In Memory

of

William Thompson Sedgwick

1855 - 1921

FOR THIRTY-EIGHT YEARS HE GAVE HIS STRENGTH AND ABILITY TO TECHNOLOGY. HE HELPED TO ESTABLISH TECH TRADITIONS IN THE MOST FORMATIVE PERIOD OF THE INSTITUTE'S HISTORY. HIS NAME WAS ALWAYS INTIMATELY IDENTIFIED WITH ITS PROGRESS AND EXPANSION, AND, WHEN THE END OF HIS ACTIVITY CAME – LIKE TECHNOLOGY'S OTHER GREAT MEN – HE WAS STILL IN THE SERVICE OF THE INSTITUTION TO WHICH HIS LIFE HAD BEEN DEVOTED.

Mirabelli, Babcock, Porter, Luther, Sutherland, Bowman, Smith, Liddell, Howard, Hosmer, Robbins, Burton, Spofford, Porter, Breed.

Professors

CHARLES M. SPOFFORD, AXP; S.B., M. I. T., 1893.
Hayward Professor of Civil Engineering; in charge of the Department. Residence: 61 Colbourne Crescent, Brookline.

DWIGHT PORTER, Ph.B., Yale Scientific School, 1880. Berzelius Society
Professor of Hydraulic and Sanitary Engineering. Residence: 149 Hawthorne Street, Malden.

ALFRED E. BURTON, ΔΚΕ, ΦΒΚ; S.B., Bowdoin, 1878; C.E., 1891; Sc.D., 1913.
Dean of Students; Professor of Topographical Engineering. Residence: 26 Webster Court, Newton Center.

ARTHUR G. ROBBINS, S.B., M. I. T., 1886.
Professor of Topographical Engineering. Residence: 42 Oak Street, Belmont.

CHARLES B. BREED, ΦΣΚ; S.B., M. I. T., 1897.
Professor of Railway and Highway Engineering. Residence: 160 Ocean Street, Lynn.

HAROLD K. BARROWS, S.B., M. I. T., 1895.
Associate Professor of Hydraulic Engineering. Residence: 319 Highland Avenue, Winchester.

GEORGE E. RUSSELL, ΑΤΩ; S.B., M. I. T., 1900.
Associate Professor of Hydraulic Engineering. Residence: 191 Park Avenue, Arlington Heights.

GEORGE L. HOSMER,
Associate Professor of Geodesy. Residence: 280 Washington Street, Woburn.

JOHN W. HOWARD, ΑΧΑ; S.B., M. I. T., 1903.
Assistant Professor of Topographical Engineering. Residence: 147 Grampian Way, Dorchester.

HOWARD B. LUTHER, S.B., M. I. T., 1908; Dipl. Ing.
Assistant Professor of Civil Engineering. Residence: 71 West Cedar Street, Boston.

JOHN B. BABCOCK, 3d, S.B., M. I. T., 1910.
Assistant Professor of Railway Engineering. Residence: 197 Maplewood Street, Watertown.

HALE SUTHERLAND, ΘΧ; A.B., Harvard, 1906; S.B., M. I. T., 1911.
Assistant Professor of Structural Engineering. Residence: 12 Mason Street, Cambridge.

HARRY L. BOWMAN, ΑΤΩ; B.S., Penn State, 1911; S.M., M. I. T., 1914.
Assistant Professor of Structural Engineering. Residence: 51 Irma Avenue, Watertown.

WHO'S WHO OF THE CLASS OF 1922

Prologue

Give heed, Juniors! During the time you have been at the Institute some of you have achieved greatness, others have had it thrust upon them. By means of a general election these celebrities (?) have been brought into the limelight, and their names are herein duly recorded.

Who of the Class of 1922 is

THE MOST POPULAR?

Frank Gage—by a big majority. Our genial class prexy, Heine Horn, was the only other mortal who had a chance.

THE MOST LIKELY TO BE ELECTED TO THE HALL OF FAME?

The Technique Board seems to have a monopoly on all the famous men. Editor-in-Chief Don Carpenter wins, with Business Manager Harry Rockefeller a close second. Here's hoping for the rest of us!

THE LAZIEST?

Goshamighty, what a lot of loafers there are in this class! Ted Miller, H. W. Coughlin, Wesly Thompson, Warren Ferguson and so on *ad infinitum*.

THE MOST VERSATILE?

Frank Gage again—Anyone who can play the piano and cornet, get married and go to the Institute at the same time, most certainly deserves this honor. Jack Liecty's many and varied talents placed him in second position.

THE BIGGEST DUB?

Folinsbee wins, with the summer camp crowd voting in a body for "Tripod" Morgan.

THE MOST SERIOUS-MINDED?

Joe Patty and Bill Russell—Try a deep one on either of them.

THE BEST EXAMPLE OF "WHAT THE WELL-DRESSED MAN SHOULD WEAR"?

Brod Haskell's wonderful assortment of the latest cuts is reported to keep three tailors busy. Phyl Krafft has the next largest number of votes, while Tommy Berlage's w. k. silk tile (see page 135) affords him quite some recognition.

THE MOST POPULAR—WITH THE LADIES?

Dave Minton—It's the way he holds 'em. It is reported that the mere mention of Abbott L. Johnson, 2d has caused many a feminine heart to flutter.

THE MOST PIOUS?

Joe Patty—at least he gets away with it. Ab Johnson gets a lot of credit —since he took on that job with the T. C. A.

RUSS + ?

THE MOST BLASÈ?

Dave again, 'tis said that he merely yawned when asked to go on a party with Irene Bordoni, Theda Bara and Norma Talmadge.

THE BEST NATURED?

"Little Sunshine" Schumacker leads the field, with Geckler and Chuck Brokaw following in order.

THE GROUCHIEST?

Freddy Burt has cracked a smile *once* since he entered the 'Stute. Bob Purinton caught him at it.

THE MOST CONSISTENT WELLESLEY HOUND?

Evidence has been discovered to show that the cards were stacked in this deal, for the final result was as follows: Spaulding, N. O. Robinson, Waugh and Landis in the order named.

THE NERVIEST?

Ed Ash wins all the berries in this event—although what's all this about Ab Johnson down at Smith?

THE MOST POPULAR—WITH HIMSELF?

According to Phyllis it's "The whole d—n class!!," but most of the votes were concentrated upon Appel, Bainbridge and Biddell.

Who Is Our

MOST POPULAR PROF?

The old stand-bys—Eddie Miller, who kills more people in his lectures than are killed in the movies; and Doc Talbot, whose genial good nature and pink carnation always win many votes. We are both surprised and encouraged at the choice of the fellow who picked Prof. Spofford.

FAVORITE ACTRESS?

"If you could care for me," although if it wasn't for Parke Appel's adam's apple, we believe he would have won.

MOST CHEERFUL LIAR?

Art Meling just scrapes in ahead of Ray Rundlett "Of the rosy cheek and Pebeco smile," with the Information Office, Windy Hammond and Gus Higgins tied for third position.

BEST ATHLETE?

Billy MacMahon wins by several laps, with Watts Humphrey and Bill Russell wrestling for second place.

WORST ATHLETE?

There must have been a misdeal here because Clif Gayley was almost unanimously chosen, despite his sterling work as q. b. of Technique's mighty championship eleven.

BOSS POLITICIAN?

Heine Horn must have convinced a great many in order to win this event, while it is rumored that Sid Biddell has had writer's cramp from putting his name on ballots. The Dorms voted solid for Pat Laverty, "The Representative of the common people."

GREATEST BULL ARTIST?

Heine again! He even admits that it is his favorite sport. Nevertheless, the Technique Board doubts if there is anyone who can express himself better by using the longest words in the wrong places than our own Art Meling.

WORST GRIND?

Eastman Smith, Marmon, "Oh, Horrors vitz," and last but not least, The Brown Bag Club.

ARROW COLLAR AD REPRESENTATIVE?

Charley Rudderham, Bill Bainbridge, Luke Walton and A. C. Lippincott were selected in the order named, to be recommended to Cluett, Peabody and Co.

BIGGEST SORE-HEAD?

Any and all writers of anonymous communications, with Sid Biddell and Dyer next in order.

GREATEST TEA HOUND?

Luke Walton and Dave Minton always answer roll call at the Copley and the Brunswick. In fact, they have even been known to arrive before the orchestra. *Now* we know why T. Berlage was absent from all those Board meetings.

MOST CONSISTENT VIOLATOR OF THE EIGHTEENTH AMENDMENT?

Sully or "Bill Noyes + Highball," although it is reported that Pop Soule saw *three* Irene Bordoni's.

CLASS HUMORIST?

Warren Ferguson was made Grinds Editor. Why—We ask you. G. S. McCue and Sam Leland are said to be quite witty at times.

CLASS BOLSHEVIST?

The author of the "Fair Play" article in the Tech wins the fur-lined bath tub; William Schulman, Shedlovsky and Borchgrevink being strong contenders for this honor.

WHAT IS YOUR FAVORITE COLLEGE (EXCLUDING TECH)

FOR—MEN?

Yale wins, with Princeton and Dartmouth tied for second, and Wellesley a good third.

FOR—WOMEN?

It's a toss up between Smith and Wellesley. "Haavad" and Vassar were next in order. "Sadcliffe" afforded a surprise by receiving one vote.

EVER EXPECT TO BECOME AN ENGINEER?

Most of them did—until they came to Tech.

ARE YOU IN FAVOR OF ENFORCING THE EIGHTEENTH AMENDMENT?

"As honest upright citizens of the United States, as men of the highest character, but of course ———."

WHERE IS YOUR FAVORITE HAUNT?

The Fenway, "Walton's Memorial," the Lenox, corner Tremont and Boylston on a windy day and the Copley. One fortunate youth confessed that it was, "Her father's cellar."

GOT A GIRL?

Several of the boys remarked, "No, I share one!" The rest of them seem to be of the opinion that there's safety in numbers.

EVER EXPECT TO BE MARRIED?

Well, Smith says we are "the kind of men they marry."

WHAT IS THE WORST THING YOU'VE DONE SO FAR?

We must have a wild crowd in this class as most of them refused to confess. One bird admitted that he had mistaken Prof. Passano for a janitor.

WHAT COURSE AT THE 'STUTE DO YOU CONSIDER THE BIGGEST JOKE?

Any course with a zero in the preparation column—the joke being on us.

DO YOU THINK ALL WELLESLEY GIRLS ARE GOLD-DIGGERS?

" $99\frac{44}{100}\%$ pure," but as Tom Gill puts it, "It's not the girls' fault that the town possesses an Inn."

WHAT IS YOUR FAVORITE INDOOR SPORT?

It used to be "Bottoms up," but now it's "You take two yeast cakes."

OF WHAT USE IS "THE TECH"?

There are three good reasons why "The Tech" should continue its "Continuous *servive* for 39 years!"

(1) To furnish a football team to be annually beaten by Technique.
(2) To afford an outlet for the writers of anonymous communications.
(3) "A banquet now and then is relished by the best of men."

WHAT IS YOUR FAVORITE LITERATURE?

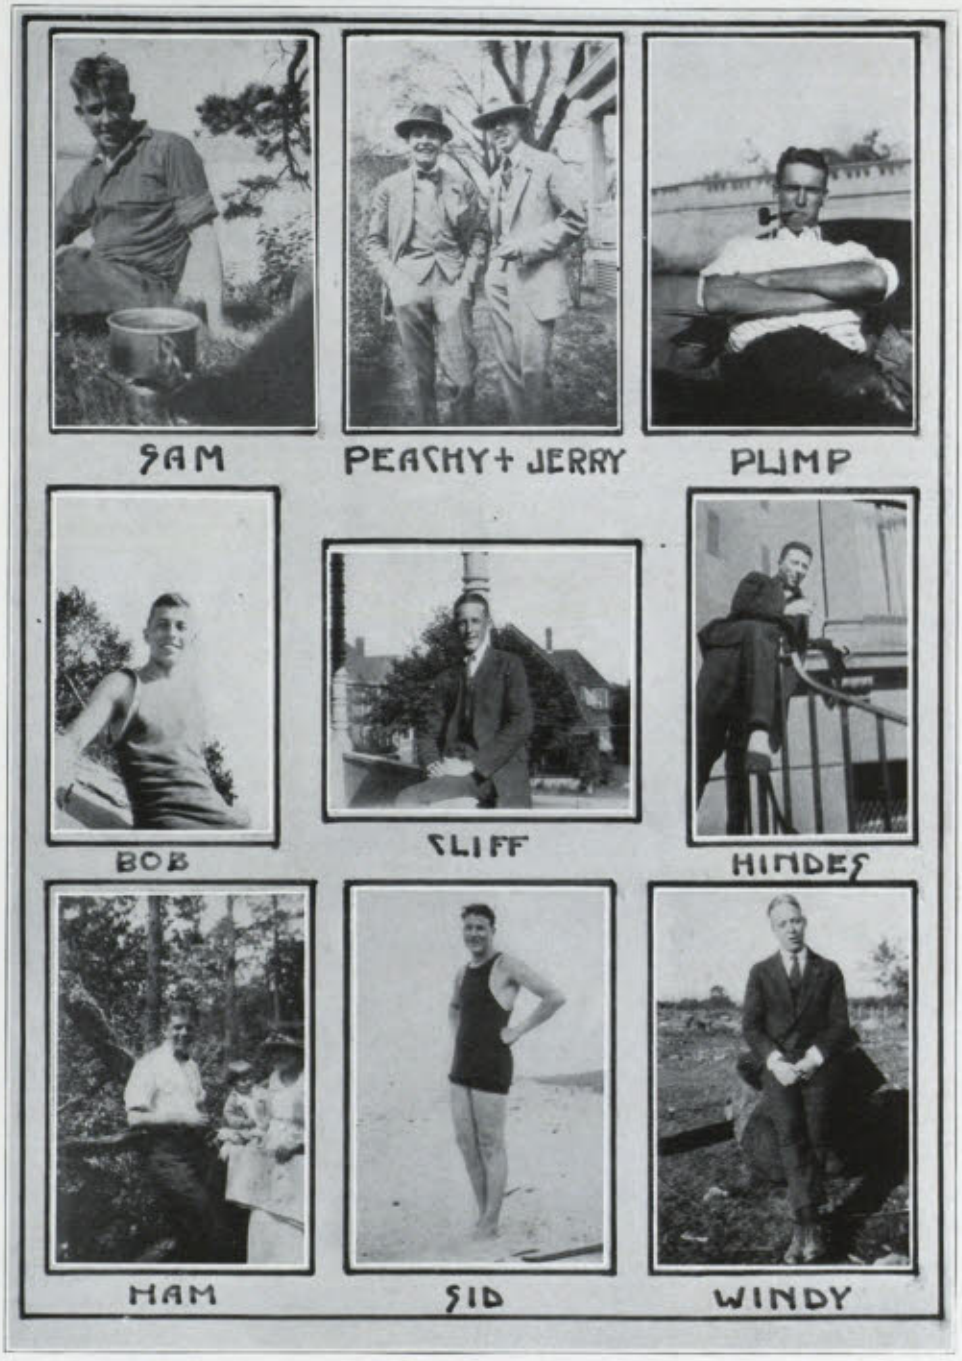

C'est La Vie, the Voo Doo and the Police Gazette, although those little notes from Father, "Pay to the order of - - - -," are extremely popular.

WHAT IS YOUR WILDEST AMBITION?

There seems to be nothing so wild as to dream of getting a degree—some day. Many expressed rather tame desires such as bumming a Camel from the Dean or discovering how much money Prof. Dewey rattles during the Economics Lectures. One little son of a gun wants to be the only man in the world, while Phyllis wishes to "Sit on the lap of The Sphinx." Tut! Tut! Phyllis.

Epilogue

Juniors, you have "seen yourselves as your classmates see you," and if you find that they have trodden upon a pet corn or else raked up some spectre of the past which you thought had long since been forgotten, tuck it away in the back of your head to tell to your grandchildren, or else to use as an antidote when you finally become Head of the Course in Steam Boilers.

"For the promotion and support of athletics by the undergraduate body."

Frank M. Kanaly

Frank M. Kanaly, Technology's track coach and physical director, came to the Institute in 1907 and since that time has been instrumental in bringing the Institute teams to the fore in intercollegiate competitions. Mr. Kanaly, before entering the professional ranks, gained reknown as a track athlete, competing against the leading stars of his day. During his career as an amateur, he won twenty-two firsts, seven seconds, and four thirds in all events from one hundred yards to ten miles.

