Department of Civil and Sanitary Engineering

Back Row: Keane, Mirabelli, Liddell, Fife, Babcock, Bowman, Reynolds, Robbins
Middle Row: Howard, Breed, Spofford, Russell, Hosmer, Sutherland
Front Row: Becker, Brittain, Gentleman

CHARLES M. SPOFFORD, AXP; S.B., M.I.T., 1893. 61 Colbourne Crescent, Brookline.
Hayward Professor of Civil Engineering; in charge of the Department.

ARTHUR G. ROBBINS, S.B., M.I.T., 1886. 42 Oak Street, Belmont.
Professor of Topographical Engineering.

CHARLES B. BREED, ΦΣΚ; S.B., M.I.T., 1897. 160 Ocean Street, Lynn.
Professor of Railway and Highway Engineering.

HAROLD K. BARROWS, S.B., M.I.T., 1895. 319 Highland Avenue, Winchester.
Professor of Hydraulic Engineering.

GEORGE E. RUSSELL, ATΩ; S.B., M.I.T., 1900. 191 Park Avenue, Arlington Heights.
Professor of Hydraulics.

GEORGE L. HOSMER. 280 Washington Street, Woburn.
Associate Professor of Geodesy.

JOHN W. HOWARD, AXA; S.B., M.I.T., 1903. 147 Grampian Way, Dorchester.
Assistant Professor of Topographical Engineering.

JOHN B. BABCOCK, 3D, S.B., M.I.T., 1910. 197 Maplewood Street, Watertown.
Assistant Professor of Railway Engineering.

HALE SUTHERLAND, ΘX; A.B., Harvard, 1906; S.B., M.I.T., 1911. 12 Mason Street, Cambridge.
Assistant Professor of Structural Engineering.

HARRY L. BOWMAN, ATΩ; B.S., Penn. State, 1911; S.M., M.I.T., 1911. 51 Irma Avenue, Watertown.
Assistant Professor of Structural Engineering.

WALTER M. FIFE, S.M. 104 Bexley Hall, Cambridge.
Assistant Professor of Civil Engineering.

INSTRUCTORS

WILLIAM A. LIDDELL, S.B.
EUGENE MIRABELLI, S.B.
KENNETH C. REYNOLDS, B.S.
LAWRENCE G. ROPES, S.M.

ASSISTANTS

ROLAND H. BECKER
JAMES F. BRITTAIN
SAMUEL T. DREW, S.B.
LAWRENCE M. GENTLEMAN, S.B.
EDWARD C. KEANE, S.B.
KEITH W. ROBBINS, S.B.

Department of Mining, Metallurgy and Geology

Back Row: Tremere, Phelps, Hayward, Muller, Benedict, Gillson, Reed
Front Row: Shimer, Waterhouse, Lindgren, Bugbee, Locke, Jones

WALDEMAR LINDGREN, M.E., Freiberg, 1885; Sc.D, Princeton, 1916. 12 Littell Road, Brookline.
William Barton Rogers Professor of Economic Geology; in charge of the Department.

WILLIAM S. HUTCHINSON, S.B., 201 Devonshire Street, Boston.
Professor of Mining. In charge of the Option in Mining.

GEORGE B. WATERHOUSE, Ph.D. 1049 Beacon Street, Brookline.
Professor of Metallurgy. In charge of the Option in Metallurgy.

HERVEY W. SHIMER, ΣΞ; A.B., Lafayette College; A.M., 1901; Ph.D., Columbia University, 1904; Sc.D., Gettysburg College, 1916. Cottage Street, Hingham.
Professor of Paleontology.

CHARLES E. LOCKE, S.B., M.I.T., 1896. 22 Bladgen Street, Boston.
Associate Professor of Mining Engineering and Ore Dressing.

CARLE R. HAYWARD, S.B., M.I.T., 1904. 233 Presidents Lane, Quincy.
Associate Professor of Metallurgy.

EDWARD E. BUGBEE, ΒΘΠ, ΣΞ; S.B., M.I.T., 1900. 110 Strathmore Road, Brookline.
Associate Professor of Assaying and Metallurgy.

WILLIAM F. JONES. Ashland.
Assistant Professor of Structural Geology.

INSTRUCTORS

RUFUS C. REED, S.B.
CHARLES J. MULLER, M.S.
JOSEPH L. GILLSON, M.A., S.M.
PLATT C. BENEDICT, S.B.

ASSISTANTS

DONALD S. PHELPS, S.B.
BENJAMIN B. TREMERE, JR., S.B.

RESEARCH ASSOCIATES IN METALLURGY

ALBERT W. OWENS, PH.D.
GUSTAF N. KIRSEBOM, CAND. MIN.
FRED S. MULLOCK, A.B.
TOWNSEND H. HINGSTON

Department of Mechanical Engineering, Applied Mechanics, and Mechanic Arts

Back Row: James, L. S. Smith, Peabody, Cowdrey
Third Row: Taft, R. H. Smith
Second Row: Hayward, Riley, T. Smith, Swett, Eames, Holmes
Front Row: Haven, Park, Miller, Johnston, Fuller, Berry

EDWARD F. MILLER, ΦΣΚ, S.B., M.I.T., 1896. 538 Ward Street, Newton Centre.
Professor of Steam Engineering; in charge of the Department; Director of Engineering Laboratories; Head of Ordnance School of Engineering.

ALLYNE L. MERRILL, S.B., M.I.T., 1885. 207 Pleasant Street, Arlington.
Professor of Mechanism; Secretary of the Faculty.

CHARLES E. FULLER, S.B., M.I.T., 1892. Wellesley.
Professor of Theoretical and Applied Mechanics.

WILLIAM A. JOHNSTON, S.B., M.I.T., 1892. 35 Hillside Terrace, Belmont.
Professor of Theoretical and Applied Mechanics.

CHARLES F. PARK, ΑΤΩ, S.B., M.I.T., 1892. 21 Prospect Street, Taunton.
Professor of Mechanism; Director of Mechanical Laboratories; Director of Lowell Institute School for Industrial Foremen.

GEORGE B. HAVEN, S.B., M.I.T., 1894. 704 Webster Street, Needham.
Professor of Machine Design.

JOSEPH C. RILEY, S.B., M.I.T., 1898. 36 Robinwood Avenue, Jamaica Plain.
Professor of Heat Engineering.

CHARLES W. BERRY, S.B., M.I.T., 1895. 6 Center Street, Somerville.
Professor of Heat Engineering.

HARRISON W. HAYWARD, ΘΞ, S.B., M.I.T., 1896. 26 Everett Street, Newton Centre.
Professor of Materials of Engineering.

THEODORE H. TAFT, S.B., M.I.T., 1902. Cypress Road, Wellesley Hills.
Associate Professor of Heat Engineering.

WALTER H. JAMES, S.B., M.I.T., 1896. 58 Dale Street, Waltham.
Assistant Professor of Mechanical Engineering Drawing.

LAWRENCE S. SMITH, S.B., M.I.T., 1900. 25 Fisher Avenue, Newton Highlands.
Associate Professor of Theoretical and Applied Mechanics.

GEORGE W. SWETT, S.B., M.I.T., 1903. 11 Henry Avenue, Melrose Highlands.
Associate Professor of Machine Design.

ADDISON F. HOLMES, S.B., M.I.T., 1904. 27 Everett Street, Arlington.
Assistant Professor of Applied Mechanics.

ROBERT H. SMITH. 17 Heath Street, Winter Hill.
Assistant Professor of Machine Construction.

THOMAS SMITH, B.S., University of Pennsylvania, 1894; M.E., 1895. 307 Harvard Street, Cambridge.
Assistant Professor of Mechanism.

JESSE J. EAMES, S.B., M.I.T., 1902. Swampscott.
Assistant Professor of Experimental Engineering.

DEAN A. FALES, S.B., M.I.T. 145 Highland Street, West Newton.
Assistant Professor of Automotive Engineering.

DEAN PEABODY, JR., S.B., M.I.T., 1910.
Assistant Professor of Applied Mechanics.

Department of Mechanical Engineering, Applied Mechanics and Mechanic Arts—*Continued*

Back Row: Burnham, Cooper, Haskel, Shepard, Schwarz, Chayne, Ashcroft, Brown, Littlefield
Middle Row: Hedberg, Hysom, Lambirth, Brickett, Nelson, Jones
Front Row: Hastings, Pearson, Taylor, Dole, Adams, Townsend

INSTRUCTORS

James Richard Lambirth
Charles Everett Littlefield
Roy Gibson Burnham, S.B.
Myron Wilkinson Dole, S.B.
Jeremiah Francis O'Neill
William Henry Jones, S.B.
Francis Alden Brown
Ralph Guy Adams, S.B.
DeWitt McClure Taylor, S.B.

Charles Augustine Chayne, S.B.
Claude Hugh Clark
Arthur Lawrence Townsend, S.B.
James Holt, S.B.
Carl Louis Svenson, S.B.
Edwin Franklin Nelson
Joseph Keighley Pearson, S.B.
Igor Nicholas Zavarine, S.M.

ASSISTANTS

Thomas Ashcroft
Edward Montgomery Brickett, S.B.
Harry Murray Chatto, A.B.
Robert Butterfield Cheney
Benjamin Austin Cooper, S.B.
Harland Clement Forbes, B.S.
George Howard Hardy
Robert William Haskel, S.B.
Philip McAlpine Hastings, S.B.
Harold Frederick Hedberg, S.B.
Richard Cornelius Hodges
Roscoe Hartwell Hysom, S.B.
Oscar Albert Muenz
Francis Winfield Perkins
Constructor of Apparatus
Edward Robinson Schwarz
William Andrew Sharp
Malcolm Keene Sheppard, S.B.

STUDENT ASSISTANT

Samuel Ewart Bickle

Department of Chemical Engineering

Back Row: Mead, Atwell, Calingaert, Whitman, Hoops, Robertson, Kunberger, Forrest
Middle Row: Robinson, Weber, Barnard, Stose, Pitman, Russell, Myers
Front Row: Youtz, Lord, Lewis, McAdams, Fuwa

WARREN K. LEWIS, S.B., M.I.T., 1905; Ph.D., Breslau, 1905. 85 Lombard Street, Newton.
Professor of Chemical Engineering; in charge of the Department.

ROBERT T. HASLAM, S.B., M.I.T., 1911. 72 Freeman Street, Arlington.
Associate Professor of Chemical Engineering; Director of School of Chemical Engineering Practice; Director of Research Laboratory of Applied Chemistry.

WILLIAM H. MCADAMS, ΚΣ; B.S., University of Kentucky, 1913, M.S., 1914; S.M., M.I.T., 1917. 7½ Center Street, Cambridge.
Assistant Professor of Chemical Engineering.

CLARK S. ROBINSON, S.B., M.I.T., 1909; 1915. 393 North Main Street, Reading.
Assistant Professor of Chemical Engineering.

WALTER G. WHITMAN, S.B., M.I.T., 1917. 1572 Massachusetts Avenue, Cambridge.
Assistant Professor of Chemical Engineering; Assistant Director of the Research Laboratory of Applied Chemistry.

DUSTIN W. WILSON, S.B., M.I.T., 1917. 338 Summer Street, Buffalo, N. Y.
Assistant Professor of Chemical Engineering; Director of the Buffalo Station of the School of Chemical Engineering Practice.

WILLIAM P. RYAN, S.B., 61 Garfield Street, Cambridge.
Assistant Professor of Chemical Engineering; Director of Boston Station of the School of Chemical Engineering Practice.

HAROLD C. WEBER, S.B. 160 Brook Road, Milton.
Assistant Professor of Chemical Engineering; Assistant Director of Boston Station of the School of Chemical Engineering Practice.

INSTRUCTORS

RALPH HENRY PRICE, A.B., S.B.
THOMAS HENRY FROST, B.S., S.B.
CHARLES HOLMES HERTY, JR., S.M.

RESEARCH ASSOCIATES

HAROLD VIVIAN ATWELL, S.B.
DANIEL PADDOCK BARNARD, 4TH, S.M.
GEORGE CALINGAERT, D.Sc.
HENRY OGLEY FORREST, S.M.
ERSKINE DANIEL LORD, S.B.
ARTHUR LORING PITMAN, A.M., S.M.
MERRILL ARTHUR YOUTZ, PH.D.

ASSISTANTS

FREDERICK WILDES ADAMS, S.M.
WILLIAM ACTON HOOPS, S.B.
EGER VAUGHAN MURPHREE, M.S.
SOLOMON MARK SILVERSTEIN, S.M.

RESEARCH ASSISTANTS

LEONARD RUSSELL CHURCHILL, B.CH.E.
TYLER FUWA, B.CH.E.
BRIAN MEAD, M.S.
HARRY MARCUS MYERS, M.S.
ROBERT PRICE RUSSELL, M.S.
HAROLD FREDERICK STOSE, S.M.

Department of Electrical Engineering

Back Row: Lane, White, Dow, Dambly, Hentz, J. C. Jones, Dahl, Preston, Coleman, Janes
Third Row: Guillemin, Husemeyer, Balsbaugh, Jeanne, Kohl, Tucker, Spaulding, Gardner
Second Row: Rose, Reed, Steze, Russell, Bangratz, Lansil, Nelson, Davis, McIlhenny
Front Row: Bush, Hudson, Ricker, Kennelly, Laws, Jackson, Dillon, Lawrence, Timbie, Dellenbaugh

DUGALD C. JACKSON, ΦΚΣ; ΣΞ; ΤΒΠ; S.B., Pennsylvania State College, 1885; C.E., Cornell, 1887. 5 Mercer Circle, Cambridge.
Professor of Electric Power Production and Distribution; in charge of the Department.

ARTHUR E. KENNELLY, Sc.D., University of Pittsburgh, 1896; A.M., Harvard, 1906. 1 Kennedy Road, Cambridge.
Professor of Electrical Communication; Director of the Research Division of the Department of Electrical Engineering.

FRANK A. LAWS, S.B., M.I.T., 1889. 124½ Federal Street, Salem.
Professor of Electrical Measurements.

THEODORE H. DILLON, U.S.M.A., 1904. Hampton Court, Brookline.
Professor of Electric Power Transmission and Electric Transportation; Director of the Summer Session.

ELIHU THOMSON, A.M., Yale, 1890; Ph.D., Tufts, 1894; Sc.D., Harvard, 1909. 42 Center Street, West Lynn.
Non-resident Professor of Applied Electricity.

RALPH R. LAWRENCE, S.B., M.I.T., 1895. 72 Summer Street, Dorchester.
Professor of Electrical Machinery.

VANNEVAR BUSH, ΑΤΩ, S.B., Tufts, 1913; M.S., 1913; Eng.D., M.I.T., 1916. 83 Plaisted Road, West Medford.
Associate Professor of Electrical Power Transmission.

WILLIAM H. TIMBIE, ΦΒΚ, B.A., Williams, 1901. 27 Clark Street, Newton Centre.
Associate Professor of Electrical Engineering and Industrial Practice.

WALDO V. LYON, S.B., M.I.T., 1905. 1108 Massachusetts Avenue, Arlington.
Associate Professor of Electrical Machinery.

RALPH G. HUDSON, S.B., M.I.T., 1907. 45 Ashton Avenue, Newton Centre.
Associate Professor of Electrical Engineering.

CLAIRE W. RICKER, S.B., M.I.T., 1914; S.M., 1914; M.E.E., Harvard, 1915. 62 Newport Street, Arlington.
Assistant Professor of Electrical Engineering and Industrial Practice.

FREREDICK S. DELLENBAUGH, JR., E.E., Columbia University, 1910; M.S., M.I.T., 1921; A.I.E.E., A.A.A.S., Franklin Institute. 91 Spooner Road, Chestnut Hill.
Assistant Professor of Electrical Machinery; Secretary of the Research Division of the Department of Electrical Engineering.

INSTRUCTORS

CLIFFORD E. LANSIL, S.B.

Department of Chemistry

(Including Research Laboratory of Physical Chemistry)

Back Row: Simpson, Young, Hamilton, Mulliken, Mitchell, Homerberg, Huntress, Phelan, Wareham
Middle Row: Underwood, Davis, Blanchard, Smith, Williams, Mueller, Small
Front Row: Norris, Sherrill, Schumb, Gill, Keyes, Talbot, Hall

FREDERICK G. KEYES, ΦΣΚ; B.S., Rhode Island University, 1906, M.S. Brown, 1907, Ph.D., 1909. 12 Mellen Street, Cambridge.
Acting Head of the Department. Professor of Physico-Chemical Research; Director of the Research Laboratory of Physical Chemistry.

HENRY P. TALBOT, ΦΓΔ; ΦΔΤ; ΑΧΣ; S.B., M.I.T., 1885; Ph.D., Leipzig, 1890. 237 Otis Street, West Newton.
Professor of Inorganic Chemistry. Acting Dean of Students.

HENRY FAY, A.B., Lafayette College, 1889; Ph.D., Johns Hopkins, 1895. 11 Worthington Road, Brookline.
Professor of Analytical Chemistry and Metallography.

AUGUSTUS H. GILL, S.B., M.I.T., 1884; A.M., Leipzig, 1890; Ph.D., 1890. 41 Myrtle Street, Belmont.
Professor of Technical Chemical Analysis.

FORRIS J. MOORE, ΧΦ; A.B., Amherst, 1889; Ph.D., Heidelberg, 1893. 372 Charles River Road, Cambridge.
Professor of Organic Chemistry.

JAMES F. NORRIS, ΦΒΚ; ΑΧΣ; A.B., Johns Hopkins, 1892; Ph.D., 1895. 339 Commonwealth Avenue, Boston.
Professor of Organic Chemistry; in charge of Graduate Students in Chemistry.

H. MONMOUTH SMITH, ΒΘΠ; ΑΧΣ; A.B., Wesleyan University; A.M., Ph.D., Heidelberg. 25 Cotswold Road, Brookline.
Professor of Inorganic Chemistry.

WILLIS R. WHITNEY, S.B., M.I.T., 1895; Ph.D., Leipzig, 1905. General Electric Company, Schenectady, N. Y.
Non-Resident Professor of Chemical Research.

SAMUEL P. MULLIKEN, S.B., M.I.T., 1887; Ph.D., Leipzig, 1890. 10 Harris Street, Newburyport.
Associate Professor of Organic Chemical Research.

MILES S. SHERRILL, S.B., M.I.T., 1889, Ph.D., Breslau, 1903. 86 Church Street, Winchester.
Associate Professor of Theoretical Chemistry.

ALPHEUS G. WOODMAN, S.B., M.I.T., 1897. 367 School Street, Watertown.
Associate Professor of the Chemistry of Foods.

ARTHUR A. BLANCHARD, S.B., M.I.T., 1898; Ph.D., Leipzig, 1902. 25 Evans Road, Brookline.
Associate Professor of Inorganic Chemistry.

WILLIAM T. HALL, ΣΑΕ; S.B., M.I.T., 1895. 5 Agassiz Park, Jamaica Plain.
Associate Professor of Analytical Chemistry.

ROBERT S. WILLIAMS, S.B., M.I.T., 1902; Ph.D., Gottingen, 1907. 156 Magazine Street, Cambridge.
Associate Professor of Analytical Chemistry and Metallography.

Department of Chemistry—Continued

EDWARD MUELLER, ΤΒΠ, S.B., Perdue, 1902; A.M. Harvard, 1905. Ph.D., 1907. Burton Halls. Dana Street, Cambridge.
Associate Professor of Inorganic Chemistry.

JOSEPH W. PHELAN, S.B., M.I.T., 1894. 60 Brooks Street, West Medford.
Associate Professor of Physico-Chemical Research.

DUNCAN A. MACINNES, ΣΞ; Ph.D., Illinois, 1911. 46 Massachusetts Avenue, Cambridge.
Associate Professor of Physico-Chemical Research.

EARL B. MILLARD, ΑΧΣ; ΣΞ; ΦΒΚ; ΦΑΤ; A.B., University of Colorado, 1910; A.M., Wisconsin, 1911; Ph.D., Illinois, 1914. 20 Prescott Street, Cambridge.
Assistant Professor of Theoretical Chemistry.

LEICESTER F. HAMILTON, S.B., M.I.T., 1914. 53 Randolph Street, Arlington.
Assistant Professor of Analytical Chemistry.

FREDERICK R. KNEELAND, ΔΦ; S.B., Columbia, 1899. Hotel Ludlow, Boston.
Assistant Professor of Organic Chemistry.

TENNY L. DAVIS, ΚΚΚ; ΑΧΣ; ΦΑΤ; S.B., M.I.T., 1913; A.M., Harvard, 1915; Ph.D., 1917. 50 Mount Vernon Street Somerville.
Assistant Professor of Organic Chemistry.

LOUIS J. GILLESPIE, ΑΧΣ; Ph.B., Brown University, 1908; A.M., 1911; Ph.D., 1911. 46 Farquhar Street, Roslindale.
Assistant Professor of Physico-Chemical Research.

WALTER C. SCHUMB, ΑΧΣ; ΦΒΚ; A.B., Harvard, 1914; A.M., 1916; Ph.D., 1918. 18 North Monroe Street, Dorchester.
Assistant Professor of Inorganic Chemistry.

