CIRCUS
APRIL
FOOL'S DAY

Major John Finnerty
(right) our candidate for Senior
Week Committee, instilling con-
fidence into the hearts of a few
of his loyal supporters from East
Boston. Major Finnerty asserts
that he is confident of election,
as he has already signed up to
have "Senior Week Committee
(4)" put after his picture in Tech-
nique.
Watch out, you'll spill the beans . . .

"...but before you say any more, I want to ask you one question.
"Why do they use pictures of pretty girls in advertisements?
"And while you are thinking about what you are going to say—
"I will tell you this much:
"Many pretty girls like a MILD and PURE cigarette that TASTES BETTER . . . and that's Chesterfield."

ELECTRIC LOVE

If she wants a date — Meter.
If she comes to call — Receiver.
If she wants an escort — Conductor.
If you think she’s picking your pockets — Detector.
If she’s slow of comprehension — Accelerator.
If she goes up in the air — Condenser.
If she’s hungry — Feeder.
If she’s a poor cook — Discharger.
If she eats too much — Reducer.
If she is wrong — Rectifier.
If her hands are cold — Heater.
If she fumes and splutters — Insulator.
If she wants a holiday — Transmitter.
If she talks too long — Interrupter.
If she is narrow in her views — Amplifier.

— Wampus

“I’ve got a new name for the girl friend.”
“What is it and why?”
“Baseball — because she won’t play without a diamond.”

— Widow

“Does your husband ever take your little hand in his?”
“Yes, and twists it until I drop the gun.”

— Davidson Yowl

Bog: “I got a real kick out of kissing Jane last night.”
Gog: “Any more than usual?”
Bog: “Yea, the old man caught me.”

INDEX TO ADVERTISERS

What does the advertising in these columns mean to you?

Every advertisement bears a message. It offers valuable information that will help you in the better choice of your clothing, your automobile, your bank, your cigarettes, or even your choice of future work.

The advertising of today has established its worth, not only as a publicity stunt, but as a directory for the buyer. Each advertisement carries an instructive message based on fact and research. The advertising in Voo Doo is that of reputable concerns, each offering a distinct line which is of interest to you at one time or another. Every wise buyer peruses the advertisements of the concerns which specialize in his wants before he makes his purchase.

You can patronize these advertisers to your distinct advantage.

SERVE THOSE WHO SERVE YOU
OPPOSITE
THE
NEW
WALDORF-ASTORIA

When the Shelton opened (7 years ago) we began catering to college men and women. Gradually their patronage has increased; we feel safe in asserting that more students make the Shelton their New York home than at any club or other hotel. One reason for this is the free recreational features plus a desire to serve on the part of Shelton employees. Room rates have been greatly reduced. Rates from $50 per month upward. A room from $2.50 daily.

Club features (free to guests) are as follows: Swimming pool; completely equipped gymnasium; game rooms for bridge and backgammon; roof garden and solarium. Restaurant and cafeteria service at reasonable prices.

“Move over,” requested the photographer of two beautiful girls whose picture he was taking, “I want to focus you.”

— Boston Beanpot

“All I did was ask you a simple engineering question. Why did you flare up like that?”

“ Well, you see I’m not a civil engineer.”

— Lyre

Won't you please vote for our candidate

... He is the man for the office ... He didn't do any work on the junior prom last year ... so he won't get in the way this year ... he is an ardent letter writer to the Tech ... three in one week is merely child's play for our candidate ... our candidate took a straw vote, but it went haywire ... however he is still confident of victory ... please don't disappoint him ... he has shown he is willing to serve ... he has put varsity hockey, varsity track, and senior week committee in his technique senior biography, not because he serves in these capacities ... but because he is willing to serve ... whether he made the teams or not ... don't let technique remove the last of these magnanimous gestures from his biography. All for Finnerty and Finnerty for Finnerty.
Herbert Hoover, Esq.
White House
Washington, D. C.

Dear Mr. President:

With the country in such grave financial stress it seems very unwise for you to have overlooked an excellent man for the office vacated by Mr. Mellon. The man I speak of is none other than our own Horace S. Ford, known to his intimates as "Hard" and to us inmates of Technology as "Five-Dollar." It's really a damn shame that this village Hamilton should be born to blush unseen and that his most successful methods of removing Technology's great budget deficit should not be applied to our country's own deficit.

