*Because successive classes since 1889 have
admired and loved him, because he is
both a true teacher and a true
man, this volume of Tech-
nique is gratefully
dedicated to*

DAVIS RICH DEWEY

THE annual has come to be a recognized activity in almost every educational institution. As photographs taken during a journey recall not only the scenes fixed by the camera, but the events associated therewith, so the Annual not only records the features of classmates and events of college life, but recalls its friendships, its serious work and its pleasures. To some it will recall the first real experience of adjusting that balance between work and recreation which, if maintained, proves beneficial not only during college days but throughout life.

To those who in the future are interested in the Institute, this book will prove a valuable record of the customs, traditions and organizations of its student life at the present day.

In Memoriam

WILLIAM HENRY LINCOLN

Member of the Corporation since March, 1895

Died December 8, 1925.

LEONARD METCALF

Member of the Corporation since June 5, 1921

Died January 29, 1926.

WILLIAM OTIS CROSBY

Professor of Geology

Died December 31, 1925.

STEPHEN FAUNCE SEARS

Instructor in English and History

Died March 31, 1925.

LEO TOROS MALEZIAN

Student in Electrical Engineering

Died June 2, 1925.

AUGUSTO VILLALON

Student in Civil Engineering

Died August 15, 1925.

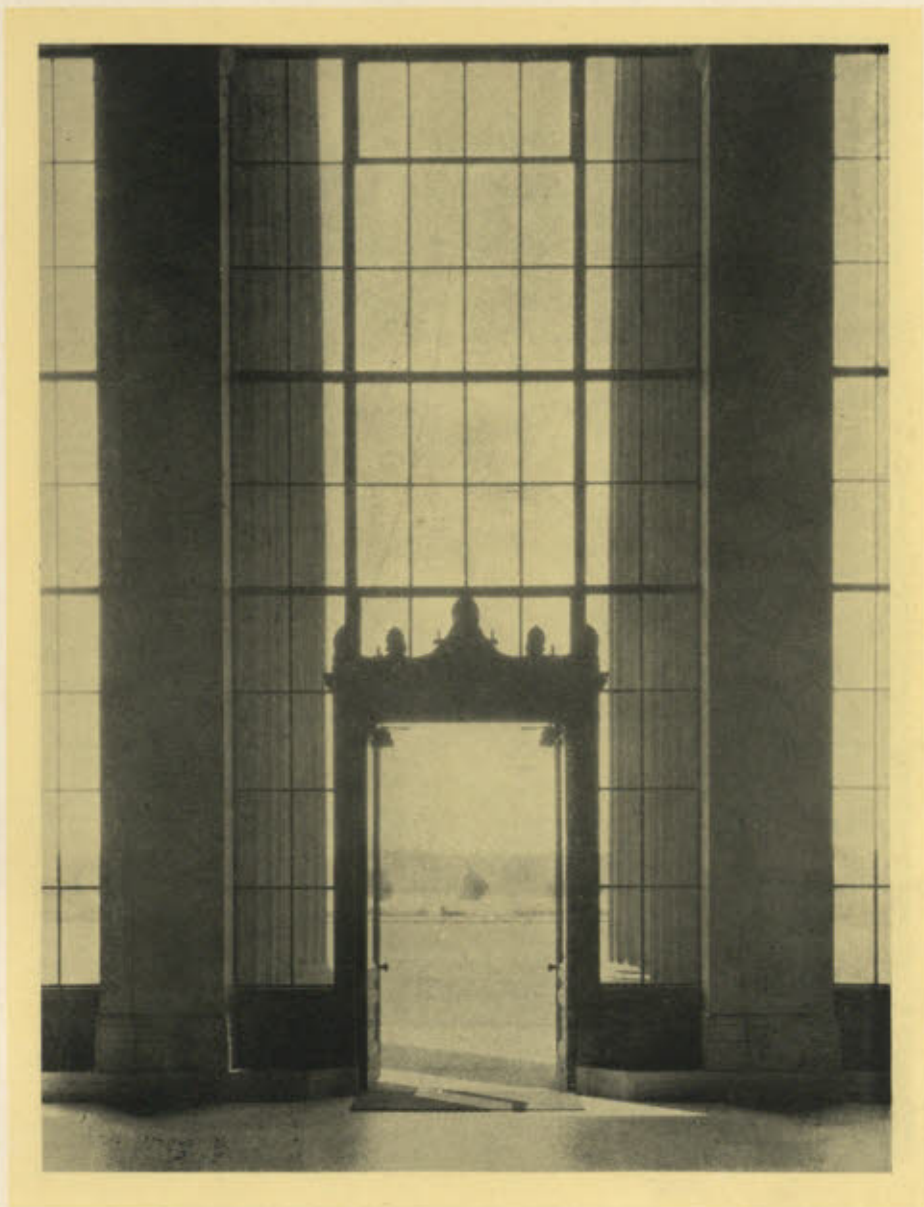

GEORGE LOUD PATTEN

Student in Chemistry

Died November 14, 1925.

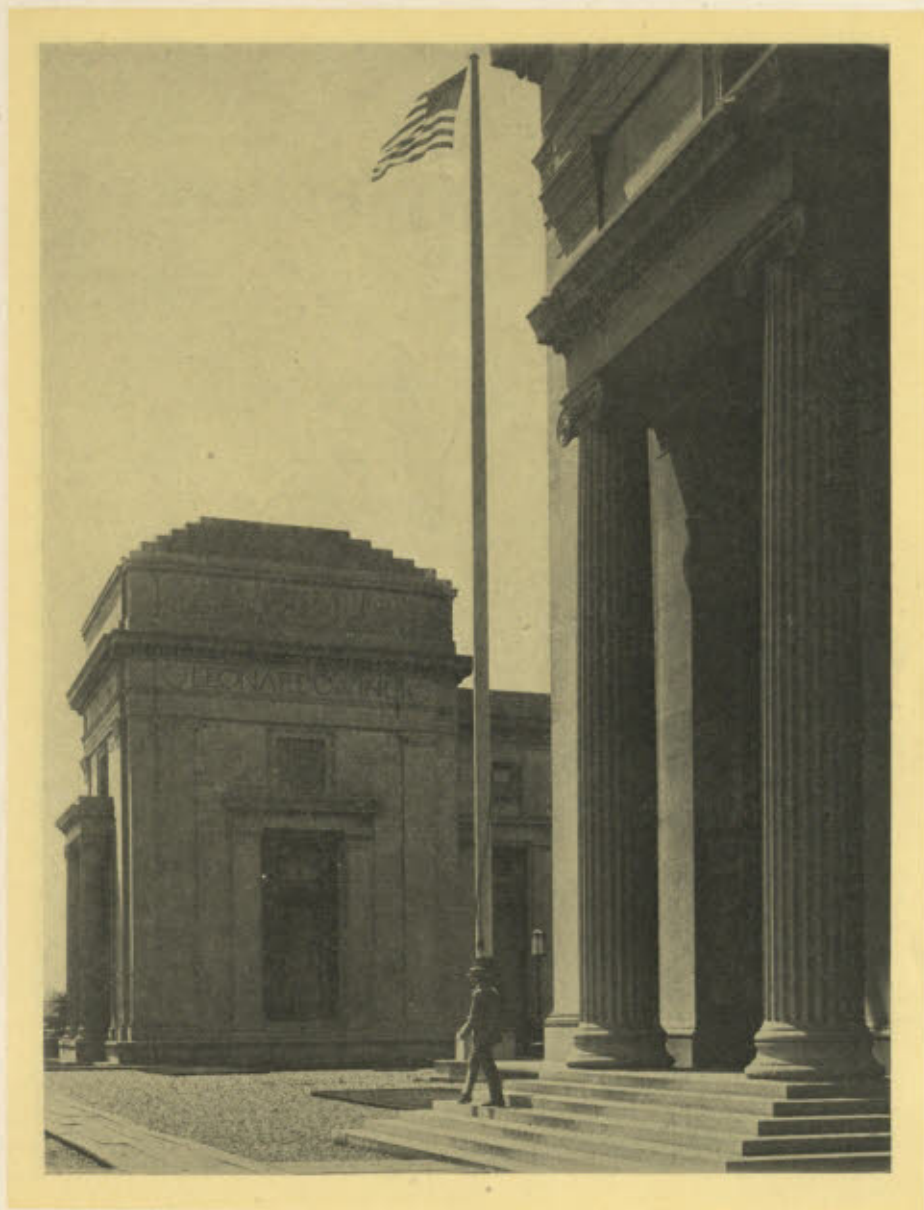

VIEWS

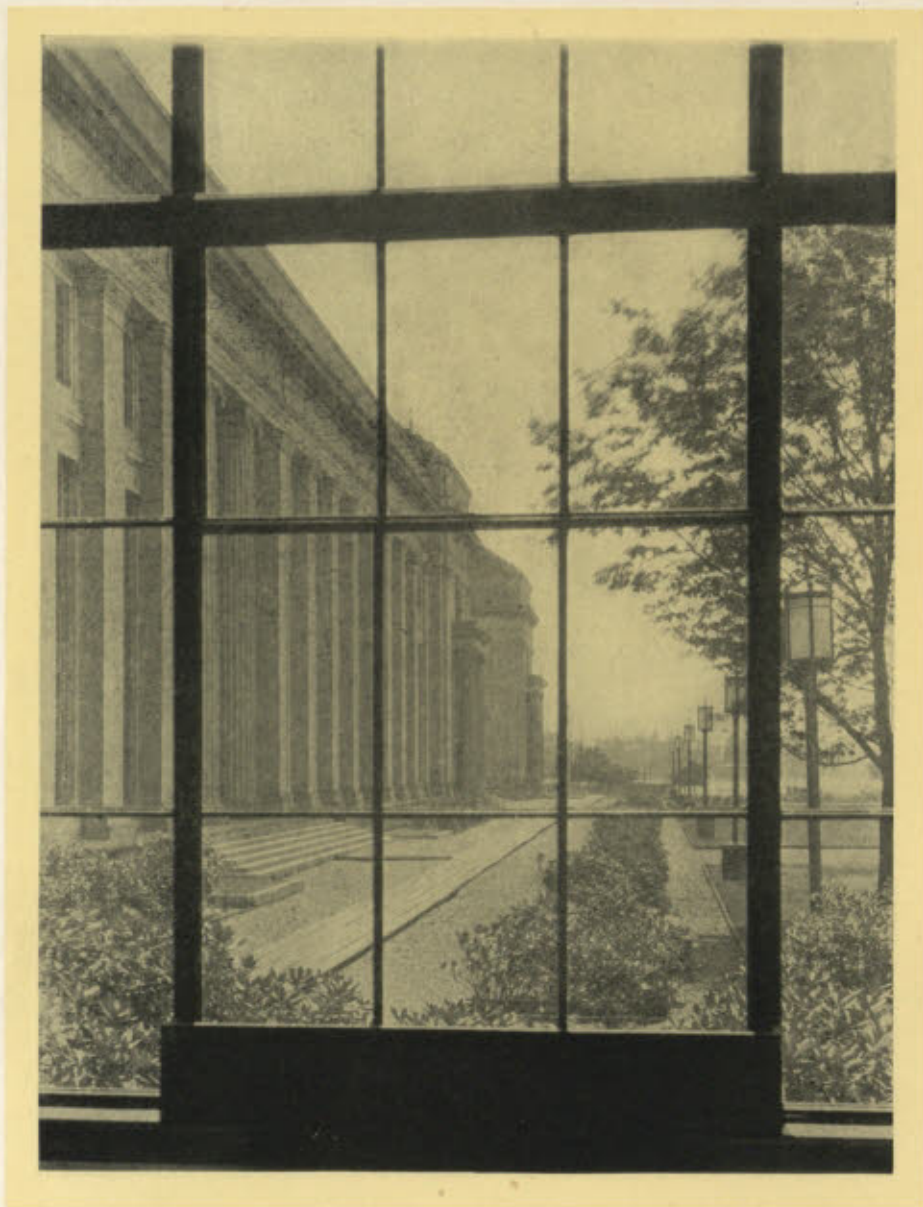

A fanciful fairy glimpse
Through delicate tracery of panes . . .
Shining plateaus with just a hint
Of the glittering city beyond . . .
Perhaps a door into the future?

Stone pillars rising to the sky
Ambition reaching ever upward
From rock-bound foundation
To dizzyest heights

Solidarity of living stone
Protecting the Growing Mind within . . .
A Sanctuary for Science . . .
An expression of Everlasting Knowledge . . .

A view of beauty and enchantment. . .
Lines drawn to a vanishing point. . .
All things pointing and leading
To One Common End. . .

A shady oasis in an old stone desert. . .
Leaves—giving rest to the eye,
Weary of cornices and lines. . .
A Tropical Forest. . .

The Dean's Message

GREETINGS and God-speed from the Dean! To that great body of students whom the Dean never meets officially; sturdy of intellect, steadfast in character and purpose, the pride of the Institute. To those who "bear the heat and burden of the day" in Student Government and in Activities; leaders and directors of Tech spirit, toiling with hearty loyalty, and often at personal sacrifice. To the many courageous fellows who strive bravely against great odds to secure an engineering training. To those who, having known sorrow, sickness or financial adversities, have sought counsel and advice. To those few whose academic disasters or human frailties have been the occasion of an official summons now relegated to the hazy past.

Many strong friendships have their beginnings at the Dean's Desk. May they be as enduring as they are sincere. May the satisfaction which comes from conscious ability to accomplish difficult tasks well find deserved fruition in many years of prosperity and happiness.

Who's Who of the Class of 1927

Juniors may come and juniors may go, but the WHO'S WHO lives on forever. Should the class by chance have placed your name among the immortals, remember the old saying, "if the shoe fits, put it on."

WHO OF THE CLASS OF 1927 IS

THE MOST POPULAR:

1. WITH THE CLASS?
As Johnny Field was the only one who did not vote for himself, he wins with a blank suit. All others had singletons. (Johnny didn't vote.)
2. WITH THE FACULTY?
Things haven't changed since last year. The faculty wins.
3. WITH THE LADIES?
Ray Hibbert's derby has won him great fame, while Dick Whiting doesn't even need artificial aid.
4. WITH HIMSELF?
Fay Darling and Bennie Levinson will have to decide among themselves. Honors were even.

THE MOST USEFUL?

The one who originally does the heat problems — we cannot publish his name for obvious reasons.

THE MOST USELESS?

Joe Melhado had no opposition.

THE MOST LIKELY TO BECOME AN ALUMNUS:

1. BY WAY OF THE FRONT DOOR?
E. Pluribus Unum is the lucky fellow.
2. BY WAY OF THE BACK DOOR?
According to the class, the majority wins. Someone suggested that the front door is too small for Wheat Hutchison.

THE MOST PERFECT BROWN BAGGER?

Bennie Levinson wins again. "A bag any color turns brown at sight of him."

THE MOST WORTHY CANDIDATE FOR TAMMANY HALL?

Lou Baker. We wonder why?

THE GREATEST EXPONENT OF SLEEP?

P. I. Cole wins by a snore over Joe Burly.

WHO IS

THE BEST ATHLETE?

