

Master of Engineering in Manufacturing

Supplemental Application

In addition to submitting the MIT Graduate School application, all students applying for the M. Eng. in Manufacturing must submit the following essays:

Essay 1 – Manufacturing Goals and Experience

The M.Eng. degree is intended to create technical professionals who will lead in the advancement of manufacturing industries. Please describe how this objective fits with your personal career goals. Be sure to cite any experience you have had that is relevant.

Essay2 – Leadership Experience

A key factor of success in advancing the field of manufacturing is leadership and innovation. Please describe your concept of leadership and give examples. Also, include any relevant leadership experience you have had, whether in school, in the community or in industry.

Please submit this supplement with your application or mail it separately to:
