OPPOSITE THE NEW
WALDORF-ASTORIA

Home of the famous swimming pool

The SHELTON

at 49th and Lexington NEW YORK

When the Shelton opened (7 years ago) we began catering to college men and women. Gradually their patronage has increased; we feel safe in asserting that more students make the Shelton their New York home than at any club or other hotel. One reason for this is the free recreational features plus a desire to serve on the part of Shelton employees. Room rates have been greatly reduced. Rates from \$50 per month upward. A room from \$2.50 daily.

Club features (free to guests) are as follows: Swimming pool; completely equipped gymnasium; game rooms for bridge and backgammon; roof garden and solarium. Restaurant and cafeteria service at reasonable prices.

Anna May Wong

Abandons her kimono to reveal the charm of the Orient on the stage at the METROPOLITAN THEATRE the week starting April 29.

BACK SEAT DRIVERS

Magistrate: "Who was driving when you collided with that car?"

Drunk: "None of us; we were all in the back seat."

— Log

First Wall Street Broker: "Let's flip a coin to see who stays in the office today."

Second Ditto: "All right; send out the office boy to see if he can borrow a coin somewhere."

don't forget Mrs. Revere

Paul: "Everything was fine until *The Tech* quoted me — 'Two if by land and one if by sea.' "

Paul Revere's Ride, or

How He Finessed His Queen

Listen, my children, and you shall hear
Of the *modern* ride of Paul Revere;
On the Eighteenth of April, at quarter past five
He started the trip on Memorial Drive
That added a step to his famous career.

He said to his friend, "If the British march
By bus or plane from the town tonight,
Make a telephone call to my private line
(The number is LIBerty 1089)
And I'll be all set with my Model T
On the opposite shore by the sycamore tree.

Well he finally put thru his telephone call
And gave all the dirt to our hero (named Paul)
Who wound up his Ford for an hour or three
And then started out on his world-famous spree.

Now he's hit Harvard Square on his mem'able
ride,
And roaring behind him with throttle wide
Rides a tough Cambridge cop on his two-
wheeled machine —
For Paul didn't wait for the light to turn green.

* * * * *

It was twelve by his Ingersoll watch
When he crossed the bridge into Medford town;
— From his pocket flask a gulp of Scotch —
And nary a sputter, a cough, or frown.

It was twelve by his Ingersoll watch
When he came to the bridge in Concord town;
By now all the road was an indistinct blotch,
And the moon and the stars looked quite brown.

It was twelve — "Well, for cryin' out loud!
It's been twelve for an hour or so."
Cried Paul to the gathering crowd,
— "I guess that the thing's a bit slow!"

"So I think I'll go home to the task
Of explaining this leave to my dame;
By the way — I just thought that I'd ask —
Does anyone know why I came?"

She was only Mr. Zilch's daughter, so she sub-
mitted to ballyhoo.

"Did you see the dairy maid?"
"No, they finished it while I was away at
college."

There once was a man who rode on a horse.
He yelled so much that he became a little hoarse.
(We'll have to make this blank verse because
He also caught colt and had night mares)

Prof: "Come, come; your paper shows you didn't go to the lecture; where did you get your information?"

'34: "I read it in *The Tech*."

Prof: "Excused."

Mr. O'Neill's palatial yacht *The Electora* was sailing toward a far-off port. All through the night the rail was under, each sail doing its expected duty. It had to reach port in time for the afternoon matinee as a large theatre party was arranged for the occasion.

As morning broke, the breeze died out — not a ripple was to be seen across the broad expanse of blue. It was impossible for them to reach shore for another twenty-four hours. A radio message of their delay was soon broadcast. The newspapers of the destined port picked it up. The headlines of the afternoon editions read — "Morning becalms *Electora*."

Father: "Look here, son, I don't want to see you drinking out of a bottle again. I had a friend who cut his lip very badly on a bottle once."

Son: "But I'm hardened to it. Don't you remember when I used to cut my teeth on a bottle?"

Running in the red.

That was Tom Rhines in the front row.

Steward: "Was it a good dinner, sir?"

Passenger (mournfully): "Yes, but I guess you just can't keep a good dinner down."

"It has been proven that opposites attract."

"Can you give me an example?"

"Sure, loose women and tight men."

"Electioneering in Its Modified Forms is Beneficial"

Always alert to the whims, desires, and gripings of the student body, Voo Doo is about to print a list of the candidates for the various class offices, together with a list of these here now candidates: (Numbers in parentheses refer to year at the Institute — if anyone cares to know.)

