Red Team Code of Ethics

Team Dynamics
- **Open communication.** Everyone’s voice should be heard and no one should feel too uncomfortable to speak up during a lab meeting.
- **Have a transparent decision-making process.** The criteria and topic of each vote should be clear. Decisions concerning the team’s product will be made by a majority vote of those present, with at least a quorum of the team.
- **Care for another.** Look after each other’s well-being and check in with teammates.
- **Make 2.009 enjoyable.** Strive for everyone to get the most out of the experience.
- **Work collaboratively.** Be receptive to constructive feedback and be engaged during meetings.
- **Seek second opinions.** Ask for feedback from teammates and instructors if unsure.

Work Habits
- **Be proactive.** If there are known future conflicts, tell teammates so members can arrange a good team schedule.
- **Be timely.** Arrive on time and notify each other when running late.
- **Be respectful of your teammates’ time.** Aim for efficient meetings. No electronics unless actively taking notes or researching.
- **Be respectful of the workspace.** Keep the lab space clean and the tools organized!
- **Be responsive.** Check Slack at least once a day.
- **Be informative.** Communicate sub team's progress and challenges.
- **Be flexible.** Expect weekly outside meetings and emergency meetings if issues arise.
- **Be good engineers.** Be responsible designers and engineers committed to creating meaningful products for society, held accountable by 2.009, MIT, and our users.

Team First
- Everyone has an opinion that deserves to be heard. However, once a decision has been made, accept that the team’s decision was made in good faith, and put the team’s best interest above personal biases.

Budget
- Use project funds reasonably and in line with the 2.009 rules.
- Make sure the team is on board with large or unusual purchases.
- Keep financial officers up to date about all purchases.
- When borrowing items from lab, be respectful of what is borrowed and return items in the same conditions.

Potential Conflicts
- If something about the team is an issue, let relevant team members (or the yodas) know sooner rather than later.
- Strive to resolve conflicts that arise.
- Do not resort to passive aggressive actions or keep things to one’s self.
