

JOSHUA BRETT TENENBAUM

Curriculum Vitae

Brain and Cognitive Sciences
77 Massachusetts Ave, 46-4015
Cambridge, MA 02139

617-452-2010
jbt@mit.edu

Degrees:

Ph.D., Brain and Cognitive Sciences, Massachusetts Institute of Technology, 1999, Thesis Advisor: Whitman Richards.

B.S. *magna cum laude*, Physics, Yale University, 1993

Employment:

Professor of Computational Cognitive Science, MIT, 2011-present
Associate Professor of Computational Cognitive Science, MIT, 2007-2011
Paul E. Newton Career Development Professor, MIT, 2004-2008
Principal Investigator, Computer Science and Artificial Intelligence Laboratory (CSAIL), MIT, 2003-present
Assistant Professor of Computational Cognitive Science, MIT, 2002-2007
Assistant Professor, Computer Science (by courtesy), Stanford University, 2000-2002
Assistant Professor, Psychology, Stanford University, 1999-2002
Postdoctoral Associate, Artificial Intelligence Laboratory, Massachusetts Institute of Technology, 1999

External Positions Held:

Member of DARPA ISAT (Information Science and Technology) Study Group, 2006-2009
Associate Editor, *Cognitive Science*, 2004-2008.

Honors:

Outstanding Paper Award, IEEE Conference on Computer Vision and Pattern Recognition, 1997, for “Learning bilinear models for two-factor problems in vision”, with William T. Freeman.
Distinguished Visiting Junior Scholar, Peter Wall Institute for Advanced Studies, University of British Columbia, July 2000.
Honorable Mention, Best Student Paper Award, Neural Information Processing Systems conference, 2002, for “Bayesian models of inductive generalization”, by Neville Sanjana (student advisee).
Best Student Paper Award, Neural Information Processing Systems conference [Natural Systems category], 2003, for “From algorithmic to subjective randomness”, by Thomas L. Griffiths (student advisee).
Best Student Paper Award, Neural Information Processing Systems conference [Synthetic Systems category], 2003, for “Hierarchical topic models and the nested Chinese restaurant process”, by David Blei, Thomas L. Griffiths (student advisee), and Michael I. Jordan.
Honorable mention, Marr Prize for Best Student Paper, Twenty-Sixth Annual Conference of the Cognitive Science Society, 2004, for “Using physical theories to infer hidden causal structure”, by Tom Griffiths (student advisee) and Liz Bonawitz.
New Investigator Award, Society for Mathematical Psychology, 2005.
Distinguished Lecturer, University of Edinburgh, Division of Informatics, 2006.

Honorable Mention, Outstanding Student Paper Award, Neural Information Processing Systems conference, 2006, for “Combining causal and similarity-based reasoning”, by Charles Kemp (student advisee), Patrick Shafto, and Allison Berke.

Early Investigator Award, Society of Experimental Psychologists, 2007.

Fellow, Society of Experimental Psychologists, 2007.

Distinguished Lecturer, University of British Columbia, Institute for Computing, Information, and Cognitive Systems, 2007.

Distinguished Lecturer, University of California, San Diego, Department of Cognitive Science, 2007.

Computational Modeling Prize for Best Paper on Perception and Action, Twenty-Ninth Annual Conference of the Cognitive Science Society, 2007, for “Learning grounded causal models”, with Noah Goodman and Vikash Mansinghka.

Computational Modeling Prize for Best Paper on Higher-Level Cognition, Twenty-Ninth Annual Conference of the Cognitive Science Society, 2007, for “Learning causal schemata”, with Charles Kemp and Noah Goodman.

Distinguished Scientific Award for Early Career Contribution to Psychology (in the area of cognition and human learning), American Psychological Association, 2008.

Wasow Visiting Scholar, Symbolic Systems Program, Stanford University, October 2010.

Posner Invited Lecture, Neural Information Processing Systems Conference, December 2010.

Troland Research Award, National Academy of Sciences, 2011.

Distinguished Lecturer, University of Toronto, Department of Computer Science, February 2011.

Computational Modeling Prize for Best Paper on Language, Thirty-Third Annual Conference of the Cognitive Science Society, 2011, for “Productivity and reuse in language”, with Timothy O’Donnell, Jesse Snedeker, and Noah D. Goodman.