For President of the Senior Class:

Oswald P. Goober (ΦΦΦ): East Golosh High School; Miss Van Snoot's Country Day School. Tug-of-War team (1); Editor of *The Tech* (1); Passed 8.01 (4); Flunked 8.01 (1) (2) (3); doesn't drink; doesn't smoke; doesn't neck; no muss; no fuss; no rasping irritants; you, too, can become an artist in six easy lessons; why wear a truss?

Xenophon P. Dingleberry (AK): President of Senior Class, South Burp Reform School. Convicted for assault and battery (1929); six months for petty larceny (1929); flunked out (1930); reentered (1931); Boston Tea Party (1773); Battle of Bull Run (1861).

"He says they're being raided."
"Tell him we'll wait."

Class of '75

Elmer J. Snodgrass (ΔΣΔΤ): Jitterville Preparatory School. Crew (1) (2) (3); track (1) (2) (3); Intercollegiate High Jump Champion (3); Ping pong (2½); Anaconda (8½); General Motors (16⅝); Johns Manville (87¼); U. S. Steel (40⅜).

J. Amos Whortlefish (ΠΡ²): North Zilch Normal School. Reporter, *The Tech* (1) (2) (3) flunked E11, E12, E21, E22. Owns four cars; flunked G75; reads Physical Culture, True Confessions, and Amazing Stories; Whistles through teeth; can also do card tricks and plain and fancy hemstitching. (Prices on request.)

Due to a lack of space, Voo Doo is forced to leave this list in its unfinished form, but we promise that it will be completed in our next issue — that is, unless we receive enough protests to warrant discounting it.

Classy

THE ICONOCLAST

"*She's beautiful and sweet,*" you say,
 "Ah, but woman has a gentle way
 "Of hiding things from common prey
 "By her pose."

"*She's beautiful and sweet,*" you say
 "She's human too, to that I'll lay,
 "Too soon delusion fades away,
 "She's no rose."

"*She's beautiful and sweet,*" you say,
 "'*She's perfect as the break of day,*'
 "But have you ever thought she may
 "Pick her nose?"

It seems as though a young lady was making her annual visit to her aunt in the country. The year before, on the same visit, she had noticed that a very colossal station was being constructed in a certain city through which the train happened to pass. This year she was anxious to know if the building had been completed. As the train drew into said city the girl shouted to the nearby porter in a tone which was not intended to sound the least bit abrupt: "Haven't they opened up that depot yet?"

The dark-complected employee was a bit startled at first, but soon collected himself and replied: "Sorry, Miss, but you gotta wait till we gits outside de city limits now."

He: "S'funny, dear, but whenever I dance with you I get that slipshod feeling."

The other day we asked a Frosh acquaintance of ours why he was enrolled in Course VI. After much coaxing we finally got him to admit that he had once heard that even magnets have their moments.

Mrs. Spring: "Ride on, Spring is here."

THE SAME BOAT

The Tech, after facing a deficit for several months, has decided to become a bi-weekly instead of its usual three issues per week. Their move was a wise one. We hope that it will make the other extra-curricular activities sit up and take notice. At the present time all of the undergraduate publications are showing a deficit. Yet what can we expect unless some definite action is taken by those in charge? Unnecessary banquets and appropriations, excessive stationery and telephone calls have always been a hindrance to the proper balancing of the books. These items can be entirely eliminated if only a greater responsibility is taken by everyone from the general manager to the prospective candidates. The amount of money received from advertising has declined. It is only natural that the overhead be reduced proportionately.

Athletics is another branch of activities where expenses could be reduced to within fifty per cent of the present figure. Intercollegiate competition has always seemed to be a superfluous pastime for prospective engineers. It is "rare as a day in June" that a Technology team has a successful season. It is equally as rare to hear the name of a Technology man mentioned as a distinguished athlete. Athletics is not a drawing card for us. The student enters Tech to be taught engineering and science.

Some system of inter-mural competition in athletics could be worked out to the complete satisfaction of those concerned. Intercollegiate competition should be abolished altogether. The reduction in expenses here is a matter that is well worth considering.

— KNOCKS BUT ONCE

The present Freshman and Sophomore classes as a whole lack the initiative or energy to engage in the Institute activities. Their absence from publication and managership competition is very apparent; even the sports do not claim as many as formerly.