Hank Steinbrenner and Jack Wiebe will have to fight it out with a slipstick.

THE BRIGHTEST STUDENT?

Kewpie Chase's attempt to graduate in three years makes him qualify.

THE LEADING "TEA HOUND"?

Hall Hately takes both lemon and cream.

THE NOISIEST CLASSMATE?

Heinie Janes tires us daily with his chords.

THE SMOOTHEST NUMBER?

Someone suggested that Frank Mesker is not a number; he's a whole adding machine. The combination Gentry to Birch must not be forgotten; it's well oiled.

THE BEST LOUD SPEAKER?

General Ray Leonard with his Freshmen Corpse can be heard in Chelsea.

THE OWNER OF THE BEST VEHICULAR CONTRAPTION?

(automobiles included)

Two of the Betas voted for their own steamroller, although a 1913 model which has been dragged out every year is bound to be rather passé.

WHAT

IS ENTROPY?

Oh! It's the Berry's!

IS WELLESLEY?

Technology's battlefield. Many have been known to fall there.

IS THE BEST ACTIVITY AT TECH?

(barring TECHNIQUE)

"Taking a quiz at 9 a.m. Saturday morning," and "walking on the Esplanade" were the most popular suggestions. Levinson suggested running for a class office.

DOES VOO DOO?

"Banquets" was the favorite answer. One man thought it didn't do anyone or anything for it is worth all of two bits.

DOES TECH SHOW?

"The glorification of the Technology Man;" "the way to go home;" and "not enough" were among the numerous suggestions.

ADVICE WOULD YOU GIVE A FRESHMAN?

1. Don't let last year's occupant sell you the radiator in your room.
2. Don't have a conscience.
3. Let your conscience be your guide.
4. Leave that brown bag at home.

WHY

DO YOU DRINK?

Some do because they prefer it to Listerine, others think it's a good disinfectant, hair remover, or cold cure; but no one was frank enough to tell the truth.

HAVE YOU STAYED HERE SO LONG?

Kurt stays in the hope of seeing a good-looking co-ed, others stay through force of habit.

DOES A SAM BROWN BELT NOT MAKE A SOLDIER?

Because it buckles under a heavy strain. — See Lyles and ask no more.

WHEN

DO YOU EXPECT TO GRADUATE?

No one expects to. Everyone merely hopes and prays.

WERE YOU ENGAGED?

The majority have been engaged since their freshman year — in the pursuit of studies.

WILL YOU RETURN TO THE BETROTHED CLASS?

"The morning after the next Prom" was the popular verdict. One man couldn't answer for he has never been engaged — poor fellow.

ARE WE HAPPY?

1927 is certainly a pessimistic class although all one optimist says he needs is a girl and a flivver.

IS TECH HELL?

9 o'clock Saturday morning came in for another slam. One man objected to the comparison for, as he says, "I prefer Hell, they don't kick you out of there!"

ATHLETICS

Season of 1925 in Athletics

A RENEWED interest in athletics and a larger number of men competing for places on the teams featured the season of 1925 in athletics. The major teams in track and crew shared prominence with several excellent teams in the minor sports. The tennis and fencing teams especially had very successful seasons. After a brilliant string of victories the tennis captain concluded by winning the New England intercollegiate championship while the fencing captain was runner-up in the intercollegiate championship.

The varsity crew won decisive victories over Cornell and Columbia, and gave the champion Navy crew a good race at Annapolis. The other crews did as well, scoring wins over Princeton, Cornell, and local boat-clubs, and succumbed to only the most powerful of the Eastern eights.

In track Technology fared better in the larger than in the smaller meets. In the New England intercollegiate championships George Leness broke the half mile record, and Major Sanford raised his previous Technology record in the pole vault. These two men also earned eight points in the I. C. A. A. A. A. competitions at Philadelphia. The season included meets with Harvard, Princeton, and Cornell, all of whom are leaders in track. Cross-country showed a remarkable improvement since last year and promises to become one of the most successful of Technology's teams in the future. The freshman team did particularly well, winning the New England championship easily.

Among the other teams, soccer, hockey, wrestling, and boxing received a great deal more support from the student body than in the past, which consequently raised their standard.

Technology has always striven to enroll as many students in athletics as possible, regardless of their talent. In this way only can sports be of real benefit to an institution. It is gratifying to note that there is an ever-increasing number of men engaged in sports every year. With this increase in numbers, keener competition for positions on the varsity teams has been the result, and Technology has scored more victories over other colleges. However, class, fraternity, and dormitory teams have also been encouraged to keep the interest of those who are not fortunate enough to make varsity squads.

No longer do colleges consider Technology's teams lightly. Records show that despite the small opportunity for practice and training, M. I. T. has become a power in intercollegiate athletics, every year showing an improvement in the quality of its performances.

Award of Insignia

AWARD OF "T"

A cardinal "T" six inches high and five and three-quarters inches wide at top bar and of "standard design" is granted to:

Winners of points at the annual meet of the I.C.A.A.A.A. and winners of first or second place at the annual meet of the N.E.I.A.A.

Scoring members of a winning cross-country team, or any man placing in the first twenty per cent, or better, at the I.C.A.A.A.A., or the first fifteen per cent, or better, at the N.E.I.A.A. runs.

Any member of the Track Team who shall break an accepted M.I.T. record in competition. This rule shall apply to a member of the Freshman Track Team breaking a Varsity record.

ADDITIONAL INSIGNIA

Winners of the "T", who already hold it, shall be granted additional insignia which shall take the form of a star.

Any student winning a "T" in two different years in any one form of sport or in the same or different years in two forms of sport, as recognized by the Advisory Council, shall be granted on event of the second win, a star to be worn in addition to the "T" upon the sweater, jersey, or other prescribed garment.

No student shall be regarded as eligible for qualification for additional insignia until after beginning his third academic year.

SPECIAL AWARD OF "T"

To the first man in a dual or first and second in a triangular intercollegiate meet, and to the first, second and third in a triangular cross-country run.

Members of a winning team in relay races and in dual or triangular cross-country runs.

Members of teams who as individuals are winners of final events in any intercollegiate championship competition.

Members of the doubles team reaching the final or of the singles team reaching the semi-final round at the annual tournament of the N.E.I.L.T.A.

Members of a team in any sport recognized officially by the Advisory Council who participated in not less than two-thirds of the games of the season.

The manager of the crew and track team.

AWARDS TO MANAGERS

Insignia awards to managers shall differ from those made to competing members of teams by the addition of a bar three inches long and three-quarters of an inch wide placed symmetrically with its superior edge one-quarter of an inch below the base of the "T".

ATA

Winners of points in intercollegiate track and field meets.

Winning teams in outdoor intercollegiate relay races.

Managers of the cross-country and track team and of the crew.

Teams, or members of teams, who shall equal an accepted M. I. T. record in competition. This rule shall apply to a member of the Freshman Track Team equalling a Varsity record.

To members of winning relay teams in indoor intercollegiate competition.

To winners of first place in open class meets.

cTc

Any man who places in the first forty per cent, or better, at the annual cross-country run of the I.C.A.A.A.A., or the first thirty per cent, or better, at that of the N.E.I.C.A.A.

Any point winner who makes tenth place, or better, in a collegiate dual or triangular cross-country race.

The four men making the fastest time in the annual M.I.T. open cross-country race.

oTr

To first place winners in intercollegiate gymnasium team meets.

rTr

To the winners of singles and doubles in M. I. T. intramural championship.

sTr

To point winners at the annual meet of the I.S.A. and at the annual N.E.I.S. championship meet.

wTr

To winners of finals in the annual championship meet of the N.E.I. W.A.

OTHER INSIGNIA

The appropriate insignia to members of any team, exclusive of the track team, who participate in two-thirds or more of the meets of one season, and to the manager.

The insignia to be as follows: aTr Soccer Football, cTc Cross-Country, bTc (crossed oar) Crew, bTr Basketball, bTr Boxing, rTr Fencing, gTr Gymnasium, gTc Golf, hTr Hockey, sTr Swimming, wTr Wrestling, T(crossed bats) Baseball, together with similar insignia for such other sports as may be recognized officially by the Advisory Council at any future date.

The insignia for the Gymnasium Team shall be gray letters on a red ground and for the Golf Team red letters on white.

The Advisory Council at its discretion may award the "T" with crossed rifles:

To members of the outdoor rifle team who shall score 143 or better out of a possible 150 at the outdoor competition of the N. R. A.

Members of the indoor rifle team who participate in two-thirds or more of the competitions of one season and demonstrate an excellence comparable to the preceding.

Competitors who shall win the "T" with crossed rifles more than once shall qualify for an award augmented with stars under the same rules as those governing the "T" with stars.

aTr

To the six members of the outdoor rifle team and the manager, provided the team position in competition places it among the first third of the competing teams.

The members of the indoor rifle team who participate in two-thirds or more of the competitions of the season, providing the team be placed in Class A (the first third of the competing teams).

CREW AWARDS

The "T" with crossed oars to members of the first crew who have competed in not less than two-thirds of the intercollegiate races of one season; under the same conditions, the same award augmented by the letters *bc* may be granted to members of the second crew and the 150-pound Varsity Crew.

CLASS NUMERALS

The following are entitled to class numerals, three inches in height, three inches in width:

Winners of points in open class meets.

Members of the Freshman Track Team who are winners of points in recognized extramural meets who have competed in not less than two-thirds of the meets of one season.

The manager of the Freshman Track Team.

The manager of the Freshman Cross-Country Team.

Members of winning Freshman relay teams in recognized indoor meets.

Members of the following teams who have competed in two-thirds of the meets of one season:

Freshman Soccer Football, Freshman Cross-Country, Freshman Basketball, Freshman Boxing, Freshman Fencing, Freshman Gymnasium, Freshman Golf, Freshman Hockey, Freshman Wrestling, Freshman Tennis, Freshman Rifle, Freshman Crew, Freshman Baseball, Freshman Football, and Sophomore Football.

Members of the Freshman Swimming Team who have competed in not less than two-thirds of the meets of one season and who have won a total of at least five points during the season.

Members and managers of winning teams in any form of interclass competition recognized jointly by the Advisory Council and the M.I.T.A.A.

Participants on Technology Field Day as follows:

First, to members, not more than five substitutes, and manager of both football teams; second, to members, not more than two substitutes and manager of the winning team in the relay race; third, to members, not more than two substitutes, the manager, and the counter of the winning tug-of-war team; fourth, to members, not more than two substitutes, and manager of the winning crew.

The Technique Award

SEVERAL years ago the TECHNIQUE Board presented to the M. I. T. A. A. a large silver cup, with the understanding that it should be presented annually to that man on the track team who had scored the greatest number of points during the season. The M. I. T. A. A. established the custom of making this award at the All-Technology Smoker where the recipient of the honor would receive distinction appropriate to his achievement. Even more unique is the fact that this presentation is the only one of its kind made at the smoker.

In accordance with this custom, the TECHNIQUE Award for 1925 was made at the Smoker held on October 8. George J. Leness, '26, Captain-Elect of the 1925-26 track team, won the award by scoring a total of 81 points, a greater number than has been accumulated by any previous winner of the cup. Leness' feats as a half-miler are well known to the students, and the award was very popular. His season's work was one record-breaking performance after another, culminating in the creating of a new New England record in the half mile of 1 minute 55 seconds, three-fifths seconds faster than the old record made by Norman Taber in 1914. But Leness did not stop here; a week later at the I. C. A. A. A. meet held in Philadelphia, he ran an even faster half-mile and came in a close second to George Marsters of Georgetown.

In the earlier meets of the season George Leness' work was equally brilliant. In the Interclass meet he took first place in both the half and the quarter-mile races, winning both events with ease; at Princeton he took first in the half-mile; at Harvard he was barely nosed out of first place at the tape by Watters of Harvard; and at Cornell he took both the half and the quarter.

K. S. Lord, '26, President of the M. I. T. A. A., made the presentation, whereupon the audience clamored for a speech of acceptance from George. The modest winner of the cup tritely announced his appreciation and stated that he would much rather run races than make speeches. As Captain of next year's track team, George has already exerted great effort in arousing interest in the sport, and he has the good wishes and whole-hearted support of all the students for another highly successful season in track.

Track, 1925

IN reviewing the season of 1925 in track, one is impressed with three things which seem to distinguish the past season from preceding ones. Not that these elements have been lacking before, but rather that they have not been as noticeable as they were this past year. First and most praiseworthy of all, is a renewed enthusiasm and lively interest in track athletics on the part of the student body and the faculty; second and most essential, is a group of exceptional performers who invariably lived

up to their reputations in the meets; and third, an addition to the coaching staff, the effect of which has already been felt and will continue to be felt in following years.

Captain Leness

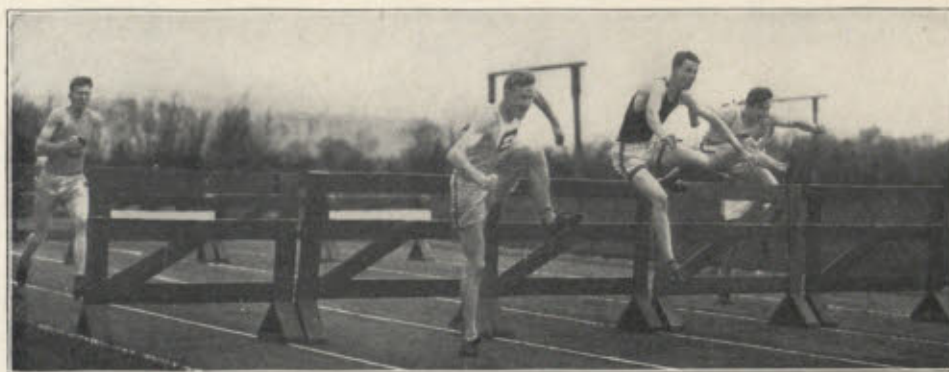

In George Leness and Major Sanford, Technology had two sterling examples of the most desirable type of athlete. They were not satisfied to rest on their laurels but were ever striving to improve their own excellent records and were always putting forth their best for the team. It was highly gratifying to observe the manner in which

Manager Field

their efforts were rewarded when, after steady improvement during the season, both men won high honors in a field which was composed of the outstanding stars of the country at the annual I. C. A. A. A. A. meet in Philadelphia.

In Oscar Hedlund, who was added to the coaching staff, Technology obtained a man interested in every athlete at the track house, and one well qualified to carry out his duties as coach of the runners. "Os" Hedlund was one of the foremost runners in the country fifteen or more years ago, and at one time held the world's record for the mile. He also participated in the Olympic games and won innumerable prizes in New

Steinbrenner at Cornell

England track meets. Whereas formerly Doc Connor had been forced to divide his time between the running and field events, his attention could now be devoted to developing men in the field events alone, in which he is especially well versed. This change in the coaching system could not have been expected to show miraculous results in its first year, but the improvement was so marked that there is no doubt at all that it will be a decided success.

With two able men at the helm, the outlook for 1925 track was far from gloomy. Doc Connor and Os Hedlund started training the team early in the preceding fall and continued to keep up interest in the sport throughout the dull winter season by holding handicap meets every Saturday afternoon. Anyone in the Institute was eligible to compete and generous handicaps were given beginners and newcomers.

