

Personal Statement as Candidate for Treasurer of EECS GSA

Jim Sukha

March 28, 2005

I accept the nomination for the office of Treasurer of the EECS Graduate Students Association. I became involved with the EECS GSA this semester, having regularly executive committee meetings and attended several of the GSA's sponsored events. From what I have observed, I believe this organization is a valuable resource for the EECS community, and I am interested in becoming more involved in the group. I have been at MIT for almost 5 years, first as an undergrad in the EECS department and now as an MEng student and a PhD candidate in computer science. I have enjoyed my time here at MIT and in the EECS department, and I look forward to having the opportunity to give back to the EECS community.
