✓ **BIOSKETCH**

Dr. Oral Buyukozturk is George Macomber Professor, Professor of Civil and Environmental Engineering, and Director of the Laboratory for Infrastructure Science and Sustainability at the Massachusetts Institute of Technology (MIT). He received his Ph.D. degree in Structural Engineering from Cornell University in 1970. He joined the MIT faculty in 1976 following six years of industrial experience, including two years at United Engineers and Constructors in safety analysis and design of nuclear containment structures, and four years with Marc Analysis and Research Corporation, a Brown University affiliate, in computational engineering analysis and development. Professor Buyukozturk's research interest is in infrastructure mechanics, materials, and sustainability integrating areas of multiscale concrete mechanics for durable and sustainable structures, and innovative sensing and data analytics towards the development of intelligent structures and resilient cities. His work in these areas have led to ground breaking developments and innovations in multiscale modeling of cementitious materials with additives, use of locally available waste materials (e.g., irradiated post-consumed plastic, volcanic ash) for durable and sustainable concrete materials and construction, and in novel computer vision techniques for structural sensing with motion magnification, system identification and structural health monitoring.

His earlier work at MIT includes fundamental research and development in thermomechanical analysis of coal gasification vessels, as well as his pioneering contribution in the evolution of segmental prestressed bridge design and construction technology. He has conducted seminal research in interface fracture mechanics, innovative experimentation for interface assessment in multi-material systems, and fiber reinforced plastic (FRP) composites for structural rehabilitation. His early work at Marc Analysis/Brown University involved pioneering developments in concrete constitutive relations, and finite element analysis of complex structures with nonlinearities and progressive cracking. Computational concrete material models he developed are still in use today by major commercial general-purpose finite element programs. It is worth noting that his current work on computational multiscale concrete using molecular dynamics provides a fundamental basis for his earlier developments of phenomenological models of complex concrete behavior.

Professor Buyukozturk's research represents an integrated effort towards infrastructure sustainability through a bottom-up approach contributing to establishment of a new paradigm in infrastructure engineering. He has published more than 370 technical papers in refereed journals, edited books and conference proceedings, made more than 210 invited and keynote presentations around the world, and served in different capacities in over 30 technical committees of professional societies. His work has been recognized through multiple prestigious honors and awards including the *George W. Housner Structural Control and Monitoring Medal* from the American Society of Civil Engineers (ASCE), the *Distinguished Service and Leadership Award* from the Civil and Environmental Engineering department at MIT, the *Golden Mirko Roš Medal* of the Swiss Federal Research Laboratory for Materials Science and Technology; *Fellow (non-resident) of the Royal Society of Edinburgh*, Scotland's National Academy of Science and Letters; *ASNT National Faculty Fellowship Awards* (2008 & 2011);

Fellow of American Concrete Institute (ACI), Fellow of American Society of Civil Engineers (ASCE) and various Best Paper Awards with his students.

✓ **EDUCATION**

Ph.D. - Cornell University (1970)
 M.S. - Cornell University
 M.S.C.E. - Istanbul Technical University

✓ **PROFESSIONAL EXPERIENCE**

1985 – Professor, CEE, MIT, Cambridge, MA
 1980 – 1985 Associate Professor (with tenure), CEE, MIT, Cambridge, MA
 1976 – 1980 Associate Professor (without tenure), CEE, MIT, Cambridge, MA
 1973 – 1974 Adjunct Associate Professor of Engineering, Brown University, Providence, RI
 1972 – 1976 Senior Research Engineer, Marc Analysis Research Corporation, Providence, RI
 1970 – 1972 Research Engineer/Consultant, United Engineers and Constructors, Philadelphia, PA

✓ **RESEARCH INTERESTS**

Prof. Buyukozturk's research interests lie in the area of Infrastructure Mechanics, Materials, and Sustainability:

- Concrete mechanics and multiscale computational modeling
- Interface mechanics in multi-material systems
- Fracture and durability of FRP retrofitted concrete systems
- Sustainable construction materials
- Thermomechanical behavior of high temperature refractory linings
- Energy-based seismic design of structures
- Advanced sensing and data analytics for infrastructure monitoring

✓ **SELECTED HONORS AND AWARDS**

2019 Recipient of the **George Macomber Professorship, MIT Endowed Chair.**

2018 **George W. Housner Structural Control and Monitoring Medal** from the American Society of Civil Engineers, for *"Pioneering and transformative developments in video-based structural sensing and identification, interferometry-based data analytics, high-efficiency generic wireless networks, and their integration with groundbreaking engineering mechanics research and practice for enhancing civil infrastructural resilience and sustainability."*