Coach Hedlund on the Job

Interclass Meet By April 20 when the first formal outdoor meet was held, tremendous enthusiasm had been aroused in track and competition was very keen. The Interclass meet held on this date, although under adverse weather conditions, was a decided success, and brought out the best in all the contestants. The juniors, class of '26, won the meet with a total of 52 1-2 points. The sophomores were second with 45 points, and the seniors and freshmen scored 38 1-2 and 28 points respectively. George Leness, '26, furnished the outstanding performance of the meet by winning both the 440 and 880-yard runs in exceptionally fast time. Lou Porter, '25, Captain Drew, '25, Henry Steinbrenner, '27, and Fred Glantzberg, '27, were other outstanding stars of the day, each scoring heavily for his respective class.

Lou Porter

Penn Relay

At the Penn Relay carnival on April 25, George Leness was principally responsible for the victory which put Technology at the head of all the technical colleges. The event was the mile relay. Doug Jeppe led off with a fast quarter and gave Howlett a seven-yard lead which he was able to pass on to Stephenson. Matched against the

Carnegie Captain, however, Stephenson was unable to keep up the pace and when Leness took the baton, the Carnegie man had a substantial lead. Leness, running easily, gradually closed up on him and after he had passed him on the straightaway

was never headed. His time for the quarter was 50 seconds, one of the best times at the games.

Leness Second at Harvard

Princeton Meet

The first dual meet of the year was held in the Palmer Stadium at Princeton on May 2. The score of the meet was quite one-sided, Princeton winning 113-22. George Leness starred for Technology, winning the only first place by running a fast half-mile in the face of a strong cross wind. Sanford and Doug Jeppe placed second in the pole vault and 440-yard run respectively. Hank Stienbrenner placed in both hurdle races, in which he was up against first-class competition in Howell and Scattergood of Princeton. Captain Drew, winner of the I. C. A. A. A. A. hammer-throw title the preceding year, had trouble in keeping in the ring and took second place in this event with a throw of 148 feet.

Harvard Meet

On May 9, the Technology track team suffered another setback in the Harvard Stadium. The score of this meet was 168 9-10 to 56 1-10. As in the Princeton meet, George Leness featured by staging a magnificent half-mile race with Watters of Harvard. After leading his rival up to the last 50 yards, George was forced into second place by the scantiest of margins at the tape when Watters put on a burst of speed and, in so doing, created a new meet record of 1 minute 57 seconds, four-fifths of a second faster than the previous time. Major Sanford won the pole vault quite easily, tying the meet record of 11 feet 6 inches. Captain Drew surprised everyone by fouling four times in the hammer-throw and consequently taking only third place with a throw of 129 feet. Jones of Harvard broke the meet high-jump record with a leap of 5 feet 10 1-2 inches.

Cornell Meet

The last dual meet of the season was held at Ithaca on May 16. Cornell won by a score of 94 2-3 to 40 1-3. Hank Steinbrenner broke both Institute records for the hurdle events. His new time for the high hurdles was 15 4-5 seconds, lowering the former Technology record of 16 1-5 seconds. In the low hurdles he covered the ground in 24 1-5 seconds, nearly 2 seconds less than in the previous record of 25 4-5. George Leness was equally brilliant, winning both the 440 and 880-yards runs in close to record time. Captain Drew who had had bad luck all season with his hammer-throwing

On the Boards

had devoted considerable time to high-jumping and was rewarded in this meet by taking first place in this event with a leap of 5 feet 11 1-2 inches, well over the average height reached by college jumpers. The 220-yard run was a feature of the meet in that Russell of Cornell equalled the world's record of 20 4-5 seconds in winning the event. K. A. Smith performed remarkably well in the mile run, taking a close second after making a fine sprint in the last fifty yards.

N. E. I. C. A. A. Meet

The following week was a busy one at Technology where extensive preparations for the New England Intercollegiate Track Meet were under way. On Saturday, May 23, the finals were held under ideal conditions on a track well-prepared for record-breaking performances. Technology and Boston College were both favored to make the best showing and it was a great surprise to M. I. T. followers when the Tech men emerged in fifth place. This may be explained partially by a streak of unprecedented mishaps among Technology's star performers.

At the New England

Lou Porter and Al Kauzmann, both fast sprinters, unfortunately pulled tendons after qualifying with no difficulty in preliminary heats. In the face of such catastrophes, Technology fought hard to regain its footing but fell short at the end by several points. The greatest race of the whole meet was the 880-yard run in which the fastest of New England's half-milers were entered. George Leness apparently had the race to himself until he was challenged about seventy yards from the finish by Larivee of Holy Cross. The two men hung together for only a few seconds, however, and then Leness gradually pulled ahead with his long, easy stride and crossed the line four yards ahead of Larivee, winning the race and the New England championship. His time of 1 minute 55 seconds was three-fifths of a second better than the record previously made by Norman Taber.

Another star performer for Technology was Major Sanford who took first place in the pole-vault and incidentally broke his own Institute record when he leaped 12 feet 2 1-2 inches, 1 1-2 inches higher than he had previously reached. Other M. I. T. scorers were Saul Brodsky who took second in the shotput, Captain Drew who won third in the hammer throw, and Steinbrenner who placed fourth in the high hurdles. With a strong field of sixteen colleges competing, and with five records broken during the afternoon, Bowdoin and Boston College tied for first honors with Colby and Holy Cross in a tie for the next place and Technology following closely behind.

1926 Mile Relay Team

CAPTAINED by George Leness, the mile relay team had a perfect season, winning races from the strong Brown and Harvard teams.

A preliminary relay carnival with Harvard in the one-lap, three-lap, and six-lap distances was held as last year. The team which later ran in the mile relay participated in the six-lap or two-mile relay in this carnival, but was beaten at this longer distance. Incidentally both the freshman and varsity one-lap teams decisively defeated Harvard.

The mile relay team which was ultimately picked included Meagher, Symonds, Howlett, and Captain Leness running in the order named. The first race, with Brown, was held in the K. of C. games on February 6 in Mechanics Building. The brilliant running of George Leness won this race. He received the baton fully five yards behind Underwood of Brown and finished ten yards ahead of his opponent.

A week later the team met Harvard in the B. A. A. games. Harvard had a crack team and was quite confident. Meagher started off by defeating O'Neill of Harvard in a very well-judged race. The lead see-sawed back and forth and finally Leness took off on even terms with Kane of Harvard as the result of a clever pass of the baton. Leness immediately obtained the lead and ran a comfortable race always keeping ahead of Kane, finishing easily four yards in the lead.

Cross-Country, 1925

WHILE pre-season discussions brought out the fact that a wealth of good material was at hand, few followers of cross-country at Technology had any idea of the surprises in store for them. The plan which was followed last year, that of having the squad divided into two separate teams, one for hilly courses and the other for level ones, was abandoned this year, and all effort was concentrated on developing one strong versatile team.

Captain Rooney

For two weeks prior to the opening of school, most of the men intending to run in the fall attended a cross-country camp at Littleton, Mass., arranged for by Captain Rooney and Coach Hedlund. Competition for places on the teams was very keen, and on October 17 trials were run at Belmont to determine who should run against New Hampshire in the first meet of the year, on the following Saturday. It was in these trials that the first signs of the strength of the freshman team were apparent. Norman

Manager Jackson

McClintock, until then merely regarded as a good prospect, loomed up as a very unusual runner when he easily finished first in good time, and set three other freshmen, Payson, Worthen, and Burgess, a hard pace to maintain. The following Wednesday, the freshmen met Arlington High, scholastic cross-country champions. McClintock won the race and broke the course record by 58 seconds. Although the team lost the meet 23-42, the showing was very encouraging.

At last, the time came for the first varsity meet. Saturday, October 24, both varsity and freshmen met New Hampshire State at Durham. In the freshman race the team stuck together in a group until the last half of the distance, when McClintock, Payson, and Worthen broke loose and were soon up in front. About a hundred yards from the finish the Tech men sprinted and left their opponents far in the rear. The team won by a close score, 26-29. In the second race, the varsity was up against strong competition. Peaslee of New Hampshire was an easy winner. Rick, Rooney, and Chute of Tech came in third, fourth, and fifth respectively. As in the freshman race, unfamiliarity with the course was a severe handicap. The final score was 31-34 for New Hampshire.

Harvard was the next college on the schedule. Both the frosh and varsity teams had high hopes of winning. In the varsity race, Technology's team scored five men in succession in a period of 50 seconds, an almost unprecedented feat. Although three Harvard men had previously scored, Technology would have come closer to victory had it not been for the fact that Pete Kirwin had not been given a number and therefore could not be counted in the race. With this discounted, the final score turned out 24-31 for Harvard. In the freshman race, McClintock as usual easily took first place,

but the team was defeated by a turn of fate. Burgess, finding a bridge across the river closed, had to retrace his steps, losing about forty yards, and lost out at the finish by a yard, thereby giving Harvard the two points necessary to win 27-29.

On November 7, both teams redeemed the misfortune of the preceding week by completely whitewashing Brown. The freshmen made a clean sweep, winning 15-40, while the varsity did practically the same, winning 16-39. Both teams had reached the top of their form, and, in this condition, fairly romped away from their rivals. The results were highly satisfactory and showed the true worth of the teams. After such brilliant work, the teams were favored to win their respective races in the N. E. I. C. A. A. meet held at Franklin Park on November 14. As it turned out, the varsity finished a close second to Bates, a dark horse in the race. In winning second place, they beat such teams as Maine, New Hampshire, and Williams, each of whom boasted stars of the highest class. Marvin Rick scored first for Technology, finishing in seventh place. In the freshman race, the Tech team had everything its own way. Norman McClintock was too good for the best in New England and had little trouble in winning. Incidentally, he broke the course record with the fast time of 18 minutes 45 seconds. His team mates were close behind him throughout the race, Payson, Worthen, and Burgess finishing soon after their leader. The team won first place quite handily.

The closing event of the season was the I. C. A. A. A. race held at Van Cortlandt Park, New York, on November 23. Marvin Rick finished first for Technology when he obtained fourteenth place, and the team took seventh place, bowing only to the very strongest teams in New England and heading Yale, Princeton, Cornell, and Pennsylvania. The freshman team won fourth place in its race when Yale, Penn State, and Cornell bunched men to beat it. Norman McClintock took the only beating of his brilliant season when Benson of Cornell nosed him out at the tape.

Crew, 1925

TECHNOLOGY heralded to the rowing world by its crew victories in 1925 the arrival of a new power on the Charles. During the 1925 season Technology confirmed the reports of its sudden and surprising rise in the rowing world by new triumphs both on the Charles and on outside courses. The varsity oarsmen measured up to expectations by winning decisive victories over Cornell and Columbia, colleges that have made rowing history for years. Among the lighter crews Tech

proved equally successful with an excellent junior varsity and a fast 150-lb. crew. The results of Coach William Haines' tutelage plainly marked Technology as a factor to be considered in the regattas of the present as well as those of the future.

Captain Latham

Manager Bigelow

Coach Haines initiated the 1925 rowing campaign shortly after the start of the second term by a stirring address at the crew dinner given in Walker Memorial. After the Coach had concluded his talk with an appeal for fighting spirit, Captain-elect Sutter an-

nounced his own resignation as head of the varsity crew because of illness, and then made known the election of William H. Latham, '26, as his successor. The official Call Day for crew was set for January 26 and it was resolved that every effort should be directed toward the enlistment of new material on that day.

On January 26 about forty new men reported in addition to the veterans of the year before. Practice was started on the machines within the next few days, and

before long a squad totalling over two hundred was working at the boathouse. The junior varsity crew, followed by the 150-lb. and the varsity crews, made its first appearance on the Charles February 25. Real training on the river did not begin, however, until March 19, after mid-term exams. Practice was then speeded up, and for a week during vacation the crews reported twice a day. On March 26, the varsity was presented with a new shell, the "Avery H. Stanton," which was built in England and donated to Tech by some unknown benefactor. In the early practice the 150-lb. crew shaped up as the most promising eight, since it rowed the varsity on almost even terms in several trial heats and conquered the junior varsity twice.

As the race with the Navy on April 25 drew near, the rivalry among the crews became keener and a try-out was necessary to prove the 150-lb. crew's right to accompany the varsity to Annapolis in place of the regular junior varsity. The Academy officials generously extended their hospitality to both crews for a week before the race and the Tech men had ample time to accustom themselves to the choppy Severn River course. In the race the first varsity lost to the powerful Navy eight by three lengths. The 150-lb. junior varsity also lost to the Navy second crew by three lengths. While the Navy clearly showed its superiority, it is only fair to the Tech men to say that they were hampered somewhat by the loss of A. F. Horle, '26, from the varsity the day before the race, due to an injured arm, and by the consequent shifting of the seating arrangement in both boats. It is interesting to note that this Navy crew later won the National Championship in the Poughkeepsie Regatta. The regular junior varsity crew, which had been left at home while the Navy meet took place, accepted the challenge of the Union Boat Club on April 24 and defeated its shell by a quarter of a length in a thrilling contest on the Charles.

May 22. Harvard on the Charles, Boston

The 150-lb. crew that rowed against the Navy journeyed to Lake Carnegie on May 2 to race the Princeton light varsity. It proved its strength by conquering the Tiger crew by a length in time that was but two seconds short of the record for the course, a regulation Henley distance.

Captain Greer

On May 6, the 150-lb. boat lost a hard race to the Harvard light varsity by a little over a length. The course was very rough, and at the finish the Tech boat was almost under water. Harvard had equipped its shell beforehand with washboards and suffered no handicap from the waves.

In the Quadrangular Regatta on the Charles, May 9, Technology entered crews against Harvard, Pennsylvania and Cornell in all three events. Strangely enough Tech came in third ahead of Cornell in every race while Pennsylvania won the freshman and junior varsity events with Harvard a close second. In the varsity race Harvard won by three lengths when Penn broke an oarlock near the finish. Technology swept in a length behind the Red and Black and a good length ahead of Cornell. The Institute won by five lengths over Cornell in the freshman race, and two lengths in the junior varsity heat.

In the final varsity meet of the season on May 16, the Tech eight rowed Columbia on the Harlem River and proved it had reached top form by an impressive four-length victory.

The junior varsity in the preceding event of the day had lost to the Syracuse and Columbia second eights but had put up a thrilling fight against Columbia all the way to the finish. The varsity triumph ended the season in a fitting way and strengthened Technology's rowing prestige considerably.

The interclass race for the Richards Cup was the final event of the Spring season on the Charles River. The freshman class crew came in first with a two-length lead over the sophomores, while the seniors managed to come in a close third. The junior eight, the winner of the event for the past two years, broke an oar a minute after the start and was left seven lengths behind at the finish.

Swimming, 1925

THE swimming prospects at the opening of the season were far from discouraging. Technology had men in four or five events who were experienced and could be depended upon for first or second places. Difficulty in obtaining the Y. M. C. A. pool for practice was a considerable handicap to the team, but the men worked hard during every available practice hour.