Best Poster Award, International Joint Conference on Artificial Intelligence (IJCAI) 2011, for “Bayesian policy search with policy priors”, with David Wingate, Noah D. Goodman, Daniel M. Roy, and Leslie P. Kaelbling.

D. O. Hebb Lecturer, McGill University, February 2012.

Pinkel Endowed Lecture in Cognitive Science, University of Pennsylvania, March 2012.

Best Student Paper Award, UAI (Uncertainty in Artificial Intelligence) 2012, for “Exploiting compositionality to explore a large space of model structures”, with Roger Grosse, Ruslan Salakhutdinov, and William T. Freeman.

Best Paper (combining experiment with computational model), ICDL (International Conference on Learning and Development) 2012, for “Sticking to the Evidence? A computational and behavioral case study of micro-theory change in the domain of magnetism”, with Elizabeth Bonawitz, Tomer Ullman, and Alison Gopnik.

Roger N. Shepard Visiting Lecturer in Cognitive Science, University of Arizona, November 2012.

Elected Fellow of the Cognitive Science Society, 2013.

MIT Department of Brain and Cognitive Sciences Award for Excellence in Undergraduate Teaching, 2014.

MIT Department of Brain and Cognitive Sciences Award for Excellence in Graduate Mentoring, 2015.

Best Paper Honorable Mention, CVPR (Computer Vision and Pattern Recognition) 2015, for “Picture: A probabilistic programming language for scene perception”, with Tejas Kulkarni, Pushmeet Kohli, and Vikash Mansinghka.

Computational Modeling Prize for Best Paper on Applied Cognition, Thirty-Seventh Annual Conference of the Cognitive Science Society, 2015, for “Emergent collective sensing in human groups”, with Peter Krafft, Robert Hawkins, Sandy Pentland, and Noah Goodman.

Howard Crosby Warren Medal, Society of Experimental Psychologists, April 2016.

19th Annual Norman Anderson Distinguished Lecturer, University of California, San Diego, 2016.

Frijda Honorary Chair, University of Amsterdam, June 2016.

Bayesian Program Learning research featured as one of *Scientific American*’s “10 World Changing Ideas” of 2016.

William James Award for Best Contributed Paper by a Graduate Student at the Annual Meeting of the Society for Psychology and Philosophy, 2017, for “Learning a Commonsense Moral Theory” with Max Kleiman-Weiner (student advisee and first author) and Rebecca Saxe. Best Paper, Third Multidisciplinary Conference on Reinforcement Learning and Decision-Making (RLDM 2017), for “Learning to Cooperate and Compete” with Max Kleiman-Weiner, Mark Ho, Joseph Austerweil, and Michael Littman.

Undergraduate and Masters Research Supervised:

Pearson, Mark, 2000..
Sanjana, Neville, 2000-2001.
Ramos, Khara, 2000-2001.
Bell, Matt, 2000-2001.
Berger, Eric, 2000-2001.
D’India, John Paul 2001.
Blum, Ben, 2001-2002.
Bryan, Ronnie, 2002-2004.
Chen, Anne, 2002-2004.
Dwyer, Brigid, 2003-2004.
Niziolek, Carrie, 2003-2005.
Jarudi, Izzat, 2004.
Marzloff, George, 2004.
Luther, Suzanne, 2004.
Yu, Ben, 2004.
Berke, Allison, 2005.
Chan, Gabe, 2006.
Shabir, Laila, 2006.
Kitch, Lacey, 2006.
Gordon, Matt, 2006.
Antwi-Boampong, Sadik, 2006.
Brenman, Stephanie, 2006.
Tobenkin, Mark, 2006.
Jotwani, Pooja, 2006.
Schapiro, Anna, 2006.
Johnson, Lindsay, 2008.
Gross, Jason, 2010.
Gramling, Hannah, 2009.
Steinhardt, Jacob, 2010.
Hamrick, Jessica, 2010-2012.
Wu, Jeffrey, 2011-2012.
Pratiksha Thaker, 2013-2014.
Mark Velednitsky, 2013-2014.
Sun, Felix, 2014-2015.
Michael Chang, 2015-2017.
Will Whitney, 2015-2016.
Michael Janner, 2015-present.
Alejandro Vientos, 2015-present.
Joey Velez-Ginorio 2016-present.
Chengkai Zhang, 2016-present.

