

The U.S. Energy Crisis and the Role of New Nuclear Plants

Thomas A. Christopher

President and CEO, AREVA NP Inc. and
Vice Chairman and CEO, AREVA Enterprises, Inc.

Monday, November 5

3:30-5:00 pm

32-141

An analysis of the U.S. electricity generation industry and the issues associated with the substantial electricity price increases anticipated in the next five years

An analysis of new generation alternatives (coal, gas, renewable, and nuclear) and their impact on the environment and future electricity prices

A review of the industry demand for new employees and career development opportunities

Co-sponsored by the Nuclear Science and Engineering Department,
the MIT Chapter of the American Nuclear Society and the MIT Energy Club