The results of the season proved that one or two stars cannot win single-handed.

Several times Technology lost meets in which it had taken four first places, due to an inability to score seconds or thirds.

In the first meet, with Yale, Technology was defeated in all the events. In the fancy dive Woods took the only second place for Technology. The next two meets, with Amherst and Williams, also resulted in defeats. In the former, Johnson broke the Institute record in the 100-yard backstroke event, while Woods took first in the diving on both occasions. The only home meet

Captain Wies

Manager Gentry

was with Boston University which was lost by a rather large score in spite of the fact that the team took four firsts. Armstrong won the 50-yard dash and Woods again won the dive. At Syracuse Armstrong took first in the 50-yard dash for the fourth consecutive time during the season.

In the Williams meet the team was handicapped by the absence of Johnson and Woods who were unable to compete due to an attack of influenza. Wesleyan was too strong for Technology, and, although the team performed well, they were no match for their opponents. In the final meet, with Brown, the Engineers made one last desperate effort to win. They were unsuccessful, however, and were forced to close the season without a victory.

In spite of these results, the team at all times kept up its spirit and put forth its best efforts in competition. Considering the difficulties under which they had to practice and the fact that most of the meets were away from home, great credit is due them for their performance throughout the season. Woods and Armstrong, who captured four first places each during the season, together with Johnson and Wies, consistent point scorers this year, will be back to form the nucleus of the 1925 team.

Basketball, 1925-1926

THE opening of the basketball season on January 10 found a well-balanced veteran team ready for the stiff schedule arranged for them. Captain Eager, Ingram, Forrester, Wilcox and Caine were all experienced men and Hinck, a sophomore, soon found a steady position on the team.

The first game with Northeastern was well attended and proved to be one of the best of the entire season. In the last few minutes of play Technology showed a burst

Captain Forrester

of speed and tied the score. Forrester then made a beautiful shot which won the game, 24-23. The next two games, with Williams and Amherst, were played against much stronger opposition, and both resulted in defeats. Williams won 30-25, and Amherst was victorious by a 38-25 score. Forrester's shooting, however, was a notable feature of both encounters.

In the next few games Technology lost its effectiveness. The team lost consecutively to Brown, 29-14, to Harvard, 31-20, to West

Manager Lyles

Point, 38-19, to Boston University, 40-25, and to Tufts, 35-32. In the Harvard game Technology outplayed the Crimson throughout the first half and was leading at the end of that period, 14-13. Captain Eager, Hinck and Ingram starred in this part of the game, but were powerless in the last half when Harvard put up an impenetrable defense. In the Army game, Roosma, the Cadets' star forward, was responsible for the greater part of the West Point score. Northeastern returned on February 14 and avenged its previous defeat by winning, 29-23, and a few days later Brown again defeated Tech.

The return engagement with Boston University was the one high light of an otherwise mediocre season. Displaying new speed and excellent team work Technology won, 29-21. Forrester lead the scoring with 9 field goals, and together with Hinck, was continually breaking loose for tries at the basket.

The last two games of the season found the team again on the short end of the score, losing to Clark, 29-26, and to New Hampshire, 38-23.

Although 1924-1925 was not a successful season from the standpoint of scores, the team, nevertheless, showed plenty of spirit and at times flashes of brilliant playing. Technology can justly look forward to a stronger team next year as very few men will be lost by graduation.

1925 SEASON

April 29.	M. I. T.	6	Boston University	0
May 6.	M. I. T.	0	Harvard	6

May 13.	M. I. T.	2	Holy Cross	4
May 16.	M. I. T.	1	Amherst	5
May 23.	M. I. T.	0	Williams	6

THE first match of the season was held on April 29, with Boston University. As the 6-0 score indicates, this was an overwhelming victory for Technology. The second match, with Harvard, May 6, resulted in the defeat of the Tech team, 6-0. Brown, the next opponent on the schedule, was defeated 6-0 in another one-sided contest. The match with Holy Cross was the closest of the season. It was well played by each team, and the 4-2 defeat came only after the last putt was sunk. The defeat in the Amherst match came as a surprise, and was partly the result of over-confidence. The team then journeyed to Williams and lost 6-0.

Considering the strength of several of the teams encountered, the season, with two victories and four defeats, cannot be called unsuccessful.

Wrestling, 1925

THE squad began work about the middle of November with a nucleus for a strong team in Tryon, Coyle, and Captain Greer, and a promising group of new men. The opening match took place in the Hangar Gym and resulted in an easy victory over Northeastern, 28-5. In the next meet, at Yale, Coyle, in the 115-lb. class, was the only man to score for Technology. The M. I. T. men relied mainly on the wrist lock and the half nelson, while the Yale team used the scissors and bar

nelson to good advantage. The score was 24-3. On the twentieth of January the team lost to Harvard in the Hangar by a score of 21-6. Then followed the Boston University meet, which was won by default. The fifth meet of the season was with Tufts College in the Hangar Gym. The Technology team was at its best and won every bout, six by straight falls and one by decision. At West Point a close meet resulted in defeat, 11-14. Coyle made a fall in the 115-lb. class, thus continuing his

Captain Franks

Manager James

good work of the season. Kurtin and Captain Greer won decisions. The seventh meet was with Syracuse in the Hangar Gym and resulted in defeat for Technology. Syracuse won four decisions and a fall while M. I. T. secured two decisions. Brown was our next opponent, and again the team lost by a very close margin, 16-13. Technology was handicapped by the absence of Capt. Greer who was suffering from injuries received in the Army meet. The turning point of the meet was the bout between Tryon and Capt. Eckstein of Brown which was lost only after two overtime periods.

Technology's run of bad luck was changed by a decisive victory over Norwich in the next meet. M. I. T. won six out of the seven bouts and so made the score 22-3. See-sawing from victory to defeat seemed to be characteristic of the team's work and Lehigh, the next opponent, defeated Tech 19-6.

The Intercollegiates were held at Harvard on March 20 and 21. The team won nine points against Harvard's 19 and Brown's 16. Burke secured the heavyweight title after a very spectacular bout, and both Coyle and Hosch secured second places.

It is interesting to note that while the team won only a third of its meets during the season of 1925, it piled up a total score of 128 points against 119 scored by its opponents.

Hockey, 1925-1926

THE hockey team started to practice in the early part of November at the Boston Arena. Because of the difficulty in obtaining the rink at a convenient time, practices were held at 6.30 in the morning.

Captain Deignan

The season opened on December 4 when the team met Boston University in the Boston Arena. Notwithstanding the good defensive work of Richards of Technology, the game was lost, 5-1. The second and third games of the season with the strong Boston College and Harvard teams were also lost. Although it was evident at this stage that the team had great possibilities, the team work had not yet attained a high grade of perfection.

Manager Carroll

After the Christmas vacation Technology seemed to take a new spurt and defeated Massachusetts Aggies on January 9 by the score of 3-0. With renewed confidence and a better organization the team again met Boston University which by this time had acquired a creditable list of victories. This game, one of the hardest fought and best played of the season, was won by Tech, 2-1. The result was a complete surprise to everyone for few people then realized the possibilities of the Tech team.

During the examination period the team ceased all activity and consequently encountered difficulty in resuming its schedule. On February 12 Technology defeated Bowdoin, 4-3, and lost to Bates on the following day, 5-4, in another close game. At Hanover on February 17, the team met Dartmouth, one of the best teams in the East. Technology managed to score a goal but could not stop the fast offense of the Dartmouth men, and lost, 7-1. Syracuse and Union were next on the schedule, but due to unfavorable weather conditions the games were cancelled.

Considerable interest was aroused in Boston when Boston University and Technology met for the third time of the season on March 1 to play off the previous tie. After winning the game on a technicality, Technology refused to accept it. The third period was then played in which Boston University established its superiority by winning, 2-0.

This year's hockey season was one of ups and downs. There were times when the team seemed unbeatable and times when lack of teamwork handicapped it. With several promising men from this year's freshman team, besides the veterans who will be back, hockey should be very successful next year.

Boxing, 1925

IN the season of 1925 the same handicap was evident that hampered the team in 1924. The good work of individuals was not sufficient to make up for the lack of enough men to make a well balanced team. The results showed one decisive victory, two ties and three defeats. Nearly all the meets were close, however, and every bout was hard fought.

The season opened at Syracuse. M. I. T. lost five close bouts and drew one when

Captain Epstein

Kwauk met Melamed in the 115-lb. class. The next meet with the University of New Hampshire at Durham resulted in a three to three tie, Tech winning the 115, 135, and 158-lb. bouts. In the feature event of the evening Captain Kuhn of M. I. T. knocked his opponent to the mat three times and won a decisive victory.

At West Point, the Engineers suffered their worst defeat of the year. While the Cadets took all six bouts, in the 125 and 145-lb. events Kwauk and Flynn lost

Manager Moore

only after a stiff fight.

For the first time in the history of McGill its boxing team met an American team on its home grounds when Technology went to Montreal. The final score of 5 to 1 in favor of McGill should not be taken as an indication of her great superiority, however, for in the 158-lb. class Trask of M. I. T. secured an extra round and Captain Kuhn of M. I. T. held his own with Elkin of McGill in the 135-lb. event up to the last round. Epstein also obtained an extra round in the 125-lb. class.

At Colgate, Pierce added to his string of victories by decisively beating Rutishaue. Trask and Flynn also won their bouts but, as Tech lost the other three, the match ended in another draw.

The last meet of the season, with Boston University, gave Tech its first real victory. Burke of M. I. T. gave Fitzpatrick of Boston University such a severe beating in the 175-lb. event that he scored a technical knockout in the second round. Pierce of M. I. T. had an easy time in the 135-lb. event as he had the advantage of height and reach over his opponent. Marelllo of B. U. was the only man to score for the visitors when he defeated Captain Kuhn in the 160-lb. bout. The final score was 5-1 in favor of Technology.

Gym, 1925

EVERY year shows an increasing interest in gym at Technology as was evidenced this season by the large attendance at the home meets. The 1924 gym team early showed signs of being well-balanced as it had capable men in all branches of the sport.

An exhibition meet held at Milton Academy before the opening of the regular season enabled the men to put polish to their style before the first meet with Annapolis on February 14. The Naval Academy won the meet by a score of 50-4 in spite of the good work of the team. Captain Turner took the only second place for Technology by a fine exhibition on the horse.

Captain Smith

The next meet was held at Technology. Dartmouth defeated the team by the close score of 33-21. King and Galphin performed excellently on the horizontal bars, in which they took first and second places respectively. Newcomb and Galphin were awarded second and third in the rope climb, and

Manager Wheeler

Garcia obtained third on the rings after a very close competition.

In the third and last meet of the season, Pennsylvania defeated Technology in the Walker Gymnasium by a score of 32 1-2 to 21 1-2. Galphin and King placed first and second on the horizontal bars. Captain Turner easily won a second place on the horse, and Burgess, after a hard fight, took second in the parallel bars. In the tumbling event, Wayne outclassed all other entrants and was awarded first place.

The spirit of the men throughout the season was always above reproach, and they gave their best performance no matter what the odds were against them. As only two men are lost by graduation, Technology may look forward to a successful season next year.

Tennis, 1925

THROUGHOUT the winter months and the early spring, the tennis team held indoor practice in preparation for the season's heavy schedule. The first match, held on April 29, was an overwhelming victory for Technology over Boston University, 5-1. Even at this early stage the team began to show strength and prospects for the future looked bright.

On May 6, the match scheduled with Williams unfortunately was cancelled on

account of rain. The team then ran a string of victories without difficulty. Bowdoin was defeated 5-1, Boston College 6-0, and Brown 9-0. The Bowdoin match was closer than the score indicates for several of the men were carried to three sets by their opponents.

Captain Peck

When Harvard was met on May 13, Technology received its only setback of the season. The feature of the afternoon was the close match played between the two captains, Ingraham of Harvard, and Russell

Manager Connell

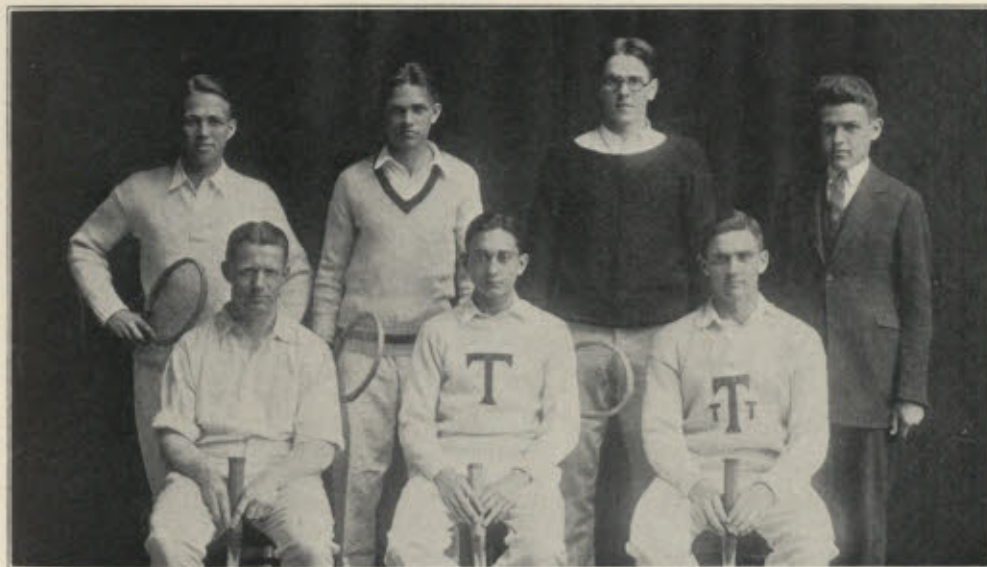

of Tech. It was only after three close sets that Ingraham was able to claim the victory. Harvard, it is interesting to note, was tied with Yale for intercollegiate honors in the East.

The last two matches of the season were again victories for Tech. Wesleyan was defeated 6-0 and Tufts 4-2. The last match of the season, with Dartmouth, had to be cancelled on account of rain.

Not content with making such an enviable record, the highest ranking men on the team entered the New England Intercollegiate Lawn Tennis Association tournament with the determination to win the New England singles title for Tech. For the first time since 1919, an M. I. T. man won when Captain Russell easily defeated Osgood of Dartmouth in the final round.

In recognition of the team's exceptional record, the M. I. T. A. A. awarded not only the regular tennis letters to the men, but also the straight Varsity T to Russell, Hinck, Broadhurst, and Peck.

Fencing, 1925

COACH DANGUY and Captain Levis were enthusiastic over the prospects for 1925 when 48 men, including varsity and freshmen, turned out early in the Fall. With Captain Levis, Elkins, Hawthorne, Seabury, and Walker in the foils, and Cole and Blake in the epees, all veterans of last year's team, there was no dearth of material with which to work. All attention was confined to the foils and epees. The sabres, which are optional in intercollegiate circles, were not developed.