Ph.D. Theses Supervised:

Griffiths, Thomas L. (Stanford PhD), Causes, coincidences and theories, 2004. Professor of Psychology and Cognitive Science, University of California, Berkeley.

Saxe, Rebecca, What functional magnetic resonance imaging can tell us about theory of mind (secondary advisor; primary advisor Nancy Kanwisher), 2003, Professor of Cognitive Neuroscience, MIT.

Krynski, Tevye R. (NSF Fellowship), The role of temporal factors and prior knowledge in causal learning and judgment, 2006, Currently at A9.com.

Kemp, Charles, (Albert Memorial Fellowship, MIT), The acquisition of inductive constraints, 2007, Associate Professor of Psychology, Carnegie Mellon University.

Perfors, Amy (NSF Fellowship, NDSEG Fellowship), Learnability, representation, and language: a Bayesian approach, 2008, Senior Lecturer in Psychology, University of Adelaide.

Schmidt, Lauren (NSF Fellowship), Meaning and compositionality as statistical induction of categories and constraints, 2009, Founder and chief scientist, HeadLamp Research.

Bonawitz, Elizabeth Baraff, The rational child: theories and evidence in [prediction, exploration and explanation (secondary advisor; primary advisor Laura Schulz), 2009, Associate Professor of Psychology, Rutgers University Newark.

Mansinghka, Vikash (NSF Fellowship), Natively probabilistic computation, 2009. Research Scientist, MIT.

Frank, Michael C. (NSF Fellowship, Javits Fellowship), Early word learning through communicative inference (secondary advisor; primary advisor Ted Gibson), 2010, Associate Professor of Psychology, Stanford University.

Vul, Ed (NSF Fellowship), Sampling in human cognition (secondary advisor; primary advisor Nancy Kanwisher), 2010, Associate Professor of Psychology, UC San Diego.

Roy, Daniel (EECS PhD, NSF Fellowship), Nonparametric Bayesian models and probabilistic programming languages. (Secondary advisor; primary advisor Leslie Kaelbling), 2011, Assistant Professor, Department of Computer and Mathematical Sciences, University of Toronto Scarborough, Department of Statistical Sciences, University of Toronto.

O'Donnell, Tim (Harvard PhD, Probabilistic models for language reuse and computation (Secondary advisor; primary advisor is Jesse Snedeker), 2011. Assistant Professor of Linguistics, McGill University.

Piantadosi, Steve (NSF Fellowship). Models of compositional language acquisition (Secondary advisor; primary advisor is Ted Gibson), 2011, Assistant Professor, Brain and Cognitive Sciences, University of Rochester.

Baker, Chris, (NSF Fellowship, DHS Fellowship), Computational models of theory of mind, 2012, Postdoctoral Fellow, MIT.

Ullman, Tomer (NSF Fellowship), On the nature and origin of intuitive theories: Learning, physics and psychology, 2015. Postdoctoral Fellow, Center for Brains, Minds and Machines, MIT/Harvard.

McCoy, John, (Fulbright International Science Fellowship). Models for collective prediction (Secondary advisor; primary advisor is Drazen Prelec), in progress.

Lake, Brenden (NSF Fellowship), Towards human-like concept learning in a machine, 2014. As of Fall 2017, Assistant Professor, Department of Psychology and Center for Data Science, NYU.

Grosse, Roger (EECS PhD, NDSEG Fellowship). Unsupervised learning of hierarchical representations (co-advised with William Freeman), 2014. Assistant Professor of Computer Science, University of Toronto.

Stuhlmuller, Andreas (ONR grant). Adaptive inference for probabilistic programs, 2015. Founder, Ought.

Kulkarni, Tejas. (Siemens Graduate Fellowship), Generative models and probabilistic programming languages for visual scene understanding, 2016. Research Scientist, Google DeepMind.

Jara-Ettinger, Julian (CBMM, Simons Center Grant), The inner life of goals: costs, rewards, and commonsense psychology, 2017. Assistant Professor of Psychology, Yale University.

Reshef, David (HST MD/PhD, NSF Fellowship), 2017, Algorithms for theory learning (co-advised with Tommi Jaakkola).

Malmaud, Jon (NSF Fellowship). Probabilistic models of value-based decision making.

Siegel, Max (BCS Training Grant). Probabilistic modeling for vision and physical scene understanding.