After serving two years each at Colby, Noble and Greenough and Tufts, he accepted the position of athletic coach at the Young Men's Gymnastic Club in New Orleans. He could not, however, become acclimated to the South and returned to Boston in 1907. At that time, Technology was without a track coach and the authorities were fortunate enough to secure his services. The splendid showing of the track teams of recent years is evidence of the ability of their mentor. Four New England Track and Field Championships in the past four years is, in itself, a tribute to Frank Kanaly whose personality has gained him a host of friends, not only in the athletic world, but in the student body as well.

Sanfrid K. Johnson

Doctor Sanfrid K. Johnson, or "Doc" as he is more familiarly known to Institute men, has been trainer of Technology's track teams since 1911 and has, to a large degree, been responsible for their showing. His kindly advice and good nature have caused him to be held in high esteem by those with whom he comes in contact. Several times during the past season, his ability to keep the men in the pink of condition has been demonstrated. Despite severe weather conditions, the team finished in the lead in the New England Intercollegiates and the Cross-Country team experienced little difficulty in overcoming their opponents by reason of their superior condition.

Review of the Track Season

With several former stars as a nucleus, the management called for candidates in the early spring, and Coach Kanaly immediately proceeded to round out a well-balanced team, weak only in the hurdles. Under his careful tutelage, Technology athletes managed to carry off the New England Intercollegiate title for the fourth consecutive time. This in itself bespeaks the successful season the team enjoyed.

April 16. By placing first, second and third in the final event, the discus throw, the Juniors managed to nose out the Sophomores in the Annual Spring Meet at Tech Field, and won the athletic honors of Junior Week by a score of 69–62. The Freshmen were third with 22 points, while the Seniors brought up hopelessly in the rear with a lone tally. Although hampered by adverse weather conditions which slowed up the track, Bossert '21 equaled the M. I. T. A. A. record of $10\frac{1}{5}$ seconds in the 100-yard dash. In the field events, Dandrow '21 broke his own record in the hammer throw, heaving the weight 139 feet. Hile '22 with two firsts in the hurdle events, starred for the Sophomores.

April 30 and May 1. Technology was well represented at the Penn Relays held in Philadelphia on April 30th and May 1st, and managed to carry off honors in three events. On Saturday, the day of the finals, Dandrow, who had performed consistently all during the year in the weights, took first place in the 56-pound event with a throw of 29 feet $\frac{3}{4}$ inch. MacMahon finished third in the three-mile run after struggling most of the way for the lead with Nightingale of New

Hampshire and Montague, the English star. The Sprint Medley Relay team, consisting of Gurney, Chittick, Stone and Bardes, finished fourth in the American College medley relay championship, running against the leading teams of the country.

On May 10, Harvard's track team won from Technology in a driving rain on Tech Field. The Harvard athletes managed to pile up a total of 65½ points against Technology's 51½. Gourdin of Harvard accounted for thirteen of his team's total of 65½ points, and was easily the star of the meet. Dandrow turned in the best Tech total with eight to his credit. Hayes '21 broke the M. I. T. A. A. record in the 100-yard dash by covering the distance in 10 seconds flat. In the quarter, Spitz '21 was hard pressed by Chittick '22 and Downey '21, but managed to cross the tape in the lead, Technology taking all three places. Dandrow '21 in the hammer, Ash '20 in the high jump, and Poole '22 in the 220-yard dash were the other first place winners for M. I. T.

Coming back strong despite the poor showing in the trials on Friday, May 21st, and adverse weather conditions, Technology won the thirty-fourth annual New England Intercollegiates for the fourth consecutive time, thereby strengthening her claims to the Major Briggs Trophy. Wading through a sea of mud, the Technology athletes piled up a total of 33 points, barely defeating Brown, who finished a close second, with 30. After the trials on Friday in which Technology placed only twelve men to Brown's fifteen, the outcome was in doubt. However, in the down-pour on Saturday, M. I. T. carried off four firsts, three seconds, a third, and three fourths. In the track events, Bossert '21 won the 100-yard dash, and in the 220, Poole '22 broke the tape barely ahead of Downey '21, who finished second. Driscoll, the Boston College star, won the quarter-mile in 52 2/5 seconds, which was good time considering the adverse weather conditions. Bardes '21 repeated his performance of last year by placing fourth in the half-mile. The two-mile race proved to be the thriller of the afternoon. For lap after lap, MacMahon '22 and Brown of Williams fought for position until the final turn, when Brown edged by and crossed the tape in the lead.

Carleton H. Talcott '21, *Manager*

Garvin Bowden '21, *Captain*

It was in the field events that Technology showed its strength and was enabled to come home a winner. Dandrow '21 broke his own M. I. T. A. A. mark in the 16-pound hammer throw with a heave of 143 feet 1½ inch. Kellar '22 captured the other first by a throw of 122 feet 1⅞ inch in the discus. Raymond '22 also repeated his performance of last year by taking second in the hammer. Ash '21 tied for second in the high jump, rounding out M. I. T.'s scoring for the day.

May 28 and 29. At the I. C. A. A. A. A. meet at Franklin Field, Philadelphia, Dandrow and MacMahon, two of Technology's star performers, accounted for M. I. T.'s total of seven points. Dandrow was the only man entered in the hammer throw who could afford any opposition to Merchant of California. The latter won the event with a toss of 159 feet 2¾ inches, 5 feet 2¾ inches better than the effort of the Technology entry. In the two-mile run, MacMahon continued his spectacular work of the season by finishing a good third behind Swede of Princeton. He was timed at 9 minutes 31 3/5 seconds, incidentally, the best time ever turned in by a Tech man.

THE 1920 cross-country season proved to be one of the most successful in the history of athletic events at M. I. T. Under the tutelage of Coach Kanaly, the team defeated Harvard and Dartmouth in dual runs, won the New England title, and finished a good third in the intercollegiate cross-country run at New Haven. Captain MacMahon '22 gained added laurels during the season, and by reason of his fine running rated among the first five distance men in collegiate

ranks. Stone '21 and Flanders '22 performed consistently during the season and with the addition of Hendrie '23 formed the nucleus of a point getting team. Sanborn '22, with the handicap of a bad leg, was forced to remain out of a majority of the meets. He returns next year in the capacity of captain.

The season opened early in October with the annual 5-mile handicap run over the Wakefield course. Sanborn '22 and Vadner '22 tied for first place and the former was awarded the Benson Cup, by reason of having the smaller handicap. Captain MacMahon '22 covered the course in 29 minutes, 37 seconds and won the Nye Cup for the best actual time.

The first intercollegiate meet was held on October 22, over the Belmont course, with Harvard as opponents. The team, however, experienced little difficulty in defeating Harvard by the score of 17 to 40. On October 30, the team journeyed to Hanover, N. H., and barely managed to defeat Dartmouth 27–28. The New England Intercollegiate followed this meet and Technology made up for the defeat of last year by finishing first among the twelve colleges running.

On November 20, in the morning before the Yale-Harvard football game, the team rounded out a successful season by placing third in the I. C. A. A. A. A. at New Haven. Although Stone '21 and Robbins '21 will be lost by graduation, and MacMahon '22 because of the three-year eligibility rule, prospects are exceedingly bright for next year. With the return of Sanborn '22 and the addition of several promising freshmen, these vacancies will not be felt as much as might be expected.

Harvard Meet

The dual cross-country meet with Harvard on Oct. 22 brought forth the strength of the Technology team when they placed four out of the five individual winners. MacMahon '22 gained the individual honors by covering the course in 34 minutes, 45 seconds. He was closely followed by Captain-elect Sanborn '22, who managed to finish barely ahead of Flanders '22. Start of the Dual Meet with Harvard.

Bemis was the first Harvard man to score, crossing the line three-fifths of a second later than the third Technology man. Hendrie '23, running his first race on the varsity, captured fifth place.

Dartmouth Meet On October 30, Technology won the second dual meet of the season, defeating Dartmouth over the difficult Hanover course by the narrow margin of one point. Coakley of Dartmouth won first place by defeating Captain MacMahon '22. The run was a series of individual duals between team members, and it was only because Technology was able to win the larger number of these duals that they won the meet. Hendrie '23 and Robbins '21, by defeating their men, scored the points necessary to bring victory to the Institute team. Sanborn '22 accompanied the team to Dartmouth, but was not allowed to run because of his injured leg, McIntire '22 taking his place.

New England Intercollegiates The cross-country team reached the height of a successful season on November 13th, when they won the eighth annual New England Intercollegiates at Franklin Park. An evenly balanced team made the victory possible. Bates, which finished second, was defeated by a margin of twenty-two points. New Hampshire State, running without the services of their former star, Nightingale, failed to come even within reaching distance of repeating their performance of a year ago. Captain MacMahon '22 again starred for Technology and finished in second place after leading most of the way. Flanders '22 and Stone '21 also finished among the first ten. Hennessy '22 scored his first points of the year, finishing twenty-fifth. Cecil Leath of New Hampshire State, who had been picked by many to win the race in view of his showing last year, when he finished second to Nightingale, was lost from the start, and finished in thirty-second place.

Captain-elect Sanborn running second in Harvard Meet.

I. C. A. A. A. A. Meet On November 20, the season closed with the annual intercollegiate run at New Haven, in which Technology sprang a surprise by finishing in third place, ahead of Pennsylvania State, Yale, Syracuse, Harvard and Pennsylvania. Captain MacMahon '22 rounded out a successful career by finishing in fifth place. Flanders '22, Stone '21, and Hendrie '23 again placed well up in the field. Hennessy '22 ran his best race of the season and was in great part responsible for Technology's showing.

Robertson of Technology was barely beaten out by Shaeffer of Harvard for first place. On November 20th, the team journeyed to New Haven, where they placed seventh. Captain Spurdle was the first Technology man to score.

SWIMMING

1920 Season

The 1920 Swimming Season, while not as successful as in previous years, turned out as well as could be expected under the circumstances. The team experienced the same old handicap, the lack of a pool, and, as in past years, used the Boston Y. M. C. A. pool for home meets. Previous to the past year, the Institute team had suffered only one defeat in four years, and that at the hands of Yale, the Intercollegiate champions. A heavy schedule was arranged, but due to the suspension of Institute activities because of President Maclaurin's death, the meet with Pennsylvania was cancelled. A heavy snowfall and the consequent tie-up of railway traffic prevented the team from reaching Northampton, and the meet with Amherst was cancelled.

Springfield Meet The opening meet of the year was held at Springfield against the Y. M. C. A. team, and resulted in a victory for Technology by the score of 36–17. Captain Greene '21 was the individual star, winning the 220-yard swim and placing second to Weber '22 in the 100-yard race. Colton '22 won the 40-yard dash, while Stalbird '22 with a plunge of 60 feet in 49 seconds won the plunge. The Relay Team, composed of Greene'21, Mc Grath '22, Young '21, and Colton '22, experienced little difficulty in winning its event.

Wesleyan Meet On Saturday, Feb. 7th, the Institute team won its second meet of the season by defeating Wesleyan at Middletown 30–20. Technology presented a well-balanced team and placed in all the events. Captain Greene '21 again won the 220-yard swim with comparative ease, and Stalbird '22 bettered his plunge of the week previous by covering the 60 feet in 39 seconds. Purinton '22 won the fancy dive. Williams of Wesleyan starred, scoring first in both the 40 and 100-yard swims.

Yale Meet For the second consecutive year, the strong Yale team defeated the Institute swimmers by the score of 39–11. With probably the strongest aggregation of stars ever representing a team in recent years, Yale experienced little difficulty in winning the meet. Meagher of Yale broke the tank record by plunging 73½ ft. in 60 seconds, which was easily the feature of the meet. In the opening event of the meet, the relay race, Yale crossed the line a winner, but was not awarded the event because a Yale man fouled by not touching the end of the tank. Yale having won by quite a margin, the judges decided the only fair way, instead of disqualifying them, was to race over again. Yale then won by

default. Biddell placed second in the 220-yard swim and third in the 100-yard race, while Captain Greene '21 trailed him in the 220.

Credit should be given Captain Greene for his untiring efforts in the interest of the team and to Manager McKay '21 for the attractive schedule he arranged. Geckler '22 successfully carried on the work where McKay left off when the latter was forced to resign because of the pressure of outside duties.

The season of 1920 marked another advancement in the establishment of crew as a permanent sport at the Institute. Although the schedule was light, the development of the varsity crew was pronounced, and towards the end of the season the eight gave evidences of its power. The 1920 season began in January, with work on the machines and board track, and the call for candidates was answered by men from all classes. Since the action of the Advisory Council in voting that the Field Day Crew Race should count in the final score, increased interest in the sport has been manifested. As soon as the ice had broken in the river and the long cold spell was over, "Pat" Manning had the crews take to the river, and under his careful guidance a strong varsity crew was developed.

The season opened May 15th at Lake Quinsigamond, Worcester, when the varsity shell met the two Norton Club crews over a mile and a half course. Technology took the lead at the start, and was never in danger, crossing the finish line three lengths ahead of the first Norton crew. The crew was awarded a silver cup for its victory.

Captain Jakobson

The second race of the year, scheduled with the Union Boat Club of Boston, had to be called off because of inclement weather conditions. The final event of the year was an informal race with the Harvard Varsity over the Charles River Course. The race was close throughout, the Harvard shell crossing the line about a quarter of a shell length in the lead. No time was taken.

Manager-elect Davis

The season of 1920, while not bringing fruitful results in the form of victories, did prove that material is available for turning out a winning combination. Due to the kindness of Mr. A. L. Stevens, the crews were allowed the use of his launch, which aided materially in the coaching.

1920 Varsity Crew

Crew is on the upward path, and at the present time plans are under way for the purchase of the boathouse for the interests of crew as a sport and the undergraduate body as a whole. If the proper interest is shown by the undergraduates it will not be long before Technology will be represented in races with major colleges.

FIELD DAY

FIELD DAY

ON Friday, the 5th of November, the day set for the twentieth Annual Field Day, the Class of 1923 managed in a last attempt to gain the privilege of having their numerals engraved upon the cup. Although the final score of 13–0 seems to indicate a decisive defeat, however, it was not without a strenuous struggle in which two records were shattered that the Freshmen finally succumbed. Early in the morning of the 5th, the pennants of the two classes floated from the flagstaffs in Lowell and du Pont Courts, but it was not until late afternoon that the Class of 1923 by means of the time-honored event proved themselves superior.

All teams showed the result of careful coaching and earnest endeavor. William W. Russell '22 took charge of the freshman football team, with Henry Baldwin '21 acting in the same capacity for the 1923 eleven.

Second pull of Tug-of-War

The 1923 and 1924 Tug-of-War teams were coached by J. D. Crosby '21 and Ralph C. Geckler '22 respectively, while Coach Kanaly and Pat Manning directed the training of the relay teams and crews. As in previous years, the different events were allotted points as follows:

Crew Race	3 points
Tug-of-War	2 points
Football	4 points
Relay Race	4 points
Total	13 points

The Crew Race At one-thirty the two crews took to their shells and rowed to the start just below the Cottage Farm Bridge. The weather conditions were none too good, a high wind causing rough water. Both shells got away to a good start and were followed downstream by the "John Harvard," containing Referee Haines, other officials and newspaper men. As the crews approached the Harvard Bridge the 1923 shell seemed to be a trifle in the lead. 1924 quickened its stroke and from then on it was a toss-up as to which was leading. About 100 yards from the finish the Sophomore shell raised its stroke and crossed the line a scant eighth of a length ahead, covering the course in 5 minutes, 38⅘ seconds. This time cut down the previous record one and one-fifth seconds and started the Sophomores off with a three-point lead.

The Tug-of-War As soon as the stands were filled after the crew race, the two tug-of-war teams manned the ropes. Both teams were evenly matched as to weight with the Sophomores having the advantage of previous experience. The Freshmen, however, did away with this advantage by pulling their opponents over the line after a long tussle lasting 2 minutes, 20⅜ seconds. Incidentally, the first pull proved to be the longest of the afternoon.

The Football Game The Sophomores easily defeated their opponents in the annual football game, scoring 25 points, thereby establishing a new record. The light Freshman line experienced difficulty in stopping the attack of 1923 and were completely outplayed. Captain Metcalf, the Sophomore leader, played a brilliant game. He scored two touchdowns, a goal after touchdown, and was responsible for most of the long gains. Brantingham at quarter, Duane at half, and Bastian at end, also played good football.

