Module Review assignments are an important part of this course; they are worth 30% of your total grade. The course instructors expect your honest feedback on these modules, as they will be revised for future use by 3.091 students. Modules are found at http://libraries.mit.edu/tutorials/classes/3.091/index.html.

Each time you review a module, click the ‘Feedback’ link, or log-in to the 3.093 wiki at: https://confab.mit.edu/confluence/display/3093FA06/Tutorials+Feedback

For each Module Review, please include the following elements, or answer these questions:

- Describe what you learned from each module. Tell us if you learned new information, or if you already knew that content.
- Did the module meet your expectations of what you needed to learn? Why or why not?
- Relate your preference for how you would ideally like to learn the content presented in the module: via an online module, via a lecture, or via another method (e.g. read it on a web page).
- Describe how you liked the delivery. Did the module move too slowly, too quickly? Were the graphics interesting? Was the module interactive enough?
- Provide feedback on the quiz at the end of the module. Were the questions challenging enough? Were there too many or too few questions?
- Give any other feedback you have about the content, presentation, or delivery of the modules.
- For the second time you review this module, were there things discussed in class that were not included in the module? Do you think it should be included in the module? In what way?