"Hard" Ford's method is very simple. Why should he bother to curtail expenses and cut down graft? He merely increases the revenue at the expense of the poor suckers who pay his fines. Think how simple it would be to enlarge his fine system to embrace the delinquent taxpayers. A fine of $5 for every late income tax return, $5 for every late payment of graft money, $5 admission charge for listening to the funniest show on earth, a session of Congress. I could go on forever enunciating the various applications of his system. It's really unbeatable.

In closing I wish to state that the inclusion of H. S. Ford as your candidate for Secretary of the Treasury would mean at least three thousand more votes for your party from grateful and loyal Tech men. And, after all, three thousand votes are not to be sneezed at in this election when Al Smith has the entire ginger ale industry behind him.

Very truly yours,
Official action should be taken against the lousy manner some of these fellows dress for a formal examination. In addition, the toodamfamiliar notation at the top of the exam paper should be changed to read “Students are not allowed to bring books, notebooks, or Hershey bars into the exam room.” The latter is provoked because of the fact that at one of the morning exams one of the “Joes” pulled out a Hershey about eleven o’clock. While blindly and slowly unwrapping it with one hand he was writing like sixty with the other. The tendency was at first to regard him with contempt. But when he started eating it, this beholder became so hungry for a bite that it was almost impossible to keep from jumping the man.

“Are you a Statue of Liberty girl?”
“Sir, what do you mean!”
“Lit up all night and stands for everything.”

Voo Doo depressed the prices of Zn, Cu, and Pb the other day by throwing on the market all the multitude of plates from the cartoons and advertisements that have been in the issues of the last year and a half. Waiting for the prices to rise became too much of an impatient job. A war would do the trick, but Phosphorus’s lobby in the Senate has been ineffectual of late.

“You gave me the wrong steer,” said the milkmaid as she came away with an empty pail.

The Maine Stag Song: Call me darling, call me sweetheart, call me deer.

You can lead a horse to water but you can’t make him drink. And vice versa.
FRIGHTENS LITTLE CHILDREN

The "Bogey Man" from Walker Memorial Basement who has been scaring the Necco Candy Factory girls has been captured by the Dormitory Vigilance Committee, who will always fight for their women.

Mr. Noyes did not know that his new mustache-pomade was going to make that upper lip crop so fertile that it made ex-Kaiser Wilhelm's handlebars look like a goatee. The little blond wisps previously had just been holding their own. Each individual bristle had to be tied to the bedpost at night to keep it from receding. Mr. Noyes was several times mistaken for the "Timid Soul" of the funny papers. Thus, being desperate, he tried with the above pictured success the pomade which the salesman guaranteed would even grow hair on the dome of Building 10.

THE INSTITUTE'S FIVE-YEAR PLAN

Uncle Horace Ford admits the funds are pretty low; Enrollment has been falling off and thus the lack of dough.
The coffers of the Institute have grown quite gaunt and thin
For fifty thousand dollars have gone out and should be in.

Now we've a plan to offer that will save the Institute From the fearful degradation of becoming destitute—
But we'll have to ask the students to cooperate a lot For the honor of Technology — and all that sort of rot.

If everyone consents to flunk two courses every June, The twenty grand that will result will be quite opportune;
Then if we pay tuition late (we'll all agree on that) Ten thousand more will go to make Our Uncle's wallet fat.
And now, to top the whole thing off, we'll each pull down two D's,
And each of us will then fling ten more dollars to the breeze.

I've figured up the total sum and found it just works out To give the fifty thousand that we cannot do without. Now if we overdo our part and flunk, say, three or four, Our school will then be swamped with dough, its finances will soar —
And soon the balance will be such that it can carry on Without the money that it gets from Harry, Dick, and Tom.

The corporation then will heave a great collective sigh And tell the student body to depart from here for aye — They never cared to teach us what an engineer should know,
The only thing they wanted was our bit of hard-earned dough.
If the depression (terrible word, that) gets any worse the Theta Chis will have to sell their old bottle collection. However, it probably would not take them long to amass another aggregation of bottles. There is something romantic to such a collection; each bottle (or set of bottles) probably has a good story back of it. A faint odor issuing from the neck makes the reminiscence even more poignant.

