

# Online Volunteer Opportunities

Despite COVID-19, there is still a myriad of volunteer opportunities our members can get involved to help and give back to our broader communities. If anything, now we have the power to directly work with and help those not just in our greater Boston area, but around the world. Below are just a few of the opportunities we encourage you to participate in/organize service events of your own. Please reach out to [Ryan Sander](#) if you have any questions or concerns about completing your service hours.

## 1. Online Tutoring/Mentoring:

- a. [CovEducation](#) (co-founded by MIT TBP's own Tam Nguyen!). Their Facebook page can be found [here](#) as well. This online mentoring/tutoring program helps to provide all K-12 students with access to high-quality education and mentoring services.
- b. [GoPeer](#). Another great online tutoring service for K-12 students - they have a great online volunteer program where you can go and tutor students online as a volunteer! To set up volunteering hours with them, you can apply as a tutor [here](#) and email their volunteer team [here](#).
- c. [Numerade](#). This platform hosts video solutions to textbook problems, and they also host free tutoring for K-12 students. You can sign up to be a volunteer tutor through this Google form [here](#).

## 2. Partnering with MIT Groups:

- a. [Code for Good](#). This MIT organization runs technical consulting programs for a variety of non-profits. Though you may need to apply in order to work with these non-profits, if interested, it is a great way to use your skills to give back.
- b. [Splash](#). Run by MIT ESP, this is another great tutoring/mentoring/teaching service. This is happening the weekend before Thanksgiving (just a heads up: registration for this may already be full).

## 3. Community Outreach/Support:

- a. [Invisible Hands](#). This organization helps by delivering food and other supplies to households with immuno-compromised individuals. You can volunteer with them by [filling out this form](#) (note you can help in-person or remotely, depending on your specific circumstances).
- b. [Translators without Borders](#). This organization partners with people around the world to perform time-sensitive, important translations for medical texts and disaster response.
- c. [UN Online Volunteering](#). Currently, there are several COVID-specific projects through which you can help people struggling with the effects of COVID-19. This organization also focuses on education and empowerment for all.

- d. [GiveCamp](#). At GiveCamp, experts in technology, design, business, and marketing come together and partner with local charities to create technology solutions for their cause. Talented professionals are given the opportunity to give back to the charities that provide so much to the communities we all live in. Together, we create websites, brand identities, marketing strategies, and custom software to improve the lives and efficiencies of local non-profits.
  - e. [Partners for Youths with Disabilities \(PYD\)](#).
4. **Broad Resources:** If none of the opportunities above are of interest to you, please also look into these resources below!
- a. [Volunteer Match](#)
  - b. [Do Something](#)
  - c. [Boston Cares](#)
  - d. [Volunteer Pro](#)
5. **Your own volunteer project:** Have your own volunteer project idea? Please email Ryan Sander at [rmsander@mit.edu](mailto:rmsander@mit.edu) - we would love to learn more about it.
