Roof. For in every section of the country there are roofs of this type that have been in service for thirty, forty or more years, and are still in good condition.

Despite proved durability and freedom from maintenance expense, Barrett Specification Roofs are moderate in first cost. And they provide a degree of fire protection not exceeded by any other kind of built-up roof.

It is only natural, therefore, that Barrett Specifi-cation Roofs are the choice of the leading architects and construction engineers the country over, and that today they cover a majority of all the permanent flat-roofed buildings in America.

#### The Only Bonded Roof

Barrett Specification Roofs are not merely guaranteed—they are bonded.

When the roof is 50 squares or larger, and located in a town of 25,000 or more, or in a smaller place where our inspection service is available, the owner receives, without cost, a bond issued by The U. S. Fidelity & Guaranty Company, of Baltimore, protecting him against all repair expense during the life of this bond—Type "AA" Roofs, for 20 years; Type "A," for 10 years.

Before specifying or closing contract for a Barrett Speci-fication Roof, be sure to read carefully all the stipulations in the specifications.

Full details regarding these Bonded Roofs and copies of the Barrett Specifications sent free on request.

### WHAT TRAINING MEANS to a MAN

The trained man will step out first, to success, in present conditions of industrial competition.

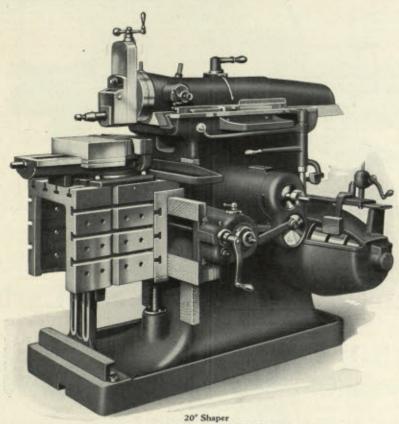

A few weeks spent in the shops and laboratories of the Michigan State Automobile School, in Detroit, the automobile center, will be of wonderful value in demonstrating the practical application of mechanical and scientific principles.

At this school, you have the opportunity of meeting executives of the automobile manufacturing and service companies (who address our classes regularly) and of inspecting the great plants.

Our free illustrated catalog, explaining training methods and describing all courses fully, will be sent on request.

#### 1922 VIEW OF OUR FACTORY

This company was established in 1905. Its steady growth in seventeen years can be traced back to a single purpose—producing tools of a uniform excellence of quality.

There is much satisfaction in a com-

plete plant.

Customers whose good will we have merited from dependable service, we serve

with adequate facilities.

Today there is no problem of the small tool user—in high-power milling, gear cutting—drilling, reaming—immediate delivery of rugged, dependable tools—which we are not prepared to meet resourcefully and intelligently.

There is real meaning in our slogan. It expresses our ideals, policies and methods.

# Massachusetts Institute of Technology Cambridge, Mass.

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY aims to give thorough instruction in Civil, Mechanical, Mining, Electrical, Chemical, Sanitary and Electrochemical Engineering; in Architecture, Chemistry, Biology and Public Health, Physics, Geology, Naval Architecture and Engineering Administration.

To be admitted to the Institute, the applicant must have attained the age of seventeen years and must pass examinations in algebra, plane and solid geometry, trigonometry, physics, chemistry, history of the United States (or some other unit of history), English and French or German. Preparation in one unit of a series of elective subjects is also required. A division of these examinations between different examination periods is allowed. In general, a faithful student who has passed creditably through a good high school, having two years' study of French and German, or three years of either, should be able to pass the Institute examinations. The requirement in Chemistry, and in History, can be fulfilled by a satisfactory certificate from the preparatory school in place of an examination.

Graduates of colleges, and in general all applicants presenting certificates representing work of at least one year done at other colleges, are excused from the usual entrance examinations and from any subjects already satisfactorily completed. Records of the College Entrance Examination Board, which holds examinations at many points throughout the country and in Europe, are also accepted for admission to the Institute.

Instruction is given by means of lectures and recitations, in connection with appropriate work in the laboratory, drawing-room or field. To this end, extensive laboratories of chemistry, physics, biology, mining, mechanical engineering, electrical engineering, applied mechanics, hydraulics and the mechanic arts, have been thoroughly equipped. Unusual opportunities for fieldwork and for the examination of existing structures and industries have been secured.

The Summer Session affords opportunity for students of other colleges to anticipate or make up work in many scientific and technical subjects. Students of the Institute are likewise able to anticipate topics or make up deficiencies of previous terms. A program of study can be enriched by either taking additional subjects in the Summer Session or by anticipating others to free time of succeeding terms which may be used for more general or professional studies. A special circular on the Summer Session is issued each year.