Incidentally, a good many of the labels on these "real stuff" bottles are made by an industry in Lowell which has a legal charter. Some bootleggers have such a fast turnover that they don't allow time for the paste on the label to dry before selling their merchandise. This was illustrated by mortification suffered by a sophomore, who having just made a purchase of "real" Gordon Dry Gin pulled it out of his pocket to show it off at the house. Dismay! The label, still damp from paste, had crunched up and brushed off.

Voo Doo suggests that the present-day investor be called a frog, because he hops from bank to bank.

Bill Barker: "Beat it, Chippy — it's my turn now."

"You guys quit teasing me or I'll call Prof. Eames," says Hesselschwerdt.

Williams Jennings Hesselschwerdt, the silver tonsilled orator of engine lab and very tender-footed boy scout of the organization there, believes in making himself heard over the wheeze of some of the obsolete apparatus. His voice can scarcely fill a phone booth but his mouth and firm belief in the lip reading ability of his pupils make up the difference. He has had his first taste of power and has imbibed deeply, as some petty politician taking over his first office. Lacking in everything that would make anyone waste a passing glance, he turns to arrogance. Even that fails him. His only protection is the skirt of Prof. Eames, but the smiles of the amused still linger on.

The Dean of a co-educational institute recently issued a questionnaire to the students in which they were asked to name their preference in student activities. On receiving the papers he was surprised to see on 90 per cent of the papers, the answer, "Lantern Slides."
During the past year the board of Volume XIV of Voo Doo has attempted, by means of its satirical pen, to dispel some of the illusions so long hovering in the minds of the "average undergraduate," that pathetic person who is rightfully the butt of a large part of the nation's humor. These precious illusions about freshmen, faculty, honorary societies, etc., which have inspired a feeling of awe in the minds of the "average undergraduate," have been made the object of sarcasm and ridicule to prove that they are not sacred and holy, but flat and commonplace.

In this, the last issue of the present board, that greatest bugaboo of all, Institute politics, is the object of Phos's efforts. The "average undergraduate," who knows too much about applied mechanics (my apologies to you, Prof. Hayward) and altogether too little about applied politics, is as wary of discussing Technology politics as is a Democratic aspirant for the presidency of discussing the League of Nations. Politics, of the Institute variety, has long been the unmentionable of undergraduate circles even as the "sex problem" has been the unmentionable of the "average American" home; and the "average undergraduate" pays as little attention to class elections as does his ideal, "the average American," to national elections. It is with full realization of the tremendous handicap under which the Tech man is laboring that Phos is arguing. Granted, that many spend altogether too much time in travelling between Boston and its suburbs, Wellesley included, to have much time or ambition left to deal with such activities as class elections and student organizations, but the mere evidence of the few who have interested themselves shows that it is not entirely impossible.

It really won't hurt you, my dear "average undergraduate," there is no one to slap your wrist if you put your finger in the pie.

Voo Doo regrets that D. Malcolm Fleming, '33, our go-getter publicity manager, did not return to the Institute this term.
Although it has been tried, it is impossible to get more than 25 c.c. of grain alcohol at the chemical supply laboratory. It must have been a racket until that maximum allowance was made.

A large number of the men in Tech know one of the two common delicate tests for wood alcohol: 1. The Resorcinol test and 2, the Fuchsin Reagent test. Usually, the "unknown" liquid is not tested until the day after the night before when a test on the personal constitution could have had its effect. However there is a justification for the chemical test in that it makes sure whether or not there is any trace of wood alcohol in the liquor in question.

Pitiful Predicaments: A Scotchman with an all-day sucker who got lockjaw at three o'clock.

Those upperclassmen who find it hard to concentrate in the presence of noise find the stacks in the Central Library as quiet as a dumb class in 2.40 that doesn't know the answer to an oral question from the Prof. In fact, it is so quiet that it is simple to bend over the desk and snooze a while, especially if the usual late-into-the-night exercise preparation has been the case.

"No. 13964 will now render 'Time on My Hands,'" said the warden as the lifer made his way to the platform.