2018 **Distinguished Service and Leadership Award** from MIT Department of Civil and Environmental Engineering, to *"Recognize outstanding departmental service and leadership contributions of a member of the CEE faculty, to acknowledge colleagues who foster a culture of diversity, inclusiveness, and innovation, to further the department mission and vision and MIT as a whole."*

2011 **Golden Mirko Ros Medal** from EMPA Swiss Federal Laboratories for Materials Science and Technology, for *"Most valuable and sustained contribution to materials science and engineering in the domain of civil engineering and also for his outstanding research support to EMPA over the past 2 decades."*

2009 **Fellow of Royal Society of Edinburgh**, Scotland's, National Academy of Science and Letters, for *"Transformative contributions to computational analysis, engineering and design."*

2008/11 American Society of Nondestructive Testing (ASNT) Faculty Fellowship Awards

1990 Fellow, American Concrete Institute (ACI)

✓ **SELECTED GRANTS**

Prof. Buyukozturk has been PI for many projects throughout his career. During the last five years only, his total funding level has been nearly 15 million USD. Here are some selected recent grants and projects:

- 1) Data Interferometry for Field Monitoring: Development and Applications in Structural and Crustal Systems (2018-2020), Oral Buyukozturk (PI) and Nafi Toksoz (Co-PI), Shell Global, \$1,310,000.00
- 2) Multi-scale Characterization of Oil-well cements for Water Dynamics and Microstructure Analysis (2017-2019), Oral Buyukozturk (PI), Aramco Services Company, \$400,000.
- 3) MIT-Kuwait Signature Project: Sustainability of Kuwait's Built Environment (2013-2017), Oral Buyukozturk (PI), Kuwait Foundation for the Advancement of Sciences, \$4,970,000.00
- 4) Motion Sensing Wi-Fi Sensor Networks, Continuous 3D Modeling and Prediction of Facility Responses to Disturbances (2011-2017), Oral Buyukozturk (PI) and William Freeman (co-PI), MIT Energy Initiative, Shell International Exploration & Production, Inc., \$8,000,000.00
- 5) A Robust Methodology for the Standoff Condition Assessment of FRP-Retrofitted Concrete Systems (2009-2013), NSF, Oral Buyukozturk (PI), \$254,999.00
- 6) De-Bonding in Bi-layer Material Systems under Moisture Effects: A Multi-Scale Fracture Approach (2009-2013), NSF, Oral Buyukozturk (PI), \$353,728.22
- 7) Moisture Affected De-Bonding in FRP Retrofitted Concrete Systems – An Interface Fracture Approach (2005-2009), NSF, Oral Buyukozturk (PI), \$262,560.35
- 8) Nondestructive Evaluation of FRP-Confined Concrete Using Microwave (2003-2008), NSF, Oral Buyukozturk (PI), \$300,308.00
- 9) A Novel Approach to Nondestructive Evaluation of FRP-Confined Concrete using Microwaves (2002-2003), NSF, Oral Buyukozturk (PI), \$99,314.15
- 10) Failure Behavior of FRP Bonded Concrete Affected by Interface Fracture (2001-2005), NSF, Oral Buyukozturk (PI), \$250,366.00
- 11) Integrity of Pre-Cracked Re-Enforced Concrete Retrofitted with Composite Laminates (1996-2000), NSF, Oral Buyukozturk (PI), \$239,936.00
- 12) Behavior of High Strength Concrete Composites Influenced by Interfacial Fracture Properties (1994-1997), NSF, Oral Buyukozturk (PI), \$246,655.00

✓ **TEACHING AND MENTORING**

Prof. Buyukozturk's life-long philosophy of civil engineering education in the area of structures and materials has been to offer courses that emphasize fundamentals and behavioral knowledge, through which innovative design solutions can be developed. In recent years, Professor Buyukozturk has played a profound role in bringing the civil engineering education program in the Department of Civil and Environmental Engineering at MIT to within a transformative program, the so-called 1-ENG umbrella, for a strong and a flexible education. During his career, he has taught over ten major undergraduate and graduate courses. He has supervised over 30 PhD students, more than 70 Master students, and over 30 undergraduate students, many of whom have developed successful careers in both academic and industrial fields.

✓ **CONSULTING**

Prof. Buyukozturk has done extensive consulting services (for nearly 40 major projects) for national and international structural engineering communities during his career. Some recent selected projects:

- Florida International University Pedestrian Bridge Collapse Investigation, Consultant, 2018

- *Building Collapse Investigation*, McDonough, Hacking and Lavoie LLC, Boston MA, Consultant, 2015
- *Development of Sustainability Center of Building Materials, and Infrastructures*, Kuwait Institute for Scientific Research, Consultant, 2011 - 2012
- *Delamination of Nuclear Containment Structure for Crystal River Nuclear Plant Unit 3*, State of Florida Office of Public Counsel, Structural and Material Consultant, 2011 - 2012