Krafft, Peter (EECS PhD, NSF Fellowship), Models of social epistemology (co-advised with Sandy Pentland). As of Fall 2017, Postdoctoral researcher, UC Berkeley.

Kleiman-Weiner, Max (Hertz Fellowship), Models and experiments on human social interaction.

Rule, Josh (NSF Fellowship). Learning systems of concepts in computation and cognitive development.

Allen, Kelsey (NSERC Fellowship). Integrating generative and discriminative models for perception and social cognition.

Wu, Jiajun (Adobe Fellowship, Facebook Fellowship). Physically based and infant-inspired scene understanding in computer vision (co-advised with Bill Freeman).

Ellis, Kevin (NSF Fellowship). Program induction for machine learning and artificial intelligence (co-advised with Armando Solar-Lezama).

Postdoctoral Research Supervised

Steyvers, Mark, 2000-2002, Professor at UC Irvine, Department of Cognitive Sciences.

de Silva, Vin, 2000-2004, Associate Professor at Pomona College, Department of Mathematics.

Stromsten, Sean, 2003-2004, Member of Research Staff at BAE Systems Advanced Information Technologies.

Koerding, Konrad, 2004-2006, Associate Professor at Northwestern University, Rehabilitation Institute and Department of Physiology.

Shafto, Pat, 2004-2007, Professor of Data Science, Department of Math and Computer Science, Rutgers University (Newark).

Goodman, Noah, 2005-2010, Associate Professor of Psychology and (by courtesy) Computer Science and Linguistics, Stanford University.

Jakel, Frank, 2008-2010, Lecturer, University of Osnabruck.

Savova, Virginia, 2007-2010, Postdoctoral scholar, Broad Institute.

Wingate, David, 2008-2012, Professor of Computer Science, Brigham Young University.

Battaglia, Peter, 2008-2013, Research Scientist, DeepMind/Google.

Salakhutdinov, Ruslan, 2009-2011, Professor of Computer Science, Carnegie Mellon University.

Heller, Katherine, 2011-2012, Assistant Professor of Statistics, Duke University.

Gao, Tao, 2011-2015. Research scientist at General Electric Global Research.

Hartshorne, Josh, 2012-2016. Assistant Professor of Psychology, Boston College.

Gershman, Samuel, 2012-2015. Assistant Professor of Psychology, Harvard University.

O'Donnell, Timothy 2012-2016. Assistant Professor of Linguistics, McGill University.

Gerstenberg, Tobi, 2012-present. As of Fall 2018, Assistant Professor of Psychology, Stanford University.

Yildirim, Ilker 2014-present.

Zhao, Yibiao, 2015-2017, Founder and CEO, iSEE.

Kevin Smith, 2015-present.

Sydney Levine, 2017-present.

Teaching Experience

Stanford University
Psychology 205, Foundations of Cognition, Fall 1999, 2000, 2001
Psychology 224, Learning and Inference in Humans and Machines, Spring 2000, 2001

MIT
9.012, The Brain and Cognitive Sciences II, Spring 2002, 2003, 2004, 2005.
9.69/9.690, Foundations of Cognition, Spring 2003

9.52/9.914, Computational Models of Concepts and Theories, Fall 2003
9.66/9.660/6.804, Computational Cognitive Science, Fall 2004-7, 2009, 2011-present.
9.012, Cognitive Science, Spring 2006-present.
9.916, 9.914 Computational Models in Cognitive Development, Fall 2008, Spring 2013.