The fraternity houses must be kept up. It would not be a surprise to see placards in front of the houses from 526 to 532 Beacon Street reading "Boarders Taken In: Initiation $50 Extra."

There are always some new men entering the second term besides those individuals who had been booted for a term or a year. Thus, the fall rushing is repeated in miniature, taking care not to bring in rushers when some of the freshmen being initiated are having their rear ends smoothed with a paddle. It usually happens that the S.A.E.'s are not interested in rushing, because their hundred odd chapters all over the United States supply them with an adequate number of transfers to fill the house.

"Shove that big stiff out of the way," said the undertaker to his assistant.

Two couples having equal moments.
AFTER THE BATTLE, MOTHER

Oh there are pests within our halls
Of every breed and nation;
The slimy kind that clings to walls
To cause us perturbation;

The easy breezy kind of pest
Whose forte is back slappings;
The spawn that nuzzles in our vest
With confidential flappings.

But these are not in any wise
The greatest of my hating,
For they're the guys who sympathise
To brag about their rating.

So now I live each night to pray
That God will make me saintly,
And when we meet on Milky Way
I'll murmur to Him faintly; —

"And how did you pass Judgment Time?
(Speak up my little hero)
What, only four point nine?
Why mine was five point zero!"

The Building Construction men know their American woods, to be sure. But they were considerably non-plussed when the new wooden doors were put in at Entrance 33, Massachusetts Avenue. Conjectures in different groups that it was beech, birch, and poplar were declared with supporting reasons, based upon the grains and textures of the wood. But then came the official announcement that it was teak, a wood from India. Dirty trick, the budding contractors thought.
The two Halls, Dick and Emery Lawrence, are brothers in arms for disarmament. Last term Dick was doing his bit to break down the compulsory training course here and Emery Lawrence was then and is now challenging President Hoover and the Boston Post of the American Legion. If they don't take care they will have the militaristic ATO House attacking them by night with their famous battle cry, "Give The Freshmen Soldiers Hell."

Incidentally, Emery Lawrence Hall has been rising fast in the world. In our news sheet, The Tech, his class was given as '34. Then two Boston papers wrote articles about him, designating his class as '33 and '32 in the two instances. And now the present haranguings of Emery Lawrence Hall have been quoted in a Boston paper as coming from Prof. E. L. Hall of M. I. T.

“Do you get my point?” said the porcupine.

Tech: “Is the college in Wellesley proper?”
Wellesley: “Sir!”

“Lost something, me lad?”
“No, shir, i’sh lookin’ for the Deke Houshe.”
On this page Phos sober up long enough to become solemn:

This is the day of mergers and big combinations. Phi Lambda Alpha and Sigma Iota, two Spanish fraternities, have pooled their interests into Phi Iota Alpha. Such action is justifiable and even advisable for fraternities that have men whose nationality and interests lie along the same line.

Phos could suggest several other possible separate combinations of two fraternities to form one good one, lifting them from their present struggling state. But no; most of them are national fraternities, and the national officers of each would stand aghast at such a suggestion.

There is little connection between a fraternity at one college and another chapter of the same fraternity at a different college: sending a delegate to an initiation at a brother chapter, to an alumni dinner or to the national convention is about the extent of the acquaintanceship. Even the national conventions are little more than hand-shaking events; the delegates all think each other great fellows when they get drunk together and talk about the dear old fraternity, but such "good fellowship" would probably be the case in any group of college men getting together. Visiting brothers from other chapters find a chapter of their fraternity a convenient free boarding place while visiting the college or staying in a college town.

No matter how much it may be denied a fraternity at a college derives negligible prominence from its national standing. Its local reputation is the thing. Also, the interests, ideals, and quality of men may distinctly vary between two different chapters of the same fraternity. Thus, a transfer may or may not find himself at the chapter of his fraternity at his new college.

At freshman camp one of the '35 class innocently asked if a man could transfer from one national fraternity to another. This of course brought loud guffaws, but seriously it is as good a solution as has been suggested.

It is deplorable the way some college comics degrade themselves and others by printing as their own original jokes from brother comics. Of course, originality is usually difficult, but any college comic staff that spends the amount of time on its publication that is required for, say, the college daily, should be able to turn out a fair-grade magazine. Perhaps copying the idea of a drawing is justifiable, although we are sure that some of the Voo Doo drawings of girls by Harper Richards and Norton Miner that were subsequently copied in other comics give picture evidence that imitator artists are crude in their sense of proportion as well as being poor originators.