✓ **SELECTED MEDIA COVERAGE**

Prof. Buyukozturk's research has been reported/featured in both national and international media coverages (e.g., MIT News, NSF News, Science360 News, ASCE Civil Engineering Magazine, Science Daily, Popular Mechanics, The Wall Street Journal, Engineering News Record, The Economic Times, Newsweek, Phys.org), over 100 times. Here are some selected recent media articles:

- 1) New tools could improve the way cement seals oil wells, **Engineers Journal**, 2019
- 2) New tools could improve the way cement seals oil wells, **MIT News**, 2019
- 3) Cities of the future may be built with locally available volcanic ash, **MIT News**, 2018
- 4) Cities of the future could be built with concrete made from volcanic ash, **Newsweek**, 2018
- 5) MIT Team Discovers Roman Secret of Volcanic Concrete to Build Future Cities, **Inverse Innovation**, 2018
- 6) MIT students fortify concrete by adding recycled plastic, **MIT News**, 2017
- 7) Students fortify concrete by adding recycled plastic, **Science Daily**, 2017
- 8) MIT students fortify concrete through recycled plastic, **Architect Magazine**, 2017
- 9) Using energy-based designs to enhance earthquake hazard resistance, **MIT News**, 2017
- 10) With new model, buildings may *sense* internal damage, **MIT News**, 2016
- 11) MIT researchers make buildings smart enough to *sense* internal damage over time, **Fox News**, 2016.
- 12) Technique to monitor building *health* utilizes ambient vibrations, **ASCE Civil Engineering Magazine**, Issue of February 2017.
- 13) Intelligent building may *sense* internal damage after earthquake, **Yahoo! News**, 2016.
- 14) Buildings of future may *sense* internal damage after earthquake, **Earthquake News**, 2016
- 15) Intelligent building may *sense* internal damage after earthquake, **The Hans India**, 2016
- 16) With New Model, Buildings May *Sense* Internal Damage, **Science Newsline Technology**, 2016
- 17) The Science Looks at Smart Buildings, Really Smart Ones, **Searching For Ithaka**, 2016
- 18) Digital nervous system would let buildings detect their own weaknesses, **Popular Mechanics**, 2016
- 19) New smart buildings may sense internal damage in real time, **India Today**, 2016
- 20) With New Computational Model, Buildings May *Sense* Internal Damage, **Tech Explorist**, 2016
- 21) MIT researchers develop sensing system to spot structural weakness in buildings, **Construction Dive**, 2016
- 22) MIT Monitors Building Health, **Durability + Design**, 2016
- 23) With new model, buildings may *sense* internal damage, **Science Daily**, 2016.
- 24) New *smart* buildings may sense internal damage in real time, **Business Standard** and **The Free Press Journal**, 2016.
- 25) Intelligent building may *sense* internal damage after earthquake, **The Economic Times Science**, 2016.
- 26) New 'smart' buildings may sense internal damage in real time, **Business Standard**, 2016
- 27) Future buildings could *sense* internal damage after earthquake, says research, **India TV News**, 2016
- 28) Intelligent building may *sense* internal damage after earthquake, **News X**, 2016
- 29) Designing a better built environment, **MIT ILP Institute Insider**, 2016
- 30) Magnifying vibrations in bridges and buildings, **MIT News**, 2015
- 31) CEE Magnifies Vibrations in Bridges and Buildings, **MIT CEE News**, 2015

- 32) Magnifying vibrations in bridges and buildings, **Global News Connect**, 2015
- 33) Researchers apply computer vision technique to see tiny vibrations in large structures, **Phys.org**, 2015
- 34) A concrete solution - Insight into cement's microscopic properties may lead to stronger, more sustainable concrete, **MIT News**, 2017.
- 35) Researchers look to nature for solutions to *greener*, more sustainable concrete production, **American Ceramic Society**, 2016
- 36) Finding a new formula for concrete, **MIT News**, 2016
- 37) Finding a New Formula for Concrete, **Science News Line Physics & Chemistry**, 2016
- 38) Finding a New Formula for Concrete, **European Coatings**, 2016
- 39) Learning how things fall apart, **MIT News**, 2014
- 40) Learning how things fall apart, **NSF News**, 2014
- 41) Learning how things fall apart, **Science360 News**, 2014
- 42) CEE's Buyukozturk receives lifetime achievement award from Swiss Federal Labs, **MIT News**, 2011
- 43) Monitoring Tiny Vibrations to Avert Big Problems, **The Wall Street Journal**, 2015.

✓ **SELECTED RECENT JOURNAL PUBLICATIONS**

Prof. Buyukozturk has published extensively during his career (over 350 technical papers in refereed journals, edited books and conference proceedings). He has also delivered over 200 keynote and invited presentations and filed 11 US patents. Selected recent journal publications are given below.