Captain Cole

On January 31, an informal match with the Harvard Graduate team was arranged. The result of the meet, which Harvard won 10-3, was in no way discouraging since among the Harvard men were included the Lane brothers who were formerly on intercollegiate championship teams. The regular season opened on February 7, with a match with the Navy at Annapolis. Sam Cole performed excellently in taking both epee bouts from the two clever Navy men. The final score was 7-4 for Annapolis. Bowdoin, in the next match, emerged victor 7-6. Technology took the foils 5-4, but lost the epees 3-1 when Cole and Blake had great

Manager Wilson

difficulty in solving the left-handed style of Clow of Bowdoin.

After intensive practice, the team met Syracuse in Walker on February 19, and won by the score of 10-3. Captain Levis starred by taking all three of his bouts in masterly fashion. An interesting feature of the next meet, with Harvard on March 7 in Hemenway Gym, was that Danguy was coach of both teams and consequently had to be extremely impartial in his actions. Harvard won the match 10-3. Elkins furnished the thrill of the day by taking two of his three bouts, in one of which he easily defeated Captain Durham of Harvard.

But three days later, the fencers redeemed their defeat, received at the hands of Harvard, by overwhelming Dartmouth 11-2 in a home meet. Cole and Blake were supreme in the epees and took all four bouts. The last meet of the season was with Yale at New Haven on March 14. Captain Levis, running true to form, won his three bouts but was not able to stave off defeat for the team, and Yale won 7-4.

This ended the official fencing season for Technology, but Captain Levis continued to practice regularly in preparation for the Intercollegiate Fencing Championships. On April 2-3 the duels were held at the Hotel Astor in New York, and Levis emerged runner-up in the tournament. To do this he fought 13 matches, making a total of 60 touches out of a possible 65, and defeated 13 of the best fencers in the country. The only man he could not conquer was Stubbs of the Navy, the winner, who was remarkably fast and clever.

From every angle the season was quite successful, and, as many of the members of the team will be back next year, Technology can look forward to another successful season.

Field Day, 1925

CRASH! and another unwary freshman had burst his way into the Hangar Gym only to be greeted by the effervescent stream of a fire extinguisher. Field Day of 1925 had officially started!

Profiting by previous experiences in Walker Memorial and realizing the impossibility of welcoming the Class of '29 in proper fashion in that building, the Class of '28 dispensed with the usual Sophomore Banquet and chose instead to rally at the Hangar Gym, where a more whole-hearted resistance could be staged to attempted entrances on the part of the Class of '29. Accordingly, fully equipped with old clothes, fire extinguishers, fire hose, and other paraphernalia, the Class of '28 assembled in the Gym about eight o'clock on the eve of November 5, 1925.

Sophomore Captains

For a time the meeting was undisturbed. The sturdy walls of the Hangar repelled all attack. Gradually, as the Class of '29 increased its forces

outside, a few intrepid freshmen gained entrance to the Hangar, where they were dealt with severely and ejected once more as an example to other ill-advised members of their class. When one of the main doors had been battered in, in the face of a stream of water from a fire hose, the freshmen poured into the Hangar where a scrap

Pull!

ensued. After the tussle was over, both classes rushed outside, formed in line, and paraded up Massachusetts Avenue to Harvard Square singing, yelling, and cheering. With such an auspicious start the prospects for the Field Events on the morrow were given added color.

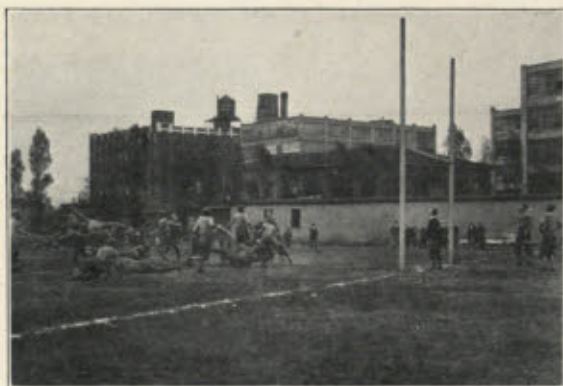

The first event was the crew race which was preceded by a race between the varsity, junior varsity, and 150-lb. crews in which the varsity won by a narrow margin. Promptly at 1.45 the freshmen and sophomore crews took off and raced down the course. As they neared the finish, the sophomores were rowing a fast, steady stroke and were keeping about three quarters of a length ahead of the heavier and slower-stroking freshmen. The sophomores maintained this lead to the end, despite a last-minute spurt by their opponents, and passed over the line winners by a few feet.

One of the Scraps

Then began the romp to the stands, featured with impromptu pitched battles en route. The sophomores appeared, zealously guarding an old red Ford that proudly sputtered its last defiant notes before suffering dismemberment at the hands of the freshmen. The stands were soon filled, and it was not long before the fight was on. In the tug-of-war only two pulls were necessary to prove the superiority of

the sophomores. It was evident both in the first pull and in the one between the halves of the football game that 1928 was far superior to its less experienced opponent, as the times of 57 and 59 seconds in which they won indicate.

A Try at Goal

Football was next on the program, and here again, as in the crew race, the contest was replete with thrills and surprises. During the game several over-enthusiastic and ingenious sophomores procured some tear-

gas bombs from the Chemical Warfare Department and skillfully threw them into the midst of the freshman stands. Immediately, a horde of freshmen came rushing out of the stands wiping their eyes and groping around in their temporarily

blinded condition. When the skirmishing ended, attention was again focused on the football game. In the first quarter of the game the freshmen upset all predic-

Fresh Team

tions by holding the heavy sophomore team scoreless. On account of its showing in the week-end games, the sophomore team was considered quite superior to the younger team, but it was unable to pierce the freshman line and several times was thrown for heavy losses. The freshmen threatened to score when Walsh picked up a sophomore fumble and ran 38 yards only to be downed on the 2-yard line. The sophomore line held, however, and

Parks punted out of danger. In the second period Wofford intercepted a freshman pass and ran 48 yards through an open field for the only score of the game. Gray kicked the goal. The last two periods showed the freshmen struggling gamely to obtain a score. Their last threat came in the fourth quarter when they advanced the ball to the sophomore 11-yard line where a pass was intercepted by '28 on the last down. The outcome of the game was never certain till the final whistle had blown and the score stood 7-0 in favor of the sophomores.

In the relay, which was held between the halves of the football game, the victory of the sophomores was a surprise to everybody, for according to the time trials held the previous week the freshmen had a decided advantage. Speller, the lead-off man for 1929, managed to obtain a lead of four yards over Churchill of the sophomores in the first lap, but when Keough was passed by Moggio in the next lap, the freshmen lost their advantage and did not threaten the sophs again until Danner, '29, drew up on Arf, '28, in the next to the last lap. The lead was too much for him, however, and the sophomore team won by about seven yards. The time for the race was 4 minutes, 57 1-5 seconds.

Got Him!

Thus 1928 made a clean sweep of Field Day, and, when all was over, both classes joined in a monstrous snake-dance across the field, over Harvard Bridge, and into the

The Snake Dance

heart of down-town Boston, blocking and tying up traffic everywhere they went. Several would-be disturbers of the snake dance were severely dealt with by the students who were bent on maintaining an unbroken line from beginning to end. When the line had reached Rogers building, the red Ford, mascot of 1928, was rolled up the steps, and its remains were left there, a reminder of the events of Field Day 1925. The Stein Song, sung on the steps of "Old Technology," fittingly closed the day which had brought together the two lower classes in a spirit of friendly rivalry.

As in 1924 the sophomore class made a clean sweep of the events, winning 13-0. Very seldom in the history of Field Day tradition has a freshman class ever been able to win from its more organized and experienced opponents. Field Day of 1925, though won by a one-sided score, was one of the closest ever fought between the two lower classes. Every event was won by the narrowest of margins, particularly the crew race in which only a few feet made the difference between victory and defeat for the sophomores. With the spirit which it showed this year, the class of 1929 should win in its turn next year unless the entering freshman class shows remarkable strength.

Institute Committee

THE Institute Committee is perhaps the most powerful of the Student Organizations at Technology. It is the legislative part of the student government and has a very active and creditable record. Seldom are its decisions overruled, and it is recognized as being the most reliable source for determining student opinion.

The Committee is composed of representatives from the four classes and a delegate from each of the recognized activities of the Institute. Its meetings are open to the entire student body. It is thus readily seen that this is truly a representative body, expressing in many ways the will of the majority of the Technology undergraduates.

The Budget Committee functions mainly to insure a just appropriation and a prompt distribution of the money accruing from the collection of the Student Tax to those activities entitled to a share thereof. It deals with all financial questions relating to student activity.

The Committee is composed of five members, namely, the treasurers of the Institute Committee, the M. I. T. A. A., and the Finance Committee, with the addition of two members-at-large chosen by the Institute Committee.

THE Walker Memorial Committee, a sub-committee of the Institute Committee, is the student administrative body in charge of Walker Memorial and the Naval Hangar Gymnasium. Each year Walker Memorial, the gift of the Alumni, is turned over to this committee which is responsible for regulating its functions in a manner most beneficial to the student body. Among its duties may be mentioned the enforcement of the house rules of Walker Memorial, the supervision of all meetings of organizations held in the building, and the control of publicity campaigns and drives conducted on the Institute grounds.

PUBLICATIONS

The Advisory Council on Undergraduate Publications

MEMBERS

Winward Prescott, *Chairman*

Harold E. Lobdell, '17

Harry D. Peck, '13

THE Advisory Council has for its purpose the furtherance of publication facilities, the supervision of all undergraduate work to appear in print and the encouragement of sound policies on the part of Technology periodicals. Its attitude is one of encouragement towards every branch of truly representative literary pursuit.

Professor Winward Prescott
Chairman

It was founded in 1910 by the Institute Committee in response to a widely felt need for cooperation between the alumni and undergraduates in the management of publications. The Alumni Council was asked to form a connecting link between the alumni and these activities. This it accomplished by means of the Advisory Council on Undergraduate Publications, the capacity of which was to be in loco parentis to *The Tech*, *TECHNIQUE*, *Voo Doo*, and *The Tech Engineering News*, both in time of financial uncertainty and in the event of radical changes in style or service.

A Constitution making clear the relationship of this Council to the Alumni Council, the Institute Committee and the activities concerned, was approved by the Executive Committee of the Alumni Council and the Institute Committee.

The concepts which govern the operation of undergraduate publications under its jurisdiction as stated in this document are:

3. (a) "The Alumni have a direct interest and a right to a voice in the management of any student activity that trades in the good-will of the Institute as a whole and by which the good name of the Institute might be compromised"

4. (b) "The Alumni claim no right or desire to interfere in any student activity not involving the principle outlined in (a) except insofar as their advice may be requested, or proffer of it may appear to be in order."

Technique

THIS year marks *TECHNIQUE*'s forty-first edition. In the fall of 1885 the junior class at Technology decided to publish an annual to fill the need which was being felt for an Institute publication of a permanent nature. Thus was *TECHNIQUE* founded.

The First Technique

Throughout all these years the line of *TECHNIQUES* has been unbroken, and it has kept its original name although the rest of its features have undergone great transformation. Incoming boards have always endeavored to improve the publication so that from a paper-covered book of two hundred pages, *TECHNIQUE* has become a substantial volume of some five hundred odd pages. In 1924 *TECHNIQUE* was changed from an electoral to a competitive basis. Instead of being purely

a junior class activity the annual was reorganized much after the fashion of other college publications, having a junior and senior board and a sophomore staff. Undoubtedly this plan is a great improvement over the preceding one, for a year-book is of interest to all the students and therefore should be published by representatives of the four classes. Competition insures the appointment of the most capable men available, whereas an electoral system depends more upon the whims of the electoral committee, and the possibility of unexperienced men obtaining responsible positions is apparent.

It has always been the policy of the board to give Technology an annual which, though at a minimum price, compares favorably with year-books of other colleges. *TECHNIQUE* has always endeavored to include in its pages all phases of Institute life, both its official activities and organizations and its informal and somewhat more personal aspects.

The 1926 *TECHNIQUE* Board hopes that it has accomplished its purpose in publishing this volume, and that now as well as in the future its pages will recall to its readers events typical of Institute life.

ON November 16, 1881, a modest twelve-page magazine made its first appearance at Technology. Small and inconspicuous as it was, the first issue of *The Tech* received an enthusiastic ovation from the undergraduates for it was the first successful attempt to start a student publication. Some years before, *The Spectrum* had made its appearance, only to succumb shortly afterward.

The organizers of this first volume bent their efforts toward making *The Tech* a permanent organization. The publication has survived the vicissitudes of the Institute, financial depressions, and early student non-support. From a bi-weekly magazine form it evolved into a weekly newspaper (1882), then a tri-weekly (1903), a daily (1909), and at last its present form as a tri-weekly (1914). For a year during the World War it was operated as a bi-weekly under alumni control.

The Tech at present embraces all the functions of a professional newspaper. Under efficient business administration it has become a large advertising medium with a consequent financial stability. It has the largest trust fund of any Institute activity. Its news service covers all matters relative to the Institute in a style and make-up similar to metropolitan journals. Editorially it has been successful in arousing student comment on problems of Technology and of the intercollegiate world. A growing Open Forum department has allowed students to voice their opinions freely, and a constantly expanding book review section has given the publication an added literary tone.

PHOSPHORUS dries his pen with the weary satisfaction of one who has labored long for a righteous cause: that of facetiousness. Volume VIII of *Voo Doo* has drawn to a close amid the pleasing chuckles that announce the appearance of the massive April "Prom Number." The past year has witnessed an improvement in both Art and literary material: new humorous talent has been discovered below the haze of gloom which blankets the Undergraduate World. Several special issues were presented in the name of satire and all that is humorous.

Delving into a field which few have dared to explore, Phosphorus published the "Occult Number" in October. This was based on an airy interpretation of psychic research and occult matters. The popular "Girls' Number" which followed, proved to be the hit of the fall term, selling out on newsstands and at the Institute. In December, the oversized "Matter of Fact Number" involved an effort to explain to an unappreciative reading public the difficulties confronting the editors of a comic. Kane's frontispiece and the double-spread entitled "The Institute as It was in 1900" were exceptionally good.

After the relaxation afforded by vacation Phosphorus presented his "After Christmas Number." This was featured by a four-page burlesque of our local newspaper. The "Prom Number," a double-sized issue, was appropriately timed to add to the geniality of Junior Week festivities. It contained, besides material by current editors, many contributions from former literary and art men as well as from the prize winners of the Girls' Number. The feature of the issue was three full pages by the talented anonymous artist who formerly contributed "Five Fruits," "The Freshman Art Candidate for *Voo Doo* Puts in a Late Ham," and other drawings worthy of appearance in any outside magazine.

Voo Doo has maintained its prominent position among college comics, as its General Manager is a member of the Executive Committee of the Eastern Association. Phosphorus is also being quoted more frequently in the reprint magazines.

BACK before the beginning of this century, there were those among the alumni, the undergraduates, and the faculty who had felt the need of an official technical or professional journal that would be in keeping with the high scientific and technical reputation of the Institute. At different times, publications had been started to fulfill this need, but none of them were permanent. Some of them were official or semi-official, having members of the faculty responsible for the editorial policy.