But direct copying of jokes without giving credit to the originator comic cannot be excused. Glaring evidence of this was the November issue of the Boston University Beanpot, which presented as its own seven or eight jokes from two previous Voo Doos. Putting several of the jokes under drawings the Beanpot had made up for the occasion in no way justified such cribbing.

Copy-cats can never go very far without getting caught up.

With the coming of spring there will be the usual fraternity costume dances. It is sometimes a gripe to provide one's self with a costume, but seeing the other costumes at a party usually makes it well worth the trouble. The Chi Phis are always up in the money with their Bohemian dance and the Lambda Chis with their Sailor affair. In the past the Sigma Chis were thoughtful in giving two different costume dances that only required negligible wearing apparel — a Turkish ball and a South Sea Island dance. It will be the greatest tragedy of the year if the Betas do not give their barn dance.
"SUGGESTIONS FOR THE PROM"
A hair in the head is worth two in the brush.

Phosphorus was sorely tempted to print in this last issue of the present volume some of the so-called-by-The-Tech “border line jokes” that have been laying in our files for several months. But they will be saved for display from a balcony at the Circus in April. Except for an occasional slip, Voo Doo prides itself on maintaining, for a college comic, a fairly respectable moral tone.

There is no question but what an obscene joke that is funny as well is appreciated in any society. But jokes that are “just plain dirty” are disgusting to any fine sense of nicety that a person may possess.

“Inspector Kennedy?”
“What do you think I’ve been doing the last half hour?”

“He was the second window dresser we had to fire this week.”

Here’s the best annual story on Ted Heim. Something went wrong with the refrigerator in his apartment. He, wanting to use his engineering knowledge, started poking around with a screw driver; this resulted in his puncturing a soft copper pipe, releasing sulphur dioxide under pressure. Frantic attempts to stop up the hole while coughing and making faces under the influence of the gas were of no avail. So Mr. Heim ran around the apartment opening all the windows; then he poked his head out of one into the open air. But there was plenty of sulphur dioxide in the refrigerator chamber, and Mr. Heim felt himself getting woozy. Accordingly he tore out of the room and rang the elevator bell furiously. Sulphur dioxide, being heavier than air, had filtered down the elevator shaft. A bewildered, gassed and bleary-eyed elevator boy finally got his car up; Ted crawled in and full steam downward was put on. By this time the bell was frantically ringing from the two floors below Ted’s flat, but the elevator boy was disabled and the people on these two floors had to chase down the stairs. Of course Ted could have gone one floor above and escaped the sulphur dioxide, because of its mentioned propensity of being heavier than air, but that was one emergency we had not been told about in engineering classes or in Humanics either.
Emerson, '33 in closed car on cold wintry night: “I’d hate to be walking.”
The Tech Reporter: “Now isn’t that lovely.”

The past vacation is undoubtedly the best one of the school year. There are no studies to be nagging the mind and no finals in the offing. Those who were not so fortunate as to go home or hit for New York City still managed to get along fine. We had all the gals from the different girls’ schools at our disposal, and the weather was smooth. The only evidence of work over at the Institute were the young scientists laboring on their theses and the janitors doing general housecleaning.

Osculate: To touch closely so as to have three or more points in common at the point of contact

— Webster’s Dictionary.

I’d practiced for many long hours
And thought that I’d learned how to kiss:
In shadowy vine-covered bowers
I’d snuggled with many a miss.

I thought that I knew all the theory;
It seemed that I had it down cold —
I’d whisper low — “Come across, dearie —”
And then use a wrestler’s hold.

But one day I happened to notice
That Webster saw fit to bestow
A new meaning on an old custom —
And certainly Webster should know!

* * * * *

So I’ve had to revise all my methods
And substitute Noah’s in place;
Altho sometimes I take him verbatim
And get a quick slap in the face!

“I thought there was a catch in it,” said the bear as the trap snapped shut.

Clarence “Chippy,” “Barrel-of-Fun” Chase probably has a better chance of a real job (with salary), than any other prospective June Graduates. Here’s the key to the worth of the man. He’s going into wrecking-crew work in a big way.