WHO'S WHO OF THE CLASS OF 1924

Prologue

Hardly had the silvery tones of the clarion call for votes ceased to reverberate through the corridors, 'ere the class responded to a man. They were urged to scintillate and scintillate they did, offering up their very life's blood in the mighty effort. The result has been a veritable sea of facetiousness, and honor be to him who can wade through it and yet survive.

Who of the Class is

MOST POPULAR WITH THE FELLOWS?

Bert Read won by a narrow margin, with a tie for second between Jennings and Bates. Several voted for Lydia Blivin, while Abie Goldberg received only one vote.

MOST LIKELY TO TAKE UP ENGINEERING?

Helen Hardy won in a walk. It is rumored that a consulting vice-presidency in the office just across the hall from Charley Steinmetz has been offered her by the General Electric Company, at the suggestion of Professor Jackson.

MOST REPRESENTATIVE MEMBER OF COURSE XV?

T. C. Tse answered the question as follows,"The guy who wonders why $2 + 4 = 6$ and $3 + 3 = 6$ also." "Dusty" Rhodes said that the member who is most businesslike in dating up Professor Dewey's stenographers fills the bill; but he won't tell us who it is.

BEST LIKED BY THE FACULTY?

Pete Ruggles was elected when the first term reports came out and left a few days later. He must be the favorite because they all voted for him.

MOST STUDIOUS?

Any member of Courses XV or IX-B will do. The voting for Hal duPont was rather heavy.

GREATEST LOAFER?

Mike Amezaga and del Cardayre headed the list. Someone with a misplaced sense of humor voted again for Hal.

GREATEST TEA-HOUND?

Nip saw George Swartz order a Florida punch at the Colonial and so voted for him. George received several other votes, also, which entitles him to the honor.

BEST FITTED TO BE A PHYSICS INSTRUCTOR?

Everyone agreed that no member of our noble class should have his or her life blighted by receiving this distinction. H. F. Simonds claims that he can drop a cat so it will land on its back and should therefore get the job.

HEAVIEST DRINKER OF SODAS?

It's a close race between Dick Wagner and Levy.

HEAVIEST DRINKER OF LIQUOR?

The honor is divided between Andy Kellogg and the last man to "pass out" on Tech night.

What is your favorite

HAUNT?

The two "W's" — Walton's and Walker scored heavily. Some suggested Cæsar's ghost or the ghost in this year's Tech Show as their favorite "haunts."

DIVERSION?

"Polishing the glass eyes in French fried potatoes with boxing gloves on," was one answer; but we can hardly imagine that the writer really meant that. Throwing chalk and bits of paper at members of Course XVI as they industriously wipe off the blackboards might appeal to some of us.

FORM OF EXERCISE?

Sleep found favor with us all. Don Murdock, however, likes to chin himself on a bar that only just comes up to his knees.

PIPE TOBACCO?

Anyone else's seems to be the favorite, with a leaning toward cactus crumbs from Mexico and Edgeworth. Some members took this question as an insult and proudly affirmed that they never smoke.

TOOTH PASTE?

Lip sticks were widely popular while a few of our classmates voted for something of a more abrasive nature, such as powdered emery or gun powder.

BRAND OF MATCHES?

All agreed on safety matches. Course VI said that Dinty Moore's feet were the best brand they knew of. Ingy Lee liked the sulphur kind because he can scratch them on his chin.

TYPE OF GIRL?

Wide diversity of opinion manifested itself. Most everyone agreed on the loving type, but beyond that, there was no harmony of feeling. The Chesterfield type, "mild yet they satisfy," was mentioned; while Chick Kane likes the girl who does not let her brains interfere with her pleasures.

STUDY?

Vice and bench work on the Fenway seems to express it as well as anything. Some, however, would rather be more specific and call it Life Class at Rogers.

TYPE OF CONVERSATION?

Just at present, everyone enjoys talking about the "rotten political system" as exemplified by the Electoral Committee. Other favorite topics are, "How hard we have to work at Tech," and " What you almost saw at the show last night."

Who Is Our

GREATEST POLITICIAN?

E. S. Bates is undisputed lord of all politicians and is ably assisted by Bill Robinson. Even the Beta Steam Roller crumbles before the pair.

BARTENDER?

No one is so out of date as to be a class bartender, everyone is his own bootlegger these days. However, if we must have a bartender, it might as well be Jack Parsons.

BEST DIPLOMAT?

If you get a FF and go around and tell the instructor you enjoyed the course and would like to take it with him again, you are a true diplomat. It has been done.

CLASS BEAUTY?

What a conceited class we have! Nearly everyone placed his own name as an answer to the question. A summary of votes is impossible, but Ed Moll came out with a favorable number.

PROPHET?

No one has been found who can tell how large a laboratory fee we will have to pay in addition to the regular deposit.

DEEPEST THINKER?

The man who falls through the ice and when at the bottom of the river, thinks he will come up where he went down. Any of our mining engineers are eligible.

OLDEST MEMBER?

Flint Taylor won with F. O. Billings just appearing on the horizon. Someone suggested the man with the baldest head, whoever that may be.

HOT LIPS EXPONENT?

Voo Doo won. Bill Van Dusen came in second and the rest of the class all voted for themselves.

BEST TEAM MANAGER?

Jack Cannon makes quite a boom when "firing off" about this position. Dr. Rowe cast the only vote in favor of Charlie Phelps.

CLASS GOAT?

Dan Keck and Ed Moll tied for first place with Hood Worthington about two jumps behind. Rakenius Possiel was not forgotten.

WHAT DEATH DO YOU SUGGEST FOR RODOLPH VALENTINO?

The most popular suggestion was that he be forced to watch all his own films. Death by drowning in boiling slick-um was also mentioned.

WHO IS YOUR FAVORITE APPLIED PROF?

Slave Driver was almost unanimously elected with a few votes scattered between Holmes and Peabody.

DO YOU BELIEVE IN MARRIAGE OR FREE LOVE?

Many answered, "No!" Others said, "Try and find free love." Charlie Phelps said to consult Professor Passano.

WHO HAS THE GREATEST MOMENT OF INERTIA TAKEN THROUGH HIS CENTER OF GRAVITY?

Since the magnitude of a moment of inertia is directly proportional to mass and the distance of its point of concentration from the axis, two answers were given for each question, one for the vertical and the other for the horizontal axis. Vin Cates won about a horizontal axis while Tubby Rogers was unanimously elected about the vertical. The Applied Mechanics Department should be glad to see that not a single student failed to specify the axis.

WHAT IS YOUR IDEA OF A GOOD TIME?

Bob Simonds says there is a good time for every little "good time." Whit Rhodes enjoys turning out the light and trying to get into bed before the room gets dark.

WHO RECEIVED THE LARGEST COOP DIVIDEND?

The right answer to this question is that the coop received the largest dividend.

WHAT IS YOUR SOLUTION FOR THE BOSTON TRAFFIC SITUATION?

Some doubt was expressed as to what "traffic" was meant. Most of the class realized that the kind which has a cop to regulate it was the one referred to. The best suggestion was to dig a tunnel under the Charles, flood it, and run submarines.

WHO IS BEST FITTED TO DESIGN A NEW HARVARD BRIDGE?

The poorest engineer in the world would be sure to improve it, so why not let Mike Hoar try. Still, there is no use worrying about problems of the 22d Century.

WHAT MEMBERS OF THE FACULTY SHOULD BE SHIFTED TO THE PHYSICS DEPARTMENT?

All Course II voted for Burnham and James was only .0006 points behind. O. Ingraham and Dr. Gerke were not overlooked.

HOW OFTEN DO YOU VISIT WELLESLEY?

Some of us live out there, so it is just one long visit; others drop out once or twice a week. And would you believe it, about half the class wonder whether Wellesley is a boy's or a girl's name.

WHAT WAS YOUR OBJECT IN COMING TO TECH?

To many, the object was their fathers, while a few want to be engineers. Some heard that the work at Tech was hard and came purely to satisfy their curiosity. We hope it is satisfactorily satisfied.

WHO IS THE CLASS RADIO-BUG?

Weeks was elected unanimously in spite of the crackling static. He receives Medford Hillside with seventeen stages of radio frequency with his inductive capacity hanging out the window.

The Season of 1922 in Athletics

A YEAR of marked activity in sports found some of the teams representing Technology falling back a notch, losing titles they had held or meeting defeat at the hands of foemen they had conquered in years previous. But other teams won new laurels and counterbalanced the reverses by the brilliance of their exploits. However, the important consideration is the manner in which the athletes on those teams went into their contests, and here the season of 1922 witnessed no setbacks. Often the advance was very slight, almost imperceptible at times, but always that real yet intangible spirit that characterizes Technology's conduct in athletics made itself more widely felt.

In Robert E. Hendrie, captain of cross-country, and Elmer Sanborn, his predecessor in that post, stands best exemplified the spirit which makes men who, entering athletics for the first time after coming to the Institute, are able to compete successfully against their longer trained rivals from other colleges. In athletics as in the world at large Technology typifies a serious purpose achieved solely by the means of hard work. These two men, the only wearers of the "T" in the national championships at the stadium last May, set an example to-day of what that spirit can accomplish in spite of difficulties. It is men of their type who have raised Technology's athletics to the distinctly higher rank they now occupy.

In track, the major sport, the team fought its way to a near triumph after disheartening reverses. The manner in which a few devoted members of a practically beaten team faced odds and by tieing Boston College in the N. E. I. C. A. A. retained the Briggs Trophy at the Institute for the fourth successive year is an epic in the story of intercollegiate competition.

The basketball team, after starting the season with severe defeats, struggled gamely until it won victory upon victory and ended its schedule with eight successive triumphs. The wrestlers did likewise and carried off the New England title though meeting reverses in early season contests. Unwilling to give up any progress made, the Sophomore class continued the baseball team it had formed its freshman year, and when the freshmen followed their example, a new sport began to grow up at Technology.

These efforts were not unnoticed by the authorities as the purchase of the B. A. A. boathouse for Technology's crews and the conversion of the old hangar into a modernly equipped gymnasium, giving added impetus to sports clearly proved. Every team found record-breaking squads of candidates reporting, and only the most strenuous efforts made possible the utilization of all available material. True to the policy of athletics for their own sake, most Institute teams cut their squads only as disciplinary measures. Track with over 200 men training under Coach Kanaly is the most notable example of this code, whereby no earnest worker is dropped merely because he is not a potential champion.

Under such conditions it is natural therefore that athletics are assuming more and more their rightful place of importance at Technology. The calibre of the Cardinal and Gray teams are making Institute athletes respected abroad, while public opinion among the undergraduates and faculty is rapidly yielding them their due at home. It may truly be said that athletics were never in a more favorable position at the Institute and the maintainence of the ideals which have established the present situation will perpetuate and better it from year to year.

Captain-elect Smith

Navy and Harvard defeated the Institute track men in dual meets, while the mile relay found fourth place its limit at the Penn Carnival, but with all that, the season of 1922 was a successful one for the Briggs Trophy, emblematic of the New England Intercollegiate Championship, may still be found on exhibition in the trophy room in Walker Memorial. A tremendous effort was needed to keep the famous cup there for its sixth successive year, but the team proved equal to the test, and the fact that Boston College shared first honors with the Engineers does not dim their exploit in any degree. The achievement was completed in spite of the odds against them, and with true dramatic effect it was Captain Chittick himself who with Bob Hershey won a supposedly impossible victory in the last event of the meet and snatched the points which kept Technology unbeaten in the N. E. I. C. A. A.

Manager-elect Swartz

New England Championships The 36th annual New England Intercollegiate Track and Field Championship Meet at Worcester on May 19 and 20 ended with Technology and Boston College deadlocked, each with 24 points to their credit. Brown was third with 19, and Bates, Williams and Amherst suc-

Gurney, Chittick and Smith against Merrill in "440"

ceeded in order. When Yard Chittick won the low hurdles and Bob Hershey slipped into third place, ahead of Cook of Wesleyan, to score the eight points Technology needed to equal the B. C. total, a new record was established in the history of the Association. Never before had any team remained unbeaten more than five years, and this final rally left Technology in the first rank for the sixth successive year. The Cardinal and Gray was not alone in the leadership this time, but until the Engineers are actually beaten, the Briggs Trophy remains in their possession.

The failure of the Institute men to qualify in the preliminaries for the field events sent Captain Chittick's team into the final day's contests under a severe handicap. At the start, Poole was shut out in the 100 when he had been looked to for points, and no Institute entrant reached the final of the high hurdles. Sanborn and Hendrie ran wonderful races in the distance events, the former winning the mile, while Ray Buker defeated Hendrie in the two mile. The quarter went to Driscoll, but Art Smith placed third, Gurney barely making fourth position. Then Kirley of B. C. won the half, while Charlie Snow dropped back to fifth.

The semi-final heats of the 220 was Poole pitted against Driscoll, but the Cardinal and Gray sprinter was crumpled up by a pulled tendon and the B. C. man went on to win fourth place in the final. It was then that the classic run of Chittick and Hershey in the last event of the meet, the low hurdles, saved the situation for Coach Kanaly's team. Tonon, Dippel and Heap were the only men to count for Technology in the field events, where they scored a total of four points, with one third and two fourths. Clark of Amherst established a new high jump mark at 6 feet, ¾ inches.

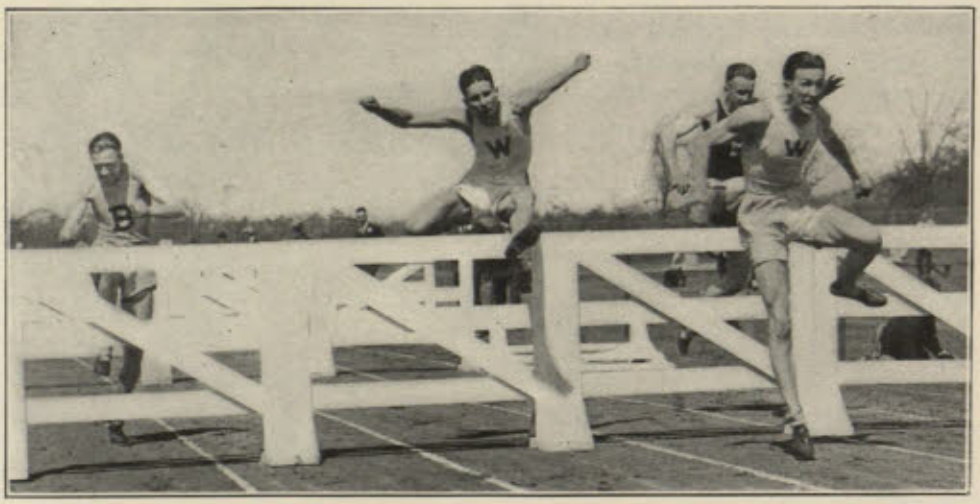

Hendrie Winning 2-Mile Run

Sanborn Leading in Mile — N. E. I. C. A. A. Meet

I. C. A. A. A. A. Championships Only Sanborn and Hendrie reached the finals of the I. C. A. A. A. A. championship meet at the stadium, May 27. Elmer Sanborn led the field in the mile for the first three laps, but then dropped back to sixth position. Hendrie likewise failed to place after alternating in setting the pace for more than seven laps with Buker of Bates, who was himself beaten at the tape by Higgins of Columbia. Both Engineer distance men gave very good account of themselves, but pitted as they were against an exceptionally fast field, did not show up their real worth in comparison. California won the meet and Princeton trailed her, leading Leland Stanford and Cornell, who were third and fourth by a substantial margin.

Interclass Meet The Seniors opened the activities of Junior Week by scoring more points than the combined totals of their three rivals in the Annual Interclass Meet, April 17. The Juniors' 41 trailed 1922's 93; the Freshmen ran

Cook of Wesleyan First in High Hurdles—N. E. I. C. A. A. Meet

Chase and Poole at the Finish of the "100"

up 21 points and the Sophomores were hopelessly out of it with only 10. Dandrow's double win in the hammer and shot put combined with a third in the discus made him high scorer and added 13 to the Senior count. Poole '22, and Heap '23, each accounted for eight points with a first and a second but in general, men confined their efforts to one event. Following the custom of former years, cups were awarded each first place winner.

Penn Relays The mile relay, composed of Johnny Poole, Bill Smith, Bill Gurney and Yard Chittick, which had done so well in the indoor season, dropped back to fourth in the Class A championship at Philadelphia, April 29. Syracuse led Princeton in record time, but only an upset at the first exchange of batons put the Engineers practically out of the fight and permitted the Chicago team to slip into third place.

Harvard Meet The University track and field men showed unexpected power on Tech Field May 6, and by having just a little greater drive at the finish than the Engineers, took most of the events by the smallest of margins.

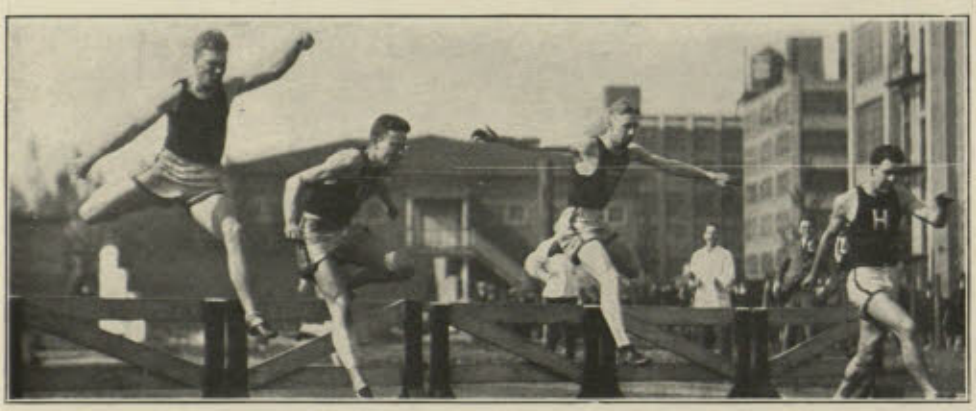

Blodgett third in High Hurdles, Harvard Meet

Chittick and Ambach in First Heat of Low Hurdles

Gurney in the 440, Hendrie in the two mile, Merrill in the high jump and Dippel in the broad jump, scored the only firsts for the Cardinal and Gray. But though victory went to the Crimson, it was hardly won. Poole lost the 100 to Chase by a hair's breadth, and was again nosed out in the 220 by the same Harvard star. Sanborn led Burke more than three laps in the mile and Chittick was at the shoulders of Fitts and Hauers in the low hurdles. Merrill sprang a surprise in the quarter when he slipped past Chittick and Art Smith for second place behind Gurney, and Burke showed his ability by winning both the mile and the half. In a game effort to fill a gap in the Engineer ranks, Elmer Sanborn entered the two mile event with Hendrie after his hard-fought mile contest and actually succeeded in crossing the line third, only to be disqualified because in a moment of excitement a sympathizer had paced him around the final curve.

The field events found Brown of Harvard taking first in the two weight competitions. Tillie Tonon took second for the Institute in the hammer and the javelin throws, while Nimick scored second in the shot and third in the discus. The broad jump gave Technology first and second through the work of Dippel

and Heap, but Harvard scored the same in the discus. No event of the meet resulted in a shutout for either team.

Annapolis Meet The dual meet with the Middies at Annapolis May 13 resulted in a complete triumph for the Navy, due chiefly to the Engineer weakness in certain events rather than to a generally inferior team. Technology's representatives were unable to place in the half mile, the discus, or the javelin throws. In the hurdles, two third places were all Blodgett and Chittick could secure. These five events gave the Annapolis team such a lead that the sterling work of the Institute men in the other contests proved unavailing. Johnny Poole scored ten points with victories over Marshall of Navy in the century and the 220. Hendrie won the two mile without opposition, but Flanders lost second to Hurd. In the mile run, Sanborn was unable to withstand Curtis' finishing sprint, though Young of the Middies, who followed Sanborn across the tape, at no time threatened the Engineer star.

Gurney's defeat in the quarter was unexpected and disappointing, as he did not run at his best. Foss passed him in the last twenty yards with a well-timed sprint, and Art Smith came up and finished right behind the pair. The high jump was the Engineers' best event, with Ed Merrill and Bill Greenough tieing for first.

1923 Mile Relay

Kanaly, *Coach* Tench Bateman Smith Cusilito Swartz, *Manager*

WITHOUT a single veteran from the speedy 1922 relay available, Coach Kanaly was forced to build up an entirely new team to represent Technology in the indoor season. Captain Smith, Bateman, Tench and Cusilito proved the fastest in time trials and met Syracuse at the Millrose Games, January 31, in New York. The collegiate champions defeated the Institute runners and demonstrated their right to their high ranking.

With Joyce replacing Cusilito, the Engineers won a thrilling hard-fought contest with Harvard in the B. A. A. games on February 3. Tench moved up to lead off man with Joyce, Bateman and Smith running the next three relays in order. A return meeting with the Crimson at the K. of C. meet two weeks later found the result reversed. Captain Smith was kept out of the contest by illness, Holden taking his place and Bateman filling the anchor position. Though the first three sprinters led the Harvard men, Burke's final quarter was too fast for Bateman and the University captain finished five yards in front. In the contest with Princeton at the N. Y. A. C., February 24, the victory went to the Orange and Black. Holden ran for Tench, but neither he nor Joyce could outdistance their opponents, and Bateman and Smith failed to make up all the first pair lost.

