

# 2013 American College Health Association’s National College Health Assessment (NCHA)

In Fall 2013, the Office of Community Development and Substance Abuse and Community Wellness at MIT Medical invited all enrolled students, undergraduate and graduate, to participate in the American College Health Association’s National College Health Assessment (NCHA) survey. The purpose of the survey was to gather information and to help understand how MIT students engage in various components of health and wellness. The survey closed on November 26, 2013, with an overall response rate of 20% (23% for undergraduates and 16% for graduates).

Below is a summary of results. The results in this document were highlighted as the most pertinent questions by the NCHA Planning Group, made up of members of the Office of Community Development and Substance Abuse and Community Wellness at MIT Medical. They are organized into eight sections, as outlined below:

- Section 1: General Health ..... 1
- Section 2: Campus Policy ..... 2
- Section 3: Alcohol & Drugs ..... 4
- Section 4: Mental Health ..... 16
- Section 5: Academic Impact ..... 24
- Section 6: Sexual Health ..... 30
- Section 7: Campus Safety ..... 35
- Section 8: Demographics ..... 37

If you would like the complete set of survey results or for more information about the survey, please contact Aideen Doneski, Senior Project Director for Assessment, Division of Student Life at 617-253-4257 or [adoneski@mit.edu](mailto:adoneski@mit.edu).

General Health

**How would you describe your general health?**

		UG/GRAD		
		UG	GRAD	Total
General Health	Excellent	14%	18%	16%
	Very good	43%	42%	43%
	Good	32%	31%	31%
	Fair	9%	7%	8%
	Poor	2%	1%	1%