In the spring of 1919, an English manufacturer who was in this country commented on an article on wireless telephony which had appeared in *The Tech* and expressed surprise that there was no publication at the Institute devoted to technical articles. Directly resulting from this, *The Tech Engineering News* was founded as a monthly technical supplement of *The Tech*. In spite of the fact that *The Tech Engineering News* was to be sponsored by undergraduates, it was realized that this new publication could fill some of the needs which had pointed to the necessity of an official organ. Those who became responsible for the editorial policy of the new monthly soon realized the place which such a publication could take and conceived the policies which have guided it toward success.

It was intended by the first editors of *The Tech Engineering News* that it should become an organ linking the past and present student bodies, broadening, extending, and stimulating, to as great a degree as possible, the engineering instruction given at the Institute by bringing before both students and faculty the accomplishments of graduates, engineers, and business men of prominence in professional fields. The editors also intended to publish the results of original investigations conducted in the Institute laboratories and to present to the undergraduates a perspective of the current scientific history of the Institute. The policy was to broaden rather than to intensify professional knowledge and always to work with the single ultimate aim of serving Technology.

While the original policies have been adhered to in the main, from time to time they have been modified, but always with the intention of better serving Tech nology

The Benchmark, an ambitious youth of some six summers, has once more appeared to capture and store up for the future many happy memories of the summer surveying camp. Replete with snapshots, lucid word-pictures, histories, and satires, to say nothing of local small-town ads, Volume VI is indeed well calculated to renew the appreciation of a merry eight weeks well spent in Maine.

TECH SHOW

Tech Show

THE lights dim and gradually go out, the curtain rises, and the music of the orchestra under Charlie Young's waving baton slowly dies away — for the 28th annual production of Tech Show has begun. The applause of the critical first night audience announces its pleasure in viewing the diversified talent of the Technology students.

The Poster

This year's show, the first to be produced since the curriculum has been placed upon the two-term basis, has entailed many new features of production. Few spectators realize the vast extent of work needed to perfect such a presentation and the long period of preparation necessary for its success. The first call for candidates brings out a hundred would-be actors and "ladies and gentlemen of the ensemble." But this year the hundred aspirants must be quickly cut down, trained, and perfected because, if the trip is to be made between the two terms, the show by necessity must be produced in far shorter time than any of its predecessors.

For the second time Tech Show, entitled "Too Many Brothers," boasts of co-authors: G. B. Goldberg, '26, and R. A. Rothschild, '26. The show for the first time in many years can truly be called a college show. The scene is laid in a fraternity house of a college at the time of a

house party, and as the title indicates, the brothers are all present for the event. There is Will Frost who is dumb enough to take his own sister to a fraternity house party, and there is James Cluet-Archer, our hero, the dashing, collegiate, energetic lady-killer; and there are all the various shades of college men between these two extremes. Although Will Frost is dumb, his sister, Barbara, certainly is not. As far as James is concerned she is ideal, very attractive, and not very bashful about admitting it. The other characters are Molly Cluet-Archer, sister of our hero, filling the place of James' girl who has gone back on him; Wilda Petten, a likable, frivolous flapper, with more on her face (it is whispered) than on her mind; Alex Chandler, her escort,

who is not so fast with the fair sex; Herman, the incorrigible; and the chaperon, the mother of Alex Chandler. The chaperon is loquacious, cheerful, motherly, and broad-minded; she considers herself responsible for Alex's behavior.

Whiting and McCormack

It has been the policy of Tech Show in past years to make the annual production a musical comedy that is entirely unrelated with college affairs. This policy has prevailed since the good old days when "The Freshman," "Applied Mechanics," and "The Scientific King" were produced. So unconnected has the theme of the show been from college life that it has often been laid in foreign countries, such as the mythical Kookoostan of the 1924 Tech Show. Last year, however, the management insisted that the plot be laid here in America. The pendulum had begun to swing, the type of the show was changing back again to what it had been in the early nineteen hundreds. History repeats itself, so we have the 1926 Show, the twenty-eighth annual production, once again in the form of a show presenting the humorous side of undergraduate life. This

reversion of the type of the Show to something more intimately connected with our lives not only breaks the monotony of the men in their work. No longer is it business proposition, but the work has become a pleasure and a symbol of good-fellowship. A further impetus in the right direction has been the acquisition of George V. C. Lord as coach. Mr. Lord has been the coach of Pi Eta Show for the past fifteen years and in that interval has worked with many other undergraduate productions, such as the Hasty Pudding Show.

Financially the organization has once more resorted to old policies. Tech Show was first organized for the purpose of giving financial aid to the M. I. T. Athletic Association. But later it was placed on an entirely independent basis having no connection whatsoever with athletics. This year has seen the old plan again adopted with certain modifications. Although the Show is still a separate activity it has pledged a large share of the profits it may derive from this season to the Athletic Association in return for publicity and propaganda.

This year Tech Show took the longest trip it has ever taken. On February 1 the Show played in Hartford, Conn. From Hartford it journeyed to Pittsburgh, Pa., on

Molly and the Chorus Men

"I didn't know the party was starting so soon"

February 2, to Buffalo on February 3, and to Schenectady on February 4. The trip was a success from every standpoint. In every city the Tech Alumni Chapters sponsored the Show, and everything was done by them to make it a trip to be remembered. No larger houses have ever greeted the Show. Besides this, the men were well entertained; teas, dinners, and dances were planned for them by the alumni wherever they went.

Tech Show's future is always a matter for conjecture. Successful it is sure to be, but the ever recurring question of extension of its circuit of appearances to include a larger public looms as an important factor which must be considered secondary to the pressure of studies.

MUSICAL CLUBS

The Musical Clubs

THE Combined Musical Clubs of Technology opened their thirty-seventh year with a promising season of concerts and dances already scheduled. The student body showed great enthusiasm when it turned out in large numbers for the various clubs and management, so that only the best were retained in the personnel of the Combined Clubs.

A. R. Keith, '28
Trombone Soloist

The new leaders and their assistants were: of the Glee Club, Frank W. Schreiner, '26, leader, and E. V. Fasce, G, assistant; of the Banjo Club, Maurice L. Ash, Jr., '26, leader, and C. C. Hall, '26, assistant; of the Mandolin Club, Donald S. Cunningham, '26, leader, and Harold J. Ryan, '26, assistant; of the "Techtonians", Martin M. Fireman, '26, leader. Besides the leaders the clubs were very fortunate in having such men for coaches as Bill Weston for the Glee and Mandolin Clubs, Dave Grant for the Banjo Club, and "Doc" Eisenbourg for the "Techtonians". With these men as leaders and coaches there was a great improvement in the work of all the clubs, particularly in the "Techtonians", as "Doc" Eisenbourg

has proved to be a remarkable coach.

Besides the work of the various clubs, the concerts have been made much more interesting by the various specialty acts. An innovation among the specialty acts is the Glee Quartette which is composed of Frank Schreiner, E. V. Fasce, Frank Thas, and Frank Harris. This quartette has been received at all concerts with the greatest enthusiasm.

The winter trip was omitted, due to the fact that most of the men on the clubs did not care to give up their Christmas holidays. There seems to be difficulty in finding a time which is convenient to both the alumni in the various cities and to the members of the clubs. However, due to the fact that there was much more support

D. A. Shepard, '26 R. Mancha, '26
Banjo Duet

offered this year than last on the part of alumni in the various cities, it is very evident that the custom of having a winter trip will be resumed next year.

This year the clubs have been running on a schedule similar to that of last year, averaging almost a concert a week. First among these concerts was the one on November twelfth at Filene's. On the twenty-fourth, because of their success last year, the clubs again broadcast a concert through WBZ from Hotel Brunswick. The Edison Club concert and the six concerts at Gordon's Capitol theater were others given in November and December. The Christmas Concert, which this year took the place of the Fall and Winter Concerts, was a splendid success. It was held at Whitney Hall on December eighteenth, and was attended by one of the largest gatherings at any of the clubs' performances. The Old Belfry Club of Lexington were so pleased with the concert last year that they again renewed their invitation. A new type of function was held at Walker on January nineteenth in the form of a Pop Concert, much after the manner of those given by the Boston Symphony. While listening to the concert, the audience sat at tables about the hall, where they were served with refreshments. This proved so successful, that it is expected more will be given in the future.

Glee Quartette

The concert given in combination with the Dartmouth Clubs at Hotel Somerset on March twelfth was perhaps one of the best of the year. The clubs from both colleges were at their best, and the performers in the specialty acts outdid themselves. Besides these, concerts at Wellesley and other girls' schools, and at various Tech clubs, were given. The concert and dance at the Somerset to be held on Monday evening of Junior Week will be the closing event of a very successful season.

Debating Society

M. I. T. debating originated in the spring of 1923 largely as a result of the unfavorable attitude of the Speakers Club toward debating as one of its activities. This attitude provoked dissention among its members, some of whom, headed by Arthur Kallet, '24, accepted a challenge for a debate with Boston University. During the same season a debate was held with New York University at New York. The men composing the team for these debates were: A. M. Kallet, '24, George Neitlich, '24, and H. F. Ware, '25. A coach from the Boston Y. M. C. A. was engaged.

In the spring of 1924 these same men, acting independently of the Speakers Club, scheduled two debates, one with Syracuse University at Cambridge and one with New York University at New York. An instructor in the English and History Department was requested to aid in coaching. For the Syracuse debate one new man was added—T. E. Moodie, '24. After the Syracuse debate, debating at the Institute increased in importance. Preliminary tryouts for the New York University debate were held and Henry Shore, '24, W. C. Asbury, '25, A. M. Kallet, '24, and Natale Gada, '26, were selected. Kallett acted as captain and E. E. Piepho, '25, acted as manager. Mr. D. M. Fuller of the English and History Department donated his services as coach.

A general study in argumentation and debating was inaugurated primarily to enable the members of the team to get more thorough training but actually it has served better to discover new material than to train members.

In the fall of 1924 W. C. Asbury, '25, and A. H. Brown, '26, were elected captain and manager respectively. A dinner was given in Walker, and men from both the team and general study were present. Mr. Richard Hale of the law firm of Hale and Dorr was the speaker of the evening.

Manager Brown arranged a schedule of four debates: Maine University, Oregon Agricultural College, Dartmouth College, and Union University. The men participating in these debates were: W. C. Asbury, '25, S. W. Livingston, '28, J. C. Evans, '25, and J. W. W. Sullivan, G. F. A. Mesker, '27, became manager of the team after the resignation of Brown.

S. W. Livingston, '28, was elected captain, but on failing to return to the Institute Sullivan was appointed captain for the year 1925-26. For this season debates were arranged by Manager Mesker with Boston College, Tufts College, Middlebury College, and Lafayette College, for the varsity.

Freshman debating was organized in the fall of 1925. Solomon Horwitz and O. W. Pineo were appointed captain and manager respectively. Debates for the freshmen were arranged with Laconia High School and Brockton High School.

Interest in debating continued to increase so that by February, 1926, there were available four varsity and two freshman teams. Because of the augmented size of this activity the appropriateness of continuing the type of organization and management originally planned was carefully studied, and detailed suggestions for improvement were submitted by members. At this writing these suggestions are under consideration.

Class Day

THE Class Day functions of 1925 were held, as usual, in Walker Memorial. On June 15, the day set aside for these exercises, the hall was filled to its capacity with seniors and their friends.

W. W. Northrop, '25, Chairman of the Class Day Committee, gave a few words of welcome, followed by Professor E. F. Miller, '96, Head of the Mechanical Engineering

Department, who delivered the main address of the day. The theme of Professor Miller's talk dealt with the problems encountered by the student in his four years at the Institute, and upon the duties of the engineer to conserve and utilize the earth's resources in an efficient manner. Austin Cole, '25, related the class history which included startling information in regard to the number of survivors of the Class of '25. Barring transfers from other colleges, only 34 percent of the original class received the coveted sheepskin.

Following this historical narrative, a group of seniors presented a brief skit of a Technology classroom, which proved to be very amusing. Many of the famous old classroom scenes were re-enacted, which provoked much merriment among alumni as well as seniors.

G. L. Bateman, president of the class, presented to Dr. S. W. Stratton, Technology's president, the Endowment Fund of the Class of 1925. This fund is the gift of the class to the Institute and is similar to the funds presented by the two preceding classes. Each senior desiring to do so takes out a policy of \$250 which at the end of twenty-five years will revert to the Institute. President Stratton expressed his appreciation and thanks for the gift, and reminded the class that its connection with Technology was in reality just beginning. He further impressed upon the graduates that they must be prepared to go out and work hard for the next twenty-five years, for in that time, he said, they must accomplish all the real work that they will ever have to do. After that, he continued, they would be in the administrative end of business and merely would have to use the knowledge gained from their experience.

In closing the exercises, O. B. Denison, '11, secretary of the Alumni Association, led the audience in singing the Stein Song.

The Senior Class Picnic

A GAIN Pemberton was the scene of the wholesome merriment and ingenious sporting events which only a group of Technology seniors can bring to it. Saturday, June 13, was the day chosen by the Class of 1925 for their last unified outburst of that frivolity which had been storing up in them during four years of constant application at things mechanical and withal depressing.

After a car ride made in close formation to Rowe's Wharf, about 250 seniors boarded the boat for Nantasket. As it happened, several other parties were on their way to Pemberton for similar purposes. One other party in particular had a goodly number of young women in it, and this made the trip a bit more vivacious than it would otherwise have been.

Immediately on arriving at Pemberton, the festivities began. The field events came first, and among these were included such hair-raising contests as the horse and rider, the sack race, the rooster fight and the three-legged race. Particularly appropriate prizes were given to the winners of each event. The winners of the three-legged race, for instance, were given a can of two-in-one shoe polish because of their marked "two-in-one" ability.

The next event was an obstacle race which consisted of climbing a stone wall, going through a barrel and a sack, and finishing with a 50-yard dash. The winner of this event received a liar's certificate which gave him free license to lie and cheat to his heart's content.

During the next half hour, hardly a sound was heard from the two hundred and fifty men while they were engaged in eating at the Pemberton Hotel. After the repast, prizes were awarded winners of the six-day bike race, and each man on the winning lock step team was given a piece of sandpaper.

The concluding events of the day were held at the pool and turned out to be aquatic obstacle races. Teams of four men each competed. The first man had to swim in a bag, the second adorned in silk stockings, the third with a lighted cigarette, and the fourth with a parasol. The members of the winning team in this event were given leaping frogs.

As the end of the day drew near and the tired but happy seniors re-embarked for Boston, another chapter in the lives of men of the class of 1925 was closed, but in closing it left in the minds of every one present memories which will never fade beyond recall.

Senior Week Social Events

THE BANQUET

WALKER MEMORIAL was the scene of the opening event of Senior Week. There, on the evening of June 11, the seniors held their annual banquet. Professor Schell, Dean Talbot, and Dr. Rowe were the speakers for the occasion and each imparted some message of value to those about to graduate. Professor Schell suggested patience and persistence in meeting the problems they were soon to face; Dean Talbot congratulated the seniors on behalf of the Faculty and the President, and advised against periodical discouragements which seem to occur to the average man about this time; Dr. Rowe urged every man to keep in close touch with his Alma Mater.