The Technique Award

Tecnnique Cup

The year of 1922 marked the start of a notable custom at Technology with the presentation of a cup by Technique '23, to be awarded each year to the Institute's foremost track athlete. This award is based on a graded point system whereby each point scored in the Intercollegiates counts five points toward the cup, each point in the New Englands, three points, each in a dual meet, two points, and each in the annual Interclass meet, one point. The original cup presented by the Technique '23 Board is kept in the trophy room at Walker and a small replica will be presented the winner each year.

John Ward Poole, '22, the first winner of the cup, surely deserved the honor, if steady, conscientious work counts in athletics. Coming from Exeter as a freshman, Poole captained his Field Day relay team in both Freshman and Sophomore years. He early showed his ability by winning the 220 of the Harvard meet when a sophomore, and followed this with a victory in the same event at the New Englands, thus earning his straight "T."

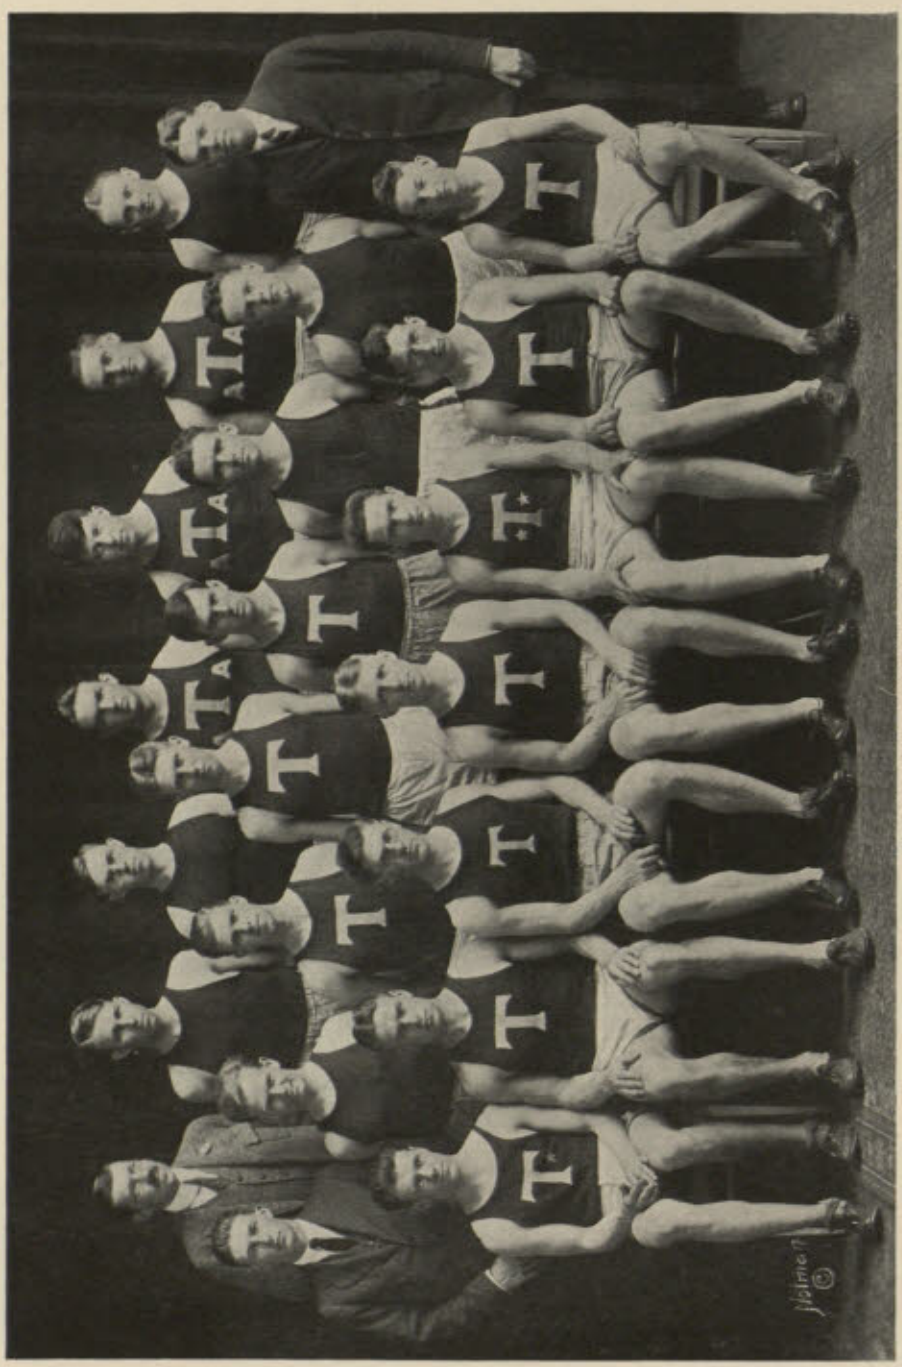

Continued hard work while a junior was the basis of his fine showing as lead off man on Technology's star relay team in the winter of his Senior year. This team made an enviable record with victories over Harvard and Syracuse and also by establishing a new Technology mile relay record.

In the spring season, Poole was the Engineer mainstay in the sprints. Starting with a 220 win in the Interclass Meet and second place in both sprints against Harvard, he came through in the 100 and 220 at the Navy Meet in thrilling finishes for two first places. Misfortune overtook him in the New Englands, however, when just after being nosed out of a place in the 100, he pulled a tendon while leading in the 220 final.

In four years of continued effort, Poole established a record of achievement which made him the winner of the first Technique award, as well as setting a standard which will not easily be surpassed by later recipients of the honor. Always a hard worker, and dependable to the limit, he represents, as the winner of the trophy should, the ideal college athlete.

Starting with a decisive victory over Cornell on her home course and ending with the winning of a very close third in the I. C. A. A. A. A. Championships, the record of the 1922 Varsity is one of the best in Technology's athletic annals. Captain Bob Hendrie proved a fitting leader for such a team, setting a unique standard of personal achievements. Bob won all his races against the best college harriers without real effort except in the national intercollegiates where Walter Higgins of Columbia snatched the Championship from his grasp almost within reach of the tape.

Hendrie an Easy Winner at Cornell

Five veterans, including Captain Hendrie, reported to Coach Kanaly at the opening of the cross-country season and these, strengthened by three members of the 1925 Freshman team, made up the squad which carried the Cardinal and Gray so successfully throughout the fall. Sanborn, Poor, Robertson and Holt had seen service before, while Bemis, Parkinson and Keplinger, who was unfortunately lost to the team after the Cornell race, were the new members.

Cornell Run On October 20, Coach Kanaly sent his team to a 50–55 victory over Coach Moakley's Cornell champions. For only the second time in her history, Cornell was defeated in a dual meet on her own course. Hendrie and Sanborn took the first two places for Technology. In this meet under the new style of scoring, ten men competed, and the first seven, instead of the first five, scored, which accounts for the large totals of both teams. Bemis, Keplinger,

Varsity Practice on Tech Field

Hendrie and Sanborn Leading the Field

Poore, Parkinson and Holt completed the tally in order. Due to an infected foot, this was Keplinger's last race and his loss was keenly felt in the later contests.

Triangular Meet Running away with the individual honors again, Bob Hendrie led his team to triumph against the harriers of Harvard and Dartmouth at Belmont on October 27. Sanborn was nosed out of second by Young of Dartmouth, while Bemis in sixth place defeated Burke, the first Crimson runner across the line. Poor in ninth and Parkinson in eleventh place brought the Engineer score to 30, clinching the victory by an 18 point margin over the Green harriers, who in turn were two ahead of Harvard.

Princeton Meet The third meet, a dual run at Princeton, November 4, was a 26–30 reverse for Technology. The strangeness of the course and other factors prevented the Engineers from attaining their best form, as

was demonstrated three weeks later when the same seven men administered a crushing defeat to the Orange and Black at Van Cortlandt Park. Captain Hendrie and Elmer Sanborn accounted for first and second, Bob even smashing the course record in his eagerness, but the home team was so closely bunched that they squeezed through nevertheless.

N. E. I. C. A. A. Run Although Bob Hendrie was as invincible as ever, the team was out of form November 18 at Franklin Park and both Maine and Bates slipped in ahead. Hendrie set his own pace throughout the five miles and won without serious effort, but for once Sanborn was not with him. Taken ill on the course, the courageous veteran showed extraordinary gameness in continuing the race, but to no avail, so that Bemis in fifteenth place was the second scorer for Technology. Parkinson, Poor, and Holt completed with a total of 110. Maine, the winner, tallied 49, Bates 53, and Bowdoin was fourth, with 128.

Off with the Gun at the New Englands

I. C. A. A. A. A. Championship In the national championships at Van Cortlandt Park, November 27, the team showed its true mettle and won third rank among the harrier aggregations of the country. Syracuse won with 75, Yale followed with 108, only five points better than the Technology score. Bob Hendrie staged a remarkable fight with the famous Walter Higgins for first place, but the latter's finishing sprint won for him within 300 yards of the tape. The rest of the team outdid former performances in their efforts to win. The results speak for themselves. Sanborn scored 11 with Bemis right behind him. Gubby Holt, captain-elect for 1923, ran the finest race of his career, finishing 33, with Poore 62, the last scorer. It was here that the loss of Keplinger cut Technology out of second place if not a championship. The failure of C. I. T. to finish but three men, eliminated them from the scoring, which explains the Institute total of 113.

The 1926 cross-country team was not as successful as its last two predecessors, due to the class's general lack of interest in the sport. The actual team members deserve much credit for their hard work but inexperience and only a small number of candidates proved too great a handicap for their efforts and Coach Kanaly's training. The first run, a dual meet with Worcester Academy, gave the prep school harriers an 18 to 50 victory. Captain Lord in third place was the first of the Institute yearlings to finish. The fast Harvard '26 team then outclassed the frosh over the Belmont course and won 17 to 44; the first Crimson victory over Technology harriers in four years. In the I. C. A. A. A. A., the 1926 runners placed eighth in a field of ten with Rooney in 37th position their first man to score.

SWIMMING 1922

Entering the 1922 season with high hopes as New England champions for the two preceding years, the Institute swimmers were doomed to a succession of disappointments. Decisive defeats were inflicted upon Amherst, Springfield and Wesleyan, but West Point, Annapolis, Brown, Rutgers and Yale proved too strong for the Technology contingent. In the N. E. I. S. A., the title was lost to Brown, Captain Weber's team tying with Wesleyan for fourth honors.

A 30–23 victory over Springfield on January 13 started the year in a most auspicious manner. A very exciting relay race was won in the fast time of one minute, twenty-three and three-fifths seconds, chiefly by the fine work of Earl Palmer, swimming anchor. Brown and Henniger both carried off firsts in the plunge and the 220-yard swim.

The second meet, January 21, was a 36–32 win over the visiting Amherst team, most of the visitor's points being due to the efforts of their star, Damon, who won both the 50 and the 100-yard dashes. Then success deserted the Cardinal and Gray swimmers. West Point and Yale both outclassed their opponents, the Eli team taking first and second in every event. In an attempt to retrieve their fortunes, the Engineers met Brown at Providence, February 15. Although Captain Weber's outfit showed marked improvement and put up real fights in every race, the Bruins triumphed by a score of 40–20.

Manager Ames

Wesleyan came to Boston, February 25, and was severely beaten by the Technology team who took occasion to make up for past misfortunes. The home swimmers ran up a total of 46 points, easily eclipsing the 22 of Wesleyan. In this meet the Institute men appeared to be coming back into shape, but a trip to Rutgers and then to Navy found them pitted against outfits of particularly strong calibre and unable to count in the pinches. Rutgers won 43–28, while Navy's victory was by a 48–13 score.

Captain Stewart

The N. E. I. S. A. was held in Boston as Technology was 1921 champion. Competing against a number of star performers and minus three of their best men, the Engineers fought uselessly to retain their title, which went to Brown. Dartmouth took second, Amherst third, and Technology tied with Wesleyan for fourth.

CREW
1922

In an effort to overcome as many handicaps as possible by extra training, Captain McCurdy started conditioning work on February 23, when one hundred and thirty prospective oarsmen reported for practice. All through the rest of the term the men were kept hard at it in the gymnasium and on the road so that when the crews first took to the water, March 21, they were in very good physical condition. Lack of a coach at first hindered the training sessions, but soon after Coach Arthur W. Stevens arrived to take up his new duties, the crew rounded into shape.

The season was opened at Annapolis with the first and second crews racing the Middies over the one-and five-sixteenths-mile Henley Course on the Severn. The Varsity put up a good fight all the way up to the finish, where the greater weight and experience of the Naval Academy oarsmen began to tell and left the Institute shell behind. The second crew was unable to maintain the pace after leading to the mile point and fell back of both the Middy second and third boats. Considering the handicaps under which the Cardinal and Gray crews were competing, the showing was by no means a poor one.

The second contest, on May 6, with the Union Boat Club on the Charles River, proved that the Varsity was responding to Coach Stevens' instructions and developing into a more smoothly running machine. Captain McCurdy's shell took the lead at the start and though forced to extend themselves at all times to maintain the advantage, nevertheless did so and crossed the line a winner by two lengths.

Manager-elect Hungerford

On this same day the second Varsity and the Freshman crews were beaten at New Haven by the Yale shells. Both the yearlings and the second crew gave the Elis a battle and both lost by the margin of a length and a half.

The following Saturday, May 13, the two Varsity and the Freshman eights met their respective Harvard opponents. The 1925 shell, as well as that of the second Varsity, was considerably behind its rival at the finish, but the Varsity race proved a thriller. It was rowed over a one-and-seven-eighths-mile course on the Charles,

Varsity Even with Harvard at Mile

and until the mile mark was passed, the advantage shifted back and forth between the contestants. By the time the shells reached the mile and a half, the Crimson cox had urged his men ahead and in spite of the best efforts of the Institute oarsmen, they held their position across the line. A single length was the margin of their victory.

The last race of the schedule was May 20, with Columbia, on the Harlem River, reverting again to the Henley mile course. Once more weight and experience counted heavily against the Technology eights, and both the first and second Varsity fell before the sweeping strokes of the Columbia veterans. The Varsity lost by two lengths, while the second shell was twice as far behind its adversary.

Thus the third season did not produce for the Institute a crew capable of defeating the foremost college crews, but it made great progress toward the future development of such an organization. The purchase of the B. A. A. Boathouse and additional equipment overcame the severest obstacles in forming successful crews to represent the Cardinal and Gray, and with Coach Stevens about to commence his second year in charge of the Engineer oarsmen, the 1923 season bids fair to prove the best to date. The chief difficulty now appears to be the lack of sufficient heavy and experienced candidates, but this is a deficiency which time and proper coaching will eliminate.

Crimson Eight Pulls Ahead

BASKETBALL
1922

A veteran team opened Technology's second season of Varsity basketball with easy wins over Northeastern and Massachusetts College of Osteopathy in practice games in December. The promise of a very successful year under the efficient guidance of Coach Allen and the dashing leadership of Captain Cub Hubbard seemed assured. It was to be realized only after a severe setback, however.

Three games played away from home resulted in as many defeats at the hands of Worcester Polytech, Clark and M. A. C. The Engineers simply were unable to get under way on an opponent's floor. Upon their return, Captain Hubbard led his five to decisive victories over Tufts and B. U. in the Walker Gym. Once again the Cardinal and Gray representatives played good basketball, but there was one more slump ahead of them. A clash with Harvard on the latter's floor gave the Crimson a 31–27 victory, while the next game, at Providence, found the Brown team winners by 28–17. The defeat by the Bruins was particularly disastrous as the whole squad played in poor form.

That was the end, however. In every one of the next eight contests, all of which were played on the home floor, the Engineers displayed brilliant basketball and though often on the verge of defeat, always succeeded in snatching a victory before the final whistle. Captain Cub gained sweet revenge on Mass. Aggies when his men triumphed over the Farmers in a thrilling 20–18 battle. Then New Hampshire State fell before the prowess of the Cardinal and Gray five, 26–20. Amherst was quickly overcome, 25–15, but Williams had a six-point lead at the end of the first half. Nothing daunted, the Engineers returned to the fray, and with Tillie Tonon heading the offensive, ran up a score out of reach of the Purple defenders.

Manager Murdock

Having gained confidence in themselves, the team met Brown in by far the hardest fought and best played game of the year. Two overtime periods were necessary to settle the matter before Ted Storb's shot gave the verdict to Technology, 27–25. B. U. and Amherst were hopelessly outclassed the next week, and then came the final contest of the year, with Harvard in Walker. The Crimson invaders piled up a seven point advantage in the first half, but to no avail. Tonon's free toss a few seconds before the whistle won a 19–18 victory.

WRESTLING
1922

The inexperience of the Engineer wrestlers cost them all their early season meets, but willingness and hard work wrought a change before the last of the year and gave Technology victories over Princeton and Harvard as well as the New England Intercollegiate Championship, defeating Brown, whose team had won from Captain Buttler's outfit some weeks before. In the N. E. A. A. U., Harry Bruner won the 118-pound crown, while Captain Buttler took second honors in the 147-pound class.

Coach Burns got practice under way November 7, when thirty-five men reported for training but, with mostly raw material to work with, Cyclone had to give a great deal of effort to the business of rounding out a capable team. On January 21, the veteran Brown wrestlers opened the Engineers' season by inflicting a 17–10 defeat upon Captain Buttler's men. Hereford and the Institute leader scored all the points for Technology, each securing a fall.

Springfield and Yale, both strong aggregations of experienced wrestlers, won from the home wrestlers by rather one-sided scores, though the individual contests were all hardly contested. The day following the Yale clash, the team met Brooklyn Polytech and due to the absence of Captain Buttler from the line-up, lost by a single point, 16–15.

The outlook was plainly better for the Institute team, steady practice having done its work, as the next two meets, decisive victories over Princeton and Harvard, showed. The Tigers lost after a good battle by the score of 18–13, while the Crimson, who were before the match favorites, found themselves on the short end 18–8. A trip to Annapolis then resulted in a crushing defeat for the Engineers, but inasmuch as only nine points were run up against the Middies in eight meets and Captain Buttler managed to tally three of these, the facts of the case are not at all uncomplimentary to the Cardinal and Gray representatives.

Manager-elect Jackson

Entering the New Englands against Harvard, Dartmouth and Brown, the expected winner, Technology qualified four men to the Bruin's six, but the work of those four was sufficient to win 18–17 over the Providence team. Bruner, Tuttle and Captain Buttler won their classes, and with Hereford's second place brought the championship to the Institute. Harvard trailed with 10 points, while the Green wrestlers could collect only 3.

HOCKEY
1922

In order to avoid the error of the 1921 season, Coach Powers began practice at an early date so that by the time of the first game, with McGill, on December 29, the men were well trained in team play. The fast Canadian hockeyists proved too strong for Captain Nickle's men, in spite of their preparation, however, and won 8–2. When he led his men to New Haven to meet Yale on January 9, the good work had its effect. In an extraordinarily hard-fought contest and by playing remarkable hockey, Technology's sextet succeeded in downing the Bulldog, 1–0.

This victory was followed by a 3–0 win over the Dalhousie College team which, unlike its countrymen from McGill, was unable to pierce the Institute defence. Boston College was the next opponent and, due more to poor playing by Technology than to her own brilliancy, won, 3–2. After this defeat, the team made a determined effort to get back into shape and swamped Mass. Aggies, 6–0. Then followed a dismal period of four successive defeats at the hands of Harvard, the Westminster Club, the B. A. A. and Boston College. The Eagles' second triumph gave them the victory in the annual three-game series which is always held between the Institute and the Heights' team. These reverses showed that the team was badly out of condition. In spite of the earnest endeavors of Coach Powers and Captain Nickle to encourage them, the men as a rule neglected training. The defeats were a natural consequence.

Manager-elect
Fletcher

The team staged a final rally in the last game that gave them a 2–0 victory over Williams and manifested a fighting spirit that had been absent since the Dalhousie contest. An unfortunate slump spoiled what otherwise would have been a season of brilliant hockey. As it was, the team scored an even break in its eight battles with the best college hockey sextets, and lost its two matches with club teams.

BOXING
1922

The call for men brought out about eighty candidates for the Varsity and Freshman teams. Under the careful training of Coach "Nap" Boutelier, the Varsity men spent the fall term in practice, while the Freshmen competed in a hard-fought tournament.

On January 28, the Varsity team had its first battle of the season, winning over the Cambridge Y. M. C. A. team by a score of 3–2. Bob Smith, in the 125-pound class, won a knock-out in the first round, while Jack Ryan, in the 135-pound class and Captain Ed Moll, in the 145-pound class, also won their bouts.