Old “Barrel’s” first job was recently completed in record time, down on Memorial Drive, when he and his crew completely demounted a fine old antique wrought iron piece. The valuable structure happened to be standing on the curb holding a sign that Chippy didn’t appreciate — so out it went. They say that the apparatus he uses burns grain alcohol for fuel, and any chemist will tell you that there are 30,000 Btu’s in any given pound. That’s a lot of heat.
Two well oiled nuts calling for a wench.

Did you see Carrol Wilson’s white gloves at the senior dance? He only wears them on one occasion — when he’s tight, which is by no means an annual occasion. It must have been terribly embarrassing to him when a young lady thought he was “waiting on” and asked for two dishes of ice cream.

The Dekes, in spite of their practice of imbibing, got sick on some stuff from a new bootlegger; they had consumed all the stock of their favorite purveyor.

“That’s my queue,” said the Chinese actor as the stage manager jerked him by the hair onto the stage.

Please permit an encore Rogers story. The architects are high pressure workers. They have big problem assignments that take one or several weeks, but in any event the problem must be done by the night of specified date, even if it is necessary to move heaven and earth.

One lad thought he would celebrate termination of the problem and start the weekend at the same time by getting gleefully tight before delivering his problem. Said problem was delivered successfully, but the architect subsequently wandered up to the fourth floor where he passed out like a lamp that Triple E Hudson accidentally short circuited. His two companions wearily followed him upstairs. Here, one of them, bright for a Course IV man, solved the problem of getting him down. The two of them lifted and deposited the limp architect in a large wicker basket “elevator” that the janitors use for lowering trash and odds and ends. Gingerly, they let the basket down between the four flights of staircases. Too bad a talking picture cameraman was not there at the time.

Here’s an event of last spring from Rogers. We just heard it, but then it takes about a year for a story to come over to this side of the river from the hibernating architects. One of the girl models was showing good form while figure posing when suddenly she became ill and faint and could scarce keep her feet. Some student rushed to get her a chair while it became Professor Brown’s job half to support and half to comfort her in the meanwhile. Having an incapacitated, unadorned beauty on one’s hands is no everyday situation — or at least it shouldn’t be. But Professor Brown summoned all his dignity and collectiveness and did not appear too awkward while trying to support the model in a way that would be least embarrassing to himself. The chair was soon placed and the girl slumped into it. While she was thus “off duty” no one thought to drape her — or at any rate no one did. If Professor Brown had only prepared for such emergencies, he could have served tea or passed around Murads.
TECH STUDENT FOUND
SWIMMING MUDDY RIVER —
IN DAZE.

Boston, Mass., Feb. 23 (P.A.) — Jackson Q. Winterbottom, a freshman at M. I. T. and scion of a socially prominent South Boston family, was found by Metropolitan police this morning, swimming briskly along Muddy River, clad in a new pair of tan oxfords and a flashy diamond stick-pin. After he pulled him out of the river with a pitchfork, Officer Jukes questioned the young engineer. "I studied for one hour last night," the boy whimpered, "and I guess I must have lost my mind. So I got dressed this morning and went out to look for it. Then I saw something in the river that looked familiar, so I dove in — and here I am." After listening to the pitiful story, Officer Jukes lent his cap to the land and carried him to the station where kind-hearted officers amused him by telling stories and feeding him peanuts. Later in the day a number of young men who said they were his brothers, called at the station and took Winterbottom to 28 The Fenway where they claimed he resided.

She may be a printer's daughter, but she's just my type.

Barber: "Haircut, Sir?"
Customer: "Naw; just lower my ears!"

Chief Spofford's a tricky old chap,
And I'd hate to get caught in his trap,
He may be an expert on ruptures
And failures of structures
But his book is just full of Cooper's $E_{so}$ loading.

"Come on over, Joe, and we'll dig up some women."

The Wellesley girls gave a dance for the benefit of the unemployed and didn't even invite the latter.
Inconsiderate, my dears.
That afternoon fire had raged, wiping out much of the business section, reducing the telephone building to smoking ruins. That night, Western Electric men were at work converting an old courthouse into a telephone exchange. The next day both local and long distance communication was restored in the stricken town...