During the banquet, permanent class officers were chosen. G. L. Bateman was elected permanent President, and C. R. Muhlenberg was elected Secretary-Treasurer. In closing, several of the seniors rendered original and classical vocal numbers.

THE POPS

The following night was "Technology Night" at the Pops Concert. A feature of the concert was the presentation of the Alumni Banner to G. L. Bateman, President of the Senior Class. Tech songs and cheers were given during intermissions, and refreshments were served.

TEA DANCE

On Monday afternoon after the Class Day Exercises, about one hundred and fifty couples attended the Senior Tea Dance. An unusually good orchestra furnished the music as was shown by the numerous calls for encores. Attractive decorations added much to the setting and helped to make this function a success.

CLASS REUNIONS

Over 2000 Alumni representing thirty-four classes held reunions during Senior Week on the occasion of the 1925 All-Technology Reunion. A big Jambouree Dinner in Mechanics Hall, a Harbor Outing and trip to Fort Warren, and the traditional "Technology Night" at the Pops Concert were the main features of the get-together. During their visit, the Alumni were given a chance to see the New Technology in action.

THE PROM

On the evening following Graduation Exercises, the Senior Prom took place in Walker Memorial, where, amidst gorgeous decorations and to the tune of delightful music, the seniors danced their way into the ever-increasing ranks of the Alumni. The Prom fittingly marked the end of their college days and the beginning of their real life's work.

Commencement

DU PONT COURT was chosen for the Graduation Exercises. A temporary platform and hundreds of chairs had been set up there, and all around the Great Court fluttered the colors of the different classes. Forming in Eastman Court, the seniors, attired in cap and gown, paraded to Du Pont Court and grouped themselves before the platform. A great many parents, friends and alumni were present, seated just behind the seniors. Altogether the graduation of the Class of 1925 was an imposing spectacle.

Dr. Stratton made the opening address, and was followed by Dr. George A. Gordon of the Old South Church who gave the invocation. Charles A. Coffin, prominent New York financier and formerly president of the General Electric Company, delivered the graduating address. Major General A. W. Brewster, Commander of the First Corps Area, spoke to the seniors enrolled in the R. O. T. C.

Following the addresses, Dr. Stratton personally awarded diplomas to those who graduated, and Major General Brewster presented commissions to the members of the R. O. T. C. A great many of those receiving degrees were not four-year students at the Institute, but were transfers from other colleges who had completed their course at Technology. It is rather interesting to note that the number of men in the graduating class who have not entered as freshmen but have come to the Institute from other schools is increasing every year.

After the conclusion of the Graduation exercises, a reception was held for the Seniors in Walker Memorial and many of the prominent officials at Technology were on hand to meet the graduates.

JUNIOR WEEK

Junior Week, 1925

THERE is no event in Technology's life which is more anticipated, planned for, and enjoyed than the traditional Junior Week.

The TECHNIQUE Rush opened the festivities on Saturday afternoon. The great court had suddenly been transformed into a gayly colored panorama which, upon closer inspection, proved to be the multitude of girls in their "newest of new frocks." These Prom Girls seemed to be everywhere during the next few days, and the men by their sides had none of the characteristics of the student. A new spring suit had taken the place of the old one, and the man himself had a broad smile on his face instead of the habitual technical frown.

After elections to the new TECHNIQUE Board had been announced, the first paddle appeared in the form of a balloon which floated across the court and finally exploded, releasing its prize. During the next twenty minutes there followed a desperate struggle to obtain the other nineteen paddles which issued forth in rapid succession from the TECHNIQUE hut. To complete the afternoon's entertainment the Corporation gave its annual Tea Dance in Walker Memorial. Vying for attention with the dance was the baseball game between the Beavers and Northeastern University on Tech Field. Several of the fraternities gave dances that evening as part of their house party programs.

Sunday was set forth as a day of rest, but few availed themselves of this opportunity. The cold rainy weather on Monday prevented many from seeing a very interesting Inter-class Track Meet, which the juniors won, the sophomores coming second. George Leness stood forth as the best performer of the day, winning both the 440 and 880-yard runs for his class. The interfraternity relay race was won by Kappa Sigma.

The weather, however, did not seem to prevent a large number from attending the Activity Tea Dance after the meet. This event was first put on the Junior Week program last year to give the activity men a chance to get together socially. The Musical Clubs concert and dance given at the Hotel Somerset that evening was thoroughly enjoyed. The program was well chosen, and included as a feature the singing of both the "Stein Song," and "The Courts of M. I. T.," this year's prize song in the four-year competition for a new Alma Mater hymn.

At the Opera House, Tech Show, "The Duchess of Broadway," played to an enthusiastic audience during three nights and was as well received as it had been in New York earlier in the season. The last day of Junior Week was an eventful one. An interfraternity tea dance was given in the Copley Plaza during the afternoon, from which a large number of the couples went to the Tech Show performance in the evening. The Junior Prom, which immediately followed the show, served as a fitting climax to a perfect week of revelry. Four hundred couples danced at the Copley Plaza well into the small hours of the morning to the accompaniment of syncopated rhythm.

The next day, all was over. The Prom Girl left, taking with her the atmosphere of gaiety and pomp, and Technology again resumed its reports and E. E. E. quizzes.

The All-Technology Smoker

THE seventh All-Technology Smoker held on October 9th marked the formal opening of extra curricula activities at the Institute. The freshmen were guests at a banquet in the Main Hall of Walker Memorial early in the evening. As the main purpose of this social function is to acquaint entering men with the activities at Technology, speeches were given after the dinner by Dr. A. W. Rowe, '01, H. D. Peck, '13, and Prof. R. E. Rogers, each speaking about his favorite activities.

The men were then given an opportunity to acquaint themselves with the activities in the building and to sign up for their choice.

Beginning at eight o'clock, various forms of entertainment were conducted, not only for the frosh, but also for the upperclassmen. A boxing exhibition by two New England professionals claimed the attention of the crowd in the gymnasium. But as knock-outs were not in order that evening, the Main Hall again became the center of attraction. After the music and a moving picture comedy had opened the program, President Stratton gave an address of welcome to the Class of 1929. The traditional presentation of the key to Walker Memorial was then made by Dr. S. C. Prescott, representing the Alumni Association, to D. A. Shepard, '26, president of the senior class.

O. B. Denison, '11, Executive Secretary of the Alumni Association, rendered some of his popular songs to the never-ending applause of his audience. The entertainment closed with a vaudeville skit and the drawing of winning raffle tickets. The *TECHNIQUE* cup was awarded to G. J. Leness, '26, high point man in track for the year 1925.

The smoker, one of the most successful ever held, was closed in a fitting fashion by the singing of the Stein Song.

DORMITORIES

The Dormitories

DORMITORIES at Technology are far from being mere places of abode where students spend their entire time grinding at their books. Lasting friendships are made there through contact with so many men, while social and athletic activities help to make dormitory life a pleasant one.

This year has seen few changes in the physical appearance of the dormitories.

However, a dining-room called the "Owl's Nest," has been instituted to provide food for the burners of the midnight oil. As these men are numerous in any technical gathering, the "Owl's Nest" has become a valuable addition to the Dorms.

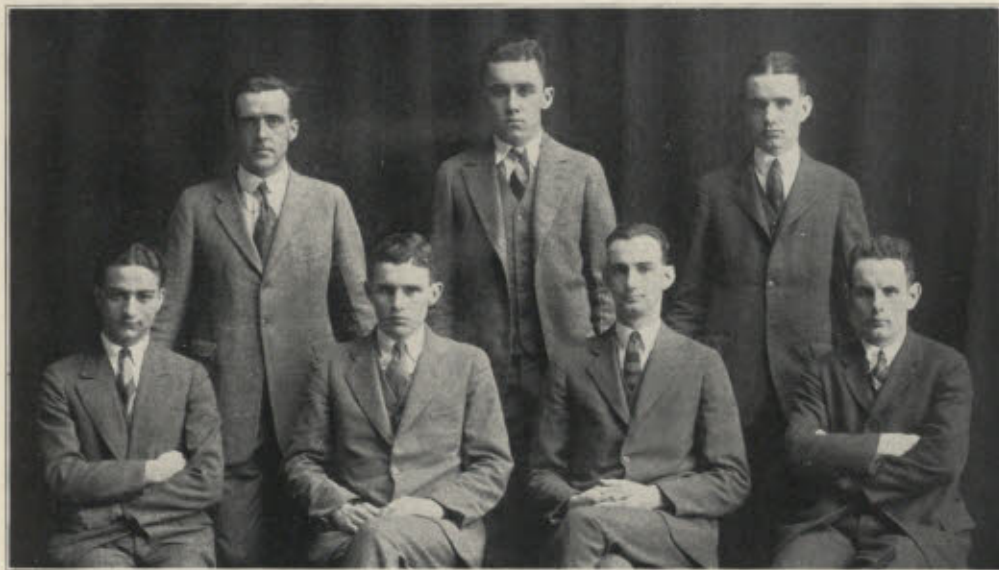

The social program of the year was opened when the third annual Dormitory Smoker was held on November 20, 1925, at Carr Fastener's. The smoker was featured by the lavish professional entertainment which had been arranged. This smoker enables everyone to get acquainted and unites the men in preparation for the social schedule which follows. The Dorm Dances, which have now become traditional, were held at regular intervals throughout the year. The efforts of the social committee to make these dances successful was rewarded by the enthusiasm and appreciation of both dorm men and other students as well.

Inter-dormitory athletics thrived this year as never before. This is the first year that '93 Dorm has been able to claim equal standing with the others for it has passed its days of infancy and is now a "full grown" dormitory. '93 proceeded to prove this fact by defeating all others with the exception of Runkle in the baseball championship last year and by winning the basketball league title this winter. Although baseball and basketball are perhaps the two most important sports in the dormitories, competitions were held in tennis, handball, and "sandlot" football.

Much excitement occurred this year at the mysterious actions of the "Dorm Goblin." This unseen and unheard force has shown evidence of its presence by disposing of articles in and about the dormitories. For example a Ford car which had been parked in a place not provided for that purpose was promptly taken away by the Goblin and was found later in the basement of the '93 Dorm. Again the '93 Dorm was looked upon in disfavor by this ghostly personage when a telephone disappeared from its booth one evening. As a consequence all questionable and unexplainable deeds have been blamed on the Goblin.

Dormitory life is certainly not a monotonous one. Events of all kinds, trivial as well as important, occur throughout the year which are the spice of life to the Dorm man.

The Freshman Review

THE Freshman Review is held every year in May as the closing event of the season for the Freshman Army.

On the date preceding the Review, Colonel E. F. Miller, head of the Mechanical Engineering Department, presented the battalion with a new National Flag in behalf of the Technology Chapter of the Reserve Officers' Association. At this ceremony Cadet Major Richard M. Wick and Cadet Lieutenant Bruce T. Humphreville were the student officers in charge.

On the following day, the battalion was reviewed by Major General Andre Brewster, Commanding Officer of the First Corps Area, accompanied by Dr. Stratton. The Field Artillery unit at Harvard University supplied the field pieces used to fire the salute, while the Coast Defenses of Boston furnished the band. Cadet Major Robert N. Oakley acted as Battalion Commander and Cadet Lieutenant Edward W. Dingley as Battalion Adjutant.

As is customary at the Review, an individual competition in the rudiments of "the school of the soldier" was conducted among those who had previously qualified in the preliminary event. The number of men soon dwindled to a mere handful as the drill movements became more complicated. Three men were picked finally as the winners and were presented with medals at the Review. R. W. Holmes obtained first prize, followed by David Olken and R. C. Merce.

The freshmen who, a few months before, knew nothing of military drill, showed by the quality of their performance that the efforts of officers and sergeants of the Military Science Department had not been in vain. They aroused much favorable comment by demonstrating that a few months of drill, held three hours a week, had changed them from the greenest of rookies to drilled and disciplined privates.

Firing the Salute

The Tech-Technique Game

THE TECHNIQUE Board and Staff consider it a duty to defeat the *Tech* every year in a football game. No season of this popular sport would ever be complete without the *Tech-TECHNIQUE* game when these two publications, in a spirit of service and self-sacrifice, afford to football enthusiasts at Technology a chance to witness a game as it should theoretically be played. The knowledge and physical strength gained during the three days of practice preliminary to the contest enable the two teams to display an intricate brand of football seldom surpassed in either amateur or professional play.

Strange as it may seem, the *Tech* never is able to obtain a victory although it fights till the last TECHNIQUE touchdown has been made.

Below is the overconfident challenge of the *Tech* and TECHNIQUE's noble reply.

To the Parvenus of the Upraised Snouts:

Ye that suffer delusions of grandeur, that revel in the swifit of your sycophantic conceit, that surge with inferiority complexes, turn ye from your self-adulation and hearken to this cosmic growl that even now forbodes your ultimate state to be the excrecence of worms.

In order that our victorious legions may regale themselves in festive repast at the expense of your decrepit exchequer we challenge, nay, we defy, your phthiriasic amphisboena to meet the journalistis thanatophobia that is so deadly to high-hat bibliophiles. In order to remove your stench and those mordacious ophidians that prevent this fair place from being Utopia we intend to squash you into our format, to riddle you with eight point type, to enslave you in our galleys, to bury you in the bubulin of your own pygmean selves.

So offer up your prayers to Belial and anoint your heads with putrid ink for the impregnable, hypermetropic phalanx of gridiron masters within our realm are straining at their leash. The cachinations of our hosts ring in the corridors as we think of mangling your torpid anatomies, as we think how closely you approximate the prehensile rump and bicaudal uropygium of a braying burro.

Arrange with your undertaker, your banker, and your devil,—the eleven tongued *Tech* typhoon is soon to envelop you in a holocaust.

(Signed)

T. W. OWEN, '26

General Manager, *The Tech*.

To the Mis-managing Board of the tech:

May megrims and hypochondriasis, dismals and doldrums, prostration and toedium vitae wherret and pother your lickerish percipience; may cachexy, morbidosity, septicity, murrain, plague, pestilence and peccant humour undermine and destroy your deleterious, malefic, and irremediable paucity; may your dowdy, draggletailed, stercoraceous hog-wash fester in the impetiginous lees of Lethe; may iniquination and canker swale your maggoty brains; may calenture expunge you from all men's sight—ye have defied the Gods!

Now, leprous ones, gather your inefficacious minions and meet us, your egregious masters, on Tech Field the 18th of November, at three o'clock in the afternoon in order that we may subduct your mildewed, mucid and reasty blatherings from the immaculate minds of the men of Tech. Mundify and deodorize your excrementitious bodies in order that the stench of your destruction may be mitigated somewhat.

Slammerkins and mudlarks, malkins, dustmen, and sweeps, your scurfy vainglory and arrogance is about to meet its dedecorous, opprobrious end. Your knell is sounded; the graves are dug. Aroynt thee!