The next meet came on February 4, with the U. S. Military Academy team at West Point, the army men winning by a score of 6–0. The score does not give a correct impression of the showing of our team, for every bout was hotly contested throughout, the Army men winning in many cases rather through better physical condition and aggressive tactics than through superior boxing skill. Al Lindsay in the 115-pound class, Lew Phillips, in the 135-pound class, and Captain Moll, in the 145-pound class, fought particularly good battles and the decisions were very close.

On February 18, our men showed good form and plenty of aggressive fighting in a meet with the Yale team. Al Lindsay, Bob Smith and Lew Phillips won the first three bouts of the evening, but in the heavier weights, Yale showed superior strength and endurance, winning the final three contests for a tie score, 3–3.

Manager Manning

The final meet of the season came with the U. S. Naval Academy boxers at Annapolis. The Middies were victorious by a 5–1 score, but without exception the bouts were close and the Navy fighters had to use all their fistic ability to obtain the decision. In the 135-pound class, Lew Phillips defeated the Navy entry with a wonderful exhibition of boxing skill, while in the 145-pound class, Captain Moll fought an exceptionally fast and close battle.

While on the whole the season did not bring many victories, yet the men in every meet brought in the best spirit of sportsmanship and made an excellent showing against the most formidable teams in the country.

Captain Moll

Because of the cancellation of dates by opposing teams, the Freshmen took part in only one meet, a hard-fought battle with the Yale Freshman team, the latter winning by a 5–1 score.

GOLF

1922

A schedule of five matches resulted in three victories for Captain Schley's golfers, Yale and Harvard demonstrating their superiority over the Engineers. The season opened at the Brookline Country Club on May 13, when Williams was defeated 4 matches to 2. On May 19, however, the Institute team was able to take only two matches from the Crimson at Brae Burn. This as well as the ones with Brown and Yale were nine-match contests, while Williams and Amherst played only six.

The Brown team was totally unable to provide any real opposition to the Technology visitors at Providence on May 19, and lost every one of the nine matches played. Amherst was then met and conquered 4 to 2 at Woodland on May 25, but two days later Yale won a sweeping victory over the Engineers on the same course, the Eli golfers took 8 matches and tied 1 for a final score of 8½ to ½.

FIELD
DAY.

FIELD DAY

Issybelle

The annual clash of the Frosh and the Sophs took place on Friday, November 3. On that day, the two classes whose rivalry had been steadily growing since the opening of the term, found a chance to express their feelings with actions. This they did with a greater showing of class spirit than has ever been shown at the Institute. Not content to limit the interclass struggle to a competition of athletic prowess, the rival classes organized unofficial battles for the domination of various points of vantage from which to hang their respective banners. In spite of the distracting effect that these little episodes had upon the general interest, the regular schedule of events went on according to the usual and time-honored custom. The first of these events was the crew race which proved to be a decided victory for the Sophomores. After the crew race, the spectators marched to the stands, the Sophomore ranks being led by Issybelle, a true Engineer's mascot. The tug-of-war proved to be the one event in which the Frosh had superior ability, both the football game and the relay race being counted as Sophomore victories. The last toot of the timer's horn ended the Freshman massacre with the scoreboard reading 11 to 2.

The Frosh Supporters

Freshman Eight

Contrary to general expectations, the contests, with the exception of the relay race, were not close. The Sophomore crew and football team showed themselves to be veterans, while the Freshman huskies found no opposition from their opposing tug-of-war team. Great credit is due the coaches of all the teams. In spite of the handicap of limited time, their men proved the statement that there is athletic ability at the Institute. The Freshman and Sophomore crews were coached by F. S. Dellenbaugh and A. Stevens, respectively. Bill Rivers '24 supervised the work of both tug-of-war teams, while Bert Read '24 acted in the same capacity for the two relay teams. W. A. Metcalf '23 and R. M. Randolf '23 coached the Soph's footballers, while E. Calkins broke in the freshmen to the ways of the gridiron.

The Crew Race As the crews pushed their shells off from the boathouse landing, vicious looking waves from a choppy sea were breaking over the bows of the vessels. The rough water proved a severe handicap to the Freshman boat on her maiden voyage, for before the Sophomore cox had barked many counts, his boat had forged ahead of the opposing shell by half a length. Excepting for a slight increase in lead on the part of the Sophomores, things remained about the same until the crews passed under what is left of Harvard Bridge, upon which a crowd of spectators were defying Charlie Spofford's theory of structures. At this point, the leading crew started a spurt from force of habit. The result of said spurt was an increase of the lead to six lengths of rough open water at the finish, and three points scored for the Sophs. Their time was 6 minutes 27 seconds. The Frosh managed to pull in twenty-eight seconds later. In the race that was run for the benefit of the second teams of the two classes, things broke for the Sophs in about the same way, for their boat crossed the finish, eight lengths ahead of their opponents. Never mind, Frosh, without a doubt there'll be another class at the Institute next year, and then, you know, the river isn't always rough.

Mike and Boutelier

The Tug-of-War To the 1926 Tug-of-War Team belongs the credit of the two lonely points which were scored in the favor of their class. The first pull took place right after the crew race and when the Sophomore team was displaced twelve feet in 1 minute, 11¾ seconds, the Freshman hopes began to rise. When the teams came out after the first half of the football game, the Sophs were determined to have a third pull to decide the contest, but — well, they use intentions for paving-blocks in some places. At any rate, whatever the Sophs wanted to do about it, the Freshmen repeated their little performance of the

Sophomores in a losing battle

Bateman crossing the line

first pull. This time they did it in 1 minute, 48 seconds. It is generally conceded that the Freshmen victory is due in part to the fact that this is the first year that the Military Science Department has not issued shoes.

Mike Perhaps the greatest disappointment of Field Day was when Mike Hoar lost the first of his annual Field Day exhibition races. The victor this time was coach Nap Boutelier who had left Mike many yards behind when he touched the tape at the end of their 220-yard race. Mike was unable to secure his handicap and did not have his usual luck in beating the gun. We all hope he'll stage a comeback next year. Pop Stedman might be suggested as suitable meat for the Technology trainer.

Relay Race The most spectacular event of the day was the relay race. The contest was such that the result was uncertain until the moment Capt. Glen Bateman, the Sophomore anchor man, touched the tape a bare four yards ahead of Captain Jones of the Freshmen team. When Davidson, the first Frosh runner, handed over the baton to his successor, after having created a ten-yard lead for his team, it looked as though the Frosh had made a good start towards victory. In fact, this lead was maintained by the Freshmen for the next three laps. During the fourth lap, however, Druckler managed to cut down the distance between him and Symonds, so that when Makepeace took up the race for the Sophomores his opponent was leading by only five yards. Makepeace and Russell, who followed him, reduced this lead to a bare yard. McHenry, the next Sophomore runner, managed to pass Rodgers, but fell near the end of his lap. He quickly recovered and handed over the baton to Hoxie after the latter's opponent had been on his way for ten yards. At

Price makes the only score

this turning point of the race, Hoxie proved his worth. He closed in on Greeley and at the end of the lap had passed him and was leading by a yard. The next two Sophomores managed to keep in front of the Freshmen runners. This gave the two anchor men practically an even start at the beginning of the last lap. Jones pressed Bateman hard until the end of the lap, when the latter managed to force his lead up to the four yards which separated the two runners at the close of the race. The time of the race was 4 minutes, 57 seconds.

Football Game Due in part to the new apportionment of Field Day points, the state of affairs at the start of the football game was rather unique. If the Sophomores could be victorious the five points gained would, when added to the three won by the '25 crew, make Field Day a sure thing. However, if the Freshmen should be successful and should be further supported by a tug-of-war team which had already decisively won their first pull, the results would be reversed. This added an especial interest on the part of the spectators and increased the zest and determination of the twenty-two warriors who lined up on the gridiron.

To follow the game in detail: Callahan '26 kicked off to Carrier who caught the ball on his 30-yard line and was downed. After Carrier had plunged through tackle for ten yards, the Sophs punted to du Pont. The referee called an off-side and the ball was returned. Johnston, Carrier and Price of the '25 team made line plunges that netted 11 yards. After carrying the ball for another first down, the Sophomores lost the ball on downs. After sending Magrew '26 through center for a 3-yard gain, Bianchi '26 called Harrison back to punt. The Sophs caught the pigskin on their 30-yard line and with a 30-yard run by Carrier and clever plunging by Price, managed to work the ball up to the Frosh 12-yard

Carrier breaks loose

line. Here Johnston '25 attempted to kick a field goal, but failed. The Frosh took the ball through one play and the quarter was called.

At the start of the second quarter, Harrison '26 returned the ball to the Sophs. The '25 backfield again pushed the ball well into the Freshmen territory in spite of a penalty for holding. An intercepted forward pass gave the ball to the Frosh on their 20-yard line. After Magrew had failed to gain through the line, the ball was punted to the Sophomores and Carrier ran it back 16 yards. The Sophs made two more first downs before their second forward was intercepted. The Frosh kicked out of danger and the half ended.

The Freshmen opened the second half by receiving the ball and making numerous and not too successful attempts to advance the ball. With the aid of penalties against the Sophs, the Frosh backfield managed to work the ball to the center of the field. An exchange of punts took place and the ball was again in the hands of the Freshmen. They attempted to kick but the kicker was blocked and the Sophs had the ball on their opponents 13-yard line. After Carrier and Johnston had placed the ball within 1 yard of a score, the quarter ended.

On the first play of the next period, Price went over the line for the only points of the game. Johnston missed the attempt at goal. The Freshmen received and made a game attempt to score throughout the remainder of the quarter. Although they were unable to make very substantial gains themselves, they checked the Sophomore advances with more success than in the earlier part of the game. The '26 men should be credited with the only two forwards completed during the game. The ball was in the Sophomore's hands when the whistle closed the contest. Score, '25–6: '26–0.

ACTIVITIES

All-Technology Smoker

WELCOME is the advance of the All-Technology Smoker toward an affair which will henceforth be attended by Technology men as a pleasure rather than a duty. The fourth annual smoker was held in Walker Memorial on October thirteenth and it proved an affair where men could go and be welcomed by their fellow students, by the faculty, and the alumni, as factors in student life. The purpose, to draw the interest of old students and to introduce new students to undergraduate activities, was carried out with remarkable success. The student was not compelled to listen to speeches by representatives of a long list of activities in order to hear a word or two concerning the one that really interested him. Instead, he heard a general talk on the advantages and pleasure derived from connection with some undergraduate organization, and was allowed personal interviews with the heads of the activities in which he was interested.

The committee consisted of a large group of men under the general direction of H. I. Beadle '23. Arrangements were made for interesting athletic contests held in the gymnasium. Boxing, wrestling, and fencing matches drew large crowds, while others had supper in the Main Hall. Music could be heard throughout the building, and was furnished by two of the best student Orchestras. Smokes were abundant, and many novelties were distributed from the offices of the Activities.

On the platform, Dean Talbot and Dr. Rowe both delivered excellent messages to the student body, which, linked with the talk on Activities by K. C. Kingsley, '23, developed the atmosphere, for which this important annual affair was held. The Technique Challenge Cup was presented to the athlete winning the most points during the Track Season. Having won and accepted this honor J. W. Poole, '23, said an encouraging word to the assembled students. The alumni, represented by the Chairman of the Association, in their usual generous manner, turned over Walker Memorial to the student body by presenting the key to R. P. Shaw, '23, Chairman of the Institute Committee. This mammoth Smoker helped to emphasize still more strongly the advantage and desirability of this established Technology tradition.

ENTHUSIASM certainly inspired all Tech men as they filled the seats in the Shubert Theatre to celebrate the annual Tech Night. A musical operetta, "The Rose of Stamboul," met with gay appreciation from all quarters of the house. There was no dull moment in the performance, or a time when a casual glance through the audience could detect visages that did not show decided enjoyment, which in some cases was actually derived from the musicale itself.

The celebration of victory or the consolation for defeat had not entirely subsided when the final curtain fell. The crowd continued the merrymaking for some time after they had left the theatre. Noise seemed to be the call from within and the evening wound up with the good spirit of abandon prevalent among all.

THE CIRCUS

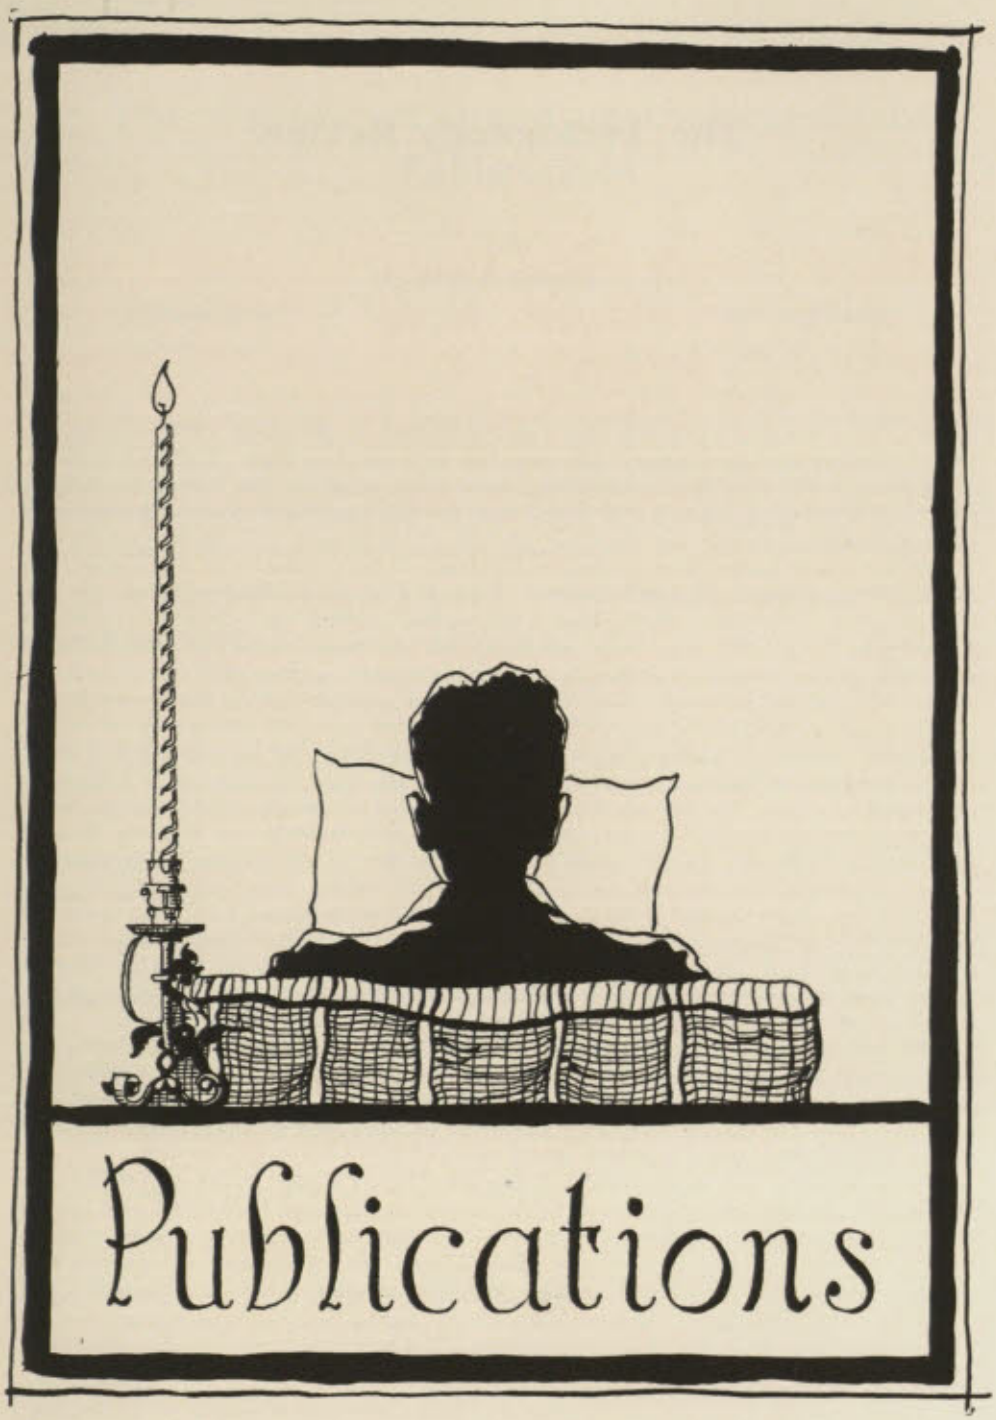

IT seems that the genius of the undergraduate mind will never be satisfied. Every year there arrives in our midst several men with the ability to conceive of some enjoyment that will appeal to the unhappy student during his busy hours. During the past year we have had several such masters of mind. Even before the last signs of the shifters had left our walls, the murmur of the possibilities of staging a Circus was heard on the lips of many of our idle dreamers. Some wise seniors, grounded solidly on the rock of tradition as a result of many years at the Institute, slid their sliderules in disgust at the suggestion of such an impossible plan. Others objected to the idea because it had never been done before. But the plan soared slowly ahead, until we were finally told that the Circus was really coming to Technology. Anxiety was immediately expressed as to the place for holding such a function as this promised to be. Many other questions were raised and for several days the student body carried a continual query, "What is to happen at the Circus?"

The date was set for Thursday, March 1, and sure enough the Circus arrived. At one o'clock the same day the entire student body assembled in the great court for the first panorama picture taken of Technology students since 1917. Copies of this were on sale that evening at the Circus.

The doors of the main hall of Walker were opened to the rush of students at 7 o'clock. Here they encountered much excitement. The hall was surrounded with many side shows, while the main stunts were performed in the middle. Most of the activities ran side shows, while Clubs and Fraternities performed in the ring. A prize was awarded the best stunt and the Bullfight staged by the Cosmopolitan Club carried it away. A great many thrills were afforded by the many entrants in the knight-riders-and-lance contest. Much liquid (?) was spilled over the Musical Rech Bar, while the latest news of the barroom brawls was reported by the associated press. During the intense excitement of the downstairs activities many enjoyed boxing, fencing, and other stunts in the gym. Food was sold everywhere at cost. Even the Filter Paper had a rival when a new publication called the Leadville Clarion made its appearance.

Most of Technology attended the spectacular affair and all had a real Circus time. The first Technology Circus ever held was a real success and a successful function should not be allowed to die. Let's allow the Circus to visit us often!

THE TECHNOLOGY REVIEW was founded in 1899 as the official publication of the Alumni Association. It was at this time issued by the Association of Class Secretaries, an organization which then held a controlling interest in alumni affairs. The Review was designed to serve as a journal of Institute and Alumni news and as a cumulative record of the history of the Institute.

Arthur Dehon Little, '85, was the first Chairman of the Committee on Publications and Arthur Thomas Hopkins, '97, the first editor. At a later time, James Phinney Munroe, '82, now Secretary of the Corporation, became head of the magazine and was succeeded in turn by Walter Humphreys, '97. In 1907, Isaac White Litchfield, '85, was chosen as the Managing Editor of the Review and continued to administer the affairs of the magazine without break until the summer of 1917 when he left Boston for Washington to become a member of the War Labor Board.

Mr. Litchfield had served both as Editor of the Review and Field Manager of the Alumni Association. This latter position was not filled when he vacated it, but his post as Editor of the Review was taken by Robert Emmons Rogers, Harvard, '09, Assistant Professor of English on the Institute Faculty, who had previously done the Review and the Alumni Association a great measure of credit by his single-handed reporting of the entire 1916 Dedication Reunion. Because he was not a Technology man, Professor Rogers desired that his appointment be considered as temporary. Despite this, however, he remained as Editor for five years and resigned in June, 1922, only because the decision of the Executive Committee of the Alumni Association to convert the Review from a quarterly to a monthly magazine made it manifestly impossible for him to continue the duties of Editorship in addition to his duties as a member of the Faculty. Professor Rogers consented, however, to become Contributing Editor to the Review. In June, consequently, H. E. Lobdell, '17, became Editor, and E. F. Hodgins, '22, Managing Editor.

The first issue of the monthly Technology Review was that of November, 1922. The Review as a quarterly had appeared as a 6 x 9 magazine of some 150 pages. In its monthly form the Review increased its trim size to 9 x 12 inches, altered its cover design, make-up, typography, news and advertising policies completely and strove to make itself a magazine of much more timely interest than ever a quarterly could be.

So far, under the new policy, which has been operating for almost a year, the Review has increased its circulation to a figure never before attained and has even built up for itself a small but constant undergraduate clientele. It has also materially increased its advertising revenue. It will, if it fulfills the hope of its present editorial board, continue to grow and progress with the years, with an ambition not only to follow precedent but also now and again to make it.

The Advisory Council on Undergraduate Publications

Harold E. Lobdell, *Chairman*

H. D. Peck '13 Winward Prescott

IN 1910, the Institute Committee, realizing the need of closer coöperation between students and Alumni in the management of undergraduate publications, and feeling that some directing influence was necessary to save the publications from financial disaster, asked the Alumni Council to form an advisory body to serve as the connecting link between the Alumni and these undergraduate activities. In response to this request, the Advisory Council on Undergraduate Publications was formed. At first, it devoted most of its attention to *The Tech*, but with a few minor changes in organization, this Council has continued with the same general purpose and now acts in an advisory capacity to *The Tech*, *Technique*, *Voo Doo*, and *The Tech Engineering News*.