Perhaps the stringent condition of the times is in some way connected to this situation. But Institute life in itself is set apart from outside affairs, and there is no obvious reason why there should not be as many men as formerly entering in undergraduate competitions. It is a recognized fact that winning a certain sought-for position brings a man into prominence and self-respect, besides the incalculable value the contacts and the experience provide. Institute authorities look upon with favor and encourage the recognized student activities.

Any undergraduate has time for at least one live activity unless he offers himself the excuse that he needs a lot of time for loafing.

Also, prospective employers of our graduates are not amiss to inquiring about and placing considerable stress upon a man's ability and coöperation as shown by his work in undergraduate affairs.

Contributors to this issue: Addison S. Ellis, James E. Harper. Contributors to the March number: John M. Kimble, Jr., Walter R. Duncan.

Ye Olde Tech speaks to Phosphoros. We are accused of believing that sex, ah sex "is the chief element, end and aim of all humor." Evidently this came from the pen of some budding staff member who doesn't even read his own yellow journal. At least we don't snoop up behind people at the Proms to snap a likeness of some couple having their moments (whoops sorry). At least we don't publish them as front-page matter. At least we don't publish photos of Prof's with young ladies on their laps. The next time, "Continuous Newsies" try to find a head that better fits the body. Your own ideas of sex are good, but your efforts show signs of amateurism. You of the Undergraduate News Organ are barking up the wrong tree. Phos is lurking in another tree, thinking how feeble are your accusations

▲ ▲ ▲

Since the ads were still failing them, *The Tech* was short of copy again last week. "Come on, you dirty louses," says "Terror" Whitton, "we gotta get some more bunk or ballyhoo for this issue."

"We don't get any breaks," says Features Editor "Edge" Wise. "The Institute has not bought lately no soap making machines or slaves from the South."

"Geeminy Crickets and Cracked Ice," ejaculates "Terror" Whitton, "that reminds me we ain't written anything for this issue about this here Voo Doo."

"Boy — excuse me, boy, I mean sir; dat's de stuff. I laugh like a horse easy as hell over Voo Doos, but we'll have to find something to sock 'em about and I can't find anything wrong with deir magazine."

It doesn't take very long before a ring on the table develops into a circle under the eye.

"Very elementary, Wisey. Order a freshman to write a slam review of the last issue, as usual. Nothing he writes will be true, but *The Tech* can fool most Tech men most of the time. We'll make them think what it ain't."

... So, Fellas, that's why we gotta settle this big question that bothers all red-blooded Tech Men: "Shall We Abolish the Filter Paper or *The Tech*?"

It certainly seems funny that there are always two dogs hanging around the base of Presidential timber.

Express Clerk: "How many 'P's' are there in shipped?"

Farmer: "Two, unless you are going to ship peas."

What the Walker Memorial Committee needs is more Noyes.

Then there was the freshman who took the Prof. seriously when he said to "pass out quietly at the end of the period."

"Where's the Czech for this coat?" shouted the Bohemian Bell Hop.

"Why are Chinamen like two taxicabs going up the street?"

"All right, let's have it."

"It's the yellow race."

Wait till you see the white of her lies.

SOCOR

A meeting of all those interested in socor will be held this Friday at 5 o'clock in Room 2-151. The management expressly wishes every member of last year's freshman squad to report as well as any who are interested in the sport but who did not come out last fall. Coach Malcolm Goldie will be present and is anxious to try out as many new men as possible to fill several vacancies due to graduation this spring.

ALPHA PHI DELTA

The first term scholastic rating of Alpha Phi Delta fraternity which was not published when the others were issued was 2.71, as determined in accordance with the method used by the Registrar's Office.

As We Like It

COLONIAL THEATER

"The Devil Passes"

"The Devil Passes," by Benn W. Levy, now playing at the Colonial Theater, can undoubtedly be classed as one of the best plays to be presented in Boston this season, as well as one of the oddest. The principals are Arthur Byron, who plays the part of being the most wicked man in England, Diana Wynward, as the beautiful heroine, and Basil Rathbone, in the part of the devil.

After the preliminaries, the plot rapidly develops. The "devil" in the person of a Rev. Nicholas Lucy, suggests a game of truth wherein each person present at the weekend party declares what he or she "wants" most in the world. Naturally a variety of desires are expressed, varying from fame to a denunciation of God. The remainder of the play deals with a number of very interesting and peculiar scenes in which the "devil" makes it possible for everyone to obtain his desire. Strange to say, each person, in the final analysis, refuses the offer.

One of the most dramatic and well-played scenes portrays the minister, played by Robert Loraine, in his denunciation of God and his immediate collapse afterward. The minister's old-fashioned wife, played by Cecilia Loftus, was an excellent characterization, and added bits of humor at just the right moment.

