

## 2.166 Probabilistic Robotics—Research Assignment 4

Massachusetts Institute of Technology

Issued: Monday, November 3rd, 2008

### **In-class presentation**

For research assignment 4, each student is requested to give an in-class presentation on a paper related to their final project. The paper you select needs to be approved in advance, and we will email it to the class and/or post it on the web. The presentation should be expected to be about 25-30 minutes, with questions. Please email your presentation materials to [jleonard@mit.edu](mailto:jleonard@mit.edu) before class. You will be graded on how well you prepare for your seminar, and the depth of technical understanding that you convey. In addition, we try to will reward students that generate an interesting discussion.

Your presentation materials are due on the day you give your talk (if you can send at least an hour before class, I'll print them and distribute to the class).