The following extract from the Preamble to the Constitution and By-laws of this Advisory Council summarizes the concepts which govern the operation of undergraduate publications under its jurisdiction:

"3. (*a*) The Alumni have a direct interest and a right to a voice in the management of any student activity that trades on the good-will of the Institute as a whole and by which the good name of the Institute might be compromised. This principle is recognized in the formation of the various existing Advisory Councils, and is especially important in the case of Activities such as Undergraduate Publications, since the latter depend in part for their advertising on giving the impression to the business public that they are responsible activities officially recognized by the students and alumni as such.

"4. (*b*) The Alumni claim no right or desire to interfere in any student activity not involving the principle outlined in (*a*) except insofar as their advice may be requested, or proffer of it may appear to be in order.

"5. (*c*) In any matter between the Alumni and Undergraduate Activities where procedure has not been charted by sanction of the Institute Committee, contact with the Activity involved should be through the Institute Committee, as the responsible and authoritative body representing the whole Undergraduate Body.

"6. (*d*) In Undergraduate Activities which are recognized by the Institute Committee as legitimate Institute Activities, the principle should be strictly adhered to that no Activity should be run for the private profit of the students involved, that surpluses should be used first, to place the Activity itself in the highest condition of effectiveness, and beyond that should be disposed of as the Management of the Activity and its Advisory Council may agree."

In the fall of 1919 the profits made from the publication of *The Tech* during the war were formally placed in a so-called "trust fund," known as "The Tech Fund," and amounting to about $3000. This idea spread to the other publications and today, besides The Tech Fund there exists The Tech Engineering News Fund, The Technique Fund, and The Voo Doo Fund, for all of which the Advisory Council acts as a trustee. The aggregate value of these funds, as shown by the last report of the trustees, is a little under $12,000. These funds are available for use in furthering the aims of the individual publication, such as the addition of necessary office equipment, etc. It is hoped that some day they may form the nucleus of a permanent building fund for the erection of a new and separate structure to house satisfactorily all undergraduate publications. With this in view the M. I. T. Chapter of Pi Delta Epsilon last year placed a small amount of money under the care of the Council to be known as The Pi Delta Epsilon Building Fund; the principal and income to be spent in furthering such a housing project.

THE NEW TECHNIQUE

THE stone wall of tradition has been stormed several times since the final meeting of the 1924 Electoral Committee, but the aimed at accomplishment did not show itself until the first meeting of the Institute Committee for the Second term. Just the thought that the 1925 Electoral Committee was soon to take office started a retrospection of some of the undesirable functions which this body had always possessed. The result was sudden action on this serious question which has been brewing for several years and which had been brought up by the 1924 Board previously but had met at that time with no success. The action took the form of making Technique an activity with positions to be filled entirely by competition. This immediately and automatically brought about the fall of the long standing tradition of the Technique Electoral Committee.

Plans for the entire reorganization of the Technique Board were then started, and within a remarkably short time competitions were opened and proceeded to get under way rapidly. The whole structure of the organization has been revised and it is generally believed that the new form contains all the advantages of the old, combined with some very desirable features which were impossible to realize under the previous division of responsibility. The New Board consists of a General Manager, A Managing Editor as head of the Editorial Division, and a Business Manager as head of the Business Division, all of whom are Seniors. The remaining seven members of the Board are all Juniors, their positions consisting of Literary Editor, Department Editor and Art Editor on the Editorial end, with the Advertising Manager, the Treasurer, the Photographic Manager and the Publicity Manager on the Business end. The only doubt that might arise as to the scope of these positions seems to be in the Literary Editor and the Department Editor. The former is in charge of all literary work throughout all the departments of the volume. The Department Editor prepares all the necessary information most of which consists of the lists of members of the various Organizations, Faculty, and Athletic teams, including also the compilation of the Senior Portfolio excluding the photographs.

The new organization is of such a nature that the competitions for the various Board positions are very definite in all of their phases. Freshmen may compete for positions of Associate Editors and Assistant Managers as Sophomores, whence they compete directly for the positions on the Board which they hold as Juniors. The Senior members of the Board are chosen from those who held the Junior berths during the previous year.

This will certainly mark an important era in the History of Technique, and the anticipation of its serge ahead when freed from the yoke that has always held it, is truly not unfounded.

Five volumes of the VOO DOO have completed their successful existence since the inception of the magazine by Edward Edwards, Teodorico Quiros, Albert Kruse, and those who worked with them on the early issues. The publication sprang into existence as the child of unusual circumstances and trends of events. A humorous paper which was in size little more than a leaflet was first brought out at Technology under the name of WoopGaroo. It was given a good reception because of its originality and cleverness of thought and line, and because a real need was felt for a publication in the lighter vein. A somewhat vague state of mind and current of events followed the founding of this sheet. With the legal dissolution of the bond between Technology and the department of engineering at Harvard, there came also the discontinuance of the monthly engineering magazine of this formerly connected student body. Subsequent to this discontinuance the WoopGaroo was also abandoned nominally, and the publication of the VOO DOO was commenced. The VOO DOO was intended, it seems, to supplant both of the older magazines. Actually this amalgamation was never effected, and the engineering undergraduate publication was dormant for some years.

With increased size came the need of a larger and more surely perpetuating organization, a greater circulation, and a better balanced product in every respect. The position occupied by the college humorous publication has been increasingly prominent every year. The combined circulation has reached high into the tens of thousands per month. The country's leading professional humorous magazines are welcoming and recognizing in their columns the apprenticeship of the college comic.

In the brief five years of its existence, the VOO DOO has been widely clipped in other publications; it has received extremely satisfactory alumni support; the organization has jumped from an original total of eight men to more than sixty who do regularly assigned and accredited work; and its circulation has outstripped all but two of its older competitors. Having made this progress while the country was undergoing business depression and while exorbitant printing costs prevailed, the further growth and improvement of the VOO DOO seems now assured, and its recognition as a permanent part of undergraduate life and graduate relations is complete.

THE Cosmopolitan Club was founded a number of years ago for the purpose of promoting friendship among the students from foreign countries at the Institute. The Club holds frequent smokers during the school year at which topics of interest are discussed by competent speakers. It is planned to revive the custom of "National Nights" at which the members from one country take charge of the entertainment of the evening. With some two hundred and fifty foreign students at the Institute, a large number of whom are members of the Club, these should prove of great interest.

Last year an Association of the Cosmopolitan Clubs of Greater Boston and vicinity was formed, which plans to hold meetings once a month at the Twentieth Century Club.

The M. I. T. Chapter of the Unitarian Laymen's League was organized in 1920 with a view toward bringing together the students of Unitarian or other liberal faith at Technology, and toward fostering among them a more definite understanding of the principles of religious liberalism. The Chapter enjoys the privileges of Unity House, Boston, and holds monthly meetings, which, during the past year, have been very successful.

TECHNIQUE RUSH

The premier Event of Junior Week brought a large crowd to Eastman Court, where stood the Technique hut, ready for the annual raid upon it by the paddle grabbers. The Snique, a large dragon of many colors, started things going by ejecting a tennis ball from its mouth, for which there immediately appeared to be much demand. Finally, H. S. Ferguson came forth from the pile of students in possession of the coveted article. The little round house then became active and the rush toward it to obtain the paddle protruding from the top was checked by the issuing of streams of water from holes in the roof of the hut. Water, combined with the transmission oil, made a pleasant coating to protect the paddles from the onrushing crowd. The successful warriors who obtained paddles in return for their bruises were as follows:—H. S. Ferguson, '23, 2 by R. C. Smith, '24, F. C. Paul, '22, 2 by R. W. Barker, '22, J. E. Brash, '22, D. H. Keck, '24, C. O. Deuvel, '24, S. J. Helfman, '24, C. T. McGrady, '22, R. W. Wood, '22, E. E. Kussmaul, '25, G. P. Shumacker, '22, P. C. Stevens, '22, E. J. Hanley, '24, R. P. Price, '25, Sydnor Hall, '22, J. E. Sallaway, '22, T. J. Killian, '25. The first four received free copies of Technique 1923 autographed by Acting President Elihu Thompson, while the other paddle gainers had their copies autographed. H. B. Kane, '24, received a free copy as winner of the Grinds Competition and J. A. Pennypacker, '23, received one as winner of the Statistics Competition.

1923 Junior Prom

The Junior Prom of the Class of 1923 lost none of the gayety and splendor of the Proms of previous years. The main lower floor of the Copley-Plaza contained the many attractive scenes of one of the most beautiful Proms ever supported by Technology undergraduates. Herbert Lowe's excellent music went a large way toward the success of the party, continually keeping the main Ballroom entertained, while Edward Boyle led a smaller orchestra in the Palm Room. The favors were certainly worth-while articles, every lady being presented with a combination bill fold and cardcase of embossed natural colored leather, while the gentlemen received English model pigskin cigarette cases. The affair was in charge of the 1923 Junior Prom Committee, which consisted of the following members of the class of 1923: E. A. Adams, H. W. Dexter, Schuyler Hazard, R. P. Shaw, and A. D. Smith, Jr.

1924 JUNIOR PROM COMMITTEE

Earle Salisbury Bates, *Chairman*

Richard Curtis Eaton — Ernest Hosbach

William Henry Robinson, Jr.

This Committee is elected by popular vote of the Junior Class for the purpose of handling the affairs of the Junior Prom. The importance of this annual event makes the Committee work an activity in itself, and a successful Prom could not be possible without the duties being assigned to a special Committee.

JUNIOR WEEK

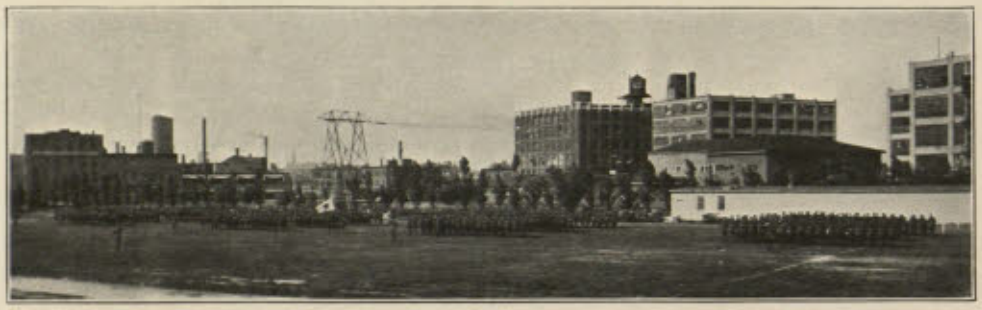

FOLLOWING the Technique Rush, the rough atmosphere was relieved considerably by the enjoyable Tea Dance held in Walker Memorial. This affair was one of the best Tea Dances the Main Hall had seen for several months, the care free atmosphere of Junior Week prevailing very strongly and being conceded by all to surpass that of our serious-minded affairs of the mid-term.

Most of the Fraternities which were running House-parties during Junior Week, entertained Saturday Evening with House Dances. Many went from one house to another during the evening, thus adding the attraction of varied atmospheres, which contributed very largely to the stock of Junior Week thrills.

Monday Afternoon gave the Seniors their chance to prevail and they were not even slightly hesitant about grabbing the opportunity. They exerted themselves very strongly in the Inter-class Track Meet, scoring more points than all other classes combined. The affair was not as enjoyable as had been hoped, on account of the pouring rain which kept away quite a number of spectators and slowed down the runners considerably. The Feature race was the Inter-fraternity relay, which was won in good time by the Sigma Chis, furnishing several worth-while thrills.

The Musical Clubs had their turn when they took over the Somerset for the Spring Concert and dance on Monday Evening. This gave the visitors a chance to enjoy excellent parties in the two best Boston Ball Rooms, when they were enabled to attend this Concert and the Prom on consecutive evenings. The Clubs gave one of the best musical entertainments they had given all the year and the dance afterwards made a most enjoyable combination.

The Tech Show contributed very largely to the success of the last Junior Week, giving three performances in Boston. They attracted the Junior Week crowd Tuesday afternoon to the Matinée performance before the Junior Prom. The Show was of such a quality that it was thoroughly appreciated by the very receptive and congenial audience.

Thomas Boeke, *Author*

Tech Show has always been a musical comedy, but sometimes a note of extravaganza has been added to the usual social comedy of such pieces. So it is this year; the singing and dancing takes place with a melodramatic background to be taken as seriously as the spectator wishes. The scene is laid in Mexico, where the rose of romance is sometimes adorned with the thorns of political turmoil.

The old legend contained a princess, and this likewise has one, Evelyn Hubbard, the daughter of an oil king. How she meets her prince is the story of the play. Together with her parents and a party of friends, she visits the oil country on the coast of Mexico. When the curtain rises in the first act they are found singing and dancing in the home of the resident manager of the oil wells, Mr. James Atwood, who wants to marry Evelyn and is encouraged by her mother. Evelyn, however, has her own opinion as to whom she wants to marry and holds foremost in her mind a young matador who has saved her from a bolting horse while she had been riding thru town. She fairly jumps with joy when she hears that Jim Sutler has invited this young man to the house. After seeing him again she falls more in love with him than ever. He, however, could tell no more than that he was an American and would see her again.

It has been somewhat embarrassing for him when Serafina, a fiery Spanish senorita, claims first right to his attentions. Luckily, her affections are fickle and are soon transferred to Arthur, a young scholar with the party who is making a collection of pottery. Serafina is a mystery to him until he connives to make a card index of her sub-conscious impulses. Even after convincing proof that his affections are given purely for the betterment of science, his sweetheart,

Betty, becomes jealous of the Spanish woman, especially after Arthur becomes a revolutionist and dresses up as a bullfighter.

Serafina also causes trouble between Jim Sutler and his fiancée, Madge. Jim succeeds through commanding words to bring Madge back to terms and in an affectionate scene he promises to remain good in the future.

The arrival of General Modesto who, in his own belief, is the bravest man in Mexico and who is prone to impress this on others, causes great excitement when he explains the activities of a notorious bandit, the Red Eagle, who works in that neighborhood. Nobody, in their wildest moments, thought that the Red Eagle would dare venture among them, but upon the departure of the young man who had been wooing Evelyn, a servant announces the amazing discovery

Keegan and Sylvester

that the Red Eagle himself had been amongst them all evening. The General is especially humiliated upon finding that the buttons of his uniform went with the parting guest.

The curtain, rising at the beginning of the second act, discloses a scene in the mountains with Sun Temple, an Aztec structure, in the foreground. Evelyn and guests arrive upon an inspection tour of the ruins and are set upon and captured by the Red Eagle and his band. He is very embarrassed upon recognizing that the party contained Evelyn, as he had not wished this to occur, but his men insist upon retaining the captives. To make the best of the situation, he not only provides for their immediate needs, but also furnishes them fireside entertainment.

How the party is to escape without paying a ransom to the Red Eagle's men is a rather difficult matter to decide, so Arthur attempts a solution by effecting an escape and seeking help. He finds three men who will help him, but the execution of their plan involves the explosion of a bomb on the part of Arthur, which he has no taste for. Arthur then seeks out General Modesto, who gathers together a rescue party, but upon finding out that the Central government has been overthrown and the Red Eagle the possessor of great political power, they set out to inform the Red Eagle of his luck. Upon hearing this news the Red Eagle's men gladly obey him and free Evelyn's party, thus bringing the Red Eagle into the good graces of Evelyn's mother. In return for her rescue, Evelyn's mother gives her parental sanction to the engagement of Evelyn to the Red Eagle. Not to be outdone, Madge and Jim decide upon an early marriage and are joined in the idea by Atwood and Senorita Serafina, thereby lending the prospects for a happy triple wedding.

The curtain falls with this joyful group surrounded by the entire ensemble.

The Development of Tech Show, since the first production in 1898, has been noticeable each year and it now represents the outlay of considerable time and expense. This advance into its present state has brought a keen desire upon the members of the Show to have the result of the great amount of work that is put into it show in more performances and before a broader field of spectators. The two performances in Northampton and the three or four performances in Boston, which have always been the extent of the showing of the finished product before the public, is hardly enough to justify the effort. However, for the last several years, attempts to visit other cities have proved futile and the Show has always ended up with the usual string of but half a dozen renditions. The journey of the Show to Hartford and New York this year has marked the most desired progress of the former promoters and will open a new field for further endeavor.

MUSICAL CLUBS

COMBINED MUSICAL CLUBS

Groce Tandler Roetheli Harvey Rupert

The Combined Musical Clubs were very fortunate in being able to start out the year with a complete organization. Schuyler Hazard, Jr., as Leader of the Glee Club, A. S. Redway, Leader of the Banjo Club, and Robert W. Hughes, Leader of the Mandolin Club, called for men for the Clubs the first week of school, to which invitation some one hundred and seventy-five men replied. With Mr. W. E. Weston of Brookline as coach of the Glee Club and Mr. John L. Liecty as coach of the Banjo and Mandolin Clubs, the organization was soon put into shape, ready for the traditional first concert at Franklin Square.

On the second of December, the Musical Clubs made their first appearance before the student body at the Fall Concert. Some four hundred people assembled in the main hall of Walker Memorial to listen to the first performance of a saxophone quintet which was organized this year. The Musical Clubs' Jazz Band, which has steadily been growing, furnished music for dancing until two o'clock. It was heartily applauded because of the very marked improvement it has shown since it started a couple of years ago.

The Winter Trip this year, after several upsets, was finally started on December 27 in Atlantic City. The Leeds-Lippincott Company, owners and operators of the Chalfonte-Haddon Hall Hotels, entertained the men very delightfully for dinner, over night, and for breakfast. The Crescendo Club of Atlantic City sponsored the concert and gave the men on the trip an idea of the congenial, hospitable atmosphere of Atlantic City. The next day in Philadelphia, the Alumni met the men and took them to the New Century Club, where they were given the privileges of the Club. In the afternoon, the program was broadcasted from Strawbridge and Clothiers. For supper, the forty men of the Musical Clubs were very pleasantly entertained at the homes of the Philadelphia Alumni. The next day the Clubs went to Schenectady. Because of a very bad storm, they were delayed and did not arrive until two o'clock. Immediately after broadcasting

from the well-known Radio Station, W. G. Y., the General Electric Company entertained the men at lunch and then took them through the Turbin Department of the Schenectady plant. The concert that evening was held at the Mohawk Golf Club and, regardless of the very bad blizzard that raged outside, there was a very large attendance. After having waited until 4 a.m. for the special pullman to come thru from Albany, the Clubs moved on to Buffalo. There, Mrs. A. B. Potter gave a very enjoyable luncheon for the men, giving them an opportunity to meet the girls who would be at the dance that evening.

Ecker Cook

Some six hundred friends and Alumni of the Institute assembled at the Twentieth Century Club at eight-thirty o'clock to hear the best concert which the Musical Clubs gave on their trip. Saturday the men spent with their friends in Buffalo and early Sunday morning they moved on to Pittsfield, where they played a concert Sunday afternoon. Monday evening the Clubs gave their last concert on the trip at Holyoke. Mr. Casper Ranger entertained the men very well while in Holyoke and helped to make the final concert stand out as one of the best.

After we returned to school, the plans were laid for the Winter Concert. It was held in the Somerset Ballroom on Friday evening, January 27. Bert Lowe certainly outdid himself on the quality of music which he played for the dance, which lasted until 3 a.m.

As soon as the Winter Concert was over, very probably the largest task ever attempted by the Musical Clubs was put in full swing. A concert was held in Symphony Hall, February 9, at which time Miss Marjory Moody acted as soloist. Miss Moody sang with Souza's Band during the summer and took a leading part in the "Messiah," which was given at Symphony Hall on January 7. The first public appearance of the Musical Clubs before Boston Alumni and their friends was greeted with a great deal of enthusiasm as shown by the fact that the house was filled nearly to its capacity.

DORMS

DORMITORY ANNALS

DORMITORIA est omnia divisa in partes quatres: unamquam incolunt Runklae, aliam Nicholes, tertiam Holmani quatramque Atkinsoni. Now this is no attempt to parody Cæsar, but an attempt to start off this word about the dormitories in a language that the Cosmopolitan inhabitants thereof may have at least a chance for some community of comprehension. If we had to publish this in the native dialect of every inmate of the premises, the Dormitory Section of this volume might even exceed the size of the book itself.

" 'The time has come,' the Walrus said——"

In facing the task of chronicling the activities of the Dormitories in the interval since the appearance of the last volume, we are confronted with the impossibility of incorporating details of many of the occurrences that lend the vital element to our undergraduate residence here.

We might tell of the part that Dorm Men played in Field Day events; how an intrepid gang of operators stormed the Main Lobby booth at midnight for Tech Night Tickets, and how they landed practically the first sixty tickets sold, thus duplicating the previous year's stunt in this regard; how arrogant freshmen stormed the Dormitory roof on Field Day eve; how they were repulsed by Juniors and Seniors of the Dormitories; how most of the Dorms went to the show Tech Night sober, and how most returned the same way.

