MIT Student Cable Television Channel 36

What Is Student Cable Television?

MIT Student Cable Television is a growing group of about 2 dozen students producing a wide range of television programming for the MIT community. Students play every role in television production: camera work, directing, writing, acting, and even repair work. Our programming includes movies, comedy, music videos and other musical presentations, and ideas that new people bring to us every week.

We're best known for bringing the 2.70 Contest to campus TV's every year. We're also MIT's best source of music videos. And, of course, we make the only programs on television about MIT. We provide equipment, advice, and help to members of the MIT community interested in creating their own programs. We are your ultimate channel.

Unlike other college television stations which are controlled and staffed by communications schools, we are entirely student-operated. We are also the youngest major medium on campus.

Through the MIT Cable Television system's almost 4,000 cable outlets, we can broadcast to and from all campus buildings and living groups. We broadcast on channel 36 (295–300 MHz).

We are always looking for new people. Even if you've never used a VCR before, you're qualified, and welcome, to join MIT Student Cable Television. Come to one of our meetings, or call us at 253–TV36.

Our Programs

The 2.70 Contest

For the last several years, we have presented the contest live from 26–100. This is our biggest and most popular project every year.

Live At Lobdell

For over two years, *Live At Lobdell* has entertained the MIT community every Friday at 5pm with its offbeat antics. *Live At Lobdell* is always fresh, and uniquely MIT's.

Tech Challenge

The innovative format of MIT's hottest game show tests contestants' ability to draw, knowledge of trivia, and physical dexterity.

M. I. T. Live!

MIT's newest tradition is a weekly live call-in program featuring remote locations all over campus.

Other Projects

We televise concerts, public affairs programs, and live and taped events of interest.

How To Find Us

In Person

We will hold meetings this spring on Mondays at 6pm in Room 9–253. A schedule of taping sessions and other meetings is posted outside our office, Room 9–026, and new members are welcome to attend. Room 9–026 is in the upper basement of building 9, which is locked after 5pm and on weekends. It may be entered through buildings 7, 13, or 35.

By Telephone

Call our station at (617) 253–TV36, or call any of our officers whose names and telephone numbers are listed on the back.

By Fax

MIT's telecopier number is (617) 253–8000. Please include a cover sheet with our name and room number, and call us to let us know that a fax is available to be picked up.

By Interdepartmental Mail

Send interdepartmental mail to "MIT Student Cable Television, Room 9–026."

By U. S. Mail

Address mail to MIT Student Cable Television, MIT Room 9–026, 77 Massachusetts Avenue, Cambridge, MA 02139. Large packages should be addressed to MIT Student Cable Television, Room 9–026, Building 3 Shipping Room, Cambridge, MA 02139.
