R/3 Enterprise – information paths
After a successful Ramp-Up, since January 2003 R/3 Enterprise is

- in unrestricted shipment
- available to all customers

3 phases took place during the Ramp-Up.
(Started: July, September and November 2002)

>220 customers were selected for Ramp-Up (worldwide)

~ 50% of the selected customers use new functionality in the SAP R/3 Enterprise Extensions

8 active pilots on Unicode

26 customer have gone live
R/3 Enterprise – Ramp-Up status

Ramp-Up process experience
- Customers felt comfortable with the Ramp-Up support
- Compared to previous shipments, there was considerable benefit in the early training of SAP consultants and partners

R/3 Enterprise product experience
- Customers have really experienced that the upgrade technology is smoother than ever before
- Customers starting from a R/3 release higher than 4.0B benefit from technical enhancements like the SAP Modification Assistant (available since 4.5B)
- During the Ramp-Up phase, no major issues were reported by customers

The standard maintenance schedule for the IS-PS solution follows the schedule of the basis release it is built on:

- Like customers, IS-PS development teams depend on the maintenance activities of core teams.
- Thus, extensions to the maintenance decided by SAP also extend the maintenance of IS-PS.
- The IBU Public Sector does not currently offer the option of a fee-based extension of maintenance. The overlap of available releases is assumed to be large enough to plan and test upgrades.
Summary

- Maintenance for 3.1I, 4.0B, 4.5B and 4.6B was extended until the end of 2003 without any additional fees
- Extension of maintenance for 3.1I, 4.0B, 4.5B and 4.6B beyond Dec.31st, 2003 is possible for a 2% additional fee
- IS-PS versions based on 3.1I, 4.0B, 4.5B and 4.6B are not covered by the offer of a fee-based extension
- Maintenance of 4.6C was extended until March 31st, 2006, with no extra fee