Eating is one of the most important functions of our existence, but it is impossible to adequately chronicle midnight suppers at Walton's and regular meals at "The Spoon." Neither will the cursing of the deadly monotony of Walker food bear repetition.

Student Government.

Only Dorm Men know how jealously have been guarded the traditions of Dormitory Independence and Self-government thruout the past year. The proposition that the Dormitory Committee be a sub-committee of the Institute Committee stirred up such a hotbed of indignant opposition that the members of the official governing body were convinced that they were using the better discretion by leaving the Dorms to their own destinies. The arbitrary action of the Dean's Dormitory Council, in going over the head of the Dormitory Committee on one or two occasions, aroused a storm of anathemas, and engendered a doubt regarding the sincerity of the council in their professed wish to maintain, unhampered, the student administration of student affairs.

But we cannot delineate all that happened but must content ourselves with mention of the events that have affected the interests of the larger portion of the men in the Dormitories.

Sports

It was a group of Dorm Men who conceived the idea last year of making a rink out of the tennis courts back of Walker. They flooded it on several cold nights and made possible the freshman hockey practice field, and the powers that be have recognized the value of this idea of Dorm Men and finally, after much delay, have this year provided a permanent rink there.

Nichols Hall won the best of three hockey games played last year. The Basketball championship was taken by the "Coogan's Alley" gang of Runkle, while Atkinson walked off with the bowling tournament. Last year's sports were quite informal, and nowhere as complete as the program of this year. A schedule of twelve basketball meets, in which each hall plays each other hall twice, is being run off as this volume goes to press, together with a similar number of bowling encounters so that well over half of the men in the Dorms get into these sports.

"Welcome, Stranger!"

And latest, though not by any means the least, is the fact that for the first time in two years, since President Maclaurin's death in 1920, have we had a neighbor resident in the President's House, about which the dormitory buildings extend appropriately protecting arms. One of the first problems that President Stratton will have to solve is the problem of making available dormitory benefits to a larger proportion of the undergraduate body of Technology, and so, living so near-by, he can have a keener appreciation of what is needed. He is welcomed to our dormitory community.

And as June approaches, many will depart as they get their degree, and the mantle of responsibility of carrying on the traditions of the dormitories will be passed on to those who take their place.

THE special advantage which Institute Surveyors have, was enjoyed last summer by ninety-six students at Camp Technology. In the wilds of Maine, the Shore of Gardner's Lake was the scene of a group of men with transit, rod and tape, attempting to put behind them that course peculiar to the Civil Engineers. The student government and camp activities were supervised by a Student Council, elected by the Student Body, shortly after arrival at Camp, which before long organized the activities.

Baseball was the main attraction in the evenings, following the "strenuous" days' work. The enthusiasts were divided into four leagues, and keen competition was shown, the members of each team aiming to have their names engraved on the Baseball Cup. The best men from each team were chosen to form the Camp "Varsity" team. These men worked hard and successfully put down the much-famed swatters from the city — East Machias. The result was a decisive 13–6 victory. The League Championship was finally won by the "Cross Hares," captained by Hosbach, while considerable scrapping was done between the K. K. K.'s (Knine Klassy Kids) and the Techsus Sluggers for last place.

The introduction of another sport, Volley Ball, brought many out for evening exercise. The difficulty of finding a spot which could live up to the requirements of the game as far as topography was concerned, lead to much distress, but was finally overcome.

Canoeing was also popular, as evidenced by the week-end trips taken by the enthusiasts. Canoes were "bought" from the natives on the condition that they be returned at the close of Camp. Trips ranging from sixty miles to as far as the Camp Meeting Grounds, were taken during the season.

News

The Athletic Meet was held on Labor Day, followed by the annual open house and dance. Russ Ambach "ran" off with the Cup, while Bill Correale was in reach of the tape, being only a half point behind. Joe Perkins took third place along with the honor of being able to "up-set" a transit in record time.

Five Acts of Vaudeville was the work of the show, which was presented to the native populace on the Saturday preceding Labor Day. The Open House dance was so successful that the sentiment grew strong for a repetition of the dance and another was held two weeks later. Besides these dances, competition was strong in town between "Maine's Best Orchestra," Wiswell's Saxophone Sextet and Mr. Black and White, who "Sing, play and entertain." Each one of these held a dance every Saturday night. The competition finally ended by seeing which could back their truck up closest to the Tech Landing to secure the Tech dancers as they landed from the other side of the Lake. On the whole, the social functions in and around Camp were a great success.

Professor Hosmer

The miners left camp the Tuesday following Labor Day, to spend two weeks in the mine in Vermont. Their work immediately became more strenuous, as they were dependent on the hours when the mine was not in operation for a large part of their Mine Survey. They lived comfortably in a small hotel and were busy continuously with work of a quite interesting nature.

The advantage which the Civil and Mining Engineers have in being able to rub shoulders in this work of a practical and professional character, is one to be envied by those who are unable to get in such close contact with their fellow students. The spirit of the Camp has developed into one which makes it a place to which a Technology man may go to make intimate and lasting friendships in addition to obtaining an excellent course in Surveying.

SENIOR WEEK

TUESDAY, a cheering happy crowd of Seniors took possession of down-town Boston as they paraded down Washington Street enroute to their Class Picnic. At Rowe's Wharf, the parade disbanded and the steamer Nantasket was commandeered for the sail up the harbor to Pemberton where the picnic proper was to begin. Swimming races and other aquatic sports were first on the program with a degree rush providing an exciting follow-up. In this, reversing the Faculty methods, the degrees were given on a basis of physical rather than mental merit. Immediately after the rush, a hearty New England Shore dinner was held at the Hotel Pemberton. At five o'clock when they sailed back down the harbor to Boston, each Senior was fully ready to call it a day, and a mighty good day at that.

Wednesday afternoon, the Tea Dance was held at Walker, where over two hundred seniors and their friends danced the afternoon away with occasional time out for tea. Wednesday evening, festivities were renewed at Symphony Hall, where Tech night at the Pops was held. Informality and hilarity claimed the evening for their own and at times even threatened to drown out the excellent music which formed its background. The prize song of '22, written by E. E. Hatch '91, was one feature of the evening and was received with great enthusiasm. Early in the evening fifty to one hundred representatives of the Class of '17 arrived with a bang and throughout the evening repeatedly repulsed all attempts that formality made to recapture the gathering. The Stein Song sung by over two thousand voices ended the evening according to tradition.

Thursday, the Class again gathered together, this time for the Class Dinner. After an excellent meal and just as excellent cheering, Tech's "four hundred" quieted down long enough for a short business meeting. The following permanent Class Officers were elected:—Donald F. Carpenter, President; Eric F. Hodgins, General Secretary; W. W. Russell, Member of the Alumni Council; C. E. Brokaw and H. G. Homer, Jr., Executive Committee.

Friday, the Senior Prom filled the ballroom of the Hotel Somerset with some three hundred couples attired in all the glory of formal dress. A hot evening attempted to dampen the spirits of the gathering but it was impossible, for they were all out for an enjoyable evening and '22 as usual got what it went after.

Saturday was Class Day and the last of the gay social events of Senior Week '22. For the first time in years, ample seating accommodations were provided, for the program was held in a large tent erected in the great Court. First Marshal Brokaw and Class President Carpenter opened the program with short speeches. An organized Burlesque was then presented, called "The Three Mosquitoes." This touching little play depicted the adventures of DeArgument '22 and his three inseparables, Porthole, Oriole, and Enormous in their perilous journey through the wilds of Tech. Affairs were brought back to a more serious level by Dean Talbot '85, who made a short address, after which Class Day and Senior Week '22 were brought to a close in the time honored way by "Take Me Back to Tech" and the Stein Song.

Commencement

A HOT June sun beat down on the Class of 1922 on the day of its Graduation on Monday, June 12, 1922. At two-thirty the throng gathered in the Tent erected in the middle of the Great Court. The program opened with the announcement by Professor Miller, Chairman of the Faculty, that the men who were to receive the Degree of Doctor of Philosophy had successfully completed their work. These men were then presented with their Degrees by Dr. Elihu Thompson, Acting President of the Institute. An address was delivered the Graduating Class by John Buffalo Christian. The following Theses extracts were read:

BENJAMIN WARDER THORON, A.B. — Civil Engineering
An Efficiency Test on Hydraulic Turbines under Operating Conditions.

HORACE WINSLOW MCCURDY — Mechanical Engineering
Douglas Fir.

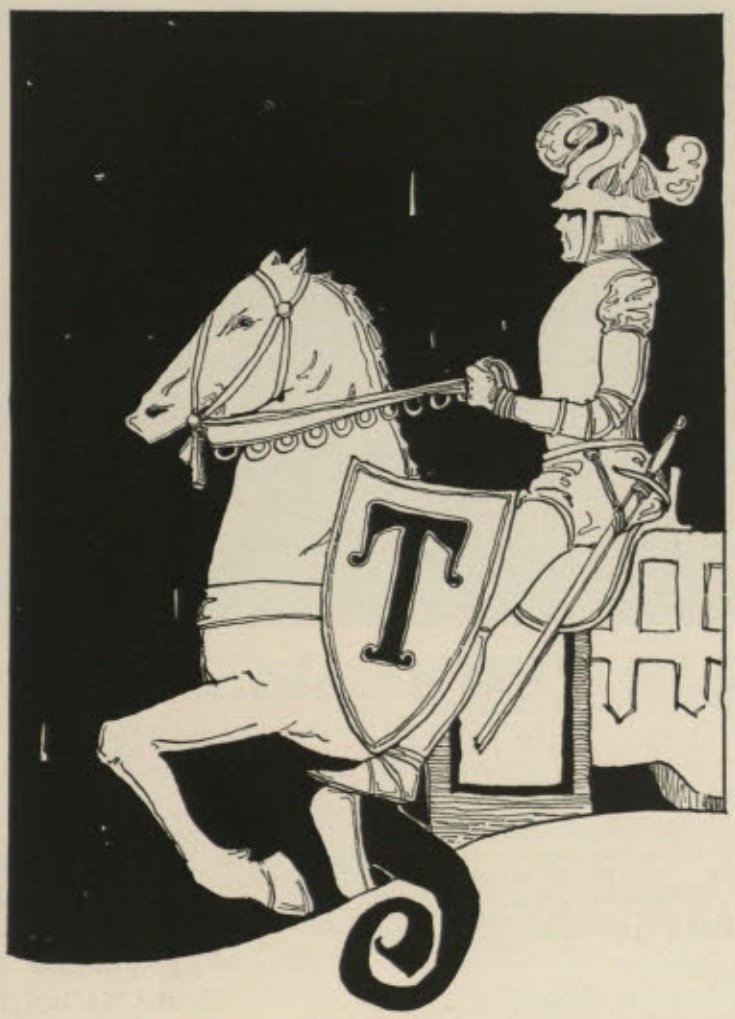

PHILIP MERRIAM ALDEN — Electrical Engineering
Proposed Hydro-Electric Development on the Namsket River for the town of Middleboro, Massachusetts.

JOHN WILLIAM STRIEDER — Biology and Public Health
The Source, Method, and Prevention of Mold Infection of Bread in Bakeries.

JOHN WHEELER CHURCH — Chemical Engineering
The Study of the Film Coefficient of Heat Transfer between Solid and Boiling Liquids.

EDWARD COLSON FALES — Engineering Administration
Analysis of the Position of the Middleman in the Distribution of Fine Papers.

THE Institute Committee is the embodiment of Student government in the Massachusetts Institute of Technology. It is composed of representatives from the classes and the various undergraduate activities and is supported by an allotment from the Student Tax.

Since the organization of this Committee, supervision by the Faculty has been unnecessary in that the student body has undoubtedly proven itself capable of self-government. The fostering of student independence in so far as student activities are concerned, and careful attention to all problems pertaining to such government, has resulted in the development of a student governing body as efficient as any similar body now organized.

Supported by the student body, composed of and controlled by undergraduates, and with a firmly established reputation, the Institute Committee is, and should remain, supreme in all matters pertaining to the activities of the undergraduate body.

The Walker Memorial Committee, whose duty it is to administer the affairs of Walker Memorial, is a sub-committee of the Institute Committee. The duties of the committee consist in assigning offices to the various student activities; in granting permission for the use of the various rooms in the building; and in general co-operating with the authorities of the Institute in the upkeep and appearance of the building.

Many helpful directories are kept in the office of this committee, the idea being to help student activities, and to see that each has a satisfactory place to transact its business and hold its social affairs.

The money derived from the payment of the Student Tax for the purpose of supporting undergraduate interests and activities, is assigned to the Budget Committee for distribution. The work consists of reviewing and adjusting the Budgets submitted by the activities, and disbursing the money accordingly. The Committee is made up of the Treasurer of the Institute Committee as Chairman, Treasurer of the M. I. T. A. A., the Chairman of the Finance Committee, and two members at large appointed by the Institute Committee.

THE vital problems which confront a young man who undertakes the strenuous life of the Institute are the maintenance of physical and spiritual vigor. The sacrifice of bodily health is still not an infrequent tragedy of our institution. Yet a greater tragedy, still less infrequent, is the loss of that deep sense of social responsibility which should mark every professional man.

The rigorous training of an engineering education gives a power for accomplishment which may be equally useful or destructive to society. Those, who fully realize that man has merely discovered nature's laws — not made them — can use them only with reverence. It is by the infusion of Christian principles into engineering ethics that the Technology Christian Association hopes to render its greatest service.

"How empty learning, and how vain is art,
But as it mends the life, and guides the heart."

THE Inter-Fraternity Conference is composed of a group of Fraternities at the Institute and is formed to promote the interests of M. I. T., to regulate and control the common interests of the fraternities at Technology, and to create a better feeling and a more general acquaintance among the fraternities and between fraternity and non-fraternity men. The inevitable separation of fraternities on account of the location of the houses is an unfortunate situation at the Institute. The Conference, therefore, has a difficult part to play, one which is largely taken care of in a great many colleges by the nature of the Campus.

The purpose of the Conference is accomplished largely through the meetings of the Delegates, which are held once every month. Here all plans for Inter-fraternity Functions or meetings are made and the control of these affairs lies in Committees appointed by the Conference. The events vary from year to year, Basketball, Baseball, and Scholastic Competitions always being held, while other affairs fill the gaps. The Basketball League has not been completed, the Cup being in the hands of the Lambda Chi Alpha Fraternity as a result of the 1922 League. The Baseball Cup was won last Spring by Beta Theta Pi and there will be the usual Inter-fraternity Baseball Games this Spring in an attempt to bring the cup back from Brookline. The traditional Bowling competitions have been abolished this year and the interest has diverted toward Inter-fraternity Bridge. It was the custom among Fraternities for a while to have exchange dinner parties, when the Freshmen and Sophomores of one house would visit the first where they would be entertained at dinner. This was quite popular for a while but was done away with on account of its general impracticability. The idea of the Inter-fraternity Bridge tournament is conceived to accomplish the same end as the exchange dinners, but since it does not involve the upheaval of quite such a large group, it is hoped that this will prove considerably more entertaining and still accomplish the same much desired purpose.

A considerable amount of interest is derived each term from the compilation of the Scholastic standing of all the Fraternities at the Institute. The winner at the end of each term enjoys the right to decorate its mantelpiece with the Inter-fraternity clock, which is always in the possession of the fraternity with the highest scholastic standing. The list was headed at the last census by the Sigma Alpha Mu Fraternity.

Another annual activity of this body is the Inter-fraternity Dance, which is held by the Conference some time during the year. The affair this year is to be held in the spring, and the anticipation of its popularity has not decreased since the last one.

GRINDS

SPEAKING from the point of view of custom, there must be a Grinds section to every Technique. And since we are more or less slaves to that great god, Custom, we take it upon ourselves to amuse you for a brief period. The word may or may not be appropriately placed, but please do not judge too severely. Remember that some day you may have to pose as funny fellow—you mutter, Heaven forbid! Now you know our position.

Before venturing into the sacred mysteries of Grinds, it is highly desirable that you be in a generous mood. After having assimilated a comfortable repast, for example. Then, we are sure you will find, through a rosy-tinted haze, that je ne sais quoi with which Technique and all the better publications are saturated. If, in the course of the next few minutes, you do not discover it, you should read the section through again, taking more care and always being on guard. Then, if je ne sais quoi has completely evaded you, read it through again very carefully. If you miss it the third time, we advise a few days' rest. Then, try and try again—at last your memory will be improved.

But that is enough about je ne sais quoi—we leave you to your own devices.

May you occasionally chuckle; to expect you to laugh would be asking too much.

'24: "No, but they shine when they get to the United States."

He: "No woman ever made a fool of me."

She: "Who did, then?"

CIRCULATING A ROOMER

"Oh, Hortense, let's wait for a street-car with a higher step."

Gwen: "How funny. This novel says, 'She picked up her skirts and ran.'"

Dolyn: "What's funny about that? It ought to be, she picked up her skirt and tried to run."

She waited at the chuch in vain.
Where could the bridegroom be?
"I fear this wedding will go off
Without a hitch," said she.

Bed Time Stories for Playful Freshmen

ALL the little Institute folk gathered around Uncle Dudley Talbot to hear the true story he was going to tell. "Once upon a time," said Uncle, "there was a freshman at Tech who had very little regard for what the good professors told him. In fact, he was very impudent—I don't want to hear of any of you little children being impudent—and even laughed when little Joe Phelan said for the fortieth time in one lecture, 'now I take a beaker in my hand.' He hung around those awful stage doors, drank sympathetic gin and just did just what all bad little boys do. And so what do you think happened at the end of the first term?"

"He got bounced," shouted Tubby Rogers.

"He flunked chemistry," gurgled Fatty Mueller with his mouth full of lollypops.

"No," said their Uncle, "he received all H's and was elected to Technique."

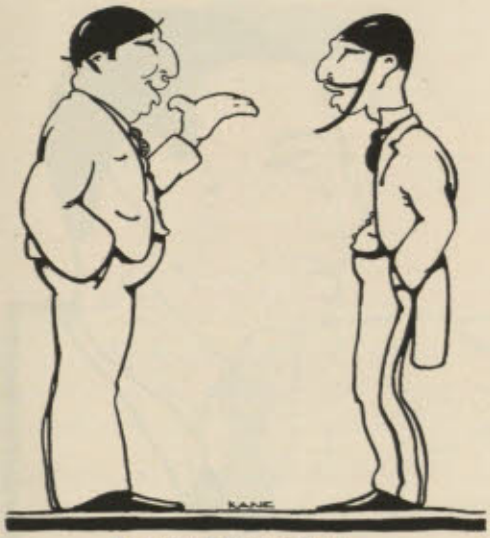

It was evident that the little folks were disappointed at the story and shouts of, "Now, Uncle, you promised us a true story" were heard. Just at this time groans came from the back of the room and they all went laughing and shouting to see what was the matter. It was none too soon, for they found Baby Lobby rolling in anguish. It seems that the little fellow, following his natural instincts, had found two gallons of cocoa and all the goodies that Uncle Dudley had bought for the party, and eaten them all up. All the little children were just dreadfully disappointed. After they had rescued Eddie Miller from the clutches of Brer Squirrel and made Whitie Dewey stop cracking his finger joints at Artie Blanchard, they all began to ask one another "What shall we do?"

"Give the whole Senior class vote Ten," suggested Danny Taylor, "that will be lots of fun."

"I know what let's do," murmered Billy Berry, who was Brer Squirrel's cousin, "Let's raise the tuition."

They all thought it would be great fun and rushed over to Uncle Dudley to see if he would let them. "You little dears," said their Uncle. "How droll you are. We'll raise the tuition and if Uncle Horace collects enough money we will have another party."

By this time the Sandman had crept into all the little folk's eyes and one by one they fell asleep among the broken beakers and slip-sticks that strewed the floor.

Well, I used to think I could get along without alcohol. I know now that I can't.

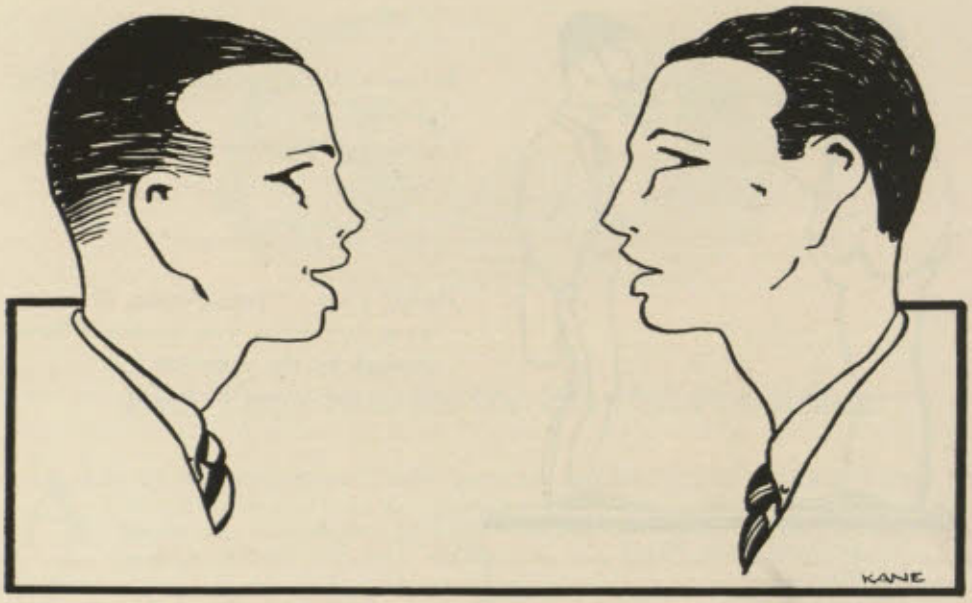

A charming young singer named Hanna
Got mixed up in a flood in Montana,
So she floated away,
And her sister, they say,
Accompanied her on the piano.