THE CHARGE OF THE TECHNIQUE BRIGADE

YET once more we gaineth victory, and once more we come to lament the inevitable fate of those dejected babblers, the tech newsboys. We come to bury these scribblers, not to praise them. Let it suffice to say that on the 18th of November in '25—hardly a newsboy is now alive who played on that famous day and year, when TECHNIQUE dealt its blow severe. We came, we scored, we conquered.

THE annual summer camp of the Civil Engineering Department began its session at Camp Technology, near East Machias, Washington County, Maine, on August 19, 1925, with ninety-one men present. That section of Maine surrounding the camp then underwent its annual survey.

Athletics were popular from the start, particularly baseball. Practice was started almost the first day, and a team was developed which defeated East Machias, Machias, and Lubec, the rivals from neighboring towns. A team composed of the instructors also made a good showing by defeating the camp team early in the season and then tying it in a game near the close of camp. Interest in swimming was increased by the addition of a new diving float to which the old diving tower was attached. However, the weather was too cool during most of the time for any indulgence in this sport.

The Camp

Dances naturally were considered necessary functions of camp life. As the camp orchestra was unable to be ready in time for the first dance which was held in the drafting room on August 22, talent was imported from Lubec for the occasion. In spite of unfavorable conditions the dance was a success. The second dance was held on the afternoon of Labor Day, and the last on the week-end preceding the closing of camp.

The Camp Show made its annual appearance in the form of a minstrel. Several of the stars of last year's Tech Show helped to make this a success.

Something new was instituted this summer in the publication, three times a week, of the *Survey*, a periodical conveying first-hand information concerning the camp and the doings of its members.

Instructors

Labor Day witnessed the annual athletic contests and the Labor Day dance. The *Benchmark Rush*, an innovation this year, opened the festivities. Holders of the paddles, after all the "scrapping" was over, were all given free autographed copies of *Benchmark*, the camp's year book. The field events of the 100-yard dash, 660-yard run, and the broad jump which followed were won by K. A. Smith. The shot put was won by R. P. Price, who also took the honors in the 50-yard swim. When the figures were totaled up, it was found that Smith had won the cup by a five-point margin over Price. H. M. Fitzpatrick and H. T. Creedon were the runners-up. The water races and canoe tilting event were then run off, Westerhoff and Copeland winning the canoe race and Barracks B winning from Barracks H in the dory race. The spirit and fury of the dory race exceeded even the skill of the performers. The Labor Day dance, held in the gaily decorated drafting room, closed the day and proved to be a real treat to the crowd that filled the room to its capacity.

The camp closed September 18, after a farewell dance on the Saturday preceding this date had marked the "beginning of the end." Thus Summer Camp 1925 became a thing of the past, and that part of Maine once more became a peaceful stamping ground.

A MUCH improved camp met the eyes of our Technology miners on their arrival, July 28, 1925, at their summer camp at Dover, N. J., near the site of the Replogle Mine. A drafting room occupied the north end of the main building, which, due to lack of room, had served formerly as a dormitory. Three new bungalows had been constructed, and a guest house with two comfortable rooms stood waiting for any chance visitors.

After making plots of surface contours, the engineers had unfolded to them the mysteries of underground surveying. A course in Mining Practice by Professors Lock and Mann was made extremely interesting and profitable by numerous trips into the various mines in the Dover region. Mining Practice was followed by a short course in Field Geology given by Professor Jones, during which slate, cement, and coal regions of Pennsylvania were visited and studied.

It was difficult to indulge in organized sports, due possibly to the diverse interests of those in camp. A league called the "Pains" s truggled with another league known as the "Aches" for the baseball supremacy. The championship never was settled, for the scores of forty and fifty runs made by the teams in each game were rather trying even to the best of scorekeepers. Lake Hopatcong received several visits during the summer. The first, held on the first Saturday after arrival, was in reply to the invitation of a girls' camp to drop over and trip the light fantastic.

As a token of appreciation for the profitable and enjoyable time while at camp, the students presented a set of andirons to adorn the fireplace in the Recreation Room. The camp could not have been such a success without the guidance of Professor Eberhard and the coöperation of the Replogle Iron Mine.

ONCE more the Reserve Officers Training Corps afforded last summer an opportunity to Technology students to obtain a more intensive training in their chosen unit of the army. The camps are of five to six weeks duration, and are a required part of the military course given at Tech for those wishing to obtain Reserve Officers' commissions.

Six units, Coast Artillery, Aviation, Engineers, Signal Corps, Ordnance, and Chemical Warfare, are represented, all having separate camps scattered along the Eastern Coast of the country. The students are provided with free transportation to and from camp, are clothed and fed, and are given the pay of enlisted men in the Regular Service during their stay. Opportunity is afforded to learn the general principles of army tactics and those things pertaining to the branch of the service found at the particular camp.

The time, however, is not spent entirely at work, as the large number of students who attended last year can testify. Most of the camps are situated near the shore so that opportunity is found to visit the numerous ocean resorts. Then sports and games are indulged in, and two or three dances are given for the would-be officers.

Valuable experience is gained at these camps as well as pleasure and novelty, and lasting friendships are often created with men from other colleges.

TIMKEN

Time Tells

Since the days when worm gearing was new in America, Timken Axles have been demonstrating the superiority of worm drive. The perfect contour of Timken Worm Gearing, cut to the F. J. formula — plus exact assembly — has resulted in the very high mileage records and low upkeep universally found among users of Timken Axles. It is significant that it has never been necessary to change the fundamental design of the worm or worm wheel.

"Where Cleanliness Rules"

¶ Packing Food Products sanitation is essential, carefully prepared products positively protected against the absorption of any harmless or harmful materials results in cleanliness and purity, which are the chief factors of protection in maintaining the highest degree of quality in the various preparations which have been made possible only through skillful and intelligent handling and selection.

¶ In the preparation every precaution is used towards the end desired, but it is here that the Glass Container plays such an important part. Just before being filled it is given a hot washing which cleanses it thoroughly, the container being still hot when the preparations are put in it. After filling it is immediately sealed positively and the contents are then thoroughly protected against any contamination.

¶ The Glass Container fills a most important part in the Food Packing Industry and it is this type of container that the buying public realizes offers them the greatest insurance of quality and cleanliness.

As engineers you will be interested in these advertisers.

The illustration shows a large sack of Edison Portland Cement, labeled 'Edison PORTLAND CEMENT NEW VILLAGE, N.Y. Net Weight 94 Lbs', pouring a fine dust into a cityscape. The city is composed of numerous tall, detailed buildings, including a prominent cathedral-like structure with a tall spire. Below the city, a banner is held by two figures. The banner contains the text: 'FROM THIS BAG COMES THE MAGIC POWDER THAT MAKES THE ENDURING STONE OF WHICH CITIES ARE BUILT. THE LASTING ROAD OVER WHICH THE WORLD RIDES. IT IS THE MODERN MIRACLE OF DUST CHANGED TO SOLID ROCK BY THE BRAINS OF MAN...'

REMEMBER TO ASK US

When concrete problems arise, remember to ask the assistance of our engineers in solving them.

The vast fund of information which has been accumulated by the Portland Association during its twenty - four years of existence is offered you without cost or obligation.

Educational books and pamphlets fully illustrating and describing important uses of concrete await your request. One of these, "*Concrete Data for Engineers and Architects*," will help you now. Ask for your free copy.

Remember, the knowledge of concrete and its uses gained through years of research by the Portland Cement Association is at your disposal always.

TOOLS of QUALITY

It is almost universally true that among the manufacturers of any class of products, one company and one trade-mark stands pre-eminent.

In the field of screw cutting tools and the like, GTD holds this distinction.

The experience of more than fifty years of good tool making is behind every tool bearing the GTD trade-mark.

DANDRUFF?

A Challenge
We'll make a little wager with you that if
you try one tube of Listerine Tooth Paste,
you'll come back for more.
LARGE TUBE—25 CENTS

*Bottle Bacilli, the cause of
Dandruff. Illustration Re-
produced from Hazen's
"Diseases of the Skin,"
C. V. Mosby, Publisher.*

Dandruff is a disease difficult to
cure, but easy to check. Read below
about the best way to combat it.

Do something about it!

DANDRUFF is a danger signal. If
you have it you should do something
about it.

Perhaps you never knew it before,
but dandruff is a germ disease. It
spreads by infection from personal
contact, as with the common use of
combs and brushes. Children, for in-
stance, are never troubled with dan-
druff until actually infected by some
contact.

Dandruff is a disease difficult to
cure, but easy to check. It has a ten-
dency to reappear, unless properly
treated, and often brings with it the
possible loss of hair or actual baldness.

The ideal treatment to combat dan-
druff conditions is the systematic use
of Listerine, the safe antiseptic.

We have received hundreds of un-
solicited letters from Listerine users,
who are most enthusiastic in their

claims for what Listerine will do in
this way. If you are troubled with
dandruff you owe it to yourself to try it.

Using Listerine for dandruff is not
complicated. You simply douse it on
your scalp, full strength, and massage
thoroughly. The effect is antiseptic,
cleansing and healing. And you will be
amazed to see how this treatment, fol-
lowed systematically, combats dandruff.

Moreover, Listerine will not discolor
the hair nor will it stain fabrics.

Not only men but women have be-
come devoted users of Listerine for
this purpose — women, particularly,
since bobbed hair has been in vogue
and has made them more conscious of
dandruff if it happened to be present.

Try Listerine this way. Used sys-
tematically, the results are almost
miraculous! — *Lambert Pharmacal
Co., St. Louis, U. S. A.*

MAKERS OF POWDERS SINCE 1802

*The oldest du Pont
powder mill—
built in 1802.*

Leadership

Leadership is measured by service.

For nearly a century and a quarter, the du Pont name has signified leadership in explosive manufacture on this continent.

Paralleling the rapid growth of American industry, du Pont has developed explosives to meet new needs and solve new problems that industry might be served.

Thus it has been the privilege of du Pont to contribute a share in the industrial expansion of the Republic.

A Notable Community

The modern conception of the "city plan" is shaping the growth—in orderly beauty and true purpose—of Kohler Village, where Kohler renowned plumbing ware and private electric plants are made

WHEN little children brush their teeth or scrub their faces shining pink, they are, unawares, living their lessons—those wordless lessons in the wholesome joy of cleanliness. A bathroom with beautiful fixtures of Kohler Ware is a *schoolroom*. . . . If you should need a more worthy bathroom, or an additional one, you will want to see those fine and graceful fixtures which bear the name "Kohler" faintly fused in immaculately white enamel. They cost no more. Write for Booklet E.

The Massachusetts Institute of Technology

CAMBRIDGE

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY offers Courses, each of four years' duration, in Civil, Mechanical, Electrical and Aeronautical Engineering; Naval Architecture and Marine Engineering; Mining Engineering and Metallurgy and Geology; Architecture and Architectural Engineering; Chemistry, Chemical Engineering and Electro-chemical Engineering; Biology and Public Health and Sanitary and Municipal Engineering; Mathematics, Physics, General Science and General Engineering; and in Engineering Administration. These Courses lead to the degree of Bachelor of Science.

To be admitted to the first year class, applicants must have attained the age of seventeen years, and must satisfactorily fulfill entrance requirements in Algebra, Plane and Solid Geometry, Trigonometry, Physics, Chemistry, English, History and French or German and two units of elective subjects. Examinations are required in all subjects except Chemistry, History and the electives, the requirements for which are fulfilled by the presentation of satisfactory certificates. A division of these entrance subjects between different examination periods is permitted.

Entrance examinations are held at the Institute in September. In June, applicants will be examined by the College Entrance Examination Board in Boston, New York, Philadelphia, Chicago and many other cities in America and Europe. A circular stating times and places is issued in advance by the College Board.

Graduates of colleges and scientific schools of collegiate grade, and in general all applicants presenting satisfactory certificates showing work done at another college corresponding to at least one year's work at the Institute, are admitted, without examination, to such advanced standing as is warranted by their previous training.

Graduate courses leading to the degrees of Master of Science, Master in Architecture, Doctor of Philosophy, Doctor of Science and Doctor of Public Health are also offered. Special Research Laboratories of Physical Chemistry, Organic Chemistry, Applied Chemistry and Science have been established.

Correspondence should be addressed to the Institute of Technology.

PUBLICATIONS

Catalogue; Bulletins of General Information, Summer Session, and Graduate Study and Research; and the Report of the President and the Treasurer.

Any of the above named publications will be mailed free on application.

Marks of Quality

Embodied in the quality that is built into each product of the Bausch & Lomb Optical Company, is the accumulated wisdom of more than seventy years of scientific and productive experience in the manufacture of

Optical merchandise. The medallion at the left symbolizes the spirit which has actuated the organization during this long period of constant growth; and the trade-mark at the right is the stamp of approval which the Company places upon its finished products—the standard by which optical goods are judged in America. In the actual manufacture we enjoy the advantage of producing practically all parts, mechanical as well as optical, in our own works. We are thus enabled not only to assure the effective cooperation of the different parts, but to give all of our optical instruments and accessories the unqualified guarantee which our name conveys.

An Organization of Opportunity

NORTON COMPANY was founded in 1885 to manufacture Grinding Wheels. The main plant at Worcester has grown from one small two-story building erected in 1886 to a plant of many buildings, containing one and a half million square feet or 34 acres of manufacturing floor space. Besides Grinding Wheels, there are also manufactured a complete line of production-precision Grinding Machines, Laboratory Ware, Refractories, and Norton Floors (non-slip tiles and treads). There are now two Norton Company electric furnace plants—one at Niagara Falls, N. Y., and one at Chippawa, Ontario, Canada—which furnish the Norton abrasives trademarked "Alundum" and "Crystolon." There are also branch Norton factories for the manufacture of grinding wheels at Hamilton, Ontario, Canada; La Courneuve, France; Wesseling, Germany; and a plant for the production of the raw material Bauxite at Bauxite, Arkansas. Branch offices or stores are maintained at New York, Chicago, Detroit, Philadelphia and Pittsburgh, and agency stocks and special service facilities are available in all industrial centers.

With its world wide organization and its wide diversity of products, Norton Company offers an opportunity for all kinds of engineers—in research work, in factory production and in sales work.

THE COOP

This is the M. I. T. man's store. Here you got your Freshman outfit and here you get your thesis paper and cap and gown for Senior week.

It takes fifteen people to serve you thru the entire year, eleven in the Store and four in the Barber Shop.

This is the place that can supply you with pictures, jewelry and souvenirs that will have a permanent value to you after you have left Tech to take your place in the world.

THE development of Modern Banking Methods has been followed by an increasing reliance of the Educational Institution upon its Depositories.

The Service an institution requires, and receives, from banks comprises much more than the safe-guarding of its securities—for this Service further gives a Source of Reliable Information and Advice regarding Credit, Investments, Dividends, and the Transfer of Securities and Real Estate.

One of the Depositories of the Massachusetts Institute of Technology herewith extends its Compliments to the 1926 Technique

The Sign of Careful Workmanship

FOR nearly one hundred years the Andover Press has been serving the printing buyers of New England with the product of its careful workmanship.

Books, catalogs, folders and small printed pieces numbering into the millions have come from its presses.

Today, it places at your service a modern equipment and a corps of highly trained workmen who have made their product known by their ability to produce something "a little bit better."