Kemp, the Freshman full back, was one of the mainstays of his team. He and Captain Taylor were the only 1924 backs who were able to gain. Evans at end also played a stellar game, time and again breaking through the opposing interference and throwing the backs for a loss.

The Game—First Quarter

1923 won the toss and elected to receive. On the kickoff, Metcalf '23 received the ball on the 15-yard line and ran it back 18 yards before he was downed. Duane '23 made 5 yards on an off tackle play and Metcalf made it first down with a gain of 10 yards around end. The 1924 line held on the next 3 downs and gained possession of the ball after Cronin '23 made 5 yards through tackle. Kemp '24 fumbled, the ball being recovered by the Sophomores, who made 9 yards only to be penalized for offside. Metcalf's attempted drop failed and it was the Freshmen's ball on their 30-yard line. Taylor '24 fumbled and again a Sophomore recovered. Cronin '23 gained 2 yards on the next 2 plays, and a pass from Cronin '23 to Duane '23 netted 5 more. Metcalf failed to gain the required distance on the next play and Kemp '24 kicked out of danger, Brantingham '23 being downed in his tracks at midfield. Duane '23 and Metcalf made 20 yards between them on the next 3 plays and Metcalf, standing on the 24-yard line, again failed in a try for field goal. The ball was brought out to the 20-yard line. The Freshmen

Crews nearing finish line

were penalized for offside and punted on the next play to their own 30-yard line. Another penalty for 1924 gave the Sophomores 5 yards, Metcalf made 3, but was penalized 15 yards on the next play for hurdling. Metcalf '23 from a fake kick formation circled left end for 25 yards and made 5 more through tackle on the next 2 plays. The whistle blew, ending the first period, with 1923 in possession of the ball on the Freshmen's 4-yard line.

Second Quarter

Brantingham '23 made a yard through center, and on the next play Captain Metcalf went through guard and tackle for a touchdown. He also kicked the goal. 1923 kicked off, and the Freshmen, failing to gain through the line, kicked out of bounds at midfield. Metcalf '23 and Brantingham '23 made 3 yards apiece. A penalty for 1924 and a 10-yard gain by Duane '23 brought the ball to the 33-yard line. Cronin fumbled on the next play, but Earle '23 recovered for the Sophomores. Metcalf '23 circled right end for 17 yards and Duane brought the ball to the 5-yard line by a line buck. Metcalf '23 made 3 through guard and on the next play Brantingham scored the second touchdown of the day. Metcalf '23 failed to kick the goal. 1923 again kicked off and the Freshmen surrendered the ball to the Sophomores on their 42-yard line after failing to make first down. Richards '23 took Metcalf's place at fullback. On an exchange of punts, the Sophomores blocked a kick and Bastian '23 recovering, ran the ball to the 5-yard line before being downed. Cronin '23 made 2 yards through tackle and the whistle blew, ending the half.

Tug-of-War Second Pull The second pull of tug-of-war was held between the halves of the football game. The Sophomores turned the tables and

managed this time to pull their opponents over the line in 1 minute, 19⅘ seconds, thereby evening up the account.

Third Quarter

Football Game Second Half

1923 opened the second half by kicking off, and Bastian '23 left end, fell on the ball back of the goal line, adding another touchdown for the Sophomores. The attempt at goal failed. After the next kickoff the Freshmen opened up with an aerial attack, passes by Taylor '24 to Evans '24 and Davidson '24 netting 20 and 30 yards respectively. However, on the next 4 plays, the Sophomore backs broke up the passes and gained the ball on their own 20-yard line. Metcalf 23 made 7 yards and on the next play, while attempting to punt, was thrown by Evans '24 for a 20-yard loss. Stand-

ing behind his own goal line, the Sophomore captain then punted out of danger. The play alternated in midfield for the remainder of the quarter.

Fourth Quarter

Duane '23 opened the final period with a 17-yard run on a fake pass formation. Further gains were stopped, however, and the ball went to 1924 on the 20-yard line. Kemp '24 made 15 yards on the next 2 plays and kicked to midfield. Substitutions for both sides were frequent. The Sophomores then started a march down field, Metcalf gaining 15 yards, Brantingham 7, Cronin 20, Metcalf '23, finally carrying the ball over the line for the final touchdown of the day. Metcalf '23 failed at try for goal. After an exchange of punts and a 20-yard gain on a short pass from Brantingham '23 to Goulon '23 the game ended with the ball in 1923's possession on the 7-yard line.

1923 . . . 25 1924 . . . 0

Tug-of-War Final Pull At the close of the football game, the tug-of-war teams took the field and the Sophomores quickly showed their superiority by winning the final pull in 44⅜ seconds.

Relay Race As in the year previous, but with conditions reversed, the Sophomores took the lead in the relay race and gradually increased this lead, the last man finishing 150 yards ahead of the Freshman anchor man. Bruner of the Sophomores got away to a good start and never once was the result questioned. If it had not been for poor passing of the baton by both teams, the final time might have approached the record held by 1921.

INSTITUTE ACTIVITIES

ALL-TECHNOLOGY SMOKER

THE All-Technology Smoker was again the first event of importance to the undergraduates this fall. Ostensibly for the purpose of welcoming the Class of 1924 to the Institute, the real object of the Smoker was to boom undergraduate activities, and to awaken interest in them among wider circles of students. The attractions were about the same as the previous year, consisting of feature boxing and wrestling bouts, for which the committee unsuccessfully tried to secure the services of Georges Carpentier as referee, and various games of chance, with cigarettes as prizes.

The committee in charge was headed by Winter Dean '21, assisted by Fred Burt '22, and the heads of the various activities. It handled the large crowds very efficiently, and its work contributed largely to the success of the smoker. On account of the large number of students, the dinner was served in three relays, during which time the bouts were conducted in the gymnasium by Mr. Fitzpatrick, who has been the foremost patron of Technology boxing. After dinner, every one returned to the main dining room, where speeches and movies were given.

R. H. Smithwick '21, president of the Senior Class, began the speeches by giving a brief talk on the necessity of promoting the social side of Institute life, as offered by the various activities. Speeches were then made by the general managers and presidents of the different organizations, and between them several acts were given by Frank Gage '22, and other members of last year's Tech Show cast. During the movies, music was furnished by Walton's orchestra.

Dean Burton was the final speaker of the evening. He warned the students against taking too much of the encouragement and advice given during the evening to heart, and trying out for too many activities. He urged, however, that every student become connected with an organization, as he had noticed in his forty years' experience that the men most successful were those who, while at the Institute, were connected with some undergraduate activity. He spoke about Field Day in conclusion, and praised it as the best means for settling the rivalry between the two lower classes. After the singing of the Stein Song, the smoker ended.

The All-Technology Smoker has proved itself to be such an indispensable item, that it seems well on the way to becoming a fixture in the undergraduate year. The smokers in the last few years have been notably successful, and it is to be hoped that they will continue to fill with equal success the necessary position they now occupy.

TECH NIGHT COMMITTEE

Irving Daniel Jakobson, *Chairman*

Alexander Duer Harvey Charles Edmund Brokaw

TECH Night is well known to every Tech student as one of the few times in the year when he goes out with his fellow-students to enjoy a show. This event occurs yearly after Field Day, and is considered by many the best part of the day. A committee composed of two Seniors and a Junior is appointed each fall by the Institute Committee. These three men have charge of picking the show, making the arrangements with the theater management, and selling the seats to the students.

"The Passing Show of 1920" was at first selected, but arrangements fell through. The committee then secured "As You Were" at the Wilbur as the Tech Night performance. The choice was a very good one, and all who attended, enjoyed the performance heartily. The company entered into the spirit of the evening, and no unpleasantness marred the affair. Irene Bordoni's popularity increased several hundred per cent after the performance, as was clearly evident in the vote for favorite actress on the Technique statistics ballots.

Special Events of the Year

Since the ending of the war, the Institute has been host to quite a few prominent men. The first of these guests last spring was General Wood, who while touring the East as a Presidential candidate, spoke at a mass meeting of the students.

Shortly after General Wood's visit, Professor Sedgwick sailed to England as our first exchange professor since the war. He was associated with the Universities of Cambridge and Leeds, and also attended the Conference of the Royal Institute of Health in Brussels.

Probably the most important event was the selection of Dr. Elihu Thomson of the General Electric Company as Acting President of the Institute, to fill the vacancy left by the death of the late Dr. Maclaurin. He took office last spring, and has been fulfilling all the duties of the President, except that the actual running of the Institute has been left in the hands of the Administrative Committee.

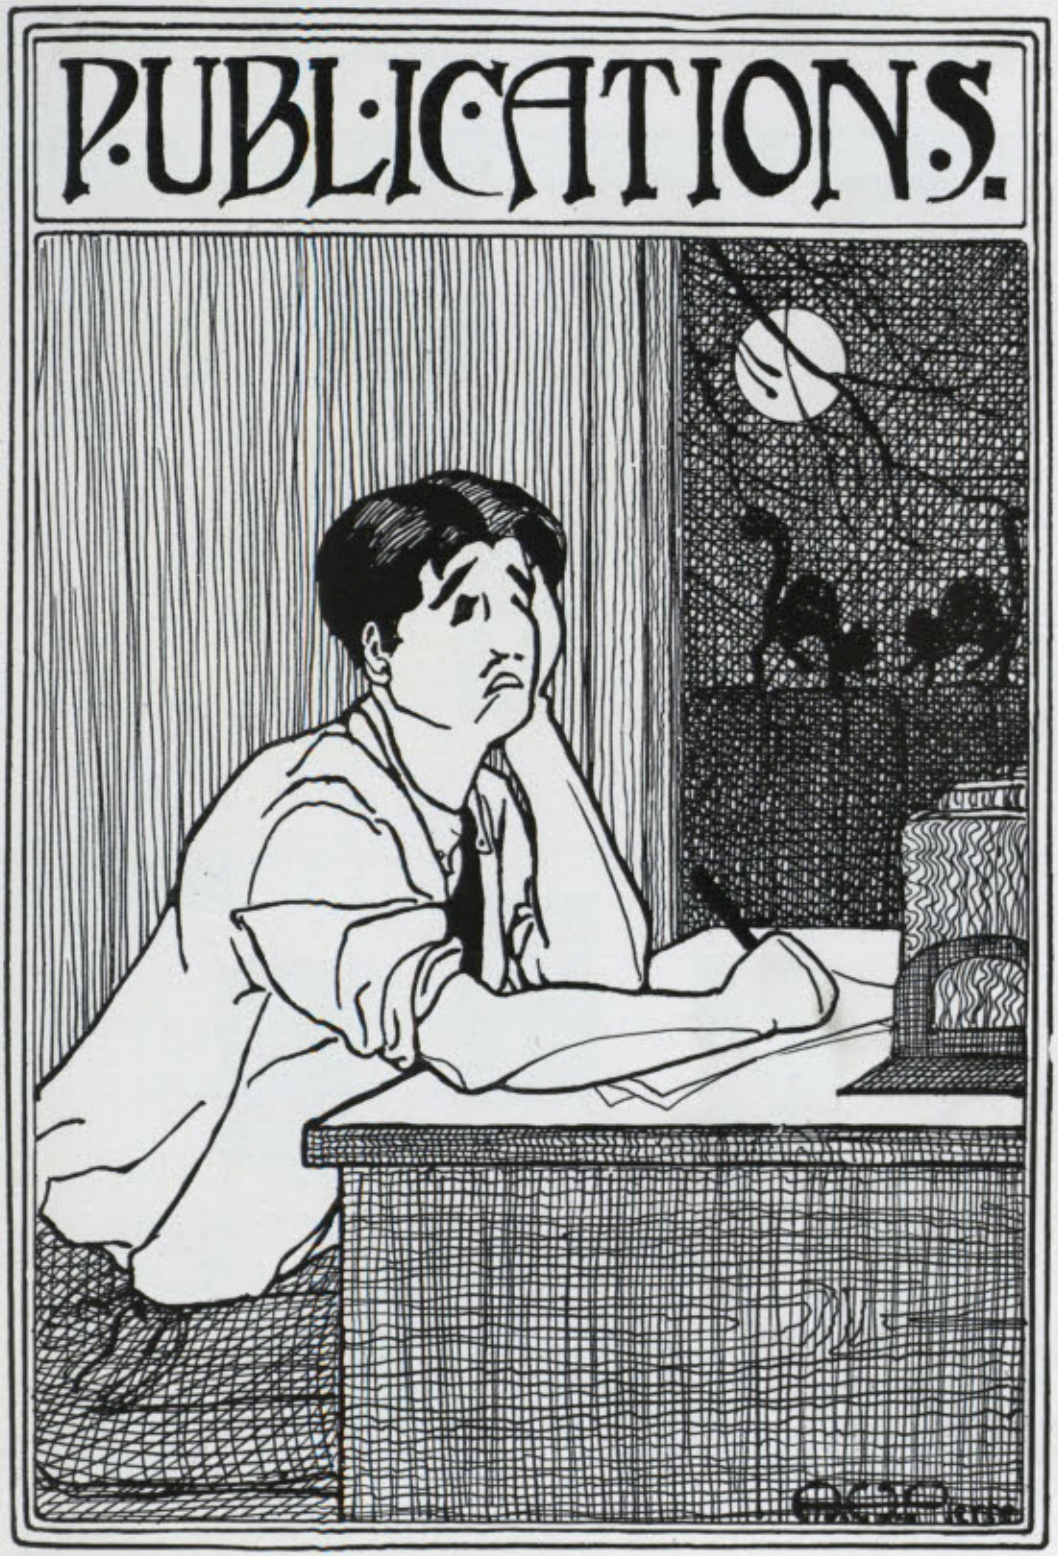

The first convocation since the war was called this November, when Dr. Henry Suzzallo, President of the University of Washington, was invited to speak on "The Working Code of the College Man." It has been the custom in the past for two or three such meetings to be held each year, at which prominent men have addressed the faculty and students, and it is to be hoped that this convocation will begin the revival of this custom.

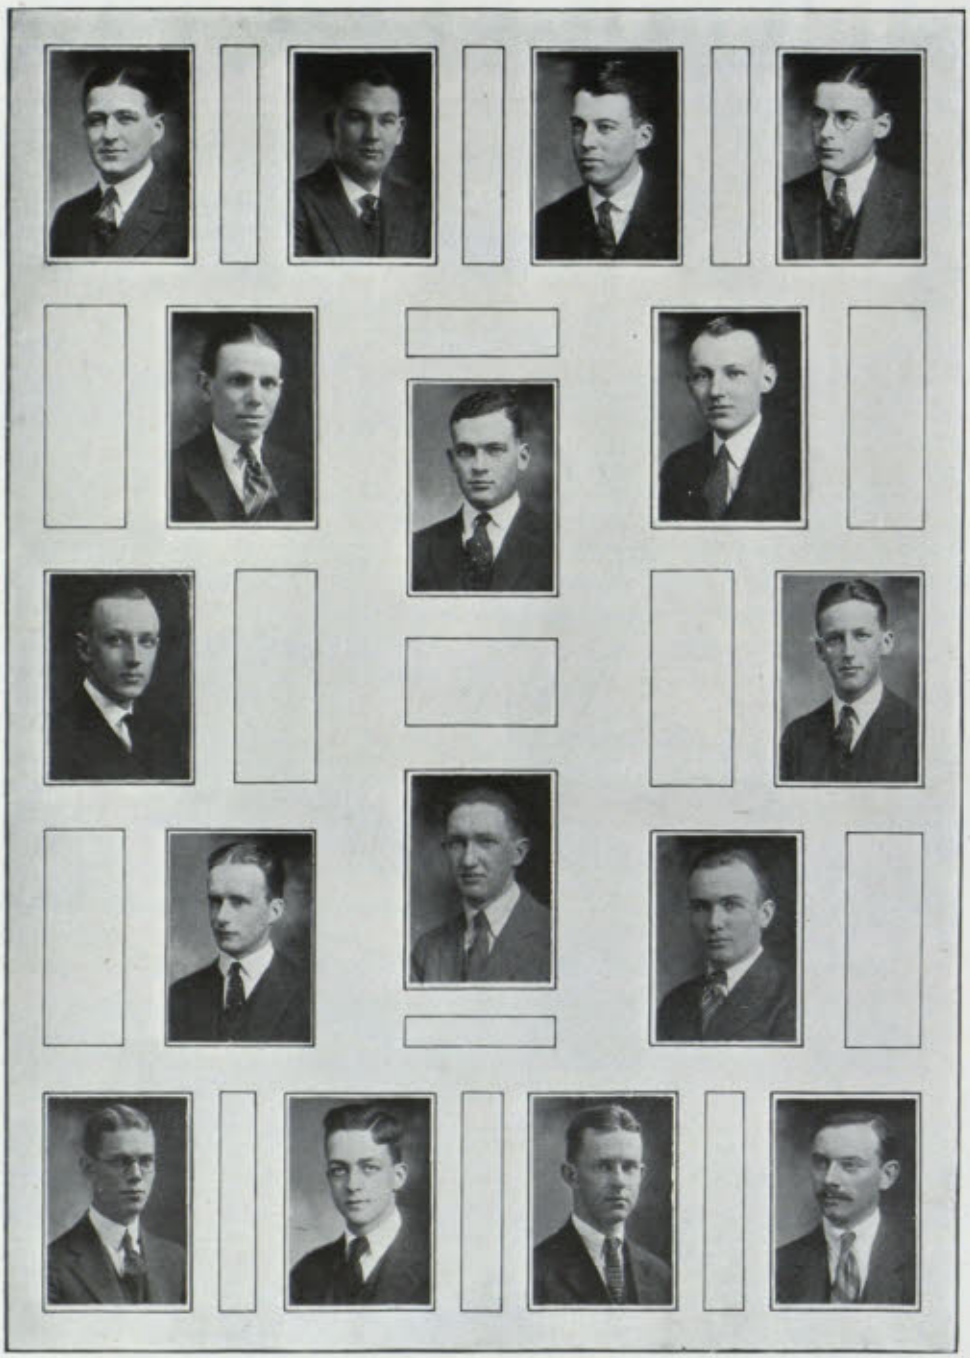

A couple of weeks later, the Georgia delegation of 125 prominent Georgians was entertained at the Institute, with an inspection of the buildings, and a luncheon at which Vice-President-elect Coolidge, Dr. Walker, Governor Dorsey of Georgia, and President Matheson of Georgia Tech were the speakers.