Service

Open Mind editorial board, 2016-present.
Department of Brain and Cognitive Sciences, Computational Search sub-head, 2015.
Department of Brain and Cognitive Sciences, BCS Council, 2013-present.
Rumelhart Prize Selection Committee, 2013-present.
Decision editorial board, 2013-present.
MIT Ad hoc Committee on Statistics, 2011-2012.
Department of Brain and Cognitive Sciences, Cognitive Search Committee, 2003-present.
McGovern Institute for Brain Research, Faculty Search Committee, 2008-2013.
Department of Brain and Cognitive Sciences, Department Head Search Committee, 2008, 2011.
Department of Brain and Cognitive Sciences, Department representative at MIT Commencement PhD Hooding, 2009.
Organizer and instructor for 9.9X, From Vision to Cognition, IAP 2004.
Organizer and instructor for 9.94, The Cognitive Science of Intuitive Theories, IAP 2006.
Co-instructor for 9.93, Marathon Moral Reasoning Laboratory, IAP 2007.
Co-organizer, MIT Intelligence Initiative, 2008-present.
Convener, MIT IdeasLab, “The Nature of Intelligence”, World Economic Forum, 2010.
Program Committee member, Annual Conference of the Cognitive Science Society, 2002-2010.
Program Committee member, Neural Information Processing Systems Conference, 2000-2002.
Chair of Cognitive Science section.
Tutorials Chair, Neural Information Processing Systems Conference, 2005.
Program Committee member, National Academy of Sciences Sackler Colloquium on Mapping Knowledge Domains, May 2003.
Program Committee member, Workshop on “Statistical Network Analysis: Models, Issues, and New Directions”, June 2006.
Cognitive Science editorial board 2001-2008.
Journal reviewing: *Behavioral and Brain Sciences*, *BioMedCentral Bioinformatics*, *Child Development*, *Cognition*, *Cognitive Science*, *Communications of the ACM*, *IEEE Transactions on Pattern Analysis and Machine Intelligence*, *IEEE Transactions on Neural Networks*, *Journal of Classification*, *Journal of Experimental Psychology: General*, *Journal of Machine Learning Research*, *Journal of Mathematical Imaging and Vision*, *Language Learning and Development*, *Machine Learning*, *Memory and Cognition*, *Nature*, *Neural Computation*, *Proceedings of the National Academy of Sciences*, *Psychological Review*, *Psychological Science*, *Psychonomic Bulletin and Review*, *Science*, *Trends in Cognitive Sciences*.
Conference reviewing: IEEE Conference on Computer Vision and Pattern Recognition (CVPR), National Conference on Artificial Intelligence (AAAI), Neural Information Processing Systems (NIPS), Annual Conference of the Cognitive Science Society (COGSCI).
Grant reviewing: National Science Foundation (NSF), Natural Sciences and Engineering Research Council of Canada (NSERC), Social Science and Humanities Research Council of Canada (SSHRC), Human Frontiers Science Program (HFSP).
Book proposals reviewed for: MIT Press, CRC Press, Oxford University Press.

Harvard University, Applied Statistics Workshop, October 2005.

International workshop on Bayesian Cognition, College de France, Paris, France, January 2006.

University of Arizona, Cognitive Science Colloquium, March 2006.

University of Southern California/Information Sciences Institute, "Young Stars" Colloquium Series, March 2006.

Harvard University, Computer Science Colloquium, May 2006.

University of Rochester, Center for Visual Science symposium on "Statistical learning and brain plasticity", May 2006.

New York University Conference on Causation, Villa La Pietra, Florence, Italy, June 2006.

University of Edinburgh, Distinguished Lecture in Informatics, June 2006.

Rational Models of Cognition, Invited Conference Address, University College London, June 2006.

DARPA ISAT/IXO Workshop on "Adaptive and Interactive Representations", Cambridge, MA, July 2006.

Society for Mathematical Psychology, Plenary address, July 2006.

NSF Workshop on "Mind and Brain: Strategies and Directions for Future Research", Arlington, VA, July 2006.

Symposium on "Exploring Mind and World" (in honor of Roger Shepard), Annual Conference of the Cognitive Science Society, July 2006.

Symposium on "Building and Evaluating Models of Human-Level Intelligence", Annual Conference of the Cognitive Science Society, July 2006.

Invited Tutorial, Neural Information Processing Systems Conference, Vancouver, B.C., Canada, December 2006.

Carnegie Mellon University, School of Computer Science, Intelligence Seminar, February 2007.

Air Force Office of Scientific Research Workshop on "Robust Decision Making", February 2007.

NSF Workshop on Learning, Development and Plasticity, Arlington, VA, March 2007.

University of British Columbia, Distinguished Lecture, Institute for Computing, Information, and Cognitive Systems, March 2007.

University of Washington, Center for Statistics in the Social Sciences (CSSS) seminar, March 2007.

University of California, San Diego, Distinguished Lecture, Department of Cognitive Science, April 2007.

Origins of Causal Cognition, Workshop sponsored by the University of Leuven, Belgium, May 2007.

Max Plank Institute for Biological Cybernetics, Colloquium, May 2007.

International Conference on Machine Learning, invited plenary address, June 2007.