The first part of the play reminds one of Shaw's plays, but as the plot progresses, the similarity disappears. All in all the production is highly recommended by the reviewer.

D. H. C.

The American • College Editor

Beginning of the End (Montana Kaimin)

Suppose you are the victim in one of those good, old-fashioned melodramas wherein the hero is bound and gagged and placed squarely between the rails of a railroad track. Suppose a huge express train is rushing down upon you at full speed. Suppose you are aware that the train is coming; you are also aware of your inability to get out of its way. Imagine your feelings then, in the face of this imminent destruction.

That, oh reader, is the position of many a Senior upon this campus today. Fastened securely to his final quarter's schedule, the unfortunate prospective graduate helplessly awaits the onrushing arrival of the month of June — of Commencement. Struggle and fight as he will, he cannot escape. Inevitably, positively, the end is approaching; his college days are about ended.

It is said that when a man is about to die, he reviews in a few moments the events of his whole life. So, too, does the Senior, in his last short quarter at school, review in the shadow of his extinction the events of his four years' collegiate life.

Freshman days — daze. Green caps; irking compulsory classes; boring prerequisites; indifferent, unsympathetic profs. Sophomore year — acquired sophistication; assumed lack of interest; educational veneer. The search for entertainment — the avoidance of study.

The third year — a Junior! An awakened interest in learning — an appreciation of the unlimited opportunity for receiving an education and a knowledge of the ease with which that education can be passed by. A realization of the folly of wasting time.

And finally, the Senior year. A wider range of freedom in study, in expression. Worries over the future; regrets about the past. Pleasant memories — some not so pleasant. Awareness of personal lack of omniscience — omnipotence. Too, a feeling of futility.

Such is the Senior's flashed review of his college life. It is too late, he knows, to do anything about it now; another second of time and he will be shot out of college and into the eternity of a vocation. The speeding express train of graduation will have arrived.

Afterwards, perhaps, undergraduates will pick aimlessly over his remains; will hold up an occasional meritorious achievement for inspection and comment; will go briskly about the routine of grooming themselves to take his place in the affairs of the university. — V. H.

New Fraternity

A new fraternity has been formed and is sweeping the country like wild-fire, according to news in the Kent State publication. The organization is known as the Rho Dammit Rho fraternity and membership is open to both men and women. Seventy-six chapters have already been founded in the United States and Canada.

THE TECH

PROFESSOR MAGOUN WINS LITERARY PRIZE

Written in Collaboration With Former Editor Of Youth's Companion

When the question of crime is men criminally because they are inherently bad? Or are there certain factors outside the individual which determine his character, for better or for worse?

In order to answer these questions, we must first determine what we really mean, says Dr. Thomas A. Fisher, professor of sociology at Syracuse University. "The idea of what constitutes criminality changes from time to time," Dr. Fisher told the *Orange* in an interview.

Crime is also determined by geography. "Anything," Dr. Fisher stated, "might definitely be a serious crime in this part of the country, but 150 to 200 miles away, it might be only frowned upon."

Behind many crimes can be found economic factors, the professor said.

"When a depression hits a group, the plane of living immediately recedes. When the plane of living goes down, man is not cut down on food, clothing, rent or anything else, on unwilling or unable to do these things, he must resort to crime."

"As the result of the reduction in the expenditure for rent, in our tenement houses, three persons are now living where only one lived. Delinquency has always been connected with crowded housing conditions."

When a man is unemployed, irritation arises easily amongst all members of the family owing to ill-health and worry. It is then that a man who has drunk usually drinks more. Again there is a high correlation between drunkenness and crime.

"During a period of progress the standard of living is so high that the underprivileged, to attain to the proper standards, rely upon crime; burglary, racketeering and the like."

"We do not have so much crime as crime, as Lombroso believed, but we have cyclical crimes. If people can work to get what they want, they will get it in that manner; if not, they will use criminal acts as the means to that end. Because of financial troubles, and, to a lesser extent, because of consequent shortage of help, more fires occur during periods of depression than at any other period."

"Another factor is that of fraud. If the truth were known there are probably at the present time more university men in prison this year than ever before, since, in hard times illegalities otherwise easily concealed, cannot be longer hidden, or recompensed."

"It is hardly fair to analyze the cause of crime from the standpoint of immediate economic factors. The Baumes law must force a man to commit murder, because a man would rather murder a would-be captor than be captured and suffer life imprisonment."

