“Flaws of Averages” Homework

1. What did you find most interesting in this video lesson?

2. What did you find confusing in this video lesson?

3. Come up with two or three examples similar to Dan’s experience with the river, where an average doesn’t provide an accurate description of the situation.

4. Come up with one or two examples similar to Rhonda’s experience with the cookies, where what’s being averaged doesn’t have a straight line or “linear” relationship.

5. Come up with two or three examples similar to the experience in Rhonda’s dance class, where the calculation of the average may depend on people viewing the situation from different perspectives.