NOTE: For a full list of publications please see the Full CV of Prof. Buyukozturk at <http://web.mit.edu/liss/home.html>

2015-2021 Journal papers

- 1) X.Q. Wang, W. Jian, O. Buyukozturk, C.K.Y. Leung, and D. Lau. Degradation of epoxy/glass interface in hygrothermal environment: An atomistic investigation. *Composites Part B: Engineering* 2021, 206, 108534.
- 2) K. Kupwade-Patil, J.G. Chen, M. Uzun, D. Lau, M.L. Johnston, A. Zhou, D. Smit, and O. Buyukozturk. Corrosion assessment of ductile iron pipes using high-speed camera technique: Microstructural validation. *NDT & E International* 2020, 116: 102362.
- 3) K. Kupwade-Patil, P. Boul, D. Rasner, S. Lapidus, J. Leao, K.D. Johnson, C. Thaemlitz, and O. Buyukozturk. In situ investigation of phosphonate retarder interaction in oil well cements at elevated temperature and pressure conditions. *Journal of the American Ceramic Society* 2020, 103(11): 6400-6413.
- 4) E. Ghorbani, O. Buyukozturk, and Y.-J. Cha. Hybrid output-only structural system identification using random decrement and Kalman filter. *Mechanical Systems and Signal Processing* 2020, 144: 106977.
- 5) R. Mohammadi-Ghazi, R.E. Welsch, and O. Buyukozturk. Kernel dependence analysis and graph structure morphing for novelty detection with high-dimensional small size dataset. *Mechanical Systems and Signal Processing* 2020, 143: 106775.
- 6) J. Long and O. Buyukozturk. Collaborative duty cycling strategies in energy harvesting sensor networks. *Computer-Aided Civil and Infrastructure Engineering*, 2020, 35(6): 534-548.
- 7) K. Kupwade-Patil, A. Bumajdad, K.C. Littrell, O. Buyukozturk. In situ examination of engineered local additives in cement paste via neutron based scattering techniques. *Construction Building and Materials*, 2020; 243: 118175.
- 8) J. Long, O. Buyukozturk. A power optimised and re-programmable system for smart wireless vibration monitoring. *Structural Control and Health Monitoring* 2020, 27(2): e2468.

- 9) K. Kupwade-Patil, P. Boul, D. Rasner, M. Everett, T. Proffen, K. Page, D. Ma, D. Olds, C. Thaemlitz, O. Buyukozturk, Retarder effect on Hydrating Oil Well Cements investigated using in situ Neutron/X-ray Pair Distribution Function (PDF) Analysis, *Cement and Concrete Research*, 2019; 126: 105920-1-13.
- 10) M. Uzun, H. Sun, D. Smit and O. Buyukozturk. Structural identification and damage detection using Bayesian inference and seismic interferometry. *Structural Control & Health Monitoring* 2019, 26(11): e2445.
- 11) R. Zhang, Z. Chen, J. Zheng, O. Buyukozturk, and H. Sun. Deep long short-term memory networks for nonlinear structural response prediction. *Computers & Structures* 2019; 220: 55-68.
- 12) H. Sun, J. Al-Qazweeni, J. Parol, H. Kamal and O. Buyukozturk. Computational modeling of a unique tower in Kuwait for structural health monitoring: numerical investigations. *Structural Control & Health Monitoring* 2019; 26(3): e2317.
- 13) A. Gullu, Y. Ercan, C. Yalcin, A. Dindar, H. Ozkaynak, and O. Buyukozturk. An improved input energy spectrum verified by the shake table tests. *Earthquake Engineering & Structural Dynamics* 2019; 48(1), 27-45.
- 14) K. Kupwade-Patil, A. Bumajdad, C. Brown, M. Tyagi, N. Butch, A. Jamsheer and O. Buyukozturk. New Insights into Water Dynamics of Portland Cement Paste with Nano-additives using Quasielastic Neutron Scattering. *Journal of Material Science* 2019; 54(6), 4710-4718.
- 15) T. Herring, C. Gu, M. Nafi Toksoz, J. Parol, A. Al-Enezi, F. Al-Jeri, J. Al-Qazweeni, H. Kamal and O. Buyukozturk. GPS Measured Response of a Tall Building due to a Distant Mw 7.3 earthquake. *Seismological Research Letters* 2018; 90(1), 149-159.
- 16) C. Gu, G.A. Prieto, A. Al-Enezi, F. Al-Jeri, J. Al-Qazweeni, H. Kamal, S. Kuleli, A. Mordret, O. Büyüköztürk, M.N. Toksöz. Ground Motion in Kuwait from Regional and Local Earthquakes: Potential Effects on Tall Buildings. *Pure and Applied Geophysics* 2018; 175(12): 4183-4195. DOI: 10.1007/s00024-018-1943-5
