

INDEX

N.B.: Page numbers in italics refer to tables and figures.

- Abbott Laboratories (firm), 94, 95
acetal copolymer (Celcon), engineering plastics innovation, 33, 67, 197–98
acetal homopolymer resins (Delrin), engineering plastics innovation, 33, 67, 197
aerospace firms
 innovation process role, 3–4, 118
 know-how trading and, 83, 86, 87–88
Allen, Robert C., 84, 92, 123
Allen, Thomas J., 83–84, 92, 115, 123
Anderson, W. A., 16, 27, 123, 143, 144, 146, 147, 150, 152, 153
applications laboratories, 120
appropriability of innovation benefit. *See* economic rent, expectations of
argon ionization detector, GC innovation, 14, 138
Army, U.S., tractor shovel use, 64
Arnold, J. T., 16, 27, 123, 144, 148, 149
articulation, tractor shovel innovation, 31, 194
astigmatism correction in objective lens, TEM innovation, 14, 157
attachment coupler system, tractor shovel innovation, 31, 32
augmented radio frequency cure, pultrusion innovation, 29, 186–87
automated clinical chemistry analyzers, innovations in
 sample listed, 98
 shifting the sources of, 7, 93–100
automated mask aligner, semiconductor innovation, 21, 174
automobile firms, innovation process role, 106–7, 118
Axelrod, Robert, 85, 92, 123
Barnett, Donald F., 80, 92, 123
barrel reactor for epitaxial processing, semiconductor innovation, 21, 171–72
Bayou Steel (firm), 78, 79, 82
Bell Laboratories (firm), 23, 111, 149, 164, 167, 170, 175, 176, 178, 181
benefit, economic. *See* economic rent, expectations of
biased electron gun, TEM innovation, 14, 162
biological enzyme innovations, know-how trading of, 83
Bloch, Felix, 15–16, 27, 124, 143, 144, 146, 147
Boeing (firm), 4, 58
butyl benzyl phthalate, plastics additive innovation, 35, 200
Calma (firm), 108
capillary column, GC innovation, 14, 135–36
Celanese (firm), 33, 67, 197–98
Celcon (acetal copolymer), engineering plastics innovation, 33, 67, 197–98
Chaparral (firm), 78, 79, 80, 82
chemical industry
 know-how sharing in, 88, 90
 licensing effectiveness in, 48–53, 90
 patent effectiveness in, 48–53, 66
circuit boards. *See* printed circuit board assembly process
citroflex plasticizer, plastics additive innovation, 35, 201–2
Clark Equipment (firm), 65, 192, 195
clinical chemistry analyzers. *See* automated clinical chemistry analyzers
Coca-Cola (firm), 54
cold specimen stage, TEM innovation, 14, 161
collective invention, 84
Collins, H. M., 90, 92, 124
competitive advantage. *See also* innovation-related knowledge
 economic rents and, 5, 24, 47, 52, 53, 54, 58, 65, 66, 72, 73–74, 76, 85, 117–18, 120–22

- know-how trading and, 76, 77, 79, 81, 83, 84, 85–91
 computer-aided-design (CAD). *See* printed circuit computer-aided-design (PC-CAD)
 Computervision (firm), 108, 109, 174
 consumers
 innovation benefit and, 71, 73*n*
 marketing research role. *See* lead users
 continuous pultrusion process innovation, 29, 184–85
 cooperation. *See* research and development, cooperation in
 copyright, as innovation protection mechanism, 55*n*, 59. *See also* innovation-related knowledge
 Corey, E. Raymond, 40, 42, 124
 correction of astigmatism in objective lens, TEM innovation, 14, 157
 costs. *See* innovation-related costs
 crystal puller, semiconductor innovation, 21, 163–64
 automatic diameter control, 21, 166
 dislocation-free, 21, 165
 resistance-heated, 21, 164–65
 cupric salt chemical/mechanical process for wafer polishing, semiconductor innovation, 21, 169
 customer product groups, 120
 customers, 26, 45, 61, 73*n*, 97, 100, 118, 119, 120. *See also* users
 cut-off saw, pultrusion innovation, 29, 186

 DEC (firm), 111
 Delrin (acetal homopolymer resins), engineering plastics innovation, 33, 67, 197
 Dial-a-Ride services, 41
 diffused junction furnace, semiconductor innovation, 21, 174–75
 diffusion of innovation, 5, 17–19, 20, 24–25, 81–82, 84, 90, 91, 107, 114, 116*n*, 118–20, 121. *See also* economic rent, expectations of; know-how trading; source of innovation
 di N undexyl phthalate, plastics additive innovation, 35, 202
 distributed innovation process, 3, 5–7, 9–10, 76, 91, 93, 117–22. *See also* source of innovation
 distributors, innovation process role of, 4, 60, 70, 118
 double-acting hydraulic cylinders, tractor shovel innovation, 31, 192–93
 double condenser lens, TEM innovation, 14, 156–57
 Du Pont (firm), 33, 67, 94–99, 135, 148, 197