Western Electric accepts many such challenges as this. Challenges that put to the test the engineering skill of its Installation Department, that call into play the resources and facilities of its nationwide system of distribution. Western Electric, backing up a far-flung line of communication, is only one phase of Western Electric's responsibility to the Bell System. Equally important is the purchasing of supplies and materials and the manufacture of telephones and telephone equipment.

"Good! They have to be good," said the chaperone as she climbed the fraternity house stairs to investigate the goings-on on the second floor.
— Octopus

As the young lover released his sweetheart from a close embrace he whispered in her ear, "What do you tell the other boys who come to see you? Do you make them think that you love them?"

"Yes, darling," she said, "you don’t mind, do you?"

"No," the lover peacefully remarked, "But it will be hell for them later, the poor, trusting fools."
— Skipper

Patient: "I’m in love with you and I don’t want to get well."

Nurse: "Never fear. The doctor is in love with me too, and he saw you kiss me this morning."
— Jack-o-Lantern
The Gamma Phis were wondering whether they should put a window seat in their sorority house or a new davenport. One of the "chi sig" boys with a mean reputation as a carpenter, suggested: "A window seat, by all means — you can't go wrong on a window seat!"

— Beanpot

Her: "Your hands remind me of a mystery play."
Him: "In what way are my hands like a mystery play?"
Her: "Creepy!"

— Purple Parrot

The radio is getting so popular in some of the fraternity houses that whenever someone asks what time it is, the answer comes back: "Half past Ben Bernie, quarter to Guy Lombardo."

— Punch Bowl

E. E.: "Say, John, I'm an electrician now."
Ag. E.: "No. That's news."
E. E.: "Last night when I was over at the Sigma Kappa house the fuse blew out, and I fixed it."
Ag. E.: "Sap — the world needs men like you."

— Green Gander

Drunk: "I don't see how our team played at all."
He: "Why is that?"
Drunk: "They say they were on the ball most of the time."

— Widow

Irate Father: "You're pretty close to my daughter, young man."
Suitor: "Yes, sir, we get along fine, don't we?"

— Widow

SMOOTH or SHAGGY?

Which shall it be? The good old grads are attacking the Eastern colleges and calling names. It all came about because their football teams didn't win. If you want to know why, read HENRY MOTON ROBINSON'S defense of the effete Princetonian in the March COLLEGE HUMOR.

Darrell Ware again writes a smooth story about LITTLE BLACK CLOUD; and the smoothest novelist of them all, DONALD HENDERSON CLARKE, has turned out a serial especially for us concerning "Beby Face," gangster's son and college man.

Other smooth stories complete an issue that is a tribute to the campus.
You Have Been Waiting for These

**BARGAINS**

**Hosiery**
A large selection, guaranteed PURE WOOL.
Also silk and wool. Sizes from 10 to 12.

A girl met an old flame who had turned her down, and decided to high-hat him. "Sorry," she murmured when the hostess introduced him to her, "I didn't get your name."
"I know you didn't," replied the ex-boy friend, "but that isn't your fault, you certainly tried hard enough."

— Lafayette Pyre

"So your father had an operation?"
"Yea, and we're suing the doctor."
"What for?"
"For opening my mother's male."

— Wautagar

Lover: "Drink to me only with thine eyes."
Petted: "What's the matter? Is the gin all gone."

— Froth
With moist quivering lips, and with eyes glistening like pools of tropical moonlight

Voo Doo's prom girl eagerly awaits the outstanding event of next month

OF
Voo Doo
First Financier: "I've just made a million berries."
Second Gambler: "Howzat?"
First Shot: "Installing speakeasies on corners where banks were."
— Green Goat

He: "Why did you jump out of the car last night and start running home?"
She: "I was being chaste."
— Green Gander

The difference between a good girl and a bad girl when they are not on dates is what we would like to know too. But then one can't tell the difference in cigarettes without first smoking them.
— Skipper

Mother (visiting son's room at college): "But, Son, what are all these empty bottles doing in this drawer?"
Quick-Minded Student: "Well, you see, Mother, I'm doing a little junk business on the side to make a little money."
— Carolinian

"What a man!" cried the old maid, gleefully, as the thug crawled through her window.
— Skipper

