Editorial: Imagination

• Imagination helps troubleshoot problems.

• Imagination is like alcohol: It should be used with moderation, and it impairs one’s ability to operate machinery and vehicles. It tastes good too.

• Corollary: Imagination can be exercised anytime, but especially when asleep. Sleep well.

• Imagination is about finding what could go wrong. What will go wrong is hard to find.

• Better imagine now than blame later. Better imagine now than being blamed later. Imagination is the antidote against trouble, blame, or having to blame the guy next door.

• Relying on creativity and imagination is much, much better than relying on deception and lies.