Work has been going on in the Pratt Memorial all year, and the building should be ready for the Naval Architects next fall. In the line of improvements, the Walker Memorial dining hall has been turned over to the management of the Georgian cafeteria since the beginning of the second term, as the Institute had been running it at a decided loss.

Technology will again play the host this April when the Intercollegiate Conference on student government will be held at the Institute. Forty-five colleges have been invited, and about seventy-five delegates are expected to attend.

Because of the lack of any periodical suitable for the publication of scientific and engineering articles, Volume XXXIX of The Tech established The Tech Engineering News. The paper is published and edited solely by undergraduates, under the direction of the Managing Board of The Tech. It is issued monthly from October to June.

The paper occupies a unique position among student publications, as it is the only one of just its type on record. Its purpose is to serve as a medium of exchange for ideas between the alumni and undergraduates. It brings matters of value to the attention of the students, and carries to the alumni and to the world at large, knowledge of what Technology men have done and are doing, both at the Institute, and in science, commerce and industry.

THE BENCHMARK

A new appreciation by college students of the opportunities in civil engineering and the increased post-war demand for worthy and well-qualified civil engineers resulted in the 1920 Summer Camp's being the largest in the history of Camp Technology. The Camp merited some permanent student record of its growth and progress, and there appeared, with the hearty co-operation of every man in camp, THE BENCHMARK NO. 1.

It has been the intention of the Editors to present in this first Camp annual a permanent memoir of Summer Surveying Camp. If they have met with any success, it has largely been due to the prompt and willing response of Faculty and Students when called upon for assistance. Their greatest ambition will have been realized if in their effort they have succeeded in establishing a permanent datum upon which better and more worthwhile books can be founded in succeeding years.

COUNCILORS

Dean Alfred E. Burton — Ralph Morris — Prof. Joseph Lipka

THE purpose of the Cosmopolitan Club is to unite for their mutual benefit, social and intellectual, Technology men of all nationalities, and to promote that breadth of view, open-mindedness, and sympathy, which are characteristic of the "citizen of the world."

March 1, 1920 was the tenth anniversary of the founding of the club. Gorton James '10 was active in forming the organization, and the first president was Christiansen, a Norwegian. Dean Burton was one of the first councilors, and has always been an interested member.

The next president was an Englishman from New Zealand. Under his leadership, the system of national chairmen was started, composed of representatives appointed from each country having three or more members. These chairmen arranged entertainments of a national character, which were presented for the benefits of all the students in the Old Technology Union on Trinity Place.

In 1912, these entertainments were continued to the pleasure and profit of all who attended. In 1914, the club affiliated with the Corda Fratres Association of Cosmopolitan Clubs, which inc ludes clubs in the largest institutions in the United States and Europe.

The first American president was elected in 1916. Under his successor, the club took part in the annual convention of the Corda Fratres Association, which was held this time at Harvard. During 1918, meetings were held to discuss international questions.

The Cosmopolitan Club is the official organization of the foreign students at the Institute, and has a representative on the Institute committee. Besides more than 250 students from other countries, half as many more of the members may be American citizens. The intercourse of these future leaders of our people with the picked youth of foreign lands should do much to help cement our friendly relations with other countries in the future.

JUNIOR WEEK

TECHNIQUE RUSH

TECHNIQUE Rush was, as usual, the opening feature of Junior Week, and was witnessed by a large number of undergraduates and guests. It was distinguished by several novelties which had not appeared in any previous rush. Handbills distributed that morning to those arriving for their nine o'clock classes announced for the first time that an aeroplane would feature in the Rush. This was the special feature of the event, the plane being used to drop the first shingle in the form of a tennis ball with streamers attached.

At four o'clock, the Technique 1921 Board, headed by Editor-in-Chief R. H. Smithwick, appeared on the field carrying an eleven-foot reproduction of the book. The procession was headed by a remarkable collection of musicians who called themselves the Technique Band. The Board deposited the book at the entrance of the lobby, and entered the enclosure to conduct the Rush. Smithwick then announced the rules governing the contest, and informed the crowd that F. M. Gill '20 and W. H. Irwin '21 had won the Grinds and Statistics competitions respectively. Soon after, the aeroplane appeared overhead and passed over the court, dropping the ball, which fell into the hands of P. C. Putnam '23. All returned immediately to the enclosure, and the signal was given for the commencement of the Rush.

For the next twenty-five minutes the hut was the center of a panting, seething mass, which alternately crawled up and was pulled down from its sides. Now and then groups of students would rush forward and hurl one of their number onto the top of the hut, while in the middle of the fight, big "Red" Bouis was able to reach up over the top into the slot out of which the shingles were passed. The contestants were soon streaked with red grease, which had been spread on top and it became evident that many had lost considerable portions of their shirts and trousers. On account of its intensity, the struggle became rather long drawn out until finally it was all the contestants could do to hang on to each other. After the last paddle was given out, the books were distributed to eager throngs in the lobby.

TECH SHOW

TECH Show 1921, "The Purple Dragon," is a musical comedy in two acts. The scene of the first act is laid in the Italian terrace of a suburban New York villa, where Mavis Churchill, owner of "The Purple Dragon," an inn in Greenwich Village, is giving a house party. Mavis may be fast, but nevertheless, she has good connections, as her cousin married the dear old Professor of the equally dear old Institute.

Among the guests at the house party are Sylvia Vernon, a wild, wild vamp, who does reporting for "Town Topics" on the side, and her brother Gerald, whose bashfulness is only exceeded by his sister's forwardness. Also, there is Lucille Hendryx, an ingenue from the Antwerp roof. *And, last but not least, the Mysterious Menace!*

Upon the serenity of this party suddenly breaks in Reginald Marston, a close friend of Lucille. Reginald's grandfather has died recently, leaving a will. Said will states in painfully direct terms that Reggie will inherit a large and tempting sum of money providing he stays for one year on a Vermont farm. Otherwise, the money goes to persons unknown. The executor of the will is the Professor, who is Reggie's uncle. At the opening of the first act two weeks have elapsed since the will was probated, and Reggie, unable to stand the strain of the simple life, is dashing back to New York as fast as he possibly can.

An Altercation

He travels by motor and the road takes him by the walls of Mavis' estate. As he is passing, he catches sight of Lucille, and stops. Naturally, he does not wish to be seen, especially when he learns that it was Mavis' cousin whom the Professor married not so long ago. His chief aim in life now is to avoid the Professor and all his relations. *Will the Mysterious Menace assist him?*

Incidentally, Mavis has a few troubles to look after. She had, in a momentary lapse from Bohemianism, married Jaynes, who is the leading light of the Cut Glass Brassiere Co. of Schenectady, and has spent the time thence in regretting the move. So finally, she sent him out to Reno to get a divorce, thereby giving Sylvia a chance to start a scandal. *Will the Mysterious Menace thwart her plans?*

Sylvia knew Mavis' lawyer, who was of the opinion that the divorce libel would not be allowed, so she intended to force Gerald into making love arduously, and more or less publicly, to Mavis, where she could drop in and surprise them. Afterwards, of course, explanations could be easily made and none would be the worse.

Meanwhile, Susan and Mavis have been devising ways of bringing the Professor down a notch or two. Mavis is giving a masquerade ball at the "Dragon" the night that the play opens. The idea which is finally decided on is this: Mavis will obtain a young woman about Susan's build. Said young woman will pick up the Professor when he returns, and get from him a bid to the ball, at which she will be recognized by some special costume. Then Susan will wear that costume. *But perhaps the Mysterious Menace will interfere?*

Mavis, under threat of exposure to Reggie, forces Lucille to be the bait. Lucille is known as the Dragon girl on the stage, because she sings the song, "The Purple Dragon." Very naturally, she is introduced to the Professor by

her stage name, and the costume agreed upon is that of the "Dragon Girl." The act closes with all the guests preparing for the masquerade, and the Professor sending a telegram, destination not mentioned. *Does this telegram concern the Mysterious Menace?*

Mavis and the Professor

Act Two opens in "The Purple Dragon" that night, just before the party starts. The Professor has received an answer to his telegram, which states merely "Address Unknown," having come from Vermont. The Professor then goes back to his hotel to dress. Going out, he barely misses Reggie, who comes in in a state of great agitation, having seen the Professor at the Biltmore shortly after leaving Mavis' country place.

Mavis, however, cheers him up with the assurance that the Professor would never be in Greenwich Village, much less at an inn like the "Dragon," and so he goes on with the party. *Will the Mysterious Menace intrude?*

Gerald, as well as Reggie, is having his troubles. Sylvia has given him his orders to start making love to Mavis that evening, and so, much as it hurts his sense of propriety, he proceeds to do so. When things are getting fairly well warmed up, however, and Sylvia is about ready to break in with the flashlight powder and the notebook, something happens. The door opens and in walks the missing husband, just like that. He says he had wired that afternoon, has been looking all over for Mavis, can't imagine where his telegram has gone.

Then Gerald remembers he took a wire for Mavis that afternoon, and had intended giving it to her ever since, but it had somehow slipped his mind. He produces the telegram and opens it. It says merely "Granted. New York at 6," but that under the circumstances, is sufficient, and Gerald collapses. The commotion attracts Sylvia, who is waiting outside, and she comes in to find the scandal gone and with it her job. To make things worse, Gerald announces that he really loves Mavis and is going to marry her, despite free love and the village. There is only one thing for Sylvia to do, and she does it, annexing the ex-husband as a forfeit for her failure.

Sylvia

Presently, the hour of midnight arrives, and since the Professor has incriminated himself rather badly with his partner, whom he still thinks is the woman to whom he was introduced at the party, the unmasking is apt to have many potent possibilities. *Will the identity of the Mysterious Menace be revealed?*

But the Professor gets fooled, for his wife forgives him for all his indiscretions of the past two hours, and after he recovers from the shock of finding that

M. Johnson, *Author*

he had committed the one unpardonable sin of making love to his wife, he rallies bravely, turns around, and sees Reggie.

Reggie naturally turns to flee, but the Professor stops him, and explains to him why he is in New York; the reason being that his lawyers had sent him a hurry call, requesting his immediate presence as the executor of the Marston will. He had called at their offices that afternoon and had discovered that a codicil had been found, which absolutely nullified the farm clause that kept Reggie in Vermont. So Reggie gets the fortune, and with it Lucille.

And, oh yes, the Mysterious Menace! Why, he is only a Technology student gone insane from trying to figure out his Physics' mark.

Tech Show 1921 is coached by Mr. Charles H. Hillman, a man of wide and varied experience in the theatrical world. As usual, Miss Virginia Tanner directs the ballet, as she has done for several years past. The co-eds are to be thanked for the design and execution of the costumes.

DORMITORIES.

FAR atop the stark, stolid walls of our glorious Institute's main buildings, standing apart and above like fathers to their little children, are the names of the world's most famous piano tuners and organ grinders — Aristotle, Copernicus, Lavoisier, and a host of others.

A pace down the esplanade, standing not so high and lofty, on not so imposing a structure, perhaps, as our aforementioned m. b. are the names of four other men — Atkinson, Runkle, Holman, and Nichols.

And the names of these men will stand longer than Technology stands, which will be pretty long provided the engineers who built the buildings studied well their fourth-year structures, for these names are associated with the one bit of college life that Technology boasts. By these names are known the four domitory halls which we have at the present time. These, the originals, will live on even as the spirit for which they stand will live on.

Who can say after he has been three years out of Tech whether Colombo or Pluto discovered Nujol. But who can forget what hall won the basketball championship, when the splinters of the gym floor keep sticking in his knee to remind him of that basket he all but shot.

The beautiful "L" those dorms form is the handiest thing in the world for yelling across to Bill in Holman to see if he checks you to the fourth place in the fundamentals of Thermo-Economics, or how to build a powerful railway out of H_2S.

The grass plot in front of the Deke house was converted into a living Yale Bowl early last fall when the Dorm football candidates reported for first practice and ran through their signals to the great discontent of passing autoists whose tooting Klaxons gave a real threat to that sweeping end run which nearly landed the runner in the well-known Charles.

Perhaps the best known activities to which the Dorms lend their fair name are the Dorm dances held in Walker as often as Tom Gill can get a girl, which is usually now and then. The scramble for pasteboards in those affairs would rival in magnitude the rush on one Chuck Ponzi, whose theories are better known to us than those of Billy Einstein, popular third-sucker of the Three-I-League-Imbibe, Indulge, and Inundate. Those dances are by far the most popular parties that grace the Walker dining-room-ball-room, of course. They usually occur on Friday night, and cause an unusually high mortality in nine o'clock classes on Saturday morning. The Tavern opens late that morning and puts out several hats-full of eggs, doughnuts, blueberry pie, and blank steaks between 9:04 and 9:05.

The Tavern is a great and wonderful Dorm institution, singularly, peculiarly, and uniquely a Dorm institution y'understand. Its glories have been sung before by our bards in poetry, song, and story, and so we'll let the Tavern off unscathed this time.

There are one hundred and sixty-nine fellows living in the Dorms this year. The total registration at the beginning of the first term was thirty-five hundred and twenty-eight. The point is almost too obvious to assert. Tech needs more Dorms, and Tech is going to build them soon, and enough of them so that eventually all the student body will be housed in dormitories. Then there will be other names to take their places along with Runkle, Atkinson, Holman and Nichols, and live in the minds of Tech men everywhere.

AS soon as the committee chairmen were elected, they made preparations for a successful season, and that was just what it was. The baseball team started practice, and in a short time, had a good, working organization. The first game was played in the fog and rain on August 14 against Camp Machias and resulted in a 10 to 6 victory for our fellows. The second game was played on August 26 and resulted in another victory for the Camp, this time not so decisive, the score being 7–5. Captain Howlett, Hayes, Liecty, and Hewes played well in both contests. A Camp League was organized, composed of two teams. One game was played, resulting in a victory for Group 2, who held their opponents to a 9–3 score. Before the League was formed, two informal teams, playing under the titles of the Dirty Thirty and the Nasty Nine had two matches in which the Thirty triumphed by tallies of 9–5 and 20–12.

ON Labor Day morning, a meet was held to determine the best all-around athlete in camp. Eleven men entered the nine event meet, and so close was the contest that the outcome was not certain until the last one was run off. Al Hayes, with four firsts and two seconds, beat out Hennessy by one point. The Pentathlon scoring system was used.

Social activities were ushered in by a dance on August 21, when the good ship TECH brought twenty-three girls and a punch bowl across the lake. The dance was held in the tastefully decorated drafting room, which was camouflaged by cedar. An exceptionally large number of visitors came up to the camp on Labor Day, when the customary Open House was held.