Person (looking at inebriate): "How gauche!"
Inebriate: "Fine. How gowsh with you?"

Peeved Prof : "Young man, if brains were dynamite, you wouldn't have enough to tip your hat."

'94: (inspecting new buildings): "Rather an improvement over Rogers. What does it cost the boys here now?"
'24: "Sixteen dollars a quart at John's."

Al: "What ever happened to that girl you used to drag to all the Proms?"
Burt: "Oh, she fell in a hole going over Harvard Bridge, and broke a leg. It was too bad, we had to shoot her."

If the Dean's office were to use more ingenuity in the form of their communications, we might expect to receive something like this:

Now, don't you wonder
What's in this funny fold?
Just keep on turning,
You will soon be told.

She: "You boys have the funniest way of asking for what you want."

A member of Course VI, as he sat down to a poker game, said, "Now, boys, if we all play carefully, we will all win."

Pieces of Hate

The girl I hate the most of all
Was christened Agnes Tait.
Refused a bid to Junior Prom,
Then came with my room-mate.

The man I hate is Louis Prout;
He is an awful twirt.
Yester eve he sallied forth
And took my last clean shirt.

"Have you kissed the bride?"
"No. Not lately."

The Freshman's Cry

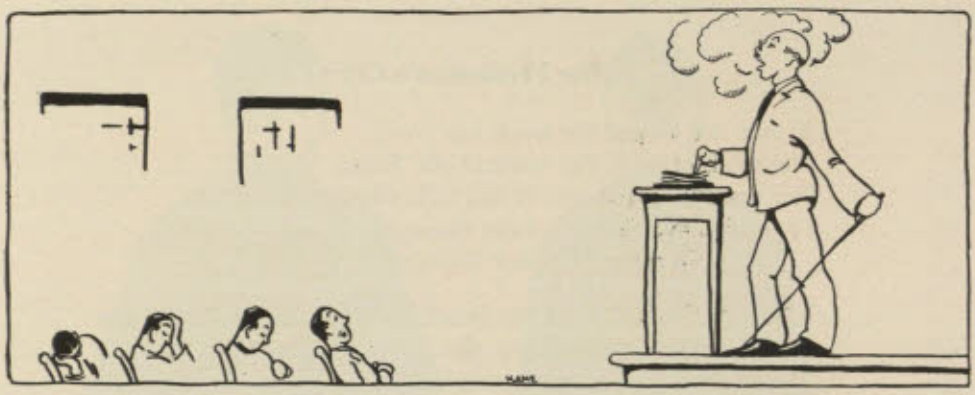

At last the longed-for week has come,
The week of joys, the week of the Prom.
I've counted the days; at last it is true,
The unbelievable fact: I am through,
No more Physical Training!

Now I'm through with the bendings and curlings and twists
Of the body, the shoulders, the arms and the wrists;
At last my legs and my toes get a rest;
My neck, thank goodness, is now off my breast.
No more Physical Training!

At last it is over, the fearful fright,
That kept me going day and night,
So I proclaim with the Freshman horde:
Now I am through, I thank the Lord,
No more Physical Training.

A woman flees from temptation. A man crawls away from it in the vain hope that it will overtake him.

Prof. (In reply to a student who wished to see him on Friday): "Mr. Smith, I am very sorry, but I am always full on Friday."

Notes taken in a Lecture on the Humanics of Engineering

(Lecturer runs up on platform and bustles about. Our hearts skip a beat—we know by his manner that he is one of those 100 per cent American and efficient persons.)

(Not too good for his stock.)

Tells joke about his wife. (Very vulgar.)

Says we should study humanics as well as mechanics. (Why doesn't he practice what he preaches?)

Says to use Golden Rule as well as Slide Rule. (We wonder if Keuffel & Esser Co. make 'em both.)

Next tells joke about Demosthenes. (We gnash our teeth. The joke bears a strange resemblance to green cheese.)

Engineer should be mediator between Capital and Labor. (Huh! Since when did the engineer start playing dove of peace?)

(Stock falling.)

Lecturer states that he was talking to the Pres. of the Amer. Flat Tire Corporation.

(He probably talked to him from the position of office boy.)

Says that another President made men in his factory as well as commercial goods. (He must have run a reformatory.)

(Stock is galloping down.)

Talks for twenty-five minutes, then blurts out, "What I really want to say, I will now say, but I haven't enough time."

(We mutter, God save the Queen.)

(His stock took a leap down.)

Uses phrases, "Real stuff, and got the stuff."

(Hot towel—some man.)

Told us how one man walked six miles in a blizzard just to shake his hand.

(We decide that he is a modest person.)

(His stock has been wiped out.)

We wish to say just one word about his type of person—Imbecile.

Louis: "Do you love children?"
Louise: "No, but you don't look so young."

And They Shot Men Like Lincoln

Ein: "Here is the same report you are trying to do—why not hand this one in like it is?"
Stein: "I can't. It's all corrected in red ink."
Ein: "Doesn't matter, the Prof. won't have to correct it again."

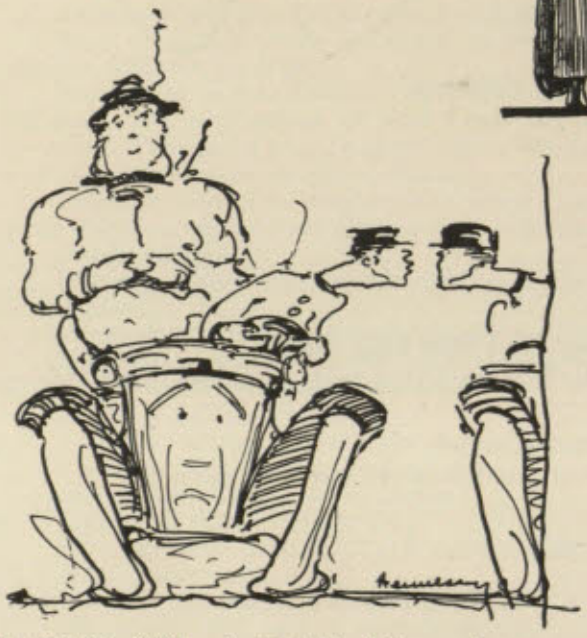

She: "Did you ever see that girl when she was'nt wearing that dress?"
He: "Now, really, don't you think that is a bit too personal?"

Daisy: "Is that affair formal or informal to-morrow night?"
Maizie: "What do you mean, formal or informal?"
Daisy: "I mean with or without hairnets."

Try And Do It

There's one thing you can't do, young fellow me lad,
You can't make a good woman out of a bad;
And let me remind you of this little jolt,
You can't teach an old horse to act like a colt.
You can't get a kick out of home-brew at all.
You can't make good liquor from wood-alcohol.
You can't beat up fifty men all in one fight.
You can't learn your math. in the Brunswick at night.
I must remark also before I go hence,
You can't beat the Stute out of two copper cents.

ARMAGEDDON IS NIGH

To the Managing Board of The Tech:—

Harken! O chattering apes of The Tech. Cease your incessant babble, and listen to the commands of your masters, speaking from a height you will never attain.

Your Lords, the mighty men of the TECHNIQUE, that God-like group, are tired unto death of your infernal racket and senile granulity. Drag forth your slothful, sphacelated carcasses from that squalid den of insalubrity.

In stately council gathered, they have decreed that each and every one of those arch offenders, the Managing Board of your obnoxious sheet, and all such members of your herd who have been hopelessly contaminated by one year of their degenerate contact, shall forthwith perish ignobly on November seventeenth at three p.m. in the year of our Lord Nineteen Hundred and Twenty-two.

Through great clemency and consideration, your masters have granted that you fight for your contemptible lives, and, if you dare, will meet you in a struggle to the death on the football field of our Alma Mater at the appointed hour.

Gather those designated, including that detestable scandalmonger, the Lounger, and show what courage you may have, that your betters may be somewhat amused for an afternoon.

The time has come! Forsake your amphibious haunts reeking with glutinous slime, and expose your palsied senility. May your puny legs support your trembling bodies till a fortnight hence, that your superiors may slaughter you, as you justly deserve.

Donald B. Jennings,
Editor-in-Chief,
TECHNIQUE 1924.

To The Lord High Members of That Board Which Is Called TECHNIQUE:

Greetings, Salaams, Slams and diverse imprecations. Know then, O unregenerate sons of Belial, reeking in the purpurescent mists of antique, TECHNIQUE, immemorial gangrenescence, know ye that the serene placidity and Confucian calm of our most puissant and right noble Board hath somewhat been disturbed by reason of various and sundry contentious disquisitions and wailing braggadocios.

Wherefore, in order that Justice and our own most puissant selves may once more reign over the hearts and hands of the faithful, undisturbed by the infantile animosities and puerescent turgidities of that unfortuitous concourse of low caste morons and protagonists of imbecility, which is called by men, The TECHNIQUE Board, We have caused to be decreed, and do hereby impart unto you, O miserables that the year of Our Lord, Nineteen Hundred and Twenty-two, the Fourth Year of the Great Drought, and the Seventeenth Day of that month which is called November, shall be forever memorable henceforth as signalizing the complete obiterative annihilation of that putrescent excrescence of the dust, the TECHNIQUE Board.

For upon that most memorable of days, our most puissant selves, accompanied by a goodly retinue of most noble scribes and sages, will proceed to the Field of Honor, there to inaugurate the slaughter of which Armageddon was but the harbinger.

Until that day may Allah preserve your palsied limbs and circumlocutory cerebellums.

E. E. Kattwinkel,
For the Managing Board, The Tech.

WE WON 19–0

There was never any doubt about the outcome. TECHNIQUE always wins—it is the thing to do. This particular time the Tech football (from the old Roman word, football) team received many 'olts and jostles on the oval of East Campus. From this particularly beautiful section of our Campus came the light shed by the stars of both teams, stars, conspicuous by their good, but mostly by their bad playing. Hereafter, a person prominent for services rendered his own team will be designated as a plain star, but one prominent for services rendered the opposing team will be termed a super-star.

The game opened with the usual kick-off. There was nothing novel in the opening, except possibly the fact that the ball traveled at least eight or ten yards. Immediately the ball was picked up by some inconspicuous Tech player, and he was downed in his tracks.

Quick as a wink they were off—off their signals. When they did finally get on, they didn't make much progress. TECHNIQUE'S line was as strong as the well known Prudential.

Tech lost the ball on downs. It seems that they were always down. And how gauche, to keep such a horizontal position throughout the game. A final analysis shows that Tech made a great mistake when it gave the ball to TECHNIQUE. If they had held the ball, TECHNIQUE could never have made a goal.

One of the outstanding features of the game was the consistent work of Tech's center, a true super-star. His game did not vary throughout the whole affair. Remarkable as it may seem, he failed to make a good pass from the beginning to the end of the game. Credit is due this man; he was the most consistent ground-gainer TECHNIQUE had.

Along in the second half when Tech was fighting against odds of 12 to 0 it was discovered that the Tech would take any number of given yards. That is, when they were given by the referee. It happened about this same time that that monstrous Vicario boy thought he was in a wrestling match. He straightway grappled with the lissom Peirce until he could no longer breathe. After this show of affection the game proceeded.

Two more things about the Tech team were Kattiwinkle and Webster. They played unheard-of games, and we accord them both positions of super-stars. It was largely due to their effort that TECHNIQUE made another touchdown in the last quarter. Oh! Yes, Rosenwald played a conspicuous game—particularly conspicuous to the referee.

The dark came all too soon, and TECHNIQUE marched triumphant off the field, directed by its able Captain, Jack Tench. It was a pretty sight to see those athletes with the rosy flush of victory in their cheeks marching to their locker house and sweet cider, all of them tired but unhappy.

TECHNIQUE wishes to take this opportunity to thank its loyal supporters. The jeering was truly remarkable, particularly when we consider that a mere handful was present. But that only goes to show what organized jeering will do.

He: "I certainly have had bum luck during Prom times. I haven't had a fur coat that wasn't stolen!"

She: "Now, really, do you think that is an honorable way to get a coat?"

Heard at Prom Time

She: "I'm just wild about your house."

Bored: "And how do you act at the Copley?"

1st: "How was the first swimming practice?"

2d: "Fine, a lot of fine men were uncovered."

Officer (having just stopped a sweet young thing for speeding).

She: "Oh, officer, don't scold me; kiss me."

Janitor (having just rolled into irate Prof.'s office): "Did you ring for me, sir?"

I. Prof.: "No, I was only tolling the bell; I thought you were dead."

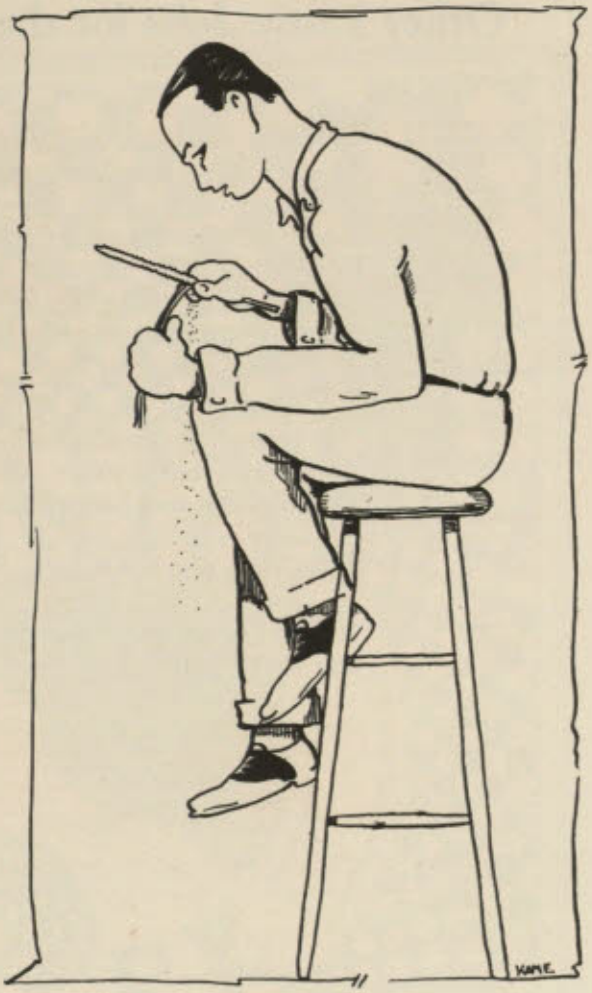

1st Frosh: "What do you think of this fraternity business? Are you, or are you not going to join one?"

2d Frosh: "Well, there is still some doubt in my mind. I don't know whether to join a fraternity or a country club."

Louie Derr lecturing: "Bottle glass often contains other things than iron to give it color."

Eng. Prof.: "Will some shining light give me an example of a good collective noun."

"He" of the back row: "Garbage."

They say that Tom Boyce is filing all his love letters. They sure must be rough.

She: "Why does Charlie break all his cigarettes in half before smoking them?"

He: "Aw, he does that so he won't have to draw the smoke so far."

Other Little Jobs for the Undertaker

When, at the end of Junior Week,
You arrive, with feelings elated;
And your one dress suit is very sleek,
And your pocket-book deflated,
Wouldn't you like to land a slam
On that rogue the house-party stag,
Who never seemed to bother a damn,
Nor let his ardour lag.

The reason for this action dire
Is told with feeling rife,
The aforesaid stag had wild desire
To snake your light and life;
Nor did he stop for anyone—
He was at it every minute.
And sad to say you funny fellow,
The lowly reptile did it.

This grave was dug for Angus Voil,
He's under the sod this minute.
At Junior Prom, he bought some oil—
Wood alcohol was in it.

St. Peter stood him at the gate,
The place where all the fringe is.
Now he's working soon and late;
He has to oil the hinges.

WEEK

If You Believe

That all Profs. who are six feet tall and three feet wide, were All-American football players.

That Jordan-Marsh is a swamp.

That all economics Profs. are millionaires.

That this year's follies are not as good as last year's.

That all Profs. of Mythology believe in fairies.

Then, you are hopeless, and will be a great help around the old farm.

There is absolutely no truth in the rumor that Arthur was slightly intoxicated on Thursday of last week.

It was Friday.

Heard in the Track House

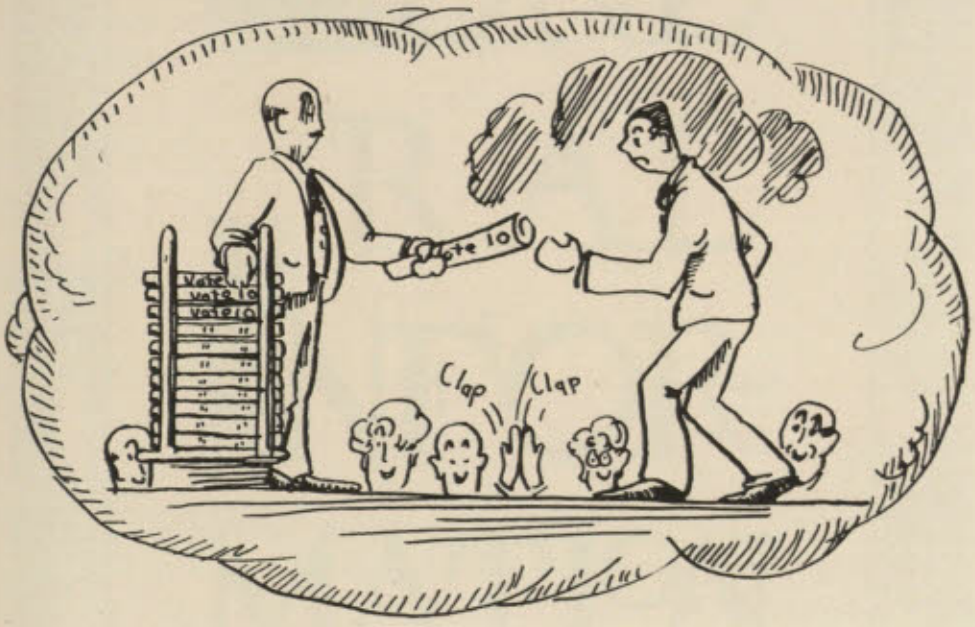

"I'm a little stiff from LaCrosse. Where are you from?"