Symposium on "Cognitive Decision Theory: Developing Models of Real-World Decision Behavior", Annual Conference of the Cognitive Science Society, July 2007.

Workshop on "Cases, rules and probabilities", Cowles Institute, Yale University, September 2007.

Workshop on "Where does syntax come from?", Cambridge, MA, October 2007.

Symposium on "Generalization in Language Learning", Society for Language Development, Boston, MA, November 2007.

Workshop on “Bridging the developmental divide: Sentence processing meets word and grammar learning”, Institute for Research in Cognitive Science, University of Pennsylvania, November 2007.

Columbia University, Department of Psychology, Colloquium, February 2008.

CUNY conference on sentence processing, invited address, March 2008.

Rockefeller University, Center for Studies in Physics and Biology seminar, April 2008.

University of Wisconsin, Cognitive Science cluster, Colloquium, May 2008.

Workshop on “Connecting probabilistic models of cognition and neural networks”, Berkeley, CA, August 2008.

Tufts University, Department of Computer Science Colloquium, September 2008.

Brown University, Department of Cognitive and Linguistic Sciences, Colloquium, November 2008.

Yale University, Cognitive Science seminar series, December 2008.

COSYNE (Computational and Systems Neuroscience) meeting, Invited speaker, February 2009.

Princeton University, Department of Psychology, Colloquium, March 2009.

Workshop on “Probabilistic models in cognitive development”, Banff International Research Station, May 2009.

Plenary address, Thirty-First Annual Conference of the Cognitive Science Society, July 2009.

Plenary address, Cognitive Development Society, October 2009.

Keynote address, Computational Cognitive Neuroscience Conference, November 2009.

Convener and presenter, IdeasLab Session on “The Nature of Intelligence”, World Economic Forum, Davos, January 2010.

Brandeis University, Department of Psychology Colloquium, February 2010.

Brain Theory Seminar, Harvard University, March 2010.

MIT Lincoln Labs Colloquium, March 2010.

Cognitive Science Colloquium, University of Maryland, April 2010.

Cognitive Science Seminar, The Johns Hopkins University, April 2010.

Keynote speaker, Statistical and Relational Artificial Intelligence (StarAI) workshop, AAI, July 2010.

Computation and Neural Systems Colloquium, Caltech, October 2010.

Symbolic Systems Forum, Stanford University, October 2010.

UC Berkeley Institute for Cognitive and Brain Sciences Seminar, October 2010.

Public Lecture on Interdisciplinary Mathematics, UCLA IPAM (Institute for Pure and Applied Mathematics) Tenth Anniversary Meeting, November 2010.

Posner Lecture, Neural Information Processing Systems conference, December 2010.

Distinguished Lecturer, Department of Computer Science, University of Toronto, February 2011.

UC San Diego Cognitive Science Department, May 2011.

Keynote speaker, Ohio State University CogFest, May 2011.

Hebb Lecture, McGill University, February 2012.

Pinkel endowed lecture in Cognitive Science, Institute for Research in Cognitive Sciences, University of Pennsylvania, March 2012.

Keynote speaker, Spring Research Day, Center for Cognitive Sciences, University of Minnesota.

Keynote speaker, Sixth International Conference on Thinking, July 2012, London.

Keynote speaker, Association for the Advancement of Artificial Intelligence (AAAI) annual meeting, July 2012 .

Simons Foundation Science Series, October 2012.

Roger N. Shepard Visiting Lecturer, University of Arizona Cognitive Science Program, November 2012.

Keynote talk of the workshop on Probabilistic Programming, "Modeling human common sense with probabilistic programs" at NIPS, 2012, Lake Tahoe, NV. December 2012.

“Turing Enduring” Symposium, Rockefeller University, December 2012.

Keynote talk of the workshop on Decision Making in Nature, "Modeling human decision making with probabilistic programs" at Imperial College, London, England. May 2013.

Keynote speaker, "Modeling common-sense scene understanding with probabilistic programs" at the 29th Conference on Uncertainty in Artificial Intelligence, in Bellevue, WA. July 2013.

Keynote speaker, "Learning as program induction" at the 23rd International Joint Conference on Artificial Intelligence, Beijing, China. August 2013.

Carnegie Mellon University, Machine Learning Department Distinguished Speaker Series, March 2014

Carnegie Mellon University, Center for the Neural Basis of Cognition Colloquium, March 2014.