The regular Courses are of four years' duration, and lead to the degree of Bachelor of Science. In most Courses the work may be distributed over five years by students who desire to do so. Special students are admitted to work for which they are qualified; and the degrees of Master of Science, Doctor of Philosophy, and Doctor of Science are given for resident graduate study. Opportunity for research is offered in all the departmental laboratories, special opportunities are offered in the Courses in Chemical Engineering Practice and in the co-operative course in Electrical Engineering in which the students spend part time in the industries for a combination of technical and industrial training.

The tuition fee is \$300 a year. A deposit for laboratory fees is also required. In addition, a student tax of \$9 per year is made.

# Reliable Refrigeration

FOR EVERY PURPOSE

THE governing factor in the selection of Refrigerating Equipment, in most cases, is the reliability of the machine. Can it be absolutely depended upon to perform the work? A shut-down during the warm season is always annoying and often is an item of expense, due to loss of production or deterioration of products in storage.

York Refrigerating Machines have demonstrated their absolute reliability by more than thirty-six years of satisfactory service, which has given them a high reputation throughout the refrigerating field.

Essential Industries in all parts of the world are employing York Mechanical Refrigeration profitably in the production and marketing of high grade products. We cordially invite all who are interested in Mechanical Refrigeration, to investigate the York System.

York Refrigerating Machines are built in all types and sizes from 1/4-ton refrigerating capacity upwards, and may be driven by any available power—steam, electricity, gas, oil, or gasoline motors.

Engineers and Manufacturers of Conveyors for Every Purpose

TAKE one tiny fibre of cotton and look at it through a magnifying glass. It looks not unlike sugar cane or a bamboo stalk.

Being nothing else but a minute stalk, each tiny fibre is extremely susceptible to the influence of moisture; all the more so when dry. And when dry—it has a tendency to flatten and curl.

Change the condition of each tiny fibre from moist to dry several times—and rapidly—and its elasticity is impaired; may be destroyed.

Immature cotton has not acquired this elasticity. It has not taken on "stalk" properties. Devitalized cotton has lost it. So you give skilful attention to the buying of cotton. Why should skill stop there?

Every step in the manufacture of cotton is, in reality, a drying process. Speed produces heat, and heat dries. It dries every one of those tiny fibres—those little stalks—and makes them tend to curl and twist.

They do this as a protest—as a signal.

They give you fair warning.

Humidifiers are installed to prevent this.

But-

Humidifiers will not do all the good possible unless violent fluctuations of dryness and moisture are made impossible.

Commercially constant atmospheric conditions may be obtained by automatic regulation only.

For more than a decade we have pioneered this. And some who have believed it, and believed in the methods we have devised to accomplish this, have reaped bounteously.

In solving these problems of air conditioning, we have acquired a fund of practical experience, which, with theories that have been checked time and again industrially, have produced data that we bring to bear on every problem.

#### HUFF ELECTROSTATIC SEPARATION

should be carefully and thoroughly investigated by everyone interested in the concentration or separation of ores, whether the ores are simple, complex, or refractory. Concentration and separations of ores and other materials are effected in the Huff Process mechanically by utilizing the difference in ELECTRICAL CONDUCTIVITY of the minerals of which most ores are composed, without water or roasting and regardless of specific gravity or magnetic permeability. The principle of the process is based upon the difference in electrical conductivity of the materials to be separated. For example, most minerals are good conductors of electricity to a more or less degree, while most gangues or rocks are very poor conductors of electricity.

The electrostatic process is especially adapted to the refining of GRAPHITE from which domestic flake is manufactured into products suitable for the manufacture of crucibles, foundry facings, paints, linotypes, pencils, batteries, electrodes, water compounds and packings.

JENKINS VALVES occupy an extraordinary position they are known, not only as good, serviceable valves, but commonly set the standard by which other valves are judged.

Jenkins design provides a heavier, stronger valve. Only "analyses-proved" metal is used, and it is uniformly cast. Castings are accurately machined to assure unity of parts.

Each valve "proves" itself in rigid tests, and leaves our factory fully guaranteed-a valve that is safe and dependable in severe as well as average service.

Brass, iron and steel valves for power plants, plumbing, heating and industrial service. The genuine are known by the signature and Jenkins' "Diamond"—supply houses everywhere.

"Small things make perfection, but Perfection is by no means a small thing."

Careful attention to the details of his art raised Michelangelo above all others in Rome, and gave him the contract for the erection and decoration of St. Peter's.

## In the Art of Printing—

It is surprising how small things will lead to perfection and how the neglect of small things will produce mediocrity and disappointment.