Jack Liecty, as Chairman of the Entertainment Committee, began preparations for the Minstrel Show at the beginning of camp and in order to show off some of the exceptional talent in our midst, independent acts were included. The preparations were carried out under unfavorable conditions, and a lot of credit is due to Jack Liecty for the success of the performance.

The Show was given on September 11 in the Town Hall of East Machias, and was enjoyed by a large number of the inhabitants. It wasn't long after this that exams came off, and then the time came to pack up our duds, and go home. The experiences, the activities, and most of all the friendships formed had made the summer one never to be forgotten.

Mining Camp

Whether or not Prof. Johnny Howard took us to the Green Mountain State on the chance that we might harmonize with our surroundings is quite aside from the question. The fact remains that we did spend some little time in Vermont, after leaving East Machias, and enjoyed it immensely.

While the weekdays contained work enough for the best of us, we rested over the Sabbath. One such idle Sunday morning we sauntered twenty miles in the wake of Mr. Boydell searching an elusive granite outcrop. After some hours we came upon our prey, but owing to the limited strength of Johansen's back, rather than to any unwillingness on his part, we were able to bring only part of it back to the bunk house.

Out of regard for next year's delegation, we spent one entire morning with soap and brush making the mine as presentable as possible. It was tedious work, but it was quite a satisfaction to feel that we had done the job well, and now, with the addition of a few Chinese rugs and cut glass chandeliers, Pike Hill mine will be all that even a coal miner could desire.

The baccalaureate sermon, the first event of Senior Week, was delivered by the Rev. George C. Gibbs '00 in the New Old South Church, on Sunday afternoon, June 6. The service, though simple, was impressive, and consisted of an opening prayer, a few hymns, the sermon, and the benediction. In the sermon, Mr. Gibbs explained how his Technology training had given him a broader vision, and he concluded by paying a tribute to the late Dr. Maclaurin.

Two hundred and fifty seniors took in the picnic which took place Tuesday. A boat conveyed the class to Pemberton, where baseball and swimming contests were held in the morning. Having worked up their appetities in this manner, the picnickers enjoyed a shore dinner. At five o'clock, the party took trolleys to Nantasket, where it remained until conveyed home by a special boat at ten-thirty.

The class dinner was held at the Boston City Club the next evening. Norris G. Abbott, President of the class, acted as toastmaster, and introduced the speakers.

The first was Dr. Dewey, who paid a tribute to the late Dr. Maclaurin. Dean Burton then gave a short address in which he praised the Class of 1920 for reviving and continuing the traditions of the Institute after the war. After the dinner, a short business meeting was held, at which Kenneth F. Akers was elected permanent secretary of the class.

The Class Day exercises were held in Walker Memorial on Thursday afternoon. They commenced with the entrance of the class by courses. There followed addresses by the Class President, Norris G. Abbott, Jr., and the first marshal, Kenneth F. Akers. The presentation speech was made by Hobart O. Davidson, and the class gift, a picture of the late Dr. Maclaurin, was accepted by R. H. Smithwick on behalf of the student body.

Frederick W. Boley then announced some interesting statistics about the class of 1920, and informed those present that Eddie Miller was the class choice for President. Robert D. Patterson and Merrill B. Knox gave a clever sketch showing a student at the various stages in Institute life. The Senior quartet, Dorr, Braaten, Davidson, and Wilson rendered several selections. Take-offs on some of the professors were given next, after which came the singing of the Class parody, written by John H. Coyle, and the exercises concluded with the Stein Song. The Senior dance was held from 8:30 to 1 that evening in Walker Memorial, and was attended by most of the class.

COMMENCEMENT

The Seniors met again in Walker Memorial on Friday afternoon for their graduation exercises, which were distinctive in the absence of caps and gowns. Dr. Elihu Thomson, acting President of the Institute, gave the address and presented the 399 degrees. Five of these were awarded for Doctor of Philosophy, 3 for Doctor of Science, 48 for Master of Science, and 343 for Bachelor of Science.

The following representative theses were read:

CIVIL ENGINEERING — Leland David Wilson
"The Development of the Port of Bridgeport."

MECHANICAL ENGINEERING — Hobart Oakes Davidson and William Farnham Dewey
"The Fractional Separation of Cement by Elutriation."

ELECTRICAL ENGINEERING — Irwin Likely Moore, Ernest George Bangratz, James Howard Becker and Charles Joel Farist
"Electrification of the Suburban Zone of the New Haven Railroad."

SANITARY ENGINEERING — Harold Raymond Kepner
"The Sewage Disposal Problem of New York City."

ELECTROCHEMICAL ENGINEERING — Raymond Ronald Ridgway
"The Electrolytic Production of Chromates from Ferrochromium."

ENGINEERING ADMINISTRATION — Harland Alexander Gray and Monroe Charles Shakespeare
"The Layout of a Small Carburetor Manufacturing Plant."

After the distribution of degrees, the names of the 1920 men who died in the service were read, while all stood reverently. There were seven in all, their names

being Francis Pratt Breck, Halmer Carleton Chidsey, William Kay Bond Emerson, Jr., William Russell Handy, Thomas Cushman Nathan, and Ermond Albert Taylor. After the graduation, a reception was held in the faculty room. The closing event of Senior Week occurred that evening, when the new alumni and many old ones attended Tech Night at the Pops, Symphony Hall.

The fourth Technology Reunion was the first gathering of the Alumni since the war, its principal object being to get the Alumni Association into working order. It also afforded opportunities for the old graduates to mingle with their classmates and to learn about the progress of the Institute. The idea of the committee in charge was to make the Reunion "Old Home Week at Tech," and this idea was kept in mind in laying the plans.

J. W. Rollins '78
Chairman Reunion Committee

The morning of the first day was devoted to the registration of the returning Alumni and to the inspection of buildings, while a band concert was given in the Great Court. Registration figures show that 736 Alumni were present at the various functions, and with the guests present, the number at Reunion came very close to 1200. The oldest class in the Institute, that of '68, was represented by Professor Emeritus R. H. Richards, who is probably the only living member of the class. The class with the largest number of men was '17, while '07 claimed the honor of having the member who had traveled farthest to a Reunion, as John Chadwick of that class had come all the way from Chile.

Commemoration

Introduction by Coleman du Pont '84, retiring President of the Alumni Association.

"Progress and Achievements of the Institute" by Dr. Charles Winslow, Professor of Public Health at Yale University.

"Dr. Maclaurin's Service as President" by Dr. Elihu Thomson, Acting President of the Institute.

"Dr. Maclaurin as a Colleague" by Dr. Ernest F. Nichols, formerly of Columbia University.

"A Personal Appreciation of Dr. Maclaurin" by Dr. George A. Gordon, of the New Old South Church.

"The Institute's Soldiers in the Great War," by Col. Henry M. Waite '90

The first meeting of Reunion, held on Monday afternoon, was known as the Commemoration meeting, and was held for the special purpose of paying tribute to the late Dr. Maclaurin, and to the Technology men in the service. Coleman du Pont '84 presided at the meeting, and in his introductory speech, he announced that George Eastman had consented to have the Great Court named Eastman Court.

The first speaker, Dr. Winslow, of the class of '98, praised the work of Technology's three great presidents, Rogers, Walker, and Maclaurin. He stated that Dr. Rogers dreamed a dream, he saw in his mind the great future of Technology, Dr. Walker brought forward the ideas in a compelling manner — but, it remained for Dr. Maclaurin, strong and resourceful, to create facts. Dr. Thomson told how Dr. Maclaurin came to the Institute at a critical time in its history, and by means of his faith in the growth of Technology, and his broad views, brought the Institute to its present high level. In the concluding speech, Colonel Waite cited the accomplishments of the Institute in training men during the war, and said that the Alumni could well be proud of its record.

The same evening, the classes held banquets at the various clubs and hotels in town, the City Club being the most popular. The first ten classes combined, while the others had separate dinners, all of which were the scenes of enthusiastic Tech spirit. The S. S. Jack o' Lantern had been chartered for the evening, and many availed themselves of the opportunity to dance.

Alumni Meeting

The Alumni meeting Tuesday morning set a precedent in Reunions, and was held for the purpose of discussing "The Present and Future of Technology." Dr. Walker began the discussion by outlining the Technology Plan, and stated that contracts had been made with 190 firms. Mr. Metcalf, the president-elect of the Alumni Association, spoke on the "Future of the Alumni Association." He brought up the idea of having an Alumni Director, whose chief function would be to keep the different bodies of Alumni in touch with each other. The undergraduate speakers were F. B. Kittredge '21, who spoke on the student tax; R. F. Officer '21 on athletics; R. A. St. Laurent '21 on publications, and W. R. McKenney '20 on the need for new dormitories. After the meeting, Course Luncheons were held in the department rooms. That afternoon, General and Mrs. du Pont entertained the visiting ladies at a tea at the Brookline Country Club.

Grand Banquet

The last formal event of the Alumni Reunion was the grand banquet at Walker Memorial Tuesday evening. Coleman duPont presided and introduced the speakers. The first speech was by Channing Cox, the Lieutenant-Governor of Massachusetts, who welcomed the Alumni to the state. Next came the chief speech of the evening, by Sir Auckland Geddes, the British Ambassador. He congratulated the Alumni on having such excellent buildings, and on the fine spirit in their organization which made the new Technology possible. Dr. Talbot, head of the Administrative Committee of the Institute, reviewed the work of the committee during the past year, and explained the changes which had been accomplished. Dr. Laurence Lowell, president of Harvard University, spoke next on the differences between European and American methods of education. General du Pont then introduced his successor as president of the Alumni Association, Leonard K. Metcalf '92, who delivered the closing address.

Picnic

On Wednesday, over six hundred graduates and friends took the all-day trip to Plymouth. The journey was made both ways by boat, and on the return journey stunts were performed by the various class groups, the one which received the most applause being a parody on one of the popular songs by the class of '01. This picnic was the closing event of Reunion.

The three-day gathering was considered a great success both by the committee in charge and those who attended. The graduates showed themselves heartily in favor of the Technology Plan and the Alumni Director idea, and all enjoyed their three-day stay at Tech.

THE ALUMNI ASSOCIATION

THE ALUMNI ASSOCIATION of the Massachusetts Institute of Technology was founded in 1876. Professor Robert H. Richards was the first President and Professor George S. Swain was the first Secretary. The Association continued in the original form of organization, having but one general meeting of the Association yearly for thirty-three years.

In 1909, the Association of Class Secretaries, which had been formed by calling together the Secretaries of the various classes, conferred with the Executive Committee of the Alumni Association in regard to forming a more formally organized governing board of the Alumni Association. As a result of this conference, the Constitution of the Alumni Association was changed and it was provided that an Alumni Council be formed which is made up of representatives of each of the classes, of ten representatives at large — five of them being elected each year for two years, with the five latest living ex-presidents and an executive committee of the officers of the Association with four additional members — two being elected each year.

Since the foundation of the Council, monthly meetings during the school year have been held. Important problems have been considered by the Alumni Association through the Council. It has proposed the establishment of certain courses in the Institute. It has arranged for a summer camp and has, through a committee, furnished the Institute the Summer Camp of Civil Engineering.

Another function of the Alumni Association is to nominate each year three term members to the Corporation, who are elected by the Corporation and serve for five years as representatives. The Association presents to the alumni twice as many names as there are vacancies to be filled and by letter ballot the Association nominates as many as there are vacancies and presents them as nominations of the Alumni Association to the Corporation for Election.

A subsidiary to the Alumni Association is the Technology Clubs Associated, which is an organization of Local Societies and it is planned that annually reunions be held at different points, but every five years an All-Technology Reunion be held at the Institute.

THE TECHNOLOGY REVIEW

THE TECHNOLOGY REVIEW was founded in 1899 as the official organ of the Alumni Association and the cumulative record of the more important events in the history of the Institute. The emphasis has, however, been usually more in the direction of keeping the members of the Association in touch with each other. For this reason, a great deal of space is usually given to the class notes and the news sent in from the local associations throughout the United States and, indeed, the world.

The first editor of the Review was Arthur Thomas Hopkins '97. Others who have edited the paper are James P. Monroe '82, now secretary to the corporation; Walter Humphreys '97, and until the summer of 1917, "Ike" Litchfield '85, who was for several years, as Field Secretary and general promoter of Tech spirit, one of the most popular of the Alumni. After his splendid work in organizing the Jubilee Dedication Reunion of 1916, on the outbreak of the war he went to Washington as an important member of the war Labor Board.

On his resignation the present incumbent, though not a Technology graduate, took charge and has carried it on since with the constant and valuable assistance of many of the Alumni. The Review, during the war years, found it impossible to carry on its former scheme of monthly numbers, so it was cut down to a quarterly, which attempts to sum up and digest all that is of immediate or permanent importance either at the Institute or in the alumni world. The current news was left to the Tech, under alumni supervision, to deal with.

For economy, two years ago, the Review adopted a new type page, smaller type, wider margins, less decorative white paper. But the activities of the alumni have grown to such an extent, during the war and since, and there is so much to record every quarter, that the issue is at present nearly double in number of pages of preceding editions. The College year 1919–1920 gave the Review a peculiarly important task of furnishing some of the publicity and recording the progress both for the Educational Endowment Fund campaign, and for the All-Technology Reunion in June of last year, in connection with which the Alumni Association issued the Technology War Record Book and a new list of occupation and addresses of former students. The numbers at Technology are growing so, the recent classes of the alumni display so much activity, the whole question of covering the field is assuming such importance, that in the fulness of time it well may be advisable to consider an Alumni Weekly, like the other great Eastern Universities. But until then the Review follows with increasing difficulty the good old proved traditions of "Jimmie" Monroe and "Ike" Litchfield.

By the time Technique is published it is to be hoped that the Alumni Association will have once more a General Manager or a Field Secretary, who will devote all his time to the alumni activities, and especially will be so able to awake and interest and organize the scattered Technology men that the Review will take on a new lease of life and become again the indispensable source of information concerning all things Technological.

ELECTORAL COMMITTEE

THE Electoral Committee is composed of twenty-five members who are elected by popular vote from the Sophomore Class at the beginning of the second term. The President of the Class is Chairman ex-officio of the Committee, which also has a Vice-Chairman and a Secretary-Treasurer. Meetings are held three times a week until the Board of Publication of Technique for the following year is elected.

The positions on the Board which are filled by elections by the Committee are Editor-in-Chief, Business Manager, Treasurer, two Associate Business Managers, Societies Editor, Athletic Editor, Portfolio Editor, Statistics Editor, Photographic Editor, Grinds Editor, Faculty Editor, Art Editor, and two Associate Art Editors. The four men in the business department and the three art editors are chosen by competitions run by the previous Board and recommended to the Committee. The position of Associate Editor was created by the 1922 Board. All members of the Board must be elected by a three-quarters vote. The Editor-in-Chief becomes Chairman of the Electoral Committee as soon as he is elected.

THE "middle name" of the Technology Christian Association is service—service to anyone, anywhere, anyway, anytime, regardless of creed or color. Not a penny is charged for services rendered. These are the high spots of this service.

ROOMS	1300 Technology men were furnished with rooms
HANDBOOKS	1500 Handbooks were distributed containing useful information about M. I. T. and the surrounding community
EMPLOYMENT BUREAU	$18,136 worth of work was given to 476 different men
BOOK EXCHANGE	$1925 worth of books were sold to and for students
FRESHMAN ADVISORS	460 Freshmen were furnished with advisors
BOYS' WORK	19 men served weekly in Greater Boston as leaders in Boys' Work
INDUSTRIAL SERVICE	22 fellows gave time weekly in factories, etc., to the human side of engineering
FOREIGN STUDENTS	254 foreign students in the "Stute" are from 37 different countries. Special attention was shown these men by a special department.
CHURCH RELATIONS	26 churches within 1½ miles' radius of Tech were furnished with names of students of their denominations. Sunday attendance and young peoples' work is promoted
OFFICE	9.00 to 5.30 the office is open daily in Walker. The General Secretary or some person is there to be of assistance to anyone.

• FRATERNITIES •

THE purpose of the Inter-Fraternity Conference is to promote the interests of the Massachusetts Institute of Technology, to regulate and control the common interests of the fraternities at Technology, and to create a better feeling and a more general acquaintance among the fraternities and between fraternity and non-fraternity men.

