

Design Project Errata

6.033 2017

Last update: 4/7/2017

4/7/2017

- Updated the DP spec to reflect the new requirements (Section 2.3, Section 3.4).

3/29/2017

- Fixed a few minor typos (Sections 1, 2.2.2, 3.2.2).
- Fixed the address examples (Section 2.4.2).

3/9/2017

- Added a description about how using the radio network to transmit voice data would work (Section 2.4.3).

3/7/2017

- Clarified that Charlie Cards/tickets include information about whether the passenger is transferring (Section 2.2.3)
- Added a description of the alternate stop dataset (Section 2.3.1).

2/28/2017

- Clarified that beam sensors sometimes generate incorrect data, not necessarily always false positives (Section 2.2.2).
- Updated example network addresses to be 48 bits, as specified (Section 2.4.2).