 economic benefit. *See* economic rent, expectations of
 economic rent, expectations of. *See also* innovation-related knowledge
 automated clinical chemistry analyzer innovation and, 93, 95–96, 99–100
 engineering plastics innovation and, 47, 57, 66–68, 70, 71, 72
 industrial gas-using innovation and, 57, 68–70, 71, 72
 know-how trading and, 6, 76, 79, 80–81, 82, 84, 85–91
 by lead users, 7, 107–11, 115
 by manufacturers, 3, 7, 60–70, 72, 73
 plastics additives innovation and, 57
 printed circuit board assembly process innovation and, 57
 pultrusion innovation and, 57, 60–63, 70, 71, 72
 scientific instrument innovation and, 57–58, 71
 semiconductor innovation and, 45–46, 51, 52–53, 57
 source of innovation and, 3, 5, 5*n*, 6, 7–8, 35, 43–55, 57–73, 76, 93, 99–100, 107, 108, 109, 110, 111, 115, 117–18, 120–22
 by suppliers, 3, 61*n*, 64*n*, 66*n*, 69–72
 thermoplastics-using innovation and, 57, 66, 70, 71, 72
 tractor shovel innovation and, 57, 58, 63–66, 70, 71, 72
 by users, 3, 7, 60–70, 71–72, 73
 electrical utilities, know-how trading and, 81*n*, 88
 electrical wire termination equipment. *See* wire termination equipment
 electron beam aperture, self-cleaning, TEM innovation, 17
 electron beam pattern generator, semiconductor innovation, 21, 180–81
 electron capture detector, GC innovation, 14, 139
 electronic integrator, NMR spectrometer innovation, 14, 152
 electron microscope. *See* transmission electron microscope
 engineering plastics, innovations in. *See also* thermoplastics, process equipment using data set for, 33, 195–99
 expectations of economic rent from, 47, 57, 66–68, 70, 71, 72
 sources of, 4–5, 32–34, 44, 57, 58, 66–68, 71, 72, 195–99

- engineers
 innovation process role, 9, 16, 17, 25, 108, 109, 110, 131
 know-how trading and, 6, 76–77, 79, 82, 83, 86–87, 89, 91
- epitaxial processing, semiconductor innovations in
 barrel reactor for, 21, 171–72
 horizontal reactor for, 21, 170–71
 pancake reactor for, 21, 170
- ethyl-2-cyano 3:3 diphenylacrylate, plastics additive innovation, 35, 203–4
- Eveland, J. D., 41, 42, 128
- Fairchild Semiconductor (firm), 23, 51, 171, 172, 173, 177, 181
- field frequency lock, NMR spectrometer innovation, 14, 149–50
- field service, innovation process role, 100, 118–19
- Finkelstein, Stan N., 7, 10, 94, 95, 100, 130
- flame ionization detector, GC innovation, 14, 139–40
- float zone crystal growing, semiconductor innovation, 21*n*, 166–67
- fluid transmission coupling, tractor shovel innovation, 31, 191
- focus groups, 105–6
- Fourier transform/pulsed NMR innovation, 14, 145–46
- four-wheel drive, tractor shovel innovation, 31, 74*n*, 193
- French, C. W., 17, 155
- frequency synthesizer, NMR spectrometer innovation, 14, 147
- functional locus of innovation. *See* functional source of innovation
- functional relationship between innovator and innovation, 3, 4, 5, 5*n*, 8, 43–55, 60–73
- functional source of innovation. *See also* source of innovation
 expectations of economic rent and, 3, 5, 5*n*, 7–8, 35, 43–55, 57–73, 76, 93, 99–100, 107, 108, 109, 110, 111, 115, 117–18, 120–22, 133
 as variable, 3, 4, 5
 variations in, 3, 4–5, 6, 7–8, 9, 11–26, 28–41, 43–55, 57–73, 76, 117
- gas chromatograph (GC), innovations in
 data set for, 14, 133–42
 sources of, 11–19, 133–42
- gas utilities, know-how trading and, 81*n*, 88
- gases, industrial. *See* industrial gases, process equipment using
- gas sampling valve with loop, GC innovation, 14, 141
- GBF/DIME, 41
- General Electric (firm), 33, 58, 67, 165, 175, 184, 195, 196, 199
- German firms, ability to capture economic rent, 73
- Goldsworthy Engineering (firm), 62, 186, 187
- goniometer specimen stage, TEM innovation, 14, 161
- government policymaking. *See* innovation policy
- Griliches, Zvi, 124, 125, 127
- heated die cure/continuous pultrusion process innovation, 29, 184–85
- heteronuclear spin decoupling, NMR spectrometer innovation, 14, 146
- hiding, as innovation protection mechanism, 5, 59, 61, 72, 73, 82, 83, 84. *See also* innovation-related knowledge
- high acceleration wafer spinner for resist coating, semiconductor innovation, 21, 172–73
- high-temperature specimen stage, TEM innovation, 14, 162
- hollow product tooling, pultrusion innovation, 29, 187–88
- homonuclear spin decoupling, NMR spectrometer innovation, 14, 147
- Honeywell (firm), 111
- horizontal reactor for epitaxial processing, semiconductor innovation, 21, 170–71
- hydraulic bucket control, tractor shovel innovation, 31, 190–91
- IBM (firm), 108, 109, 166, 171, 174, 179
- ID saw for silicon crystal wafer slicing, semiconductor innovation, 21, 168
- imitation of innovation, 5, 47, 59–60, 64, 73*n*–74*n*, 121. *See also* innovation-related knowledge
- improved tooling dies, pultrusion innovation, 29, 188
- improvements. *See* innovation