"Especially in juvenile delinquency it is true that disrespect for police power is responsible for many crimes. This is fostered by the notion that if a policeman is not already a criminal he is the next thing to it. The fault lies here with the policeman and the political system under which he works."

"It is my personal opinion that we have far too many policemen. For example, any eighth-grade boy could put tickets on parked automobiles, but it seems to require a squad of policemen to do it."

If, then, behind every criminal deed there is a long chain of causes and effects over which the criminal had no control, what should be done with a man or woman declared guilty by the law?

"My notion," declared Dr. Fisher, "is that no prisoner should be incarcerated for the sake of punishment. I do not care particularly what the state does with hardened criminals, but killing him will not do him any good, or society any good. Every criminal should go to prison for curative purposes; if incorrigible he should be imprisoned for life."

"The idea of 'quarantining' a prisoner from society is insufficient, because in practice it does not serve to readjust the criminal to the laws of a social state. Prisoners should not be released until they are adjusted. Offenders should be sent to prison as we send patients to hospitals."

"I do not think the state is justified in capital punishment. The only justification the state could have would be to deter thereby any further crime, but this belief has many times been proved false."

"Capital punishment is contrary to all we have been taught. It is against the principle of 'Thou shalt not kill,' and the

Graduate Thesis Proposes Building Shortcut Subway Under Great Court

Wilks, '22 Gives Plans For Tunnel Between Building Two And Walker

Plans for building subway passages to connect Building No. 1 with Building No. 2, and Building No. 2 with Walker Memorial were chosen as the subject for a thesis by Archie P. Wilks '22, a graduate of the department of Civil Engineering ten years ago. Since that time nothing has been done to further this project.

Reasons for the construction of such underground passages, according to Mr. Wilks, are obvious to anyone who has been around the Institute during a spell of genuine New England weather. In walking from Building No. 1 to Building No. 2 indoors, as one is sometimes forced to do by meteorological conditions, the distance travelled is 2280 feet. By way of the proposed passage this distance would be reduced to only 350 feet.

Tunnel Would Help Freshmen

Compulsory Physical Training classes for freshmen are held in Walker Memorial gymnasium once a week. During bad weather, this fact means a four-hundred-thousand mile walk through the storm for these freshmen. There is no way for them to get to the gymnasium under conditions except by wading through the elements.

Lunch is eaten in Walker Memorial Dining Room every weekday by a large percentage of the students. Sometimes they must plow through snow or get sprayed by rain in order to get a meal.

Book Reviews

"Behemoth: The Story of Power," written by Eric Hodgins and P. Alexander Magoun, an associate professor at the Institute, was chosen by the Junior Guild as the third best book of the month of April. The book tells the story of the steam engine, that Robert Fulton was not the first man to propel a boat by steam, and that George Stephenson's "rocket" was not the first successful locomotive. "Behemoth" is the story of great happenings in the world of power told in terms of the men who made them happen, beginning with the power provided by man and beast and concluding with the mighty machines of the present. Mr. Hodgins and Professor Magoun also collaborated on "Sky High," a history of aircraft, and their new book, "Behemoth," is said to be even more thrilling and spirited, scientific and dramatic. It is vividly illustrated with over seventy photographs showing every manner of power employed in the world today. The book is published by Doubleday, Doran and Company. The authors have not attempted to tell what is "wrong with the machine civilization," but have given their readers a good narrative of adventure in a physical, non-abstract world.

The book "Little House in the Big Woods," by Laura Ingalls Wilder, mother of Rose Wilder Lane, novelist, won first place in the Guild's choice. The story is autobiographical and tells of the life on a pioneer farm and the valiant efforts of the early pioneers in opening up the Northwest.

As second choice, the Guild picked "Two Children of Tyre," by Louise Andrews Kent. This book is one of the very few written for boys and girls concerning the ancient island city at the time of King Solomon. The story itself contains an absorbing account of the life of David and Esther, children of a venturesome Phoenician captain, and of David's experiences with the trading fleet.

Fourth of the April Junior Guild selections is May Lamberton Becker's anthology of stories entitled "Under Twenty."

"Golden Rule." The state kills about one out of every fifty murderers. It is contrary to the whole philosophy of Christianity. And principally because no good comes from it, there is no reason for the maintenance of such a punishment."

Over six hundred men living in the Dormitories would be saved about half the distance they now have to walk outside in order to get to classes in the main building, if the proposed passageway were built. Also, there would be a marked difference in the time taken to get from classes in Building No. 1 to those in Building No. 2 during bad weather.