University of Massachusetts, Amherst, Computational Social Science Program, April 2014.

Columbia University, Theoretical Neuroscience Colloquium, April 2014.

Keynote speaker CVPR 2014 workshop, "Vision meets Cognition", June 2014

Invited speaker, Annual Meeting of the Cognitive Science Society, Plenary Symposium on Computational Models of Moral Cognition, July 2014.

Invited speaker, MIT Center for Art, Science and Technology (CAST) Symposium on "Seeing, Sounding, Sensing", September 2014.

Keynote speaker, Gulf Coast Consortium Conference on Theoretical and Computational Neuroscience, February 2015.

Invited talk, AAAI Spring Symposium on "Knowledge Representation and Reasoning: Integrating Symbolic and Neural Approaches", March 2015.

Keynote speaker, Federation of European Neuroscience Societies (FENS) Brain Conference on "Bridging neural mechanisms and cognition", April 2015.

Invited speaker, Boston University Conference on Neural Processing in Humans, Animals and Machines, June 2015.

Invited speaker, CVPR 2015 Workshop on scene understanding, June 2015.

Invited speaker, Kavli Meeting on Frontiers of Brain Science, June 2015.

Heller Lecturer, Safra Center for Brain Sciences, Hebrew University, June 2015.

Invited speaker CogSci 2015 Workshop on Vision meets Cognition, July 2015.

Keynote speaker, "Is the Brain Bayesian?" Workshop at New York University, Center for Mind, Brain and Consciousness.

Invited speaker, NIPS Workshop on Computation and Cognition: Neuro-symbolic models, December 2015.

Invited speaker, NIPS Symposium on Intelligence in Brains, Minds and Machines, December 2015.

Presentation to the Swiss Computational Neuroscience Forum in Geneva, February 2016

Keynote speaker, Robotics@MIT conference, February 2016.

Norman Anderson Distinguished Lectureship, UC San Diego, March 2016.

Frijda Honorary Lecture, University of Amsterdam, June 2016.

Invited Symposium on Causation, Society for Philosophy and Psychology, June 2016.

Invited Speaker, Rovereto Cog-Evo meeting, July 2016.

Invited Symposium on Causal Reasoning, International Conference on Thinking, August 2016.

Keynote speaker, Annual Meeting of the Simons Collaboration on the Global Brain, September 2016.

Distinguished Lecture, Toyota Technological Institute-Chicago, October 2016.

Address to the Vatican (Pontifical Academy of Sciences) conference on AI and the Brain, November 2016.

Invited Speaker, NIPS Workshop on Deep Reinforcement Learning, December 2016.

Invited Speaker, NIPS Workshop on Neural Abstract Machines and Program Induction, December 2016.

Invited Speaker, NIPS Workshop on Intuitive Physics, December 2016.

Keynote speaker at i-CORE (Israeli Center for Research Excellence) in Cognitive Science annual conference, January 2017.

Jon Postel Distinsuighed Lecturer, UCLA Department of Computer Science, February 2017.

Emory University, Department of Psychology, Colloquium, February 2017.

Annual Invited Lecturer, Washington University's program in Cognitive, Computational and Systems Neuroscience, March 2017.

Keynote speaker, AAAI Symposium on Intelligence in Brains Minds and Machines, March 2017.

AFOSR Future of Machine Learning Workshop, Arlington, VA, May 2017.

Keynote speaker, O'Reilly AI Conference, New York City, June 2017.

Invited speaker, Deep Learning in Robotics workshop, Robotics: Science and Systems (RSS) conference, July 2017.

Invited speaker, Learning from Demonstrations workshop, Robotics: Science and Systems (RSS) conference, July 2017.

Invited speaker, Gatsby Computational Neuroscience Unit, London, July 2017.

Opening keynote speaker, Inaugural Cognitive Computational Neuroscience (CCN) meeting, New York City, September 2017.

Keynote speaker, National Robotics Initiative (NRI) Annual Meeting, Washington, D. C., November, 2017.

Research Contracts and Grants:

The Schlumberger Foundation, September 1999, \$30,000, "Manifold learning for nonlinear inverse problems."

Center for the Study of Language and Information, Stanford University, November 1999, \$12,500, "A Bayesian framework for example-driven database search."

MERL (Mitsubishi Electric Research Labs), January 2000, \$20,000, "Bayesian models of perception and cognition."