This purpose is carried out in many different ways. It has been customary in the past to award a prize to the fraternity having the best scholarship record in the past year, the prize consisting of a clock which remains in the possession of the chapter as long as it continues to uphold the highest record in the following years. The faculty has been glad to co-operate with the Conference in this matter by issuing to it the official marks upon which the ratings of the chapters are based. Among other things, inter-fraternity sports are arranged by the Conference for each year. The most popular sports have undoubtedly been baseball and bowling, but basketball also promises this year to spring into prominence. The support of basketball has been very enthusiastic among the chapters and some lively games are expected. Football has unfortunately been omitted from the list of fraternity athletics. Handsome cups are awarded to the champions.

Inter-fraternity sports on the whole have been exceedingly well supported, probably on account of the little time which the men have to devote to Institute athletics. Exchange dinners are also arranged for, and through these an opportunity is offered to the chapters to visit one another and become better acquainted. Last, but not least, are the inter-fraternity dances, which promise to become very popular. The dances held in the past have been a great success, and the enthusiasm among the fraternities this year prophesies an even greater success.

GRINDS

GREETINGS

LAST spring I was sentenced by that famous Political Machine, known as the Technique Electoral Committee, to serve one year in the bug house collecting such stuff as might be considered funny enough to crack the frozen faces of our fellow students.

Every now and then some new nut would arrive at this world-famed dump and set his minus quantity of brain matter to work.

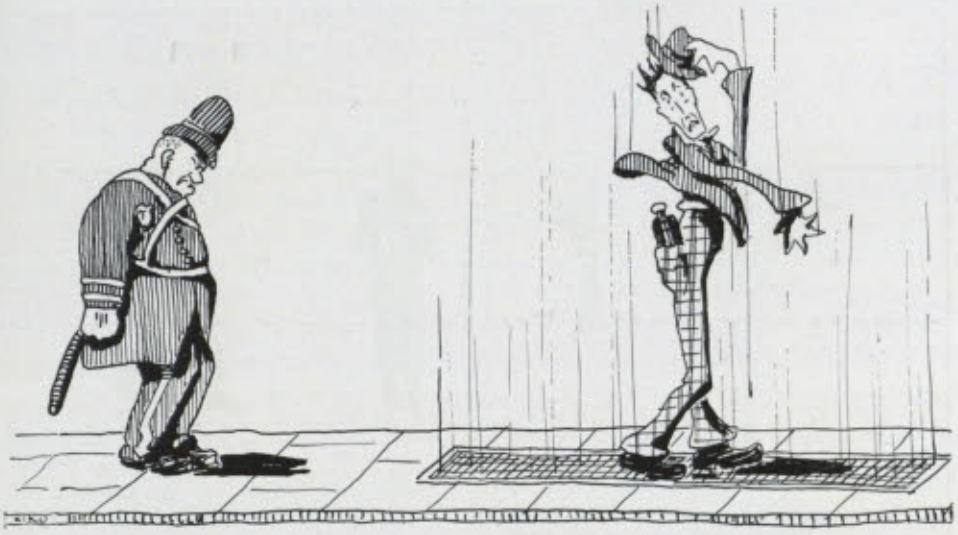

We are a foolish gang; you know it; we know it; it's no secret; so if we appear a bit queer in these pages, please have pity on us, we can't help it.

As usual, we will make use of some of the standard jokes, such as harvard, the Prof's, our lunch rooms, otherwise known as clubhouses of that famous society, "I Eat In Fear," and many others too old to mention in such an undisguised form, but they will be there.

We will endeavor to distribute a few good knocks among our friends. We hope they will be felt by as many as possible because we do not wish to show any partiality toward our fellows of the learned world not even the Profs.

Now then, before commencing to read this section, try and place yourself in our world of comics, where a smile is as good as a mile and a tear is surely a crime. Cast off your grouch, forget there ever was such junk as Applied and M23.

Come on now, let's go.

Will the Officer Perform His Duty or Satisfy a Longing Desire?

A Frank Admission

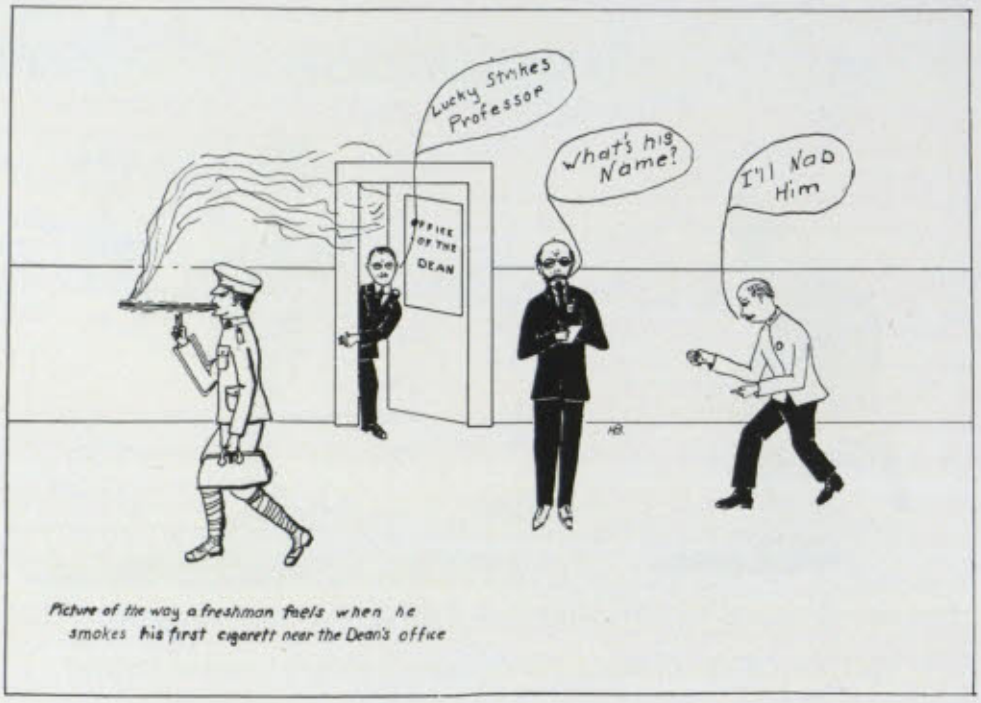

Phyll: Shame on you, Jack, I saw you come out of the Emma Rogers room yesterday.

Jack: Well, you would not want me to stay there all day would you?

Heard In Summer School

Prof. Swett: "Gentlemen, this machine will weave cloth so fine that if it were spread on the grass a cow would eat it up without observing it."

E. W. Freeman: "Is that one of these lawn materials they talk about?"

Picture of the way a freshman feels when he smokes his first cigarett near the Dean's office

Why is the "bar diagram," used in illustrating Statistics, more easily comprehended by the general public than any other?

Because the public is well acquainted with bars.

Often True

Gentlemen, if you will only get this little bit in your head you will have everything in a nutshell.

Everybody Knows It

Calls Wilson King, Judge Agrees, and Ignatz Is Citizen

CHICAGO, June 30—After 11 years' residence in the United States, Ignatz Kaczmorek appeared before the federal bar of justice to swear allegiance to his adopted land and become a loyal citizen thereof.

"Ever heard of Wilson?" he was asked by Judge Carpenter.

"Yeah," said Ignatz, "I've heard."

"Who is he?" insisted the questioner.

"The King," said Ignatz.

Judge Carpenter nodded.

"I guess he isn't far off at that," said the judge. "Consider it an answer."

"Well, then," the questioner started on another tack, "who makes the laws for Chicago?"

Ignatz disposed of that one briefly.

"George," said he.

"George who?"

Ignatz smiled at ease. "King George," said he.

"I see; then what does the city council do?"

"They gets you a lamppost in front of your home, and when you get pinched they whisper to the judge and you no go to jail——"

"That's enough," Judge Carpenter cut in. So Ignatz was made a citizen and left, wearing a tiny American flag.

No Luck

Say, Jack, I have two cases in my house.
Hooray, Scotch?
No, Measles.

It Can't Be Done

The florists urge us to "say it with flowers" but just what flower would express our thoughts when the wind deposits our hat in the Charles?

A Well-Known Fact

Prof. Derr (in Physics Lecture discussing a battery):—"Now this pole is called positive and this one (scratches his head) is minus."

Heard In Machine Tool Class

Gentlemen, you should always keep out of the way when the workmen are removing a nut.

How About It ?

Say, Harry, did you do these problems by moments?

No, by hours.

An Old One But Still True

A Junior:—"When they take the Co-ed's away from Tech, what will follow?
A Senior:—"I will."

Book of Techfrosh

CHAPTER I

1 Now it came to pass in the nineteenth year of his life and in the tenth month, that Techfrosh, son of Jechaz, lord of Chicago, came unto Tech. Yea, he came unto that tomb of knowledge which sitteth so blithesome upon the banks of the Charles River.

2 The fame of Tech having spread itself abroad in all the land, Techfrosh bethought himself to leave in the land from whence he came all that pertaineth to sport, yea, his tennis racket and golf clubs left he then there.

3 But the scribes and elders of the College Board had decreed that Techfrosh should not enter the mighty gates of Tech unscorched by the cleansing fires of the condition exam. And so it happened that Techfrosh did sit himself down upon a high stool, and did swat himself oft on the gonk as he wrestled mightily with the little x's and y's, whose master he thought himself to be, yet which would not obey his commands.

4 And Techfrosh left the chamber of the condition exam with a heavy heart, for he bethought himself of the words of the prophet, "It is easier to stay in Tech than to get thyself in."

5 Yet Techfrosh did not lose faith in the mighty drag of his father and on the following day did betake him to the Stute again, there to inscribe his name on the rolls of the favored. Yea, the blue cards did he fill out and the yellow and the white.

6 And as he sitteth there did he see many men who wore buttons of flaming scarlet pinned upon their garment. Men of high rank were they for they were garbed in glorious raiment and moved about with lordly mien, whispering among themselves and smoking many toasties under the very scrolls which forbade it.

7 And as he watched, came one of these lords to him and with many laughs helped him in the work which he there preformed. Then did his heart rejoice for the prince of the flaming button did converse with him long, saying unto him that he, Techfrosh, bore no flies upon him and did at length invite him unto the house for lunch on the following day.

8 And early in the next morn did Techfrosh again enter the great registration chamber of the Stute, for he had been commanded to do so in order to gain his registration receipt. But he was told that it had not come and therefore must he wait. And so it came to pass that he waited, yea, many weary hours waited he, even until the fifth hour after the sun had passed the zenith and still came it not. And so it was upon the second day and upon the third. And with each day did the heart of Techfrosh become heavier for he bethought himself of Harvard where the commands of his father would carry him lest he receive this card.

9 But on the fourth day in the eleventh hour did the card come and thereon was inscribed in letters of red, "Registration Approved." And so it happened that Techfrosh became a slave of the rule that slideth and gained unto himself the privilege of spending much of his father's gold in the Coop. And he became laden with many cards of white, orange, and yellow, for each of which must he leave numberless shekels at the bursars.

10 And as the days and the weeks passed did Techfrosh go to his classes, yea, to physics and math, and E. H. 11 went he. And at each class the elder who there presided to teach the youths of the Stute, did hand out a mighty gob of work to be done for the class that followeth.

11 And each night, or nearly each night, sateth Techfrosh down at a table in his own chamber these terrible tasks to perform. And with the accomplishing of each task did his wisdom double until as the end of the first five weeks did approach he spoke unto himself and said, "My knowledge is great, yea it reaches to the ends of learning, and increaseth even as the cost of living."

12 And thus was he satisfied and did cast about for means of spending the hours between dusk and sunrise in merriment. And it so happened that he spoke of his desire to a man who was known to the world as a tea-lapper and a Wellesley hound. And this man knew no pity and did persuade him to journey unto that place which bears the name of a place of learning but which exists only as a nest of sirens whose sweet voices reach even unto the closed class rooms in the day and lure the wise and the foolish alike.

13 And so it came about that Techfrosh did journey with the Wellesley hound to the place which no man has seen by light of day. And there he met a woman whose charms were so great that a mighty fever arose within him which did surpass in B. T. U's. the heat of the sun, and which did cook from his head all that was grey and cool and which did leave in its place only a light gas which did make his feet so light that the comely maiden tied him to her endless string and thereafter felt no weight as she dragged it with her.

14 And the following day did Techfrosh buy for himself a ticket of twelve trips, and nightly did make haste to the Back Bay station and hie himself upon the steam caravan which departs at 6.20 to that nest of sirens, and nightly did he curse the law that sayeth, "Visitors shall leave at 9.45," as he climbed with panting lungs and exausted limbs to the moving stairs of the 10.01.

15 And anon did he taste the meat and the French fries and the bacon and the wienies in the Grill of the Lenox, yea, he tasted them and found them pleasing to his throat. And in the days that followed he gave unto John of the Highball many winks and anon many

shekels and was wont to wander with uncertain steps in the hours of early dawn to his chamber.

16 The class room and the lecture hall were unto Techfrosh but a place to sleep, and there he slept even as the dead. And so it came to pass in ten weeks and ten days after he and his books and his raiment of Chicago had reached the land of Boston, that Techfrosh did get his report, and upon it were many F's, yea and a note which bore upon it the number 10, and there was weeping and gnashing of teeth.

17 Then did the father of Techfrosh unchain the family bull and polish the ancestral paddle. And Techfrosh did go back to the land from whence he came and was heard of no more in the realm of knowledge.

Dedicated to those who made Summer School worth while

WILD GIRLS PUT LID ON TECH FLOAT

Audacious Exploits Start Things and Now All Are Barred

Women queered it.

The metropolitan police didn't seem to mind when the "gang" got in and out of their clothes over on the Tech float in the Charles and went in for a duck. But when the girls started it—"good night!" The Tech students thought it was just the thing, especially at the end of a tedious summer course in chem and math and things, and crowded around the float, cheering the wild women on to further audacious exploits. But then, it was said, the M. I. T. faculty took a hand, complained to the metropolitan park police, and now none but Tech students are permitted to use the Tech float.

BLAME COLLEGE BOYS

The float, diagonally opposite to the Prexy House and located towards the centre of the Technology buildings on Charles River Road, Cambridge, was, until the new rule, the daily rendezvous of the carefree Huckleberry Finn's from all over Cambridge. They blame the "college guys" for the new rule. For, according to them, the appearance of a couple of young women from parts unknown in just a little less than even a one-piece bathing suit, meant nothing at all.

But when the word passed over to Runkle hall in the Tech dorms, to the fraternity houses, to Atkinson hall, etc., that a blonde and a brunette, wearing nearly nothing were halting the attention of traffic on Charles River Road, there at once proceeded a running procession to the float.

Change Into Clothes

The Tech students shortly were augmented by crowds of automobilists who left their cars and came over to the river rail to see what it was all about.

But the proportions of the crowd growing constantly and never losing any of the early comers, at length frightened the entertainers. So as a finale to the afternoon's performance they proceeded without the slighest semblance of a blush to strip each other of the clinging bits of bathing suits and get into the few things they wore for street clothes.

They didn't hurry much about making the change, but finally dressed and departed.

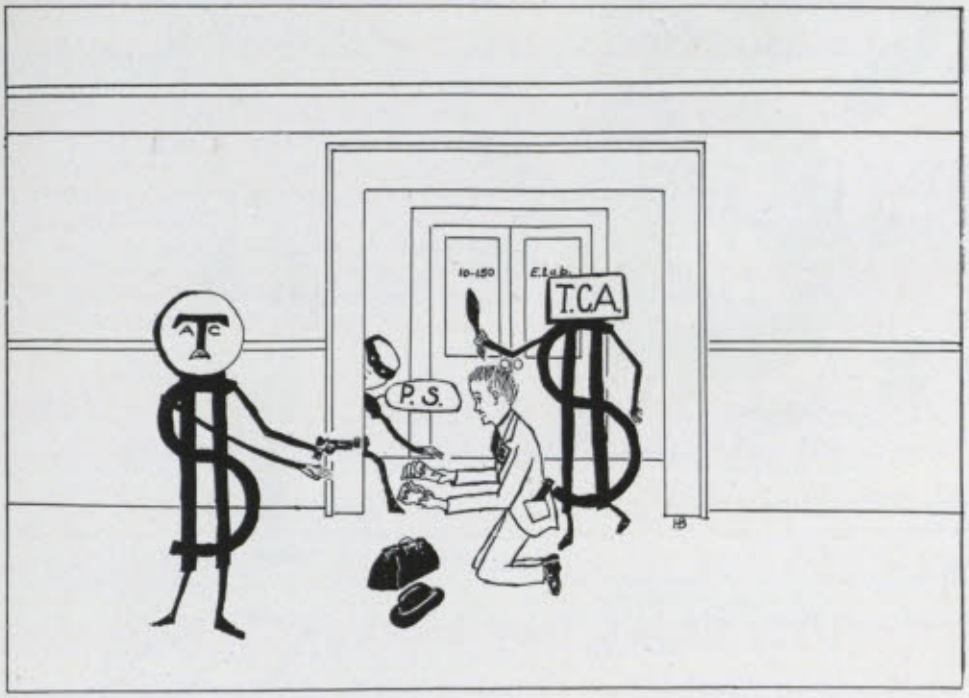

And Now They Can't

All of which led to divers complaints from diverse sources. The Tech float is posted up with signs in paint that is still fresh, advising outsiders that that is the property of the Massachusetts Institute of Technology and that it is meant for the use exclusively of persons connected with the institution.