"She's a plenty good sport."
"Oh, well, my girl isn't so hot-looking either."
— Sour Owl
The

MASSACHUSETTS INSTITUTE
OF TECHNOLOGY

CAMBRIDGE

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY offers Courses in Engineering and Science, each of four years' duration, leading to the degree of Bachelor of Science in:

Aeronautical Engineering
Architectural Engineering
Biology and Public Health
Building Construction
Business and Engineering Administration
Chemical Engineering
Chemical Engineering Practice
Chemistry
Civil Engineering
Electrical Engineering
Electrochemical Engineering
General Science
General Engineering

Geology
Industrial Biology
Mathematics
Mechanical Engineering
Metallurgy
Military Engineering
Mining Engineering
Naval Architecture and Marine Engineering
Physics
Public Health Engineering
Sanitary Engineering
Ship Operation

The Course in Architecture is of five years' duration, and leads to the degree of Bachelor in Architecture. A five-year Coöperative Course in Electrical Engineering leading to the degree of Bachelor of Science and Master of Science is also offered.

Graduate Courses leading to the degrees of Master of Science, Master in Architecture, Doctor of Philosophy, Doctor of Science, and Doctor of Public Health are offered. The Courses leading to the degree of Master of Science include Coöperative Courses in Chemical Engineering Practice and Fuel and Gas Engineering.

The better high schools and other preparatory schools in the United States offer adequate preparation for the required entrance examinations given by the College Entrance Examination Board in June, or by the Institute in September.

Graduates of colleges or of scientific schools of collegiate grade, and in general all applicants presenting satisfactory certificates showing work done at another college corresponding approximately to at least one year's work at the Institute, are admitted to such advanced standing as is warranted by their previous training, and are given credit for our required subjects, including the entrance requirements, so far as they have been satisfactorily completed.

The Summer Session, extending from June to September, includes most of the subjects given during the academic year.

Any of the following publications will be sent free upon request

SUMMER SESSION BULLETIN

CORRESPONDENCE SHOULD BE ADDRESSED TO THE DIRECTOR OF ADMISSIONS
A city girl was visiting in the country. She became rather friendly with a young farmer. One evening as they were strolling in the fields they happened across a cow and a calf rubbing noses in the accepted fashion. "That sight makes me want to do the same," said the farmer.

"Well, go ahead," said the girl encouragingly, "it's your cow."

When there’s an important selling job to be done, after hours, on some moonlit roadway, or shadowy campus drive, nothing gets you off to a better start than one of those new sport roadsters being built by Chevrolet.

The front seat has plenty of room for the great American blonde, *youself*, and several tons of raccoon coat—as well as a second blonde, if you believe in numbers. Then, if some offensive male decides that he’ll go along too, there’s a pleasantly remote rumble seat, where he can be placed in cold storage indefinitely.

In addition—with Syncro-Mesh and Free Wheeling, you can let the car practically drive itself. Chevrolet’s six-cylinder motor runs so noiselessly that you can put across your personality without using a gold-lined megaphone.

And just as the Chevrolet Six never cramps your technique, it never cramps the allowance, either. Gas, oil, and servicings can be paid for, with plenty of change left over for cover charges and refreshments. And as for first-cost—well, bless your soul—just snap on the bifocals and take a look to the right!

**NEW CHEVROLET SIX**

*The Great-American Value for 1932*
There's none so good as LUCKIES

SHE'S MISCHIEVOUS, RESTLESS
AND 20, WEIGHS 112 POUNDS.
Miss Harlow has smoked Luckies
for two years... not one cent was
paid for her signed statement. She
rose to stardom in "Hell's Angels"
... and if you've seen her new
COLUMBIA PICTURE, "THREE
WISE GIRLS," you'll understand
why thousands of girls are trying to
match her riotous platinum blonde
locks. We appreciate all she writes
of Luckies, and so we say, "Thanks,
Jean Harlow."

I've tried all cigarettes and there's none so good as
LUCKIES. And incidentally I'm careful in my choice
of cigarettes. I have to be because of my throat. Put
me down as one who always reaches for a LUCKY.
It's a real delight to find a Cellophane wrapper that
opens without an ice pick."

"It's toasted"