The Schlumberger Foundation, May 2000, \$30,000, "Manifold learning for nonlinear inverse problems" (continuation of previous award).

DARPA/ONR, October 2000 – July 2002, \$137,613, "Human ID and the structure of perceptual face space."

NTT Communications Sciences Laboratory, April 2001-April 2002, \$115,000, "Theory and applications of Bayesian concept learning."

MERL (Mitsubishi Electric Research Labs), April 2001, \$10,000, "Bayesian models of perception and cognition".

NSF Focused Research Group, July 2001-July 2004, \$1,000,000, "Topological methods in data analysis", with Gunnar Carlsson and Persi Diaconis.

NTT Communications Sciences Laboratory, July 2002-December 2010, \$890,000 (approximate), "Learning semantic structure".

DARPA/SRI CALO Project, July 2004-February 2009, \$470,000, "Topic modeling and identification."

AFOSR MURI, June 2005-June 2008, \$4,600,000, "Computational modeling of adversary attitudes and behaviors: computational models for belief structures and intentions", with Whitman Richards (PI) and eight other investigators across five institutions. MIT component, supporting Richards, Winston, Tenenbaum and several students and postdoctoral researchers, is \$840,000.

James S. McDonnell Foundation Causal Learning Research Collaborative, September 2005-July 2010, \$225,000 (approximate), "Prior knowledge in causal learning and categorization."

DARPA BICA (Biologically Inspired Cognitive Architectures) Program, October 2005-May 2007. Support for Phase I study by CSAIL team, with Patrick Winston (PI) and several other investigators. Total support for Tenenbaum is \$75,000.

Eli Lilly & Co., October 2006, \$50,000, "Finding structure in heterogenous scientific data".

ONR MURI, June 2007-June 2012, \$6,500,000, "Robust learning and skill transfer with video games", with Daphne Bavelier (PI) and six other investigators across six institutions. MIT component is approximately \$650,000 over five years.

AFOSR Cognition and Decision Program, December 2006-December 2009, \$225,000, "Theory-based Bayesian models of inductive inference".

Google Research Award, December 2007, \$100,000, “Scalable Approximate Inference for Structured Probabilistic Models”.

ARL MURI, June 2008-July 2011, “A unified approach to abductive inference”, with Pedro Domingos (PI) and five other investigators across seven institutions. MIT component is approximately \$750,000 over five years.

ONR Cognitive Science Program, July 2009-July 2012, \$458,802, “A framework for core cognition”, with Noah Goodman as co-PI.

AFOSR Robust Decision Making program, September 2009-September 2012, \$600,000, “Rich causal models for robust decision making”, with Leslie Kaelbling and Michael Littman.

Shell, \$375,000, July 2009 – July 2012, “Manifold learning for muldi-attribute dynamic co-visualization”, with Alan Willsky.

Qualcomm, \$200,000, “A generative approach to visual scene understanding”, with Antonio Torralba.

IARPA ICARUS (Integrated Cognitive Architectures for Understanding Sensemaking; Award approved subject to contract negotiation). Joint with BBN and multiple MIT faculty. MIT component is approximately \$850,000/year, for 3-5 years.

ONR MURI, 2010-2015, “Knowledge Representation, Reasoning and Learning for Understanding Scenes and Events”, joint with multiple faculty at Stanford, Berkeley, MIT, Caltech, and USC (Song-Chun Zhu, PI).

ONR, 2013-2016, “Probabilistic programming for cognitive modeling”, \$150,000/year (joint with Vikash Mansinghka).

ARO, 2013-2017, “Probabilistic programming foundations and theory”, \$200,000/year (joint with Vikash Mansinghka).

ONR MURI, 2015-2020, “Common-sense scene understanding”, joint with multiple faculty at UCLA, Stanford, CMU, MIT, Yale, Oxford, and Glasgow (Song-Chun Zhu, PI). MIT component \$225,000/year.

NSF Center for Brains, Minds and Machines, 2013-2018, Research thrust leader, budget roughly \$850,000/year.

DARPA Robotics seedling, 2015-2016, \$600,000 (joint with Emo Todorov, UWashington and Tao Gao, GE Research).

IARPA MICRONS, 2016-2019.

AFOSR, 2015-2018, “Concept learning as program induction”, \$200,000/year.
