Ready to use!

analyze the platen lift assembly

don't look yet!

no sharing. work independently

do as much as you can!

A top-down view of a white plate filled with spaghetti. The word "debugging" is written in a bold, dark, sans-serif font across the center of the spaghetti.

debugging

if it's **not tested** it **doesn't work**

if it's **not tested** it **doesn't work**

debugging

debugging

when something goes wrong

stop, observe, and think

don't jump to conclusions

document the circumstances

debugging

document the circumstances

who observed the problem?

what has been changed?

describe the faulty behavior

what, when, where

debugging

form symptom statements

use an object-defect format

what, when, where

form symptom statements

use an object-defect format

the **product** made a **popping sound**,
emitted a **flash of light** and **smoke**

form symptom statements

use an object-defect format

+ the **product** made a **popping sound**,
emitted a **flash of light** and **smoke**

it shorted out

debugging

build a team to debug

system integrators may facilitate
transfer and explain your notes

debugging

make a plan!

are more experiments needed?

can the issue be isolated?

what else needs to happen?

debugging

execute the plan!

generate hypotheses

order by likelihood

start with simple, least invasive

debugging

design and implement

test with mockups

carefully verify

debugging

inform!

summarize the fault (**object—defect**)

the **cause(s)**, and the **solution(s)**

debugging

STILL ONE SMALL THING THAT I FEEL THE NEED TO SAY...
