Installing Pokerstars for MIT 15.S50

Quick Instructions:

1. Download the Installer at http://web.mit.edu/willma/www/DotComInstall.zip (Windows) or http://web.mit.edu/willma/www/MacDotComInstall.pkg.zip (Mac).
2. IMPORTANT Do not use the Installer you download from pokerstars.net! That is the play-money-only version which lacks features. Even though we aren't allowed to play for real money in the United States, we want to install the real-money version.
3. Install and register an account on Pokerstars.
4. IMPORTANT Make your Username your real name! Otherwise it's a nightmare for me to grade the class. Also, end it with _MIT to give our team unity! Eg. JohnDoe_MIT
5. To sign up for the MIT private league, click "Home Games" then "Join a Poker Club". Club ID is 557832; Invitation Code is ENGINEERS. You will not get in right away, but I will try to approve everyone quickly.
6. Playing a hand should be easy on the Pokerstars interface; but you can watch the second Youtube video below if you need help.
7. For fun, you can change your picture to a picture of yourself, so that people can recognize you in class!

Youtube References:

- Installation: http://www.youtube.com/watch?v=jt6VKzo5WD4 (**NOTE**: I use the pokerstars.net Installer in this video, which is wrong, but everything else is the same.)