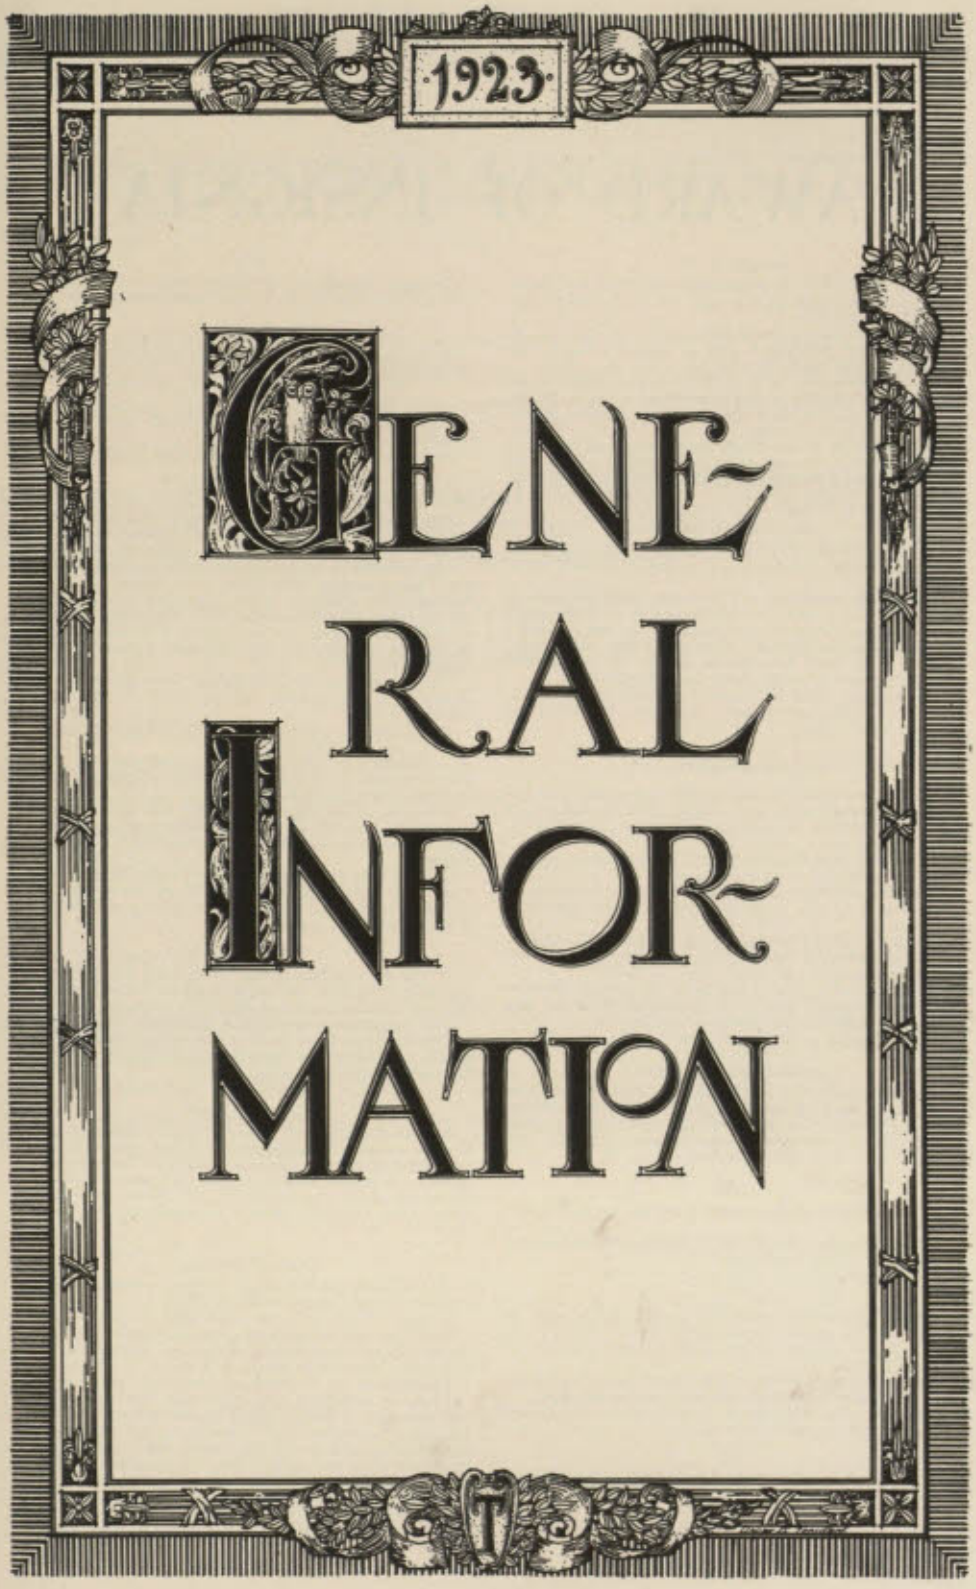

Coarse: "Did you hear they have non-skid hair brushes in the Hotel?"

Ten: "No."

Coarse: "Sure, they've got chains on!"

GENERAL
INFORMATION

AWARD OF INSIGNIA

Award of "T"

A cardinal "T," six inches high and five and three-quarter inches wide at top bar, and of "standard design," is granted to:

Winners of points at the annual meet of the I. C. A. A. A. A. and winners of first or second place at the annual meet of the N. E. I. A. A.

Scoring members of a winning cross-country team, or any man placing in the first 20 per cent, or better, at the I. C. A. A. A. A. or the first 15 per cent, or better, at the N. E. I. A. A. runs.

Any member of the Track Team who shall break an accepted M. I. T. record in competition. This rule shall apply to a member of the Freshman Track Team, breaking a Varsity record.

Additional Insignia

Winners of the "T," who already hold it, shall be granted additional insignia which shall take the form of a star.

Any student winning a "T" in two different years in any one form of sport or in the same of different years in two forms of sport as recognized by the Advisory Council, shall be granted, on event of the second win, a star to be worn in addition to the "T" upon the sweater, jersey, or other prescribed garment.

No student shall be regarded as eligible for qualification for additional insignia until after beginning his third academic year.

Special Award of "T"

To the first man in a dual or first and second in a triangular intercollegiate meet, and to the first and second in a dual, or first, second, and third in a triangular intercollegiate cross-country run.

Members of a winning team in relay races and in dual or triangular cross-country runs.

Members of teams who as individuals are winners of final events in any intercollegiate championship competition.

Members of the doubles team reaching the final or of the singles team reaching the semi-final round at the annual tournament of the N. E. I. L. T. A.

Members of a team in any sport recognized officially by the Advisory Council who participated in not less than two-thirds of the games of one season.

The manager of the track team.

Awards to Managers

Insignia awards to managers shall differ from those made to competing members of teams by the addition of a bar three inches three quarters of an inch long and wide placed symetrically with its superior edge one quarter of an inch below the base of the "T."

aTa

To winners of points in intercollegiate track and field meets.

Winning teams in outdoor intercollegiate relay races.

Manager of the track team.

cTc

To any man who places in the first 40 per cent, or better, at the annual cross-country run of the I. C. A. A. A. A., or the first 30 per cent, or better, at that of the N. E. I. A. A.

Any point winner who makes tenth place, or better, in a collegiate dual or triangular cross-country race.

The four men making the fastest time in the annual M. I. T. open cross-country race.

gTt

To first place winners in intercollegiate gymnasium team meets.

rTt

To the winners of singles and doubles in M. I. T. intramural championship.

sTt

To point winners at the annual meet of the I. S. A. and at the annual N. E. I. S. Championship meet.

wTt

To winners of finals in the annual championship meet of the N. E. I. W. A.

aTa

To members of winning relay teams in indoor intercollegiate competition.

To winners of first place in open class meets.

Other Insignia

The appropriate insignia to members of any team, exclusive of the track team, who participate in two thirds or more of the meets of one season, and to the manager.

The insignia to be as follows: aTf Soccer Football, cTc Cross-Country, bTc Crew, bTb Basket Ball, bTt Boxing, fTt Fencing, GTt Gymnasium, gTt Golf, hTt Hockey, sTt Swimming, wTt Wrestling, together with similar insignia for such other sports as may be recognized officially by the Advisory Council at any future date.

The insignia for the Gymnasium Team shall be gray letters on a red ground and for the Golf Team, red letters, on white.

The Advisory Council at its discretion may award the "T" with crossed rifles.

To members of the outdoor rifle team who shall score 143, or better, out of a possible 150 at the outdoor competition of the N. R. A.

Members of the indoor rifle team who participate in two thirds or more of the competitions of one season and demonstrate an excellence comparable to the preceding.

Competitors who shall win the T with crossed rifles more than once shall qualify for an award augmented with stars under the same rules as those governing the T with stars.

rTt

To the six members of the outdoor rifle team and the manager, provided the team position in competition places it among the first third of the competing teams.

The members of the indoor rifle team who participate in two-thirds or more of the competitions of one season, providing the team be placed in Class A (the first third of the competing teams).

Crew Awards

At the discretion of the Advisory Council a bTc may be granted to members of the first crew who have competed in not less than two-thirds of the intercollegiate races of one season; under the same conditions, the same award augmented by the letters 2nd placed beneath the T may be granted to members of the second crew.

Class Numerals

The following are entitled to class numerals, three inches in height, three inches in width:

Winners of points in open class meets.

Members and manager of winning teams in any form of interclass competition recognized jointly by the Advisory Council and the M. I. T. A. A.

Participants on Technology Field Day as follows:

First, to members, not more than five substitutes, and manager of both football teams; second, to members, not more than two substitutes and manager of the winning team in the relay race; third, to members, not more than two substitutes, the manager, and the counter of the winning tug-of-war team; fourth, to members, not more than two substitutes, and manager of the winning crew.

The first six to finish of the winning class in the annual Freshman-Sophomore cross-country run.

DO YOU REALIZE that the advertisements in the following pages represent a valuable indication of the industrial progress of the world? They offer us the efforts which science is making to provide comforts and labor-saving devices in the fields in which we are most interested.

We, as students of applied science, must know about these things, if we are to succeed. It is desirable that we become acquainted with the concerns which are leaders in their respective fields.

Each of them has a definite message to convey to us. Notice in the following section how carefully the concerns have designed their advertisements in order to obtain our approval. Not only do they want to sell something, but they are seeking for our good will as well.

Every advertiser realizes that his advertising is a pledge which he must live up to in order to secure success. As a result, unreliable statements are no longer met with. For these reasons the following advertisers are entitled to your interest and consideration, and are worthy of your trust and confidence.

No Rolls-Royce has ever worn out

ROLLS ROYCE

RECENTLY, a celebrated surgeon purchased a Rolls-Royce. He believed that, insofar as the sensations attendant upon motor transportation were concerned, "there was nothing new under the sun".....Yet shortly after the delivery of his car he said,".....When I ordered a Rolls-Royce, I did so because I had had about everything else. I received it with indifference. However, my attitude has been changed. I consider the Rolls-Royce everything that an automobile should be, a mechanical marvel, beautiful."....The impression made by the Rolls-Royce upon this professional man in so brief a period is not the complete evidence of its greatness. The final proof of perfect building will be demonstrated ten, or fifteen years from now; when this Rolls-Royce is still affording daily cause for enthusiasm.

Twelve exclusive Rolls-Royce designs in open and closed coach work.

The four-five passenger phaeton $10,900

"When that time comes"—

The time is not far off when you will be exerting an influence in the purchase of mechanical equipment. When that time comes, and you need machines for heavy production, think of the name BROWN & SHARPE.

For heavy work, our No. 5B Heavy Plain Milling Machine, weighing over 5¾ Tons—our No. 6 Automatic Gear Cutting Machine for gears up to 72" diameter with 13" face—our No. 16 Plain Grinding Machine with a capacity of 72" between centres—and our No. 6 Automatic Screw Machine, taking work to 2⅜" diameter, these Brown & Sharpe Machines, the largest in our complete line, are rugged units for rapid production on big pieces.

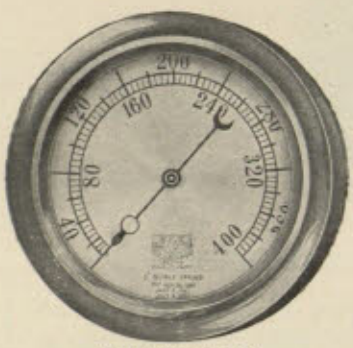

The durability of Brown & Sharpe Machines makes them investments of lasting value. Careful choice of material, expert workmanship and rigid inspection are combined to produce machines capable of long service under severe conditions.

Remember the name BROWN & SHARPE

There will be always a standard of excellence

—always a name that has come to mean the best. "Starrett" means as much to the man who uses fine tools today as "Damascus" meant to the courtier who, five centuries ago, sought the highest example of the sword-maker's art.

In the metal working trade "Starrett" represents all that is desirable in a fine precision tool.

The Value of a Good Record

A MAN'S RECORD gives him his place in the community. Men measure him by what he has been, by what he has done from day to day. Each day he builds for tomorrow. What he does today either adds or detracts from his record. To grow in good deeds, he must do better today than he did yesterday, do better tomorrow than he does today. It is with newspapers as it is with men.

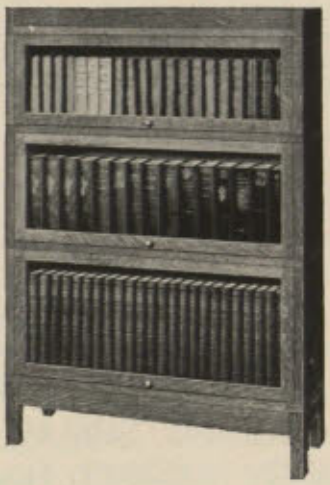

The Boston Evening Transcript

is nearing its hundredth birthday. It is nearing it with the determination to be better at one hundred than it is today at ninety-two. A newspaper is really a succession of lives, a succession of issues that are born to live for a day. The part of it, the breath of life of it, that goes on so long as daily issue follows daily issue is its spirit, its reputation.

Modesty is as becoming in newspapers as it is in men. What the record of the TRANSCRIPT is, what it is as a readable newspaper, giving the news in such manner that it may respect itself and win the respect of decent, self-respecting people, what its record is as an advertising medium giving reputable advertisers opportunity to advertise where advertising assures profitable returns, its readers and advertisers know, and it has today more readers and more advertisers than it ever had before.

Globe-Wernicke

BUILT TO ENDURE

UNIVERSAL STYLE

Beautiful in design, elegant in finish, perfect in proportions, the clean simple lines of the UNIVERSAL STYLE Sections will appeal to even the most esthetic sense. Here is an example of pure decoration, by just the repetition of regular sections. Everything is symmetrical, the idea of simplicity being carried out to perfection. Nothing florid or over-decorated is seen in this or any of the Globe-Wernicke styles. They cling tenaciously to the idea of good taste and consequently fit harmoniously in every decorative scheme.

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY

Cambridge, Mass.

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY aims to give thorough instruction in **Civil, Mechanical, Electrical, Chemical, Electrochemical and Sanitary Engineering; in Mining Engineering and Metallurgy, Architecture and Architectural Engineering, Geology and Geological Engineering, Naval Architecture and Marine Engineering; in Engineering Administration; in Chemistry, Biology and Public Health and Physics; and in General Science and General Engineering.**

To be admitted to the Institute, the applicant must have attained the age of seventeen years and must pass examinations in algebra, plane and solid geometry, trigonometry, physics, English, French or German, and present satisfactory certificates for history and chemistry or pass examinations in these. Preparation in one unit of a series of elective subjects is also required. A division of these examinations between different examination periods is allowed. In general, a faithful student who has passed creditably through a good high school, having two years' study of French and German, or three years of either, should be able to pass the Institute examinations.

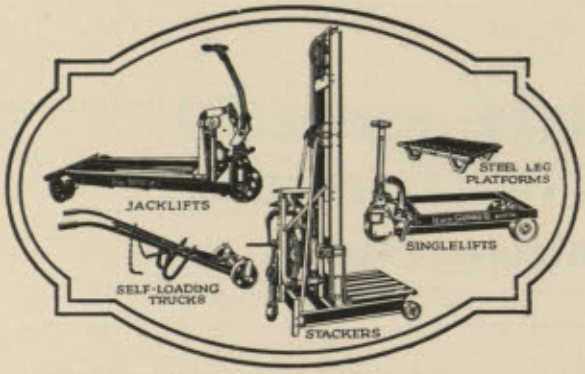

Graduates of colleges, and in general all applicants presenting certificates representing work done at other colleges, are excused from the usual entrance examinations and from any subjects already satisfactorily completed. Records of the College Entrance Examination Board, which holds examinations at many points throughout the country and in Europe, are also accepted for admission to the Institute.

The regular Courses are of four years' duration, and lead to the degree of Bachelor of Science. In most Courses the work may also be distributed over five years by students who prefer to do so. Special students are admitted to work for which they are qualified; and the degrees of Master of Science, Doctor of Philosophy, and Doctor of Science are given for resident study subsequent to graduation. Opportunity for research is offered in all the departmental laboratories and special opportunities are offered in the Course in Chemical Engineering Practice and in the co-operative Course in Electrical Engineering, in which the students spend part time in the industries for a combination of technical and industrial training.

The Tuition Fee, not including breakage in the laboratories, is $300 a year. In addition, Undergraduate Dues of $9 per year are collected.

CADILLAC

The character and prestige of Cadillac owners impart special significance to their cordial praise of their car.

Almost without exception, the men and women who own Cadillacs are prominent in the professional, business, social or public life of their communities.

In many instances, they are celebrities of international importance, honored for their attainments in the old world and in the new.

Naturally, these men and women select their motor car with the most particular care.

It must be beautiful and fine, because love of these qualities is woven deeply into their being by prolonged intimacy with fine and beautiful things.

In addition, it must be a leader—in all of the elements which comprise motor car leadership—in order adequately to represent their ideals and standards.

Above all it must be dependable, for the importance of their affairs makes reliability not merely a virtue, but a cardinal necessity.

All of these qualities they know that the Cadillac possesses, and their choice of the car is one of the most graceful tributes that could be paid to its leadership.

Everywhere

A SYMBOL of service and satisfaction to those who know valves and valve requirements, the Jenkins "Diamond" is familiar to thousands.

In power plants, factories, mills, hotels, office buildings, schools, theatres, churches, laundries, in railroad work on locomotives, steamships, in oil fields and refineries, on water mains, on machines as part of the equipment, in apartment houses, in the home—wherever valves are used you'll find Jenkins Valves. Each year finds millions more Jenkins Valves in use—because they go into service and STAY.

Each valve is designed, made, tested, and guaranteed for the maximum service, not merely the average. Brass, iron, and steel valves for all pressures and purposes.

Merchandisers of Self-Respect

"THERE is one other reason for dressing well than I have ever considered, namely, that dogs respect it and will not attack you in good clothes."

So wrote Emerson half-humorously in his Journal.

But there is a better reason why a man should be well dressed. The world respects him and he respects himself.

A certain city rescue mission has reclaimed hundreds of men who were down and out. And the first thing they do for such a man is to give him a bath, build up the heels of his shoes and fit him out with a clean shirt and collar.

"No man can respect himself," they say, "until he can stand squarely on his feet and meet the critical gaze of the world unflinchingly."

We are manufacturers of Quality collars and shirts. But we are more than that. We are dealers in the stuff out of which men make their success; merchandisers of self-respect.

The Origin of America's Chemical Industry

IN 1793, John Harrison established, at Philadelphia, the first sulphuric acid unit in America. This unit marked the beginning of commercial chemical manufacture in this country.

The development of this small unit is represented today in du Pont acids and chemicals—a development that has kept pace with the nation's progress.

Manufacturers of quality acids and chemicals for industrial uses

A Complete Paint Service

Backed by the same type of quality control that produces du Pont Explosives

The manufacture of paints and varnishes is a science based on chemistry. So is the making of explosives. In entering the paint and varnish industry, the du Pont Company thus adds over a century of technical experience to the specialized knowledge of the four well-known paint and varnish houses now united under the du Pont Oval.

Du Pont Paints and Varnishes are produced today under an exact, scientific system of quality control similar to that which is responsible for the quality leadership of du Pont Explosives.

For the past five years du Pont Chemical Engineers, working with all the broad resources and cumulative experience of the du Pont Organization, have conducted an intensive study of paint problems in the engineering field.

The result has been the selection of paint products which will best meet every standard or special purpose of metal or timber protection—a complete "Paint Prescription Service" to the construction industry. When you specify Paints, simply specify du Pont.

An Edison in your home is actually the artist in all but physical presence.

The Edison cannot be distinguished from the living artist when heard in direct comparison.

More than fifty great singers and instrumentalists have publicly compared their art with their Edison Records. The most exacting music critics could detect no difference.

Only the Edison dares this test of direct comparison with living artists.

The initials of a friend

You will find these letters on many tools by which electricity works. They are on great generators used by electric light and power companies; and on lamps that light millions of homes.

They are on big motors that pull railway trains; and on tiny motors that make hard housework easy.

By such tools electricity dispels the dark and lifts heavy burdens from human shoulders. Hence the letters G-E are more than a trademark. They are an emblem of service—the initials of a friend.

EUGENE P. CORNELL AND STAFF

THE real romances of today are the stories of achievement which have been worked out in the great industrial plants of America. These factories are commercial universities, and in the development of the volume, quality and good-will which their production represents, there is a powerful selling argument if it be properly expressed.

To visualize this sales story so that it will present a logical and forceful argument in favor of the advertiser's products requires a knowledge of both manufacturing and selling combined with a thorough understanding of the possibilities of the motion picture camera and the screen.

We offer as proof of our ability in creating business building motion pictures the long list of clients whom we have successfully served in this capacity. May we tell you about some of them?

Building Machinery for the World's Great Engineering Projects

Extraordinary manufacturing facilities and highest technical talent enable Allis-Chalmers Mfg. Co. to build superior machinery for engineering projects of any magnitude.

A multitude of successful installations include some of the largest and most powerful prime movers and electrical machinery in the world.

Supplying light, heat, power and water, and handling sewage and drainage in great centers of population present innumerable complex problems to engineers. Great economy and efficiency have been reached in these operations through the installation of Allis-Chalmers machinery.

Building six million horsepower in gas, oil and steam engines of all kinds and sizes is but one of many Allis-Chalmers achievements. Daily great shipments of modern machinery--frequently complete plants--go forth to assist the engineers and manufacturers to meet the needs for greater equipment.

The Outside Point of View

The technical fields, by their very nature, are peculiarly closed to suggestion from the outsider. Your merchant is not likely ever to contribute to the scientific knowledge of bridge stresses, or add to the argument on the sub-division of the atom.

The two occupations may touch, but they don't overlap.

Industrial science and the art of printing, however, *do* overlap. The products of science have to be sold. We printers don't know how you *produce;* but if we are up-to-date, we know many ways of helping you *sell.*

Perry & Elliott Co. have ideas on the subject of illustrating and telling about a scientific product. We can put into your sales literature the outside point of view, using the slant that strikes the consumer of your product at the most acute angle.

Your message will not only prod, but penetrate.