For a day or two the signs didn't work, and the Huckleberry Finn's continued to go in swimmin'!

But along came a Metropolitan Park policeman in a fast operating motor boat who now makes that a part of his regular beat, and ever since the Tech float, except for an occasional student or two, has been a lonesome and deserted spot.

JUNIOR WEEK IN VERSE

Now when at last Junior Week comes in sight
The joyful Techite
Sits up all the night
And he wonders — whom he will take to the fight.

He gets out his list and scans it with care
This one is fair
Of the next one beware
They all have their points, but he dreads to compare.

He can not decide on the fortunate dame
Some have great fame
But looks can not claim
So he cancels his sign-up and drops from the strain.

But the time wanders on and he can not forget
He begins soon to fret
And he pines with regret
For there must be a girl he ought to have met.

As the days go on by and the party draws near
He begins to have fear
She will never appear
But the janitor's daughter he finds is a dear.

Alas for the sign-up he did not retain!
In the pouring rain
He steps out to regain
That small missing link between joy and great pain.

At last he discovers a youth in great grief
But now to be brief
The latter's a thief
Since the ticket's worth fifty to his best belief.

As the loan of a fifty was not to be had
This very young lad
Had to wire his dad
To secure the cash for which he was mad.

And so it is plain from this little tale
That many may fail
And even grow frail
On occasions like this when one's lacking in kale.

"Who is that funny looking dud?"

"Why, that's I. M. Dumm, president of the brown bag club. They call him Hesperus, he's such a wreck."

Nobody: How stupid you are! Can't multiply eighty-nine by ninety-four. I can do it in less than no time.

Not-so-bad: I shouldn't be surprised. They say that fools multiply very rapidly these days.

INDUSTRY REWARDED

"We have just learned of an engineer who started twenty years ago and has retired with the comfortable fortune of $50,000," says the OFFICIAL BULLETIN of the Colorado Society of Engineers.

"This money was acquired through industry, economy, conscientious efforts to give full value, indomitable perseverance, and the death of an uncle who left the engineer $49,999.50."

IS IT POSSIBLE?

Professor Moore, calling the roll on the first day of the year, comes to the name of Cohen. He repeats the name a number of times but receives no reply. He then rises and exclaims, "What, a Cohen absent! Why, I never heard of a Cohen absent on the first day. They usually don't lose so much of their tuition."

For You Who Sleep

Prof. Dewey, explaining the condition of the country if the people were to live on their wealth alone, said "and the country would be stripped as much as in the time of Adam and Eve."

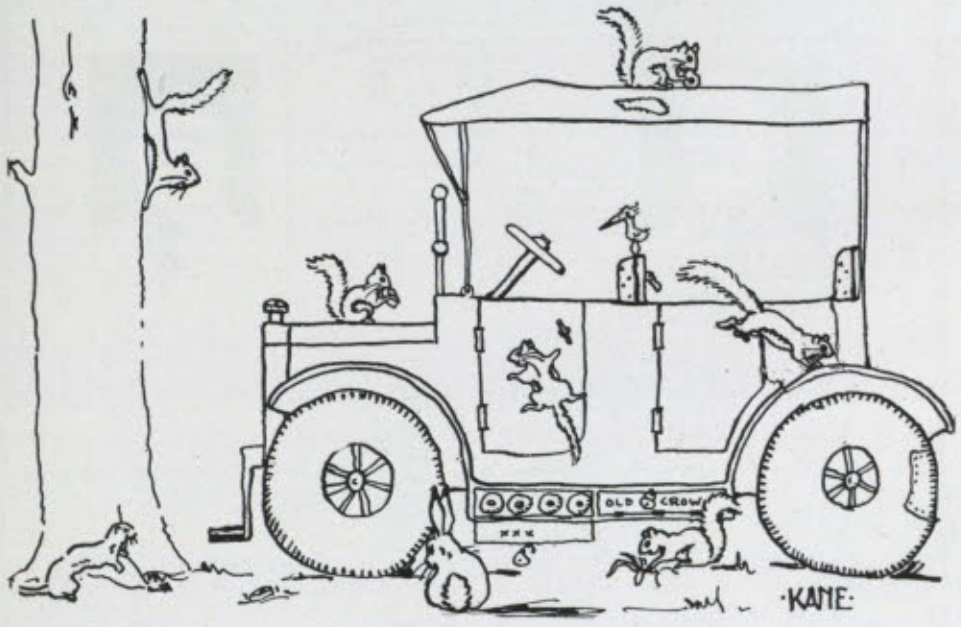

Why Louie

Prof. Derr (trying to change a four dollar bill):—"Who's got 2 two's?" Baldwin (just waking). "Heave'em Louie, you can't open on that."

Prof. Smith:—"How do you get at the size of a shaft?"

Mc Gee:—"Well, a good many men get at it differently."

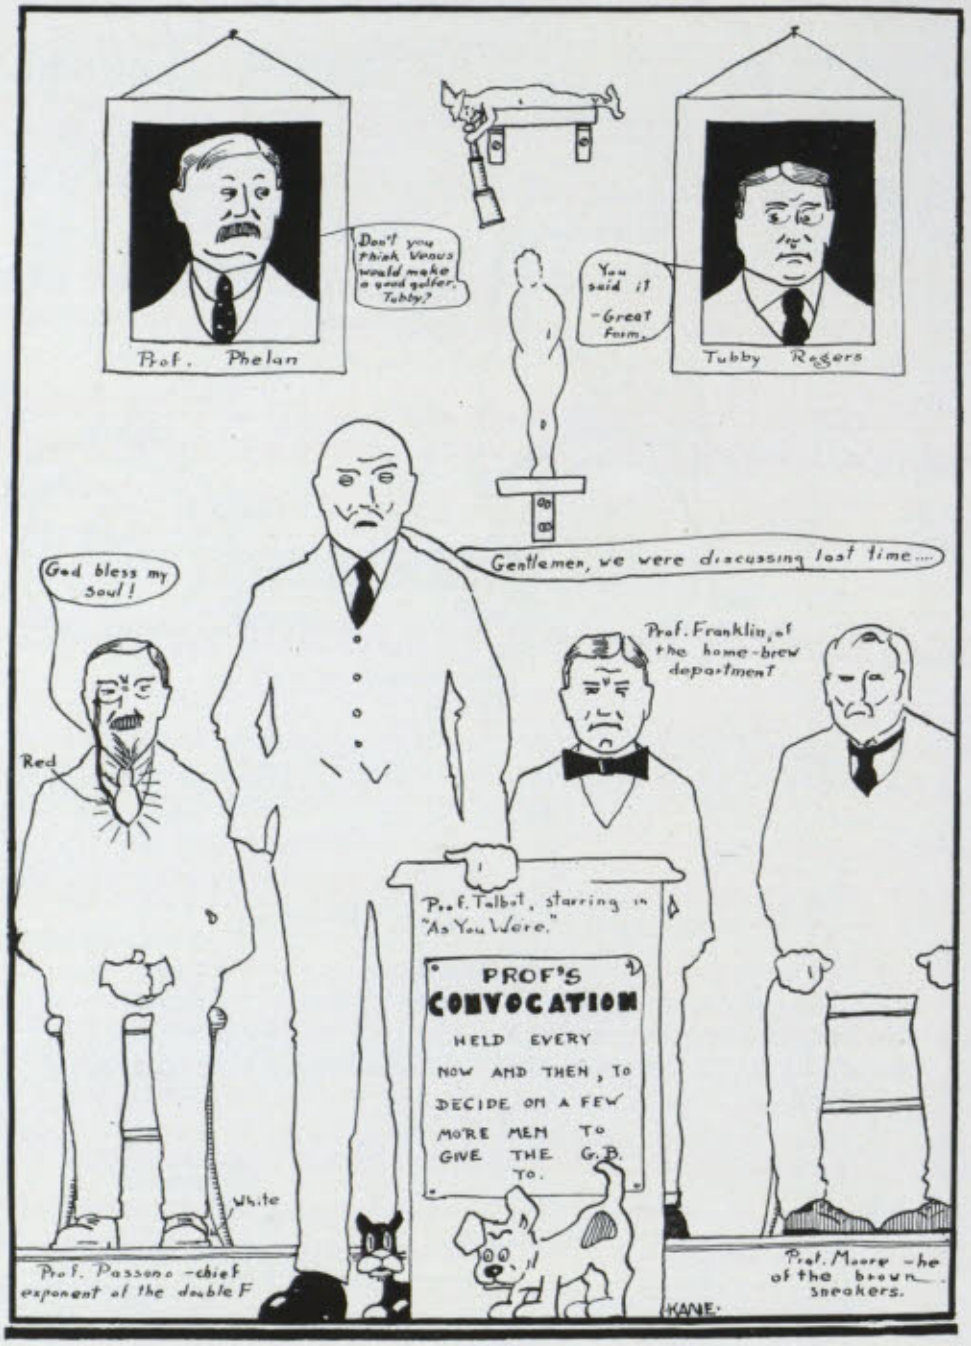

One of the Prof's flivvers got stalled in the wilds recently. When he returned he found that the squirrels had eaten all the nuts.

DID YOU EVER THINK OF THIS?

If a fellow tries to kiss a woman and gets away with it, he's a man; if he tries and doesn't get away with it, he's a brute; if he doesn't try to kiss her but would get away with it if he tried, he's a coward; and if he doesn't try to kiss her and wouldn't get away with it if he tried, he's a wise man.

Sarcastic as Usual

Professor George was in the midst of a very deep discussion in M23 and the room had been in silence for some time when a wandering Freshman walked in.

"What can I do for you?" said Professor George.

"Oh, I thought the room was empty," replied 1924.

"Well," remarked Professor George looking over his glasses, "I guess it is mentally."

Better Late Than Never

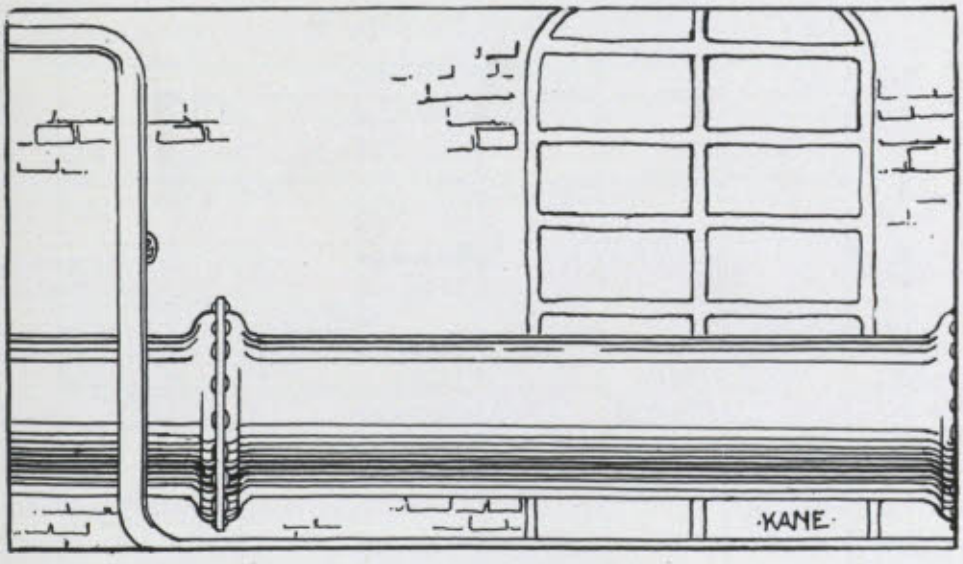

Professor Armstrong, being interrupted six minutes before the hour is over by the entrance of a co-ed, greets the late one with, "good morning, Miss."

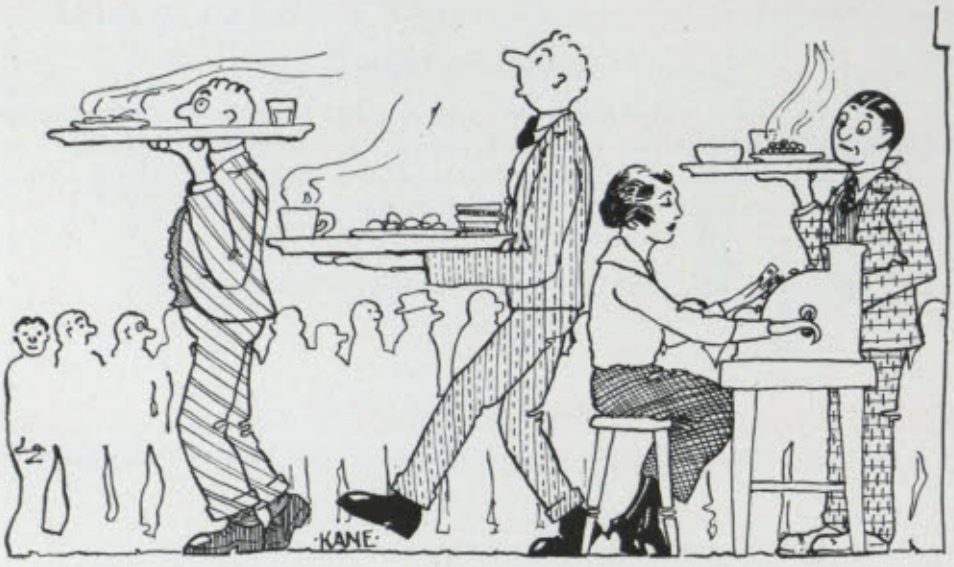

Co-ed:—"Oh, Good morning."

Prof. A:—"This is this hour not the next one."

Co-ed, coolly:—"I know it is. I want this one."

Cigarettes Next!!!

CAMBRIDGE, Mass., Nov. 27.—The Harvard Union, gathering place for the men of the college, inaugurated afternoon tea today. Tiffin was made an event in the undergraduate day in the belief that it would serve both to promote the club idea of the student commons and to serve as a relief from the day's study through the Winter months, when outdoor activities are curtailed. With the tea the menu provided for muffins, toast and strawberry jam. —*Taken from New York Times.*

TECHNIQUE 6 TECH 0

To the Managing Board of THE TECH:

Quousque tandem abutere, O Techites, patientia nostra! Most lizard-like with vile and loathsome crust, the time has come if you are men stand forth, we choose an open slaughter; Ye are doomed till the foul crimes done in your days of raving are burnt and purged away.

So be it that on November 16 shall you with all your powers prepare to meet your doom. We shall cause each particular hair to stand on end like quills upon the fretful porcupine. Ye are pigeon-livered and lack gall to take oppression bitter, for ere long ye shall have fatted with your offal all the region kites.

The quality of our mercy will not be strained, for we thirst only for the blood of you who have so unwisely permitted your names to be officially published as being responsible for your misdoings. Those who walk in ignorance so far as to aspire to be among you but as yet are not accepted we refuse to touch. So beware of our wrath and seek not to display your weakness by luring those who have heard nought but the call of the Siren and know not its vices.

In the ancient and honorable game of football lieth the reckoning. It is chosen as the fitting criterion whereby our prowess may be duly proclaimed.

Out, out, damned sheet, since 'tis done when 'twere done, 'twere well, 'twere done quickly, so lay on, Techites, and damned be he who first cries hold enough.

'Twill be a good deed well done.

DONALD F. CARPENTER

To the Editors, Technique 1922:

You cannot imagine our surprise on learning you would come to the well once more. We had thought that the superiority of the embryo Brisbanes was firmly impressed upon the 'Sniquers last year when the Oliver-wreckers were returned victors by the overwhelming score of O to 0 after a bloody battle in the Tech Bowl. We had thought that one draught of the bitter cup of inglorious defeat would suffice to free us from further insults in the form of challenges from those who never have been, are not, and never will be, our equals, either in pushing a pen or following a football.