Heat Would Keep Walks Clean

Since the top of the tunnel could serve as a pavement between the buildings it connected, the heat from inside the passageway would keep snow and ice from obstructing the surface paths.

Mr. Wilks pointed out that there is some room for argument as to where that portion of the tunnel connecting Buildings Nos. 1 and 2 should be located. The figures pertaining to distances that are quoted above are with reference to its being located at the extreme southern tips of these buildings, the route closest to the river. It was suggested, however, that the passage might accommodate more students if it were constructed so as to join the junction of Buildings Nos. 2 and 4 with that of Buildings Nos. 1 and 3.

Cost of engineering advice would be saved if it were decided to build the proposed tunnels, because complete construction specifications are given in Mr. Wilks' thesis.

Opinions on the question of whether this project should be undertaken have been solicited from some of the leaders in Institute affairs. Responses indicate that they think it utterly foolish.

PRESENT PAPER AT A. I. E. E. MEETING

Frank S. Duncan '32, student in Course VI, will present a paper on "Vertical Transportation," at a dinner meeting of the A. I. E. E. Student Branch of the A. I. E. E. in the North Hall of Walker Memorial. Tickets are 55 cents and may be obtained in Room 4-203 or from any officers of the Society.

Duncan, who has worked with the Otis Elevator Company for several summers, will lead the discussion which will follow the presentation of his paper. The meeting will be over by 8 o'clock.

S. A. E. SEES NEW FORD AT MEETING

(Continued from page one)

car of 65 horsepower, we are offering a new four-cylinder car of 50 horsepower. Either may be had in any of 14 body types. Except for the engines, there is but little difference between the two cars. Bodies and chassis are practically the same. There will be, however, a difference in price. For while the V-8 will sell at low price field figures, the "four" will sell for still less. That is our conception of expanding service to the motoring public, particularly in the face of present economic conditions."

Billet Doux

A certain fraternity man at Bradley Tech was such a good composer of billets-doux that his brothers asked that his love letters be mimeographed so that they could use them as models.

Another successful RENTAL season for our
DOUBLE BREASTED TUXEDO
at student rate of \$2.25 ♦ Single Breasted \$1.50
— READ & WHITE —
111 Summer Street ♦ BOSTON ♦ 93 Massachusetts Ave.

No heads would have been better than two.

(Mistakes like this have been going on for over fifty years. The only reason that there will be fewer in the future is that there will be fewer Techs in the future. Still \$700 is a lot of money).

Drinking beer is like smoking a cigarette, you tap it before using.

Paul Revere goes through the Underpass.

(Courtesy The Tech Photographic Department)

We heave a great sigh as we print the following story, for some of our fondest illusions were destroyed when we heard it; and no doubt you too, dear reader, will sigh and wish it weren't true. But don't blame us if you knew it all the time.

Can it be that one of our most cultured and well-known Professors Has A Past? Can it be that our paragon of learning and rotundity has worn a purple shirt and a checkered vest at some time in his varied career? A thousand manly heads wag gravely and from a thousand Sophomoric throats the answer comes booming back: "Yes!"

In an E22 lecture a while ago some fidgety individual dropped a quarter which clanged noisily to the floor and was heard to roll away. Tubby stopped in the middle of his sentence, and, as a far-away look came into his eye, his instinct got the better of him.

"Heads," he called.

Well, he probably lost, anyway — so to speak.

The Tech has only been "blurbing" about fifty years and that is pretty early for second childhood to be setting in.

"Pulling a fast one."

Wait, we've gotta nine o'clock.

Hoard and the world hoards with you,
Buy and you buy alone.
Bank and the plane banks with you,
Unless you have never flown.

"Sorry, sir, but the A. A. wants more space."

BRIDGE FOR BEGINNERS

By JACK HIGH

Four people sit around a square table. Their positions are North, East, South and West. Two more people must be in the room; their positions are Northeast and Southwest.

There must be at least two ash trays on the table, or if the smokeless type is used, one is sufficient. Ash trays should be emptied at odd intervals by the dummy. This is what is known as the "forcing takeout." If, at any point, ashes are dropped on the table cover, do not try to brush them off. They should always be blown off by the West wind.

A pack of cards is similar to a pack of wolves, there are fifty-two of them. Each pack is divided up into four suits. Each suit has two pair of pants, a coat, and vest. Sometimes an extra piece of material is also included in the hip pocket of the first pair of pants. It is to be used in case of emergencies and adds that "cross-ruff" appearance.

