Abstract

Contents

1 The Makefile

3

1 The Makefile

This Makefile checks to make sure that the command line scripts exist in the bin subdirectory. We depend on the “document” script to exist and prevent duplicate copying.

— * —

```
OUT=${MNT}/${SYS}/bin
OUT1=${MNT}/${SYS}/lib
```

```
all: announce ${OUT}/document ${OUT1}/SPAEDIT
```

```
announce:
```

```
@ echo =====
@ echo src/scripts BUILDING SCRIPTS
@ echo =====
```

```
${OUT}/document:
```

```
@echo 1 making ${SRC}/scripts
@cp -pr * ${OUT}
@mkdir -p ${OUT}/tex
@rm -f ${OUT}/Makefile*
@rm -f ${OUT}/SPAEDIT
```

```
${OUT1}/SPAEDIT:
```

```
@echo 2 making ${OUT1}/SPAEDIT from ${SRC}/scripts/SPAEDIT
@mkdir -p ${OUT1}
@cp ${SRC}/scripts/SPAEDIT ${OUT1}/SPAEDIT
```

```
clean:
```

```
@echo 2 cleaning ${SRC}/scripts
```