But being always of a generous nature, ever willing to prove our prowess on the gridiron and offer to aspiring challengers an opportunity to wrest from us the crown of victory, we will be pleased to show you once more, on November 16, if you wish, that we are still invincible.

You have chosen the time, the place, the weapons. Permit us now one request. When the battle waxes warm and the irony of fate denies the 'Sniquers even the dx part of victory, do not, we beg of you, unsweeten our quaff of the cup of success with such defamatory allegations as those with which you introduce your challenge.

Say it with artichokes.

ARTHUR W. SKILLING
For the Managing Board.

Now that you have had your little laugh and explained all the local stuff to your girl so that she, too, can be amused, we wish to apologize if we have said or drawn anything that we shouldn't, for you know we are nuts and are not responsible. But our term in the bug house is up and we have to make room for the new occupants, whom we wish the greatest success.

OUR ADVERTISERS

IN the following pages you will find announcements of the many concerns who have contributed materially to the success of this publication.

Both they and we will benefit by your patronage.

87% of all buildings erected by Turner Construction Co. during 16 years are covered with Barrett Specification Roofs—

IF experience in constructing permanent buildings counts for anything, surely the great Turner Construction Company of New York, builders of the vast Concrete "Cities" pictured here, should *know* how to select a *permanent* roof.

The figures quoted tell their own story. This great construction company, the 270 owners for whom they erected these 519 concrete buildings, and the 94 prominent architects and engineers, united in choosing Barrett Specification Roofs for over 87% of the total roof area.

Could there be more conclusive proof of the durability, economy and general superiority of these roofs?

The Surety Bond Guarantee

Yet the owner of a Barrett Specification Roof need not rely upon even this practically unanimous judgment of experts. He is absolutely insured against all roof trouble and upkeep expense by a Surety Bond of one of the strongest surety companies in America—The U. S. Fidelity and Guaranty Company of Baltimore.

Before specifying or closing contract for a Barrett Specification Bonded Roof, be sure to read carefully all the stipulations in the Specification.

The Barrett Specification Type "AA" 20-Year Bonded Roof represents the most permanent roof covering it is possible to construct, and while we bond it for twenty years only, we can name many roofs of this type that have been in service over forty years and are still in good condition.

Where the character of the building does not justify a roof of such extreme length of service, we recommend the Barrett Specification Type "A" Roof bonded for 10 years. Both roofs are built of the same high-grade materials, the only difference being in the quantity used.

Full details regarding these Bonded Roofs and copies of the Barrett Specifications sent free on request.

Stop Experimenting

When you wear "Bostons," your socks look as though they were ironed into place. If you see some fellow reach down for a dangling garter strap, pass the good word along to him. Young college men who stopped experimenting are now wearing Boston Garters.

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY offers courses, each of four years' duration, leading to the degree of Bachelor of Science, in Civil, Mechanical, Mining, Electrical, Chemical, Sanitary, Geological and Electrochemical Engineering; in Architecture, Chemistry, Biology and Public Health, Physics, General Science and General Engineering, and Naval Architecture, and in Engineering Administration.

To be admitted to the first-year class, applicants must have attained the age of seventeen, and must pass satisfactory examinations in Algebra, Plane and Solid Geometry, Trigonometry, Physics, English, History, French or German, and must present teachers' certificates for two units of a series of elective subjects. A division of these entrance subjects between June and September or over three successive years is permitted.

Entrance examinations are held in June and September of each year. In June, applicants are examined by the College Entrance Examination Board in Boston, New York, Philadelphia, Chicago, and many other cities in America and Europe. A circular stating times and places is issued in advance, and will be mailed on application to the Secretary of the College Board, 431 West 117th Street, New York City. The September examinations are held only at Cambridge.

Graduates of colleges and scientific schools of collegiate grade are admitted, without examination, to such advanced standing as is warranted by their previous training.

Graduate courses leading to the degrees of Master of Science, Doctor of Philosophy, and Doctor of Science are also offered. Special Research Laboratories of Applied Chemistry, Electrical Engineering, Industrial Physics and Physical Chemistry have been established.

Correspondence should be addressed to the Massachusetts Institute of Technology, Cambridge, Mass.

Spur-Geared Blocks

FOR SPEED AND SAFETY

Superiority of design, materials and construction gives the Yale Spur-geared Chain Block unrivalled safety, speed and all-round labor-saving efficiency.

Its planetary gear system provides balanced pressures, neutralized thrusts, minimum wear, rapid hoisting speed from small chain overhaul, *and holds the load,* which will not lower unless the hand chain is pulled.

Rugged, all-steel suspension parts are used throughout—"From hook to hook a line of steel." Special improvements are the Yale Safety Hook, which will not break but opens slowly if dangerously overloaded; Yale Steel Chain, with links electrically welded on the side, Yale Steel Detachable Shackle, for easy interchange of hooks.

Over 80% of the applied power results in hoisting energy. With a 1-ton block one man easily hoists 2000 lbs. Every block is rated by the long ton—2240 lbs.—and tested with a 50% overload, or 3360 lbs., to the ton. Made in sizes from ¼ to 40 tons capacity.

We also manufacture a full line of Yale Differential, Screw-Geared, and Electrical Blocks and Hoists, and Electric Industrial Trucks. Send for catalogs and prices.

ROBERTS IRON WORKS

THE SOLVAY PROCESS COMPANY manufactures basic ***Alkali.*** Basic Alkali is Sodium Carbonate, or Soda Ash, from which, as derivatives, many diversified products enter practically all industries. The transformation of the raw materials into commercial products is effected by heat, power and chemical reaction, working through the medium of machinery and mechanical apparatus on a large scale. The process is a story of technical co-operation of chemists, engineers, and operators. Thus, the trained technician is supreme in the soda ash business. Mechanical, civil, electrical, chemical and mining engineers combine with chemists, investigators, theorists, and inventors in all stages of Alkali production. Plant layout, machine design, construction and erection, shop operation and management, plant operation, maintenance and repair, plant management, investigation, research, and experimentation, expert technical service,—for all of these, men of good technical education (particularly in mechanical engineering) are needed.

The Solvay Process Company, congratulates the young men who take their technical degrees this year in a period of unequalled opportunity, and desires them to know that its interests, in the future as in the past, are best served by men of engineering education.

NORTON PRODUCTS:

Alundum Grinding Wheels, Crystolon Grinding Wheels, Alundum Grain for Polishing, Glass Cutting Wheels, Razor Hones, Scythe Stones, Alundum Refractories, Alundum Safety Tile, Rubbing Bricks and Stones, Grinding Wheel Dressers, Precision Grinding Machines, Bench and Floor Stands.

▼▼

THE grinding wheel user should always remember that there is one suitable wheel, one combination of abrasive, grain and grade, for each particular operation, whether it be round grinding, surface grinding, tool grinding, internal grinding, for machinery, manganese or high speed steel, cast iron, chilled iron, bronze, brass, or aluminum. He should also remember that the wheel must be selected to meet all the conditions that affect the operation, such as the condition of the machine, feed, contact, and method of grinding.

Alundum Wheels and Crystolon Wheels are distinct in composition and have therefore different cutting qualities.

Alundum Grinding Wheels should be used for all steel grinding, except in those few cases where the conditions are out of the ordinary. Since 75% of the pig iron production of the world goes into steel, this means that Alundum Wheels should perform by far the larger proportion of grinding operations.

Crystolon Wheels, on the other hand, should be used on cast iron, which is lower than steel in tensile strength. Crystolon Wheels are hard and sharp, and the grain is of such a character as to break away at the right time, giving a wheel that cuts fast and free.

The Norton Company, Engineers and Demonstrators, come in contact daily with different grinding operations, and learn the successes and failures of wheels of certain grains and grades. Such experience is always beneficial to the buyer and the benefit of it is free to every inquirer.

The heart of the American Dyestuffs Industry, the Deepwater Works of the Du Pont Company at Deepwater Point, New Jersey.

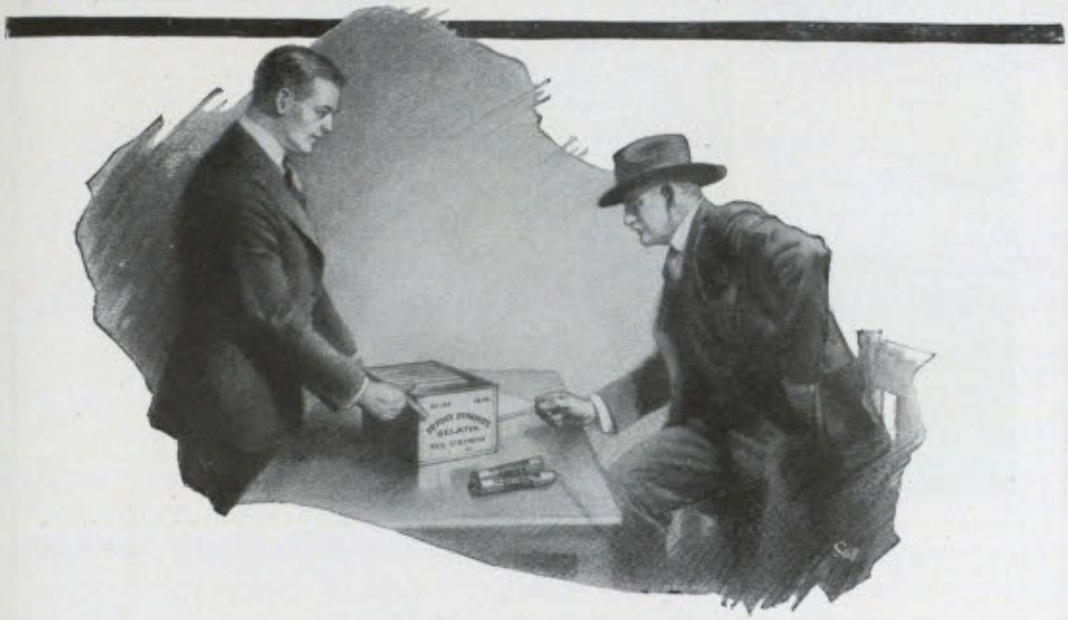

Building for permanence and not to meet a wartime emergency, our vast Deepwater Plant is the visible pledge of the Du Pont Company to America that her dyestuffs needs will be met, no matter what the situation without her borders.

From the research laboratory, through every phase of manufacture back to the checking laboratory, adequate facilities, involving a tremendous investment, are provided for large scale production of the essential dyestuffs required by the textile manufacturers and other dyestuffs consuming industries.

DU PONT DYESTUFFS

First to Protect the Buyer

IN the early days of the Explosives Industry, dynamite was sold just as Dynamite. The user had no means of telling what strength powder he was using until the Du Pont Company inaugurated the standard practice of putting the exact strength of the explosive on every box and on every cartridge.

Explosives buyers were quick to recognize the value of this method of marking. As a result this practice was rapidly made a general one throughout the industry.

This is merely another instance of that spirit of service which has been the guiding principle of this organization since the first Du Pont founded the Explosives Industry in the United States in 1802.

Du Pont Service enters into every phase of the production and use of explosives. Our facilities in plant, laboratory and in the field have made it possible for us to develop this service to an unusual degree,—first in producing explosives of remarkable and uniform value; and second, in aiding our customers in all matters pertaining to their handling and use.

This Du Pont Explosives Service is yours to command in solving your own explosives problems.

Standard for over half a century

The Jenkins idea—and accomplishment—is to make valves that are dependable in the severest as well as the average service.

The Jenkins standard is high and so maintained by a thoroughness of manufacture carried to the minutest detail.

Jenkins valves are made of brass, iron and steel for power plant, plumbing and heating service; and for any service where a substantial, trouble-free valve is desired.

Genuine Jenkins Valves are known by the name and Jenkins Diamond Mark—at supply houses everywhere.

We shall gladly send our catalog, which is a comprehensive book on valves.

Molding the Prosperity *of* Industries

Wherever swift machinery is needed to perform an intricate operation, industry looks to New England. It is quite natural that this section—the nation's greatest workshop—should also be the home of the builders of ingenious machinery.

Ample capital is vitally necessary to machinery manufacture. Many weeks must elapse between the first processes and the final marketing of the machine. Fine materials and super-workmanship entail heavy investment. Banking lends a very necessary support. The National Shawmut Bank is in the closest financial relationship to this industry.

To the machinery manufacturer, this bank offers full co-operation. Our world-wide organization guides and assists clients entering the new markets at home and abroad. Those who have business to transact with the New England machinery trade find our services equally valuable, as our clientele includes the leading firms throughout the industry.

Technical Men can readily appreciate –

The distinctive and superior features of SUNOCO Motor Oil.

For example, they know that a straight-run, wholly distilled, non-compounded lubricant (SUNOCO Motor Oil) burns down evenly when subjected to high temperatures, thus eliminating hard carbon troubles and subsequent repairs.

Also, the demands for engineering accuracy in motor lubrication are met by the six distinct types in which SUNOCO is available, which fill exactly the requirements of every automotive unit.

Experience shows that technical men enthusiastically adopt SUNOCO after they try it. Stop at a SUNOCO dealer today and start enjoying the motor comfort and economy of

of the most expert sort is given to policyholders of this Company in its Workmen's Compensation, Liability, Boiler and Fly-wheel Departments.

Plant surveys made by our Safety Engineers nearly always bring either a reduction in rate or correction of unsafe working conditions, with resultant prevention of accidents and betterment of employees' morale.

Technical men who occupy positions of prominence in the industrial world are quick to see the value of such work, and are glad to receive the bulletin service of our Engineering & Rating Bureau, which is given free of cost to our policyholders.

Full particulars will be given on request, either of our agent in your city or of the Home Office.

built for Mr. Roscoe Arbuckle, alias "Fatty," of international screen fame. This car is equipped with Houdaille Hydraulic Shock Absorbers.

— *and* Houdaille Shock-absorbers

Mr. Arbuckle says: "I think Houdailles are wonderful things!"

HOUDAILLE Hydraulic Shock Absorbers automatically check the rebound and help eliminate skidding, which is often caused by side sway. This means tire economy and comfort even while riding over the roughest roads.

Houdaille has been prominent in Europe for ten years. And is now American made for American motor cars. Among the foreign cars factory equipped are: Alba, Alda, (F. Charron) Chenard & Walcker, Delage, DeLaunay-Belleville, de Bazelaire, Majola, Farman, Minerva, Panhard & Levassor, Piccard & Pictet, Rochet-Schneider, Secqueville & Hoyau and Unic (G. 17-Jewel Illinois Watch

12 SIZE—25-YEAR GOLD-FILLED CASE

The Illinois watch is known as one of America's finest products. The railroad movements of this famous factory are accepted as standard on all lines. Every Illinois watch bears a positive guaranty for accuracy. The Aristocrat model is unusually fine in every respect.

It contains 17 hand polished and hand set jewels, to reduce friction to a minimum. This insures the utmost reliability. It is adjusted to temperature, isochronism, and position. It is guaranteed by ourselves and by the makers to give absolute satisfaction. It comes in the popular 12 size, sensibly thin, and 25-year, double-strata, gold-filled case.

The movement has compensating steel escape balance wheel, gold center wheel, polished wind wheel and safety recoil click. It is stem wind and stem set. It is an open face style, perfectly plain with room for large monogram or ribbon initials.

The case is highly polished and guaranteed for 25 years. It is a screw back and bezel model.

We shall be glad to furnish this watch for a month's trial. If perfectly satisfied, easy terms may be arranged.

No. YF475—Price $28.95

New thin model, thirty-hour **continuous** *alarm. Height 6 inches, with plain hands and dial.*

Rich mahogany finish, hand-rubbed clock. Eight-day pendulum type of movement and Cathedral gong. Height 11 inches and width 18 inches.

WHEN the evening shadows cover the footprints of the departing day, you will realize how companionable a good timepiece can really be if you place a Gilbert Clock on your table or bookcase. There is an almost human friendliness about it that helps create the atmosphere of home.

Some Gilbert Clocks announce the hours with rich, melodious voices; others are silent except for a faint pulse-beat, elusive as the overtones from an orchestra. There are Gilbert Radium Clocks whose friendly faces and faithful hands mark the passing of the busy hours, and glow at night with a gentle radiance, soft as a firefly gleam.

For more than a century this Company has been making good clocks at Winsted. We are proud of the fact that in thousands of homes Gilbert Clocks are regarded as faithful and familiar friends — not mere pieces of mechanism.