Aces are held only by those who have shot down ten German airplanes. It is considered an honor to hold an ace. It is considered two honors to hold two aces. It is considered three honors to — never mind, perhaps you can figure out by this time the correct value for the remaining aces. It is sometimes permissible to go to bed with an ace, but not advised unless at least four chaperones are present.

The cards are usually piled on top of each other, which is known as the "one-over-one system." They are then spread diagonally across the table face down. The person drawing the highest card has the choice of seats. This is the vital point of the game! Be sure to pick out a seat that will give normal support.

If, at this stage of the game, the talk happens to switch from blades to spades, nobody will give a damn anyway (except Northeast and Southwest, who have been dying to play all evening).

Next month's pointer: Score Pads and Pencils.

"Would you like to join a fraternity?"

"No thanks, I'm through with women."

But, Daddy, he's a Rogers student.

"What's the difference between opera singers and station announcers?"

"I'll bite."

"Opera singers train their voices."

If all the rifles used during the war were dumped into the middle of the ocean, the stocks would reach new lows.

The worst faux pas of the year is the Bridge player who bid spades in the Club car.

Then there was the Tech student who took Machine Tool Lab, became disgusted, jumped in the Charles River, and left a ring around the basin.

There have been mascots and mascots. But the latest one, it seems, is the common member of the genus *Mus*, known as the rat. His name is Oscar and together with the members of his immediate family (species *Zilch*) he inhabits the locker room of the Course II boys (a common malady) in the basement at the corner of Buildings 1 and 3. They lure him out of his hiding place by singing the Stein Song; for then, with the true Technology spirit, he stands up and in doing so usually bumps his head on one of the ventilator tubes, thus betraying his whereabouts. Once they get him out, he's the life of the party. Some of the boys have taught him a few things and, for a penny or a small bite of cut plug, he'll amuse the boys for hours with songs and tap dancing. He's even been trained to keep all but Course II boys out of the locker room — he can tell them by the smell. And it is rumored that one clever Mechanical Engineer is teaching Oscar to take notes. As soon as Oscar is proficient, he intends to rent him by the hour to lecture-weary students at a small charge.

I'm sorry, Mrs. Astor, I didn't know your dog behaved like that.

SEPARATING THE SHEEP FROM THE GOATS OR REARRANGING WALKER

Due to the sudden increasing interest in the more cultured side of life the *Drama Shop* is well on its way toward becoming a class A activity. For the same reason *The Tech* is reducing itself to a class B inactivity. Consequently a rearrangement of the Activity offices in Walker is absolutely necessary.

The Athletic Association will expand into two offices, one for those holding down the jobs, the other for those who didn't get any jobs. The Voo Doo will attempt to get as far away from the A. A. as possible so they won't be able to read our exchanges. As a result, Phos will wander over to the old Tech Show office out of reach of the common rabble. At the same time we will keep our highly decorated meeting place as a matter of sentiment if not for anything else.

Of course the *Drama Shop* will move into *The Tech* office on the third floor as per arrangements. But wait, *The Tech* will not be deprived of its customary two offices. The Business Department will occupy the Budget Committee office along with Carroll Wilson. The reasons for this are obvious. Hereafter we hope they will stick a little closer to their budget. The News De-

Horse: "I can see where this is going to be another steeplechase."

partment, we regret to say, will be outside of Walker altogether. They will occupy the Information Booth on the corner of Massachusetts Avenue and Memorial Drive. We hope that this will cut down the space which is now occupied by bull slingers.

The T. C. A. has always had too much room, but this is of little consequence as you never hear much about them anyway.

Light whines and bear.

A counter 25,000 miles long!

Five continents supply raw materials.

Western Electric goes all around the world to make its purchases.

In distant parts of the earth materials are gathered for manufacturing

Bell telephones—silk from Japan, mica from India, South African

gold, Australian wool. ¶ Not only is purchasing done on a world-

wide scale, but buying is raised to the status of a science at Western

Electric. It includes thoroughgoing studies in the fields of economics

Testing is part of purchasing, here.

and geography, rigid chemical and physical testing of many

samples before definite selections are made. ¶ Western Electric

men, as a kind of second nature, are constantly striving for

improvements. In serving the Bell System, they search constantly

for better materials, better methods of manufacture, better means of distribution.

Think how far your Bell telephone has already traveled.

