MIT Greens

First Meeting of the School Year
Wednesday · 6PM · 66-148

OUT OF IRAQ NOW! BRING THE TROOPS HOME
The unjust, illegal and immoral war in Iraq must be brought to an end now. Greens call for an immediate withdrawal of US military from Iraq.

HEALTH CARE FOR ALL
Every person in the United States must have complete and timely access to health care and medicine. Greens call for a single-payer, universal, health care program.

GOVERNMENT OF, BY, AND FOR THE PEOPLE
No corporation has the right to claim human status before the law. Greens stand for public financing of campaigns, Instant Runoff Voting, Proportional Representation, DC Statehood, and the abolition of the Electoral College.

ENERGY INDEPENDENCE
Greens demand energy independence and a rapid transition to clean, renewable energy sources. We call for more public transit, better fuel efficiency for cars, and political leadership that isn't beholden to the energy industry.

JOBS AND A LIVING WAGE
No one should work full time for less than it costs to survive, and all workers should have the right to collectively bargain. Greens embrace greater support for small businesses and labor and call for a living wage to replace the poverty-level minimum wage.