The MASSACHUSETTS INSTITUTE OF TECHNOLOGY

CAMBRIDGE

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY offers Courses in Engineering and Science, each of four years' duration, leading to the degree of Bachelor of Science in:

AERONAUTICAL ENGINEERING
ARCHITECTURAL ENGINEERING
BIOLOGY AND PUBLIC HEALTH
BUILDING CONSTRUCTION
BUSINESS AND ENGINEERING ADMINISTRATION
CHEMICAL ENGINEERING
CHEMICAL ENGINEERING PRACTICE
CHEMISTRY
CIVIL ENGINEERING
ELECTRICAL ENGINEERING
ELECTROCHEMICAL ENGINEERING
GENERAL SCIENCE
GENERAL ENGINEERING

GEOLOGY
INDUSTRIAL BIOLOGY
MATHEMATICS
MECHANICAL ENGINEERING
METALLURGY
MILITARY ENGINEERING
MINING ENGINEERING
NAVAL ARCHITECTURE AND MARINE ENGINEERING
PHYSICS
PUBLIC HEALTH ENGINEERING
SANITARY ENGINEERING
SHIP OPERATION

The Course in Architecture is of five years' duration, and leads to the degree of Bachelor in Architecture. A five-year Coöperative Course in Electrical Engineering leading to the degree of Bachelor of Science and Master of Science is also offered.

Graduate Courses leading to the degrees of Master of Science, Master in Architecture, Doctor of Philosophy, Doctor of Science, and Doctor of Public Health are offered. The Courses leading to the degree of Master of Science include Coöperative Courses in Chemical Engineering Practice and Fuel and Gas Engineering.

The better high schools and other preparatory schools in the United States offer adequate preparation for the required entrance examinations given by the College Entrance Examination Board in June, or by the Institute in September.

Graduates of colleges or of scientific schools of collegiate grade, and in general all applicants presenting satisfactory certificates showing work done at another college corresponding approximately to at least one year's work at the Institute, are admitted to such advanced standing as is warranted by their previous training, and are given credit for our required subjects, including the entrance requirements, so far as they have been satisfactorily completed.

The Summer Session, extending from June to September, includes most of the subjects given during the academic year.

Any of the following publications will be sent free upon request

*Que
voulez-vous
encore?*

No, we haven't forsaken our good old American language (off with your hats—the flag is passing by). We are merely using an approved technique to lure you into reading this advertisement. Don't leave the room, please. You'll thank us for it before we're through. Yes, Corona Coronas will be all right if you simply *must* express your gratitude that way.

But to return to our subject. What more *could* you wish in a motor car than all that the new Chevrolet Six provides? You have doubtless thrilled already to the smartness of Chevrolet's long streamlines and spacious Fisher bodies. If you want speed, the new Chevrolet touches 65 to 70 miles an hour, with six-cylinder ease, quietness and smoothness. If you yearn for power—well, 60 horsepower is more than adequate for any demand you are likely to make. Marvelous handling ease is assured by combining the easy, quiet Syncro-Mesh gear-shift with Free Wheeling. And as for running costs—any owner will tell you that Chevrolet operating and upkeep economy is unexcelled.

Does that strike a responsive chord, or are you just an old cynic? If you are, we suggest a *ride* in the new Chevrolet Six. Once you take one, you'll agree with every point we've made. And you'll agree, too, that the best place to be these fine spring days is at the wheel of this smart, fast, and *remarkably inexpensive* automobile.

Twenty beautiful new models, at prices ranging from \$475 to \$660

All prices f. o. b. Flint, Mich., special equipment extra. Low delivered prices and easy G. M. A. C. terms. Chevrolet Motor Company, Detroit, Michigan. Division of General Motors.

NEW CHEVROLET SIX

The Great American Value

*"Cream of
the Crop"*

Robert Montgomery

Copyright, 1932, The American Tobacco Co.

"There are no better cigarettes"

HE BOBBED UP SMILING

Bob Montgomery has been an iron worker, deck hand, railroad mechanic and a booed-at extra in Hollywood . . . The gals will go completely zooney when they see him in his latest M-G-M, "LOVERS COURAGEOUS" . . . He's stuck to LUCKIES these last 7 years . . . Not a buffalo nickel was paid for his statement . . . He gave it just for a pleasant "Thank You."

"I have always used LUCKIES—as far as I am concerned there are no better cigarettes—congratulations also on your improved Cellophane wrapper with that little tab that opens your package so easily." *Robert Montgomery*

"It's toasted"

Your Throat Protection—against irritation—against cough
And Moisture-Proof Cellophane Keeps that "Toasted" Flavor Ever Fresh
